here illustrate these points. The one at the top of the illustration is a wide white straw trimmed with roses and Alice blue ribbon. The one shown below is of lace straw and trimmed with wheat heads.

Cleaning White Clothes.

For cleaning white clothes of any kind, especially white wool, use the common block magnesia. Lay garment on table and rub magnesia into it thoroughly; roll up and lay away for a few days. Then shake out and brush with clean brush. It will look like new and save many a dry cleaner's bill.

Now that the season of white clothes is here it is quite necessary to know how to clean these garments at home.

The new Light of Asia is that dove of peace hovering over Japan and China, with the rest of the world at war or talking war.

Fighting in defense of honor may only be a descent to the level of the slugger and end in loss of the fight and honor too.

While the big noise autos are signaling danger ahead they scare people around them half to death.

Headlines on attempts to assassinate "the president of Mexico" should state which one.

PERJURY IN COURT.

It Is Quite Common and the Rules of Evidence Favor It.

It is a conservative averment that in two-thirds of the cases tried in court there is positive contradiction of facts. There are few arguments made by advocates in which bias and prevarication on the part of witnesses are not charged. Deplorably immoral as well as farcical is some of the evidence adduced in many cases where experts are used on both sides to support diametrically opposed propositions.

Any judge or practicing attorney knows that seldom does a party to a suit testify against his own interests in the decisive matters affecting the rights involved. Although perjury may not necessarily and invariably be predicated on these facts, yet they must lead to the conclusion of sworn misstatements in a large proportion of cases, especially when we recall that the oath of the witness requires him not only to tell the truth and nothing but the truth, but all the truth.

In this connection it is interesting to remember that the rules of evidence at present and for centuries in the past, enforced in our courts and English courts, not only tend in spite of the plain context of the oath to prevent the telling of all, but permit a witness rather to conceal much that has some bearing in truth upon the matter at issue.

We are forced to recognize, then, that perjury prevails as a common and crying evil.—Charles J. Martell in Case and Comment.

Hedgehog Fish.

The hedgehog fish is a strange creature. It has a body covered with long thin spines. When in danger it follows the custom of the ordinary hedgehog to a certain extent, but in addition it puts its nose out of the water and swallows such a quantity of air that its body is blown out into the shape of a football, with sharply pointed spines bristling in every direction. This maneuver upsets its balance. Still it floats contentedly along on its back, quite safe against the attacks of its opponents, who are kept at bay by impenetrable armor.

PRACTICAL HEALTH HINT.

To Relieve Colic.

Fennel water is an agreeable carminative in flatulence and colic. It relieves mild attacks of indigestion. Fifteen drops of fennel water (buy it from the druggist) in a little hot water every fifteen minutes until six doses are taken is the proper dosage for an adult. It may be taken in half teaspoonful doses in hot water three times a day between meals for two or three days if there is a great deal of intestinal rumbling and discomfort. Fennel does not cure any form of disease. It is a remedy for the temporary relief of pain or colic in digestive tract.

Directions For Making Corner of a Table Spread.

Embroidery.—Most of the leaves are outlined in buttonhole stitch, others have one side worked in buttonhole stitch and the other side in chain, snail trail or stem stitches. The veins, scrolls and stems are done in stem stitch and the fillings of the leaves in honeycomb, herringbone, braid or buttonhole stitch, the latter in one or two rows. Work the small leaves on the scrolls and stems in satin, buttonhole or herringbone stitch and turnovers in buttonhole stitch. The flowers are treated in the same way as the large leaves and their sepals worked in satin stitch.

Drawnwork.—For the band of drawnwork leave one and three-quarters inches of linen and draw out threads

TABLECLOTH MADE OF HANDWORK.

for half an inch all round, turn down the material round three sides for a hem and hemstitch the four sides.

The simple drawn thread pattern can be clearly seen in the illustration, also the little darned four leaved shamrock at each corner.

Abbreviations.—Ch., chain; d.c., double crochet; tr., treble. Crochet cotton No. 30 is used for the lace.

Crochet Lace.—8 ch., 1 tr. into sixth ch. and 5 tr. into next 2, turn with 5 ch., * 1 tr. into second tr., 2 ch., 1 tr. into fourth tr., 2 ch. and 1 tr. into sixth tr., 5 ch., 6 tr. under 5 ch., 5 ch., turn and repeat from * until four points are worked along one side and 3 points and 6 tr. on the other, then work 12 ch., 1 d.c. back into the sixth (forming a loop), 10 ch., 1 d.c. back into first point at the right, 12 tr. (3 ch. for first), under loop of 10 ch., 1 d.c. into loop at end, * * turn with 10 ch., 1 tr. into seventh tr. on first arm, 2 ch. and 1 tr. in next tr. to the end (making 5 tr.), turn with 2 ch., 1 d.c. in next point, 2 ch., 1 d.c. in first loop (of 2 ch.), * * * 5 ch., 1 d.c. in next, repeat from * * * twice, then 2 ch., 12 tr. under arm, as before, and 1 d.c. in loop, repeat from * * making 6 arms, then 6 d.c. under 6 ch. and finish point as usual. In the second and succeeding scallops catch the first picot (of 5 ch.) to the last on preceding one, also when making the fifth foundation point after a scallop in turning catch to middle of sixth arm.

Footing, First Row.—2 tr., 3 ch. and 2 tr. in each point and 3 ch. between points. At a corner over a scallop work 3 ch., 2 tr. in 2 points together, 3 ch., 2 tr. in next 2 points together, 3 ch., and work as before corner.

Second Row.—3 tr. in 3 ch. loop between 4 tr., 1 ch., 1 tr. under 3 ch. between points, 1 ch. At a corner after 3 tr. between 4 tr. work 1 ch., 1 tr. under next 3 ch. loop, 1 tr. under next loop, 1 tr. under next, 1 ch., 3 tr., between next 4 tr. and work as before.

Third Row.—1 quadruple tr. (cotton 4 times over hook) in first tr. of 3, cotton over and through 2 stitches twice, * cotton over, hook in next tr., cotton over, draw through, cotton over, draw through 2 stitches, repeat from * once then work off all stitches in twos, 2 tr. in top of grouped tr. below (just made), 2 ch. and repeat. At a corner omit the 2 ch. between groups.

BRIDE WEDS IN CAST.

Society Girl Won't Let Operation In Hospital Postpone Wedding.

Miss Sarah Penner George, daughter of Mr. and Mrs. John C. George, well known in Baltimore society, declined to have her marriage to Dr. T. Grier Miller of Philadelphia postponed, and the ceremony was performed at her bedside in a private hospital.

The bride recently underwent a serious operation and was encased in a plaster cast while the ceremony was performed.

Thrown Down.

Poet—Here is a poem entitled "Why Do I Live?" Editor—It is a mystery, isn't it?—New York Press.

CHERRY SEASON.

This Is the Time of Year When Fruit Is at Its Best.

MANY WAYS TO USE IT.

Desserts and Salads Can Be Made as Well as Frozen Dainties—Several Recipes For Use of Cherries Given Below.

Try a cherry dessert with rice for the children's dinner. Drop large cherries into a hot rich sirup until they are heated through. Have some boiled rice ready and pile the cherries on a nest of it on the platter, serving the whole with whipped cream. Garnish, if possible, with a few cherry leaves or two or three clusters of the dipped cherries to which the stems are still fixed.

Cherry Salad.

Select some firm, ripe bananas that are not too long. Loosen a strip of the skin, turn this back with a spoon carefully and remove the inside in small pieces. Allow half a cup of the banana to each cup of cherries. To make the dressing, take the juice from the cherries and mix with lemon and orange juices to taste, sweetening with pulverized sugar as necessary. Pour this over the salad and put the mixture on the ice. Just before serving stir the ingredients together lightly, pack them into the banana cases and serve on individual plates garnished with cherry leaves and pitted cherries.

Cherry Betty.

Butter a deep baking dish and cover the bottom with a layer of stoned cherries. Sprinkle the fruit with sugar, nutmeg and cocoanut. Add sufficient cherry juice to moisten. On top of this spread a layer of breadcrumbs and continue in alternate layers of fruit and crumbs until the dish is full. See that the top layer is one of breadcrumbs. Cover and steam in the oven for one hour; then uncover and brown quickly. Serve hot with sweetened cream as a sauce.

Cherry Roll.

Sift together two cupfuls of flour, two teaspoonfuls of baking powder and a pinch of salt. Beat two eggs, add to them a cupful of milk and a rounding tablespoonful of melted butter. Mix with the dry ingredients to a light batter and stir in two cupfuls of pitted cherries. Turn into a well greased pudding mold having a tightly fitting lid and steam for two hours. Turn out, garnish with cherries and serve with hard sauce.

Cherries In Jelly Mold.

To one pint of juice drained from stewed cherries add sugar to make quite sweet and let it come to a boil. Dissolve a tablespoonful of granulated gelatin in cold water to cover, pour over it the boiling hot cherry juice and strain into a border mold. Set aside to become firm; then turn out carefully on a low glass dish, fill the center with pitted, sweetened cherries and heap over all whipped cream.

Cherry Shortcake.

Sift together two cupfuls of flour, a heaping teaspoonful of baking powder, two tablespoonfuls of sugar and a teaspoonful of salt. Rub in half a cupful of butter and mix with a well beaten egg added to a half cupful of milk. Make the dough soft, roll out about an inch thick and bake for about twenty-five minutes. When done split carefully, butter well and cover with half of the cherries, from which of course the stones have been removed. Sprinkle with sugar. Butter the top layer, cover the cherries, sprinkle with powdered sugar and serve with whipped cream. The cherries should be very ripe.

Cherry Toast.

Cook a pint of pitted cherries with a cupful of sugar until the fruit is tender. Have buttered slices of toast ready, pour this mixture over them and when cold serve with whipped cream.

Her First Book.

"Your novel will be bound in cloth, of course," announced the pompous publisher.

"Oh, how nice!" exclaimed the girlish author. "And may I select the cloth? I choose pink chiffon."—Exchange.

It is a mistaken notion, that The Evening Times job printing department is too busy to handle all classes of work. Just jot down the address, 66 E. 1st st., or telephone 45 for a representative.—Advt.

Community Notes

Mr. and Mrs. Wade E. Gayer are entertaining Mr. and Mrs. W. H. Gayer of Edbridge, N.Y.

* * *

The infant son of Mr. and Mrs. Lybolt died at the hospital of the Good Shepherd in Syracuse yesterday.

* * *

Miss Cora Morehouse is ill at the local hospital.

* * *

Miss Nellie Wybron has been entertained by Syracuse friends.

* * *

J. J. Jordan, general manager of the Electric Co., has been in Albany this week. He is expected home today or tomorrow.

* * *

Mrs. Frances Waugh of 4th st. is in Albany for the week.

* * *

Dr. and Mrs. Anderson of West Broadway are enjoying an auto trip to Winston, Mass.

* * *

Secretary Heydecker of the Chamber of Commerce is in New York city.

* * *

Miss Edna Roy of Highland st. entertained the graduating class of State st. school, Wednesday evening. A most enjoyable time was the result; music and some singing and afterwards dainty refreshments, were features of amusement.

* * *

Miss Clara Grigson of Spokane, Wash., is at the Grigson home in Hannibal st. for the summer.

* * *

Mr. and Mrs. Floyd Marvin have ben the guests of Oneida friends.

* * *

The Brotherhood class of the State St. Methodist church will hold an ice cream social on the adjoining lawns of C. E. Wilson and William Singleton, 408-412 East Broadway tomorrow night. The affair will begin at 7.30 o'clock.

* * *

Mr. and Mrs. A. Seymour of Cayuga st. are guests of Syracuse friends for a few days.

* * *

Mr. and Mrs. W. E. Gayer are entertaining friends from Elbridge.

* * *

The Division of Agriculture of the Chamber of Commerce will meet tonight at the headquarters at 8 o'clock. The members of the Fulton Produce Growers Association will be the guests of the division at the meeting and several speakers will be heard.

* * *

Mrs. F. M. Blanchard has been the guest of Fulton friends.

* * *

Miss Louise Leonard and Miss Eilzabeth White of Syracuse have been visiting Fulton friends.

* * *

After a short visit at the home of Mr. and Mrs. J. L. Jones, Miss Marguerite Zahn and Bernard Jones both of Syracuse, have returned to that city. The engagement of Miss Zahn and Mr. Jones was recently announced.

* * *

Ruth and Susan Kezar of S. 4th st. attended commencement of the Wolcott High school.

* * *

Miss Isabelle Diamond has returned from a short trip out of the city.

* * *

Miss Clara Bache, assistant to Secretary Heydecker of the Chamber of Commerce, injured a finger yesterday by priecing it with the sharp point of a file, and is unable to be at her post as a result.

WEATHER FORECAST

Moderate west winds tonight, becoming variable Friday; probably showers tonight and Friday; warmer.

Do Your Eyes Trouble You ?

ADMISSION 10c.

Achieving Manhood, Subject of Dr. King's Address to Grads

(Continued from Page One)

men attains notable success. But the figures also show that only one man out of every 10,000 men who did not go to college attains notable success, making the odds 40 to 1 in favor of the college man.

The fatal mistake of taking children out of school at an early age and putting them to work was deplored by Mr. King. He advised the parents to go without things, if necessary, in order to keep their children in school. The man who does not get an early education is not without hope, however, according to Mr. King. He told of the rise of two great ministers who had no opportunities in their youth but who applied themselves to study and hard work and finally won out.

In closing, Mr. King said, "And whatever your success may be, be satisfied! Do your best and then be satisfied with what doing your best brings!"

The program of the Commencement was not a long one. Rev. H. D. Holmes opened with an eloquent invocation and the high school orchestra rendered a selection. Miss Lillian P. Simons, in her Salutatory address, welcomed the friends and audience to the exercises and spoke of the anticipation of the pupils throughout their four years' work in school of the final day when they would receive their diplomas.

After another selection by the orchestra, Superintendent Fairgrives introduced Mr. King, saying he knew of no place or time when the spoken word could have greater effect.

After Mr. King's address, the orchestra rendered another selection and the prizes offered for proficiency in history by the Kayendatsyona Chapter, Daughters of the American Revolution, were presented by Mrs. F. E. Goodjon, who congratulated the pupils on their good work with a few well chosen words. The winnings pupils, each of whom received $2.50 in gold, were: Miss Mildred Sharp, of the Fourth St. school; Miss Evelyn Hopkins, of the Phillips St. school; Miss Harvia Wilson, of the State St. school, and Master Ivan Jones, of the Erie St. school.

The winners of the prize speaking contest were awarded the prizes by Superintendent Fairgrieve. The first prize winners were Miss Lillian P. Simons and Harold Caffrey. Miss Jessie B. Wilcox and Leland Carner won the second prizes.

After the valedictory of Harold Thompson, who spoke of the regret of the pupils at leaving their Alma Mater and thanked the teachers, friends and relatives for the interest shown and the help given them, A. T. Jennings, of the Board of Education, presented the diplomas.

The benediction by Rev. Mr. Holmes closed the evening.

Harold Thompson, the president of his class, first honor man, and valedictorian, as well as honor man in science and history, has established, during his four years of high school work an enviable record. Miss Lillian P. Simons, who won second honors, as well as the honors in English, has also proven herself a very bright and studious pupil. Both young people are to be congratulated upon their fine records in school work.

Bernard Reswick, the youngest member of the class, carried off the honors in mathematics. Margaret K. Clark won first honors in elocution and Howard Shaff won honorary mention.

This year the first graduate of the commercial course of the school received a high school commercial diploma. The young man so honored is Raymond Lewis. Harold Gillespie has been given credit by the Regents for work in manual training, another new departure in the local curriculm.

Following are the names of graduates who received diplomas:

Evadne F. Austin, Margaret K. Clark, Esther M. Freeman, Eliza Hubbard, Rose M. King, Isabel Merriam, Florence L. Moody, Eryma E. Paige, Lola B. Palmer, Amelia L. Rolfe, Kathleen M. Scanlon, Lillian P. Simons, Rose A. Walsh, Jessie B. Wilcox, Murial F. Winters, Harold F. Caffrey, Leland T. Carner, Matthew Frawley, Harold N. Gillespie, Earl D. Hopkins, Ramon F. Lewis, Harry J. Lynch, Marshall G. Penfield, Bernard S. Reswick, Leland Root, Albert L. Sanford, Harold Scholz, Howard Shaff, Andrew M. Sharp, Edward K. Sullivan, Harold Thompson.

THERE ARE MISTAKEN IDEAS ABOUT CHATAUQUA

Experience teaches that many people have a mistaken idea about the nature of the entertainments which will be given during the coming Chautauqua week. Some seem to think it is a revival, others a temperance meeting, and now and then some one will voice the guess that some of Billy Sunday's assistants are to put on a show for a week. The Chautauqua, however, is not any of these, but a combination of entertainments and lectures.

The lectures are not the conventional "dry old stuff," but are talks by some of the best known and most brilliant men of the day. Some of these men are humorists and will make you laugh. All of them will make you think. The musical productions represent the very highest and best which the country affords. Look over the Chautauqua advertising in the papers, the store windows and then read the souvenir program and you will be convinced that some wonderful musical things will be heard during the week. The Ben Greet Players will appear in "Much Ado About Nothing," the play which Shakespeare designed to drive dull care away for an evening at least.

The local guarantors of the Chautauqua have made it possible for us to see and hear lectures, artists and entertainers who could not be brought together in our town under any other circumstances.

BIG DAY PLANNED FOR M. E. SUNDAY SCHOOL

The First Methodist Episcopal Sunday school will hold its picnic tomorrow, Friday, on the fair grounds. It is to be a table picnic, at which all members of the Sunday school will sit down at about 12:15. Scholars should report to their teachers immediately on reaching the grounds and receive their tickets which will entitle them to a free ice cream cone. J. Harry Howe is chairman and with his sub-committees has arranged a fine program. A ball game for the younger boys is scheduled for 10:30 and in the afternoon a regular program will be followed which is as follows: 1:15, peanut scramble for the primaries; 1:30, potato race for boys, 10 to 14 years; 1:45, peanut race for girls over 15 years; 2:00, relay race between the Reds and the Blues, 10 men on a side; 2:15, contest for girls, 12 to 15 years; 2:30, mile at Scout pace; 3:00, game for girls under 12 years; 3:15 100 yard dash; 3:30, big ball game.

Suitable prizes will be offered and with the fine lunch and the "pink lemonade" a fine time is assured to young and old alike.

F. E. Goodjon will give frequent trips on the lake to those who are fond of boating.

You can get Black's baked products at the right hour for meals. They are at your grocer's, fresh every afternoon. adv.

ANTI-MORMON WAR IN STATE

Utah's Senator to Lead in Fight—First Attack Next Month

Mormons in eleven state and Christians everywhere will watch with increasing interest the opening up of an Anti-Mormon campaign in New York State. The start will be made here on July 28 when the Hon. Frank J. Cannon, the first United States Senator elected by Utah comes to address the Chautauqua.

Senator Cannon has just completed a cycle of fifty tremendously successful meetings conducted under the joint auspices of the National Reform Association, Pittsburgh, Pa., and the National Order of Anti-Mormon Crusaders, Pittsburgh, Pa. These organizations represent the Christian and the moral element in the Nation and their aggressive co-operation makes the coming of Senator Cannon a matter of National importance at this time. Back of Senator Cannon and these organizations is the organized Christian sentiment expressed at the great Second World's Christian Citizenship Conference held at Portland, Oregon, a few months ago when more than 25,000 Christians, representing fifteen nations, all the States of the Union and all denominations of Christendom directed the National Reform Association to lead in the war to be waged against the Mormons throughout the world.

Senator Cannon proposes to show the insidious character of the teaching of the Mormon church which, he says "conducts a system of plural marriages which has become such a part of the social and religious life of the Mordom Kingdom that the victims find themselves unable to either denounce the system or free themselves from the Mormon Heirarchs who hold them in eternal bondage in the name of a religion and under the threat of eternal damnation frankly promised by the Seer and Prophet of the Mormon Church who claims to speak for and with authority from Almighty God."

In a financial way the Mormon Kingdom controls millions of actual and active money. It fixes the price of both sugar and salt in every American home and exercises a baneful influence upon the copper market. The silver output of America is also dominated by the Mormon Church and at least four railroads pay strict attention to the wishes of Prophet Joseph F. Smith.

It is these and other equally vital issues that Senator Cannon comes here to discuss.

SEVENTEENTH ANNIVERSARY

Good old-fashioned dancing will be one of the attractions at tonight's celebration of the 17th anniversary of the C. R. and B. A., at the rooms in West Broadway. The dancing will begin at 9 o'clock, and at the conclusion of the entertainment refreshments will be served, in true C. R. style.

TITANIC CLAIMANTS MUST FIGHT SUIT

New York.—After many months' delay the suit of the Oceanic Steamship Company, operating the White Star Line, to limit its responsibility for the sinking of the Titanic to $97,972.12, was called yesterday before Judge Julius M. Mayer in the United States Court.

The company contends that the loss of the steamship on April 14, 1912, was not due to carelessness or neglect on their part, and that they shall be held responsible only for the amount of money received from passenger and freight fares. Survivors and estates of passengers who lost their lives have filed claims amounting to $18,000,000.

That the case will be bitterly contested, was evidenced by the statements of attorneys for the claimants and by Charles C. Burlingham, proctor in Admiralty for the line.

ROOSTER'S BACKWARD CROW REVERSES 'ECHO'

New York.—Jacob Newman, a clothing merchant of Tarrytown, owns two roosters. One of them crows naturally and the other crows backwards.

Yesterday two Englishmen were passing Newman's yard.

"Cock-a-doodle-do!" crowed one of roosters.

"Do-doodle-a-cock!" answered the other.

The strangers looked at each other surprised.

"Most remarkable country for echoes," said one, as he gazed intently at the surrounding hills. Then they moved along.

SARATOGA SPRINGS NOW A CITY

Saratoga, N. Y.—The village of Saratoga Springs, one of the oldest in the State, went out of existence at 9 a.m. Tuesday, and was succeeded by a commission form of city government. Practically an entirely new set of officers assumed control of the former town and village, which are now merged in the new city, the fifty-fifth in the state.

MISS LANG SAYS HALT WAR DEARTH

New York.—"Four-fifths of all the American people are in sympathy with our desire to prohibit the exportation of 'things that kill.' It is not the Germans only, but Irish and French and English, as well as native Americans."

This was the answer of Miss Elsa Lang, of the American Humanity League, to the charge that the league under whose name signatures are being collected was controlled by German interests. Miss Lang is the executive secretary of the league, and it is at her home, 316 Garfield Place, Brooklyn, that the stenographers are installed who do the work of handling 2,000,000 signatures.

Miss Lang says she is an American, though Mrs. R. P. Golde, head of the league, and Mrs. Ernest Richard, wife of Dr. Richard, who lectures on the History of German civilization at Columbia University, another member, have obviously German connections.

"We had a booth for two weeks at the Cosmopolitan Garden, at 32 West Twenty-third street," she said yesterday. "Four-fifths of the people passing through that street seemed glad to sign our petition. You cannot argue that they were all of German sympathies. They were the genuine peace-loving Americans, who do not think it is right for their country to grow rich at the cost of Europe's blood.

"One woman who signed our petition is an American girl married to a German. Her two sons were with the Kaiser's army. Not long ago she was to be the guest at a dinner party. When the appointed night came she was not present. We received a telegram instead, which said: 'Second son killed at front. American bullets did it.'

"Another signer was a French corsetiere. 'France,' she said, 'is bleeding to death for England. America is helping to prolong the war when she gives more bullets to England.'"

One million signatures have been received already, acording to Miss Lang, and when the day for counting comes, on July 1, she expects to have a total of two million to [illegible] President Wilson.

CENSUS SHOWS GAINS IN 12 UPSTATE CITIES

Albany, N. Y.—Incomplete census figures showing increases for twelve cities of the State were announced by Secretary of State Hugo as follows:

Batavia, 12,660; Corning, 17,700; Dunkirk, 17,816; Fulton, 11,263; Geneva, 12,801; Glens Falls, 18,583; Hudson, 12,047; Norwich, 9,625; Oneonta, 10,448; Rensselaer, 11,348; Rome, 21,622; Middletown, 17,844.

JUDGE DENIES SWEET A NEW TRIAL

An order by Justice Hubbs denying the motion for a new trial in the case of Frank Massaro vs. Nirk N. Sweet was filed in the county clerk's office yesterday. A verdict of $150 was returned in favor of the plaintiff at the May term at [illegible]

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

Albany, June 24.—In a communication to the president and members of the Constitutional convention, the New York County Lawyers' Association has set forth the proposed amendments which it favors and disapproves. The propositions which are dealt with naturally deal with judicial subjects.

The association disapproves of the proposal that the Constitution be amended so as to provide that hereafter the judges of the Court of Appeals and justices of the Supreme Court be appointed and not elected. It also disapproves of the proposition that the appointment of judges of the Court of Appeals and justices of the Supreme Court be made by the governor by and with the consent of the Senate; the proposal that judges of the Court of Appeals and justices of the Supreme Court may be removed by the governor upon the recommendation of both houses of the legislature; that appeals to the Court of Appeals in civil cases be permitted only upon allowance; that the power to allow an appeal to the Court of Appeals shall be vested in the Appellate Division or a judge thereof.

In all twenty-four proposed amendments are specified as reflecting the attitude of the association above mentioned either in favor of or against. The proposition that the judges of the Court of Appeals and the justices of the Supreme Court in joint convention, be vested with exclusive power to make rules of practice and procedure and that, upon promulgation of such rules, all provisions of the Code of Civil Procedure and other statutes relating to procedural matters be forwith repealed, is frowned upon. The conjunctive paragraph that each court have power to adopt such special rules applicable to its procedure as may not be in conflict with the rules thus enacted, is also disapproved.

Still another proposal rejected by the association is that which provides that the justices of the Appellate Division of the department or a majority of them shall be empowered from time to time to designate one or more of such masters or referees to hold trial terms of the Supreme Court within such department and to revoke such designation; and that a referee or master so designated shall have power to perform all the duties of a justice of the Supreme Court to which he may be assigned.

The proposal to eliminate from the present Constitution the provision that the salaries of judges shall not be increased during their terms of office, is still another proposition which is frowned upon.

The association, however, endorses twelve propositions. The most important of which include that which provides for the retention of the provisions of the present Constitution as to the trial of judges by impeachment, but that judgment in such cases should be by a majority vote; that which authorizes the Court of Appeals to designate the justices of the Supreme Court to serve as judges of the Court of Appeals; that which vests in the chief judge of the Court of Appeals the power to designate justices of the Supreme Court to serve in the Appellate Division.

Another important proposal which is approved by the association is that which authorizes the legislature to confer upon surrogates' courts general legal and equitable jurisdiction in the case of probate of wills and all matters properly incidental to the devolution of real and personal property upon the death of its owner. The association, however, disapproves of giving the legislature authority to transfer to the Supreme Court, in counties having a population of 600,000 or more, part of the functions and jurisdiction now exercised by the surrogates' court.

GARRISON TO PUBLISH PLAN FOR U. S. DEFENSE

Washington.—The War Department plans to secure the military preparedness of the country as formulated by Secretary of War Garrison at the instance of the War College and the General Army Staff, may be made public long before the next Congress meets.

Secretary Garrison said today that the plan had assumed complete shape pratically and that he was inclined to make it public, probably in the fall.

Katharine Ridgeway

THIS is Katharine Ridgeway, the great entertainer. She is one of the star attractions to appear at the Chautauqua here. She is said to rank at the very forefront of platform entertainers. Her manner is most pleasing; and every number abounds in thrills. She has established a reputation throughout the United States and has enjoyed a great number of return engagements. She is one of the most popular of readers and makes new friends wherever she goes.

HUGO WILL ATTEND MOTORCYCLISTS' RALLY

Secretary of State Francis M. Hugo has accepted the invitation extended by the motorcyclists, to be present at their mid-summer rally at Saratoga Springs, July 3, 4 and 5. This year's event will take the form of a motor peacec arnival, and it seems evident at this time from the number of entries rerceived for the tours, that the famous resort will witness the largest gathering of motor two-wheelers ever seen anywhere before.

Tours will be run from all sections of the eastern territory.

The western New York tour, taking in riders from Ohio, Western Pennsylvania, etc., will leave Buffalo on the morning of July 1st, at 8 o'clock, making Rochester the noon stop and then continuing to Syracuse where the tourists will remain for the night.

The secretary of state will witness this race, review the motor peace pageant in the afternoon, attend the championship races following and speak at the Fourth of July celebration at Convention Hall in the evening.

SUFFRAGISTS GIVE THEIR OBJECTION AT CONVENTION

Albany, June 25.—Suffragsists cast as self-chosen Constitution makers occupied the Constitutional convention's stage here today. Led by Mrs. Harriet Stanton Blatch, President of the Woman's Political Union, they told of alleged "ambiguities" in the State's present basic raw. Warning against incorporating "similar inconsistencies" in the new organ was sounded. The women made their appearance before a Committee on Bill of Rights, headed by Louis Marshall.

Special objections to the preamble of the existing Constitution was made. The clause, "We, the people, established this constitution," was attacked. The objectors declared the statement is false because women had no official voice in making or adopting the document. They pleaded for more clearly defined expression and more exact wording in the Constitution now in the making.

PAPERMAKERS' STRIKE MAY GO OVER THE LINE

Watertown.—The strike now prevailing in the St. Regis Paper Company's mills in the Black River Valley may now be carried across the border and into Canada. Trouble is iminetn at the Donnaconna mills in Lower Canada, owned largely by G. H. P. Gould of Lyons Falls, head of the St. Regis Company. It became known today that a representative of the International Brotherhood of Papermakers is already on the ground at Donaconna and in daily communication with international officers now in this city. The assertion is made that through the Canadian mills, Mr. Gould is filling New York orders on which the St. Regis mills would be employed were it not for the present strike.

NEW REVENUE STAMPS FOR GOODS SHIPPED

The internal revenue office has just handed down a ruling to the effect that canal lines carrying packages and motor trucks engaged in the same business must affix the new revenue stamps.

The Interstate Commerce Comission has also handed down a ruling akecting shippers to the effect that they can not take advantage of a combination of intrastate and interstate rates in order to get a lower rate charge on a through shipment of goods. The Commission says that the established interstate rate applies on shipments first billed to an intermediate point within the State of origin and then rebilled to the intended destination in the other State.

CIRCUS HORSE SHOWS FONDNESS FOR LETTUCE

Assistant City Engineer Frawley of 114 West First st. found a strange horse nibbling on the tender leaves of his lettuce this morning at the early hour of 5 o'clock. Mr. Frawley caught the animal and reported his find to the police. It was reported taht one of the horses with the Tompkins wild west show bolted last night when some one set off a fire-cracker near the horse, and the police are inclined to believe that this horse is a circus animal, although the owners of the show reported no lost horse. The horse is waiting its owner at Mr. Frawley's barn.

MORE OPEN HOMES NEEDED FOR DELEGATES

The committee in charge of finding lodging for the delegates to the State Y. P. B. convention to be held here July 2-7 announces that more places are needed to accommodate the visitors.

If there are any persons who desire to open their homes to give lodging and breakfast to one or more delegates the name and address of such person will be given the committee if left at the Chamber of Commerce rooms.

CONFUSION THE RESULT OF WAR

Hard to Place True Construction on Some of the Measures of Passed by Congress

Washington, D. C., June 24.—A study of the "war revenue tax" discloses some of the most astonishing blunders to be found in the entire legislative record of the present administration. The most elementary principles of law making seem to have been disregarded.

In the passage of any special tax measure where the approximate deficit to be met is known, there are four simple requirements that are obvious:

1. It should be determined where the burden of the tax should fall.

2. Based on accurate estimates, the law should produce the amount of revenue needed.

3. The law should be phrased in clear unmistable terms, admitting of but one construction that will insure a minimum cost of administration, prevent confusion, and avoid useless, expensive litigation.

4. Timely, adequate provision should be made for revenue stamps, blank returns, instructions, and all other numerous details entering into the enforcement of such a law.

This administration failed on every one of these counts.

1. Under the first essential, that of determining where the burden of the tax shall fall, the Democrats floundered repeatedly. They first announced the plan of increasing the income tax, and abandoned it on discovering that financial returns would be delayed for months under that method. Then they turned to a plan of taxing freight receipts. This was discarded with astonishing celerity. Political pressure was too great. After other ineffectual attempts the Spanish war stamp tax was adopted as a basis, giving the country a "war tax" in time of peace.

2. The second essential was disregarded. Their estimates were inaccurate. Had they been based on facts instead of guess work, we would not now have the treasury deficit as a constant reminder of Democratic extravagance and inefficiency.

3. The third essential was disregarded. There are conflicting provisions in the "war tax" as to when it shall take effect. Other clauses are so obscurely phrased that it has been necessary to appeal to the courts for construction.

4. The fourth essential was disregarded. So inadequate were the provisions for stamps required under the act that business all over the country halted because of inability to comply with the law. Long and annoying controversies arose over penalties for such violations, resulting in needless confusion for which no one but the present administration is to blame.

Specific examples of the errors referred to in the "war tax" law will be discussed in later articles.

FEW HOME GROWN STRAWBERRIES IN MARKET

The strawberry season, which opened about the first of May with the advent of southern berries, will be unusually short this season. The middle of next week will see the last shipment of southern berries. The first shipments came from Florida and berries from North Carolina and Virginia came next. The bulk of the berries on the market now are from Delaware.

The supply of state berries is unusually late, and will be far less than ever known before, the frosts having worked havoc with the crop. The opportunity for canning cheap berries has passed, and the home crop, already late, will be short. In about another week the home berries will be coming in.

Cherries from Ohio have appeared in the market, and are selling at 12 cents per quart.

GRATITUDE

The Fulton Evening Times expresses gratitude for the liberal support given its endeavors to launch in this city a daily newspaper. This expression of good will is extended to the people in every walk of life---to those who were at first skeptical of the advisability of beginning the publication of this newspaper, and to those who believed that *Fulton* should have in addition to its weekly newspapers a daily that would place the town in the same *category* as other towns of the same *size* of *Fulton*.

NOT AN EXPERIMENT

The Fulton Evening Times is no longer in the experimental stage. Since December 17, 1914, it has issued more than 150 numbers, or approximately 375,000 copies, which represents in the neighborhood of 37,500 pounds of paper made at the big mill of the Oswego Falls Pulp & Paper Co. It will be seen by these figures and the fact that the payroll of Fulton Evening Times is expended with the merchants of the city, that here is an industry of no mean proportions---one that deserves the support of the people, and we are pleased to report, that this newspaper

IS GETTING SUPPORT

Because the citizenship of this city has the proper amount of civic pride to impel it to support a home institution. There are many reasons why our subscribers are numbered by the hundreds, chief of which is that The Evening Times is counted upon as the medium wherein local news is the leading feature, and wherein the people feel that they have a defender of their rights.

The Evening Times is Winning its Way, too Because it is

"A HERALD OF PROGRESS"

THE CITY BEAUTIFUL

A MEMORIAL PARK FOR THE PEOPLE.

Laporte, Ind., Has One of the Most Beautiful Parks in Central West.

In Laporte, Ind., a city of 16,000 situated fifty-nine miles east of Chicago, is located one of the most beautiful parks in the central west, adorned with a large number of great oaks and hickories, varieties of trees which are not common in its section, says the American City.

Fox Memorial park represents an investment of $50,000, and its establishment has resulted in the expenditure of not less than $50,000 for boulevards leading through the park and to the city, a distance of less than a mile. It contains approximately twenty-five acres, situated along the north shore of Clear lake, a very attractive body of water. From the park casino there is a fine view of the city.

The park has been open to the public for nearly two years. The dedicatory exercises were held on June 26, 1913, when the Hon. James Eli Watson, former Republican leader of the house of representatives, expressed in behalf of Messrs. Maurice, Herbert, Robert, Walter and Norman Fox the pleasure which it afforded the sons of the late Mrs. Fannie L. Fox to give to the people of Laporte the park as a memorial to their mother.

PUBLIC CELEBRATION IN MEMORIAL PARK

The people of Laporte have shown their appreciation of this beauty spot in no uncertain manner. Because of its rare picturesqueness and its accessibility the park has a large patronage. The city band of twenty-one pieces plays in the park on Wednesday evenings, and band concerts are frequently held on Sunday afternoons, when hundreds of people visit the grounds, many making the trip by automobile and many more walking to the park. The distance is short, and the walk along the shore of Clear lake is delightful. For the comparatively few who do not wish to walk to the park and who have no automobiles, bus service at a nominal charge is provided by local liveries. The park is also used largely as a picnic ground.

The leading feature of the park is the great number and variety of the shrubs and trees.

The twenty-five acres of the park are largely of rolling prairie land, most suitable for park purposes. The band stand is in the hollow of a natural amphitheater. The park grounds present a beautiful picture on a band concert evening—scores of automobiles parked along the wide boulevard, hundreds of people seated on the grassy slopes around the band stand, children romping and playing, rowboats and canoes crossing and recrossing in the changing shadows, lights everywhere, and the music the central feature in a perfect setting.

Restricting Garage Locations.

A section of an ordinance in force in a suburb of Chicago reads: "It shall not be lawful for any person or corporation to locate, build, construct or maintain in the village of Oak Park, on any site where two-thirds of the buildings within a radius of 500 feet of the proposed site are used exclusively for residence purposes, a building for a public garage * * * without written consent of a majority of the property owners, according to frontage, within a radius of 500 feet of the proposed site of the building."

In a decision lately handed down by the supreme court of Illinois in the case of People versus Village of Oak Park, 107 Northeastern Reporter 636, the validity of this regulation was sustained as constituting a valid exercise of the police power of a municipality. It was further held that the ordinance applies to garages which were in existence when the ordinance was passed, and hence does not discriminate against those sought to be established afterward.

Clean Up and Paint Up!

A little fresh paint and the vigorous use of the scrub brush make morals cleaner. Add to these a shrub or two and a neat back yard garden and you'll know the joy of living amid a new and better environment.

WIND PRESSURE SPECIFIED IN BUILDING CODES.

The Requirements Should Be Revised and Made Uniform.

How 120 American cities specify wind pressure for the design of buildings is discussed in an article by R. Fleming of the American Bridge company of New York in the Engineering News. The writer's conclusions are summarized by him as follows:

"It might seem that our American municipalities have exhausted the combinations of wind pressure and wind stress that can be made. The fact that one code differs from another is not in itself a cause for criticism, but a code is decidedly at fault when it contains absurd or needless requirements or when its requirements are not clearly expressed. To assume wind pressure over a large area at thirty pounds per square foot and then to add the sectional area necessary to resist wind stresses to that required for live and dead loads is needless. Where this is specified in a code it is evaded in practice. It would be far better to make rational assumptions and insist on a rigid adherence to them than to insert in a code improbable leadings or working stresses that will be ignored in actual construction.

"That the need of revision in our building codes is being felt by the public is evidenced by the number now being revised. Although our knowledge of wind action is limited, we should be able to come nearer to a common ground of requirement for wind bracing than we have at present. As a basis for uniformity the writer suggests the building ordinances of Chicago. The paragraph on wind resistance reads:

"'All buildings shall be designed to resist a horizontal wind pressure of twenty pounds per square foot for every square foot of exposed surface. In no case shall the overturning moment due to wind pressure exceed 75 per cent of the moment of stability of the building due to the dead load only.'

"The paragraph relating to wind stress reads:

"'For stress produced by wind forces, combined with those from live and dead loads, the unit stress may be increased 50 per cent over those given above, but the section shall not be less than required if wind forces be neglected.'"

CITY PLANNING LEGISLATION

New Jersey's New Law an Aid to Growing Municipalities.

Effective work by commercial organizations resulted in the enactment of a new law by the New Jersey legislature last April. There has been on the statute books of New Jersey since 1913 a law giving to the first and second class cities the power to appoint municipal planning and art commissions. Such power had, however, not been accorded to the smaller municipalities.

Realizing the need for such legislation for their own community, the directors of the board of public improvement of Madison, N. J., suggested to the New Jersey state chamber of commerce the desirability of co-operating in the advocacy of a law of this kind. As a result the state chamber of commerce appointed a committee which drafted what was subsequently known as assembly bill No. 591. When this bill was printed by the legislature it was accompanied by the following statement:

"In recognition of the need so frequently apparent of more careful advance planning of future municipal improvements, such as streets, parks, public buildings, etc., and of the location and design of public buildings and public works of art, the New Jersey state chamber of commerce heartily indorses the foregoing bill and bespeaks for it the favorable action of the legislature at the present session.

"This bill gives all municipalities except first and second class cities (for which similar provision has been made by laws of 1913, chapters 72 and 170) the power to appoint municipal plan and art commissions, the members of which are to serve without pay. Such commissions are to act in an advisory capacity to the local municipal governments and are to have no power to incur indebtedness except such as shall have been provided for and covered by appropriations previously made by the local municipal governments."

The new law was signed by Governor Fielder April 6. It is believed that it will be of material aid to the many small and growing municipalities in New Jersey in controlling more effectively than heretofore their future growth and development along rational lines.

Merchant's Gift of Trees.

William F. Gable, head of William F. Gable & Co., Altoona, Pa., recently distributed to the school children of his county 25,000 silver maple trees, says the Dry Goods Economist. The gift of trees is an annual custom with Mr. Gable, inaugurated in the spring of 1911, it being his desire to make the county one of the most attractive in the state.

In 1911 Mr. Gable distributed 20,000 catalpas, in the following year 20,000 silver maples, in 1913 English elms and in 1914 white ash, these trees being selected according to their desirability for special purposes.

The daily press of Altoona has given Mr. Gable deserved commendation for his generosity and foresight.

HE WAS A WONDER.

He Admitted It Himself and Made Good His Assertion.

At a place where the compositors on the morning papers gather after the last edition has gone to press this story was told by an old typo:

Some years ago a tramp printer landed in a little town dead broke but with unshattered nerve. He wandered into a little job office and persuaded the owner to trust him for some small posters, saying he would set up the matter himself.

That night he went forth and posted up all over town a sheet reading as follows:

HE
IS COMING.

This set all the people to talking and speculating, and the next night he posted up another sheet which read:

HE
IS A WONDER.

This poster increased the popular excitement, and on the next day it was followed by a third announcement:

HE
IS HERE.

The last of the series of posters said:

HE
WILL BE AT THE
OPERA HOUSE TONIGHT.

That night there was an immense crowd before the opera house and a great rush when the doors were opened. The tramp printer was in the box office with the proprietor, whom he soon paid, and then began to stow away bills and silver all over his person.

When the house could hold no more the printer closed the box office and went out. Ten minutes later the curtain arose, and the audience, which had awaited its ascent with breathless excitement, saw suspended from one of the borders a big sign which said:

HE
HAS GONE.

And he had.—Editor and Publisher.

One's Own Fault.

People influence us who have no business to do it simply because we have neglected to train ourselves to attend to our own affairs.—A. E. Winship.

Had Nothing on Him.

The haughty English lord was endeavoring to impress the importance of his family upon his guide in the Scotch Highlands.

"Why," he exclaimed, with an eloquent gesture, "my ancestors have had the right to bear arms for the last 200 years!"

"Hoot, mon," cried the Scot, "my ancestors have had the right to bare legs for the last twa thoosand years!"

A Solar Plexus Blow.

On one occasion Sam Berger, the brawny fight manager, was in a certain small town sounding some of the residents as to the possibility of holding a prizefight. The local police force, a clownish looking individual with a huge badge, heard of Sam's investigations.

"You can't hold no prize fight in this here town," said the police force threateningly in his best "I be the marshal" tones. "It is agin the law, and I won't stand for it."

"AW, BEAT IT!"

"Aw, beat it!" said Berger in disgust. "What do you know about law? Why, your very appearance in public is a misdemeanor."—Lippincott's.

A Filial Burglar.

The small son of a Washington official was asked by his mother what he intended to be when he became a man.

"I think I shall be a burglar," he replied.

"Why, Willie," his shocked mother protested, "that isn't nice."

"Oh, it will be all right," he assured his mother. "I shan't steal anything from you."—Saturday Evening Post.

ONCE UNPOPULAR, CONSTANTINE BECAME HERO OF GREEK NATION

Blamed For Disaster In War of 1897, He Planned Exile, but Gained Fame In Balkans.

Son George, Like Father, Was Educated In Germany and Lacked Hold on His People.

KING CONSTANTINE of Greece succeeded to the throne on the assassination of his father, King George, by the regicide Schinas March 19, 1913. It was expected he would take the name of Constantine XIII., reviving the old Byzantine line, but he contented himself with the simple Constantine I.

He was born at Athens Aug. 2, 1868. He was educated by tutors obtained from Leipsic and from early boyhood showed effects of German influence. He married Princess Sophia of Prus-

Photo by American Press Association.

KING CONSTANTINE OF GREECE.

sia, sister of Kaiser Wilhelm, at Athens Oct. 27, 1889.

Tall, soldierly in appearance, quiet, reserved almost to shyness, Constantine was for a long while most unpopular with the Greeks. He was blamed for the failure of the Greeks in the war with the Turks in 1897.

Until the war with Turkey he had had little military experience aside from participating in the annual maneuvers of the German army. When he saw his country drifting into war with the Turks he opposed the movement, for he knew his people were utterly unprepared. The Greek infantry were then armed with discarded French rifles, bought at $2 each.

In 1908 Constantine felt his unpopularity so keenly that he acquired a palace in St. Petersburg, took service in the Russian army, and was determined on quitting Greece forever. But in 1911 the national legislature by an overwhelming vote restored him to his former post as inspector general of the Greek army. Then came the Balkan war and Constantine soon became the hero of his people.

He brought the Greek army to a state of high efficiency and led it to many victories, not the least of which were those at Saloniki and Janina. Several New Yorkers headed the committee which presented him with a jeweled sword as a memento of these achievements.

Complete accord has not always ruled in the domestic affairs of Constantine. While there was no whisper of scandal, he and Sophia lived apart for a time and there seemed little prospect of a reconciliation until after the victories in the Balkans.

Curiously enough, there is a very old Greek tradition which says that when a royal Constantine weds a Princess Sophia their son shall reign in Constantinople and revive the ancient Byzantine empire.

George of Greece is the eldest son of Constantine and Sophia. He was born July 7, 1890, and is not married. His engagement to the beautiful Princess Elizabeth, eldest daughter of King Ferdinand of Roumania, was announced two years ago, subsequently denied and then later reannounced. Early in the present year it was stated that the wedding had been scheduled for the spring, but postponed on account of the war.

Like his father, George received his education and military training in Germany under the care of his uncle, the kaiser. Because of this there have been reports from time to time that the Greeks looked with more favor on Prince Nicholas, brother of Constantine.

George has two brothers and two sisters. Prince Alexander, born in 1893; Princess Helene, born in 1896; Prince Paul, born in 1901, and Princess Irene, born in 1904.

Prince Nicholas commanded the Greek artillery in the Balkan wars. He received his military education in France. His wife is the Grand Duchess Helene of Russia, daughter of the late Grand Duke Vladimir. Thus instead of the influence of Dowager Queen Olga being minimized in his case, as in that of King Constantine, by a German wife, the influence of Princess Helene is all exercised against the German tendency of the family.

King Ferdinand of Roumania, father of Princess Elizabeth, is a Hohenzollern, while the princess' mother is Princess Mary of Great Britain and Ireland.

"SWAP WIVES LIKE HORSES."

Supreme Court Justice Makes Caustic Comment on Divorce Cases.

In the course of a divorce case in which the husband admitted being a bigamist, Supreme Court Justice Frederick E. Crane of Brooklyn delivered a brief but crackling philippic against American marriage and divorce conditions.

"Marriage is the cheapest thing under our law," snapped the justice. "Marry one day and then come back in court the following morning and get divorced! Swapping wives and husbands has become as common as swapping horses in our country. If we want polygamy why don't we come out bravely and establish it here?

"We judges, the supposed guardians of the law, are forced practically to sit back and wink at felonies and watch the offenders go free."

"Perhaps I sometimes say too much in court," Justice Crane added later in his chamber, but he didn't smile when he said it.

NEW WAY OF MAKING LIVING.

Man Gets $10 a Week From City to Prevent Him Committing Suicide.

A new way of making a living has been revealed in Atlanta, Ga. C. S. Stafford, ex-proprietor of a paint shop, is getting $10 a week from the city to prevent him from committing suicide.

Becoming ill five years ago, Stafford was taken to the City Detention hospital, and when he recovered he refused to move out. Threatened with forcible ejection, he declared he would commit suicide. The health authorities decided to put him on the payroll at $10 a week.

AUTHORS RUN AMBULANCES.

"Queed" Harrison and Stanton Are With American Hospital In France.

One of the ambulance chauffeurs making the most runs to bring in wounded with the American ambulance in France is H. S. Harrison, better known as "Queed" Harrison, from his "best seller" book of two years ago. He hates the nickname, but everybody calls him by it.

Mr. Stanton, son of Elizabeth Cady Stanton and himself an author, is one of the orderlies in the American hospital in Paris.

LIFE SENTENCE OF SOBRIETY.

Court Puts Woman Under Permanent Ban Against Drinking.

Magistrate Harry Miller at Jamaica, N. Y., sentenced Mrs. Margaret Askins to "eternal sobriety." She accepted the life sentence with thanks and left the court with her husband, whose plea to the court won for her that sentence instead of another.

Mrs. Askins, who is thirty-three years old, was charged with being an improper guardian of her children. Agent C. Harstedt of the Children's society testified that the woman threatened to kill her children and chased her husband with a carving knife.

The husband said his wife would be all right if she let liquor alone, so the "eternal" sentence was imposed.

SET OFF BY HUMAN SPARK.

Man's Electrified Body Caused Big Explosion, Expert Thinks.

The theory that a man's body may contain enough electricity to set off a charge of explosive has been advanced by a British government expert on combustibles to account for an explosion at Stowmarket which resulted in the death of four men.

Major Cooper-Key, the expert, expressed the opinion that one of the men had accumulated electricity in his body "and had not earthed himself." He added: "It was an exceptional accident, which could probably have been prevented by a metal stud in the worker's rubber overshoe. A regulation to this effect will probably be made."

HOPES FOR BLACK COTTON.

Planter Tries to Make It Grow So It Won't Need Dyeing.

A southern cotton planter who is trying to make a black cotton grow says:

"God gave men five primal sorts of cotton—white, red, brown, yellow and black. The black has been lost somewhere in the mists of the ages, but every experienced breeder knows that so long as the species exists the lost variety can be restored.

"To this end I am working. The start was made by planting deep green lint cotton, red lint cotton and brown lint cotton in my experimental patch. If I can get the three to come into blossom at the same time black lint is assured."

SOLDIERS' BURDENS.

Loads They Have to Carry on the March and In Action.

While the rifle of the infantrymen of the world's armies has steadily lessened in weight during the last fifty years, and while constant attempts have been made in other ways to lighten the soldier's burden on march, it is nevertheless a fact that the uniformed fighter of today carries very little if any less than he did a generation or two ago. His gun and bayonet and some other details of equipment that had an exact counterpart in the old armies may be lighter, but modern military necessities have added to his carrying requirements.

He must now face this marching load: Magazine rifle, bayonet, scabbard, rifle cartridge belt and fasteners, rifle cartridge belt suspenders, first aid packet, canteen, canteen strap, set of blankets, roll straps, haversack, meat can (used as a frying pan), cup, knife, fork, spoon, one shelter tent (half), five shelter tent pins, one poncho (rubber blanket), one pair shoes, one housewife (needle and thread), one overcoat, one intrenching tool.

These marching loads have varied from 40 to 100 pounds in the past and weigh about the same now.

Of course, in going into action much of this load is discarded, some of it never to be possessed by the owner again, even though he escapes the battle peril. In the old days knapsacks were always cast off by seasoned troops, who grew calloused as to the hoarding up of little trinkets and mementos that so appeal to the amateur soldier.

After a battle these discarded knapsacks might be recovered, but it was not likely. At any rate, while another knapsack might be issued, it would not be the one possessed by the soldier before the battle.

Whenever a new levy of troops was mustered in and arrived in a camp where veterans were stationed the newcomers were greeted with mock praise for their spick and span soldierly appearance, with special emphasis on "How nice those knapsacks look!" This time honored receptacle of everything a soldier desired or hoped to keep ever near him is no longer reckoned in the latter day, universal fighting equipment. While troops on going into battle discard everything not absolutely necessary to them for the fight and are thus lightened up some, they have to take on some weight in the place of that relinquished in the shape of an extra number of cartridges.—Cleveland Plain Dealer.

Singular Gender.

"Some days ago," relates the wife of a well known attorney, "I accompanied my husband on a business trip to Cleveland. As we ate our luncheon I chanced to overhear several traveling men jesting with the colored waiter.

"'George,' (traveling men always say George to a colored waiter)—'this bill of fare has an item, chicken giblets with biscuit. We would like to have some of that; but we want to know whether there is more than one biscuit.'

"George examined the menu card, scratched his poll, and finally answered:

"'No, suh—yo' don' git only one. De wo'd "biscuit" is singular gender, as de good book teaches. So yo' all don't get but one.'"—Columbus Dispatch.

The London Bobby's Helmet.

The policeman's dignity is largely centered in his helmet. The late Sir John Astley testifies to this in his autobiography. Speaking from the experience of his youth, he says: "If you get into a row with the police don't attempt to hit a policeman, or you will get the worst of it, but knock his helmet off. He will instinctively stoop down to pick it up, for a policeman without a helmet is impossible. Meanwhile you run away." It is perhaps advisable to add that Sir John was the champion sprinter of the army, as well as being a first class boxer.—London Standard.

By Inference.

Pater and his small boy were passing St. Paul's churchyard when the father pointed out some of the larger monuments about.

The boy asked why they were erected. His father explained that they were in memory of good men and women. Soon the boy noticed some stones which are laid flat. He pointed to these and asked:

"Do they put those that way to keep the bad ones down?"—New York Post.

Confirming a Wife's Right.

"At least he was original in his proposal."

"Did he claim that you were the only girl he ever loved?"

"No. He asked me if I'd accept the right nightly to demand of him where he had been till this hour."—Detroit Free Press.

Start of His Finish.

"Well, old man, how's tricks?"

"Miss Wallaby accepted me last night."

"I suppose you are around today accepting congratulations."

"No; I'm around today trying to borrow $200 to buy the ring."—Louisville Courier-Journal.

Impartial.

Sire—Now that you're starting in business remember that honesty is the best policy. Son—I intend to give both systems a fair tryout.—Chicago News.

Very Refined.

Josh—Is she refined?

Frosh—I should say she is! She won't even read coarse print!—California Pelican.

NOW THAT VACATION SEASON IS HERE.

—Briggs in New York Tribune.

BULGARIA MAY BE NEXT TO JOIN WAR

Holds Key to Constantinople and Asks High Price.

WANTS CASH DOWN TERMS.

Balkan Nation, on Whose Decision Await Roumania and Greece, Is Ready to Side With Allies, but Stands Out For Guarantees Her Share In Spoils Shall Include Macedonia.

All eyes in Europe are now turned upon Bulgaria. That Balkan state holds not only the key to Constantinople, but the power to decide whether two other peoples as well as herself shall enter the war, making it a conflict of no fewer than fourteen nations.

It is the opinion of the diplomats that the effect of Bulgaria's intervention on the side of the allies would be felt much more quickly than that of Italy despite the far greater strength of the Italian forces. The reason is that her action would at once release Roumania, who would rush to support the left wing of the Russians and would complete the ring of steel forming round the central empires.

Bulgaria nowhere touches the frontier of Austria. She lies to the south of Roumania and the east of Servia. Close to her border stands Bucharest, the capital of Roumania. This geographical situation keeps Roumania out of the war because of the possibility that Bulgaria might attack her from the rear.

Was Expected to Aid Kaiser.

For long it was thought that if Bulgaria intervened it would be on the side of the kaiser. But that has been altered by the determined nature of the attack on the Dardanelles by the allies. The Bulgarians now feel sure that Constantinople must fall. Bulgaria has promised Roumania not to attack her should Roumania join in the fight. But will she go further? Her decision cannot long be postponed, it is believed.

Bulgaria's position today merits understanding. To know the forces that bear upon its choice is to have the "incomprehensible Balkans" illuminated and a light thrown upon the war which is essential to an analysis of the motives hidden in the intricacies of international politics.

Bulgaria, it must be remembered, has two ambitions—one to regain Macedonia, which it believes is ethnically Bulgarian; the other, to move its Turkish boundary back to the Midia-Enos line. The Macedonian ambition was responsible for the first Balkan war, which was fought, as far as Bulgaria was concerned, to free the Bulgarians of Macedonia from Turkish rule.

His Interest Is Macedonia.

No Bulgarian has ever thought of the results of the second Balkan war as being permanent. He wants back what is his by nationality in Macedonia and what was his by conquest in Thrace. His primary interest is in Macedonia. Bulgarian policy in this war plays about these ambitions.

But, having been bitten once by the diplomacy of the powers, Bulgaria now regards all with an icy suspicion. She wants to be allowed to occupy the territory she desires and do it before she needs to strike a blow, and in return she will go to war in a minute, for Bulgaria is not interested in the war as a moral proposition; she is interested only in Bulgaria.

But an occupation of the territory is out of the question as things stand. Servia cannot brook it until she has Bosnia and Herzegovina. Greece threw out her best statesman for daring to think of making concessions to Bulgaria. The entente can only promise. Premier Radoslavoff demands cash down.

The opposition, led by Malinoff and Guechkoff, is strongly in favor of accepting the promises. It is not so much that the opposition places complete reliance on the promises as that it entertains the fear all may be lost by delay.

"There are other guarantees besides occupation," said Malinoff recently. "Participation in the war is the best assurance of success after the war. The tide must not be lost. The time has come, if not for action, for preparing for action."

Watch Constantinople.

Only one thing is holding Bulgaria back—the slowness of the allies' advance in their attack on the Dardanelles by land. This is enabling Radoslavoff to stand firm in the bargaining and to insist on his cash down terms.

Forcing the strait by water the Bulgarians believe to be out of the question, for England cannot sacrifice her whole Mediterranean fleet. Taking the strait by land may look easy enough on paper, but is proving quite the reverse in practice.

To Constantinople Bulgaria undoubtedly holds the key. The Bulgarians know this. Their only fear is that the allies might forestall them by landing an army on Bulgarian soil to march on the Turkish capital, but they are realising on the fact that the allies to do so would have to violate Bulgarian neutrality. Every one in Sofia is talking politics. The words Macedonia and Thrace fall at every cafe table. Promises and rumors of promises fill the air.

The moment Constantinople should fall or seem about to fall Bulgaria will be frightened into the fight.

They All Stood Up.

Recently in a small town in New York state four young women snubbed a young man whom they knew at the door of a theater. He at once determined to get even. The girls occupied the first four seats in the sixth row, while he took the fifth seat in the same row. The girls paid no attention to him during the early part of the program, but later on a comedian came

"PLEASE LET ME OUT."

out on the stage and began to talk about love. Suddenly the comedian asked:

"Will all the girls who are in love please stand up?"

Then the young man saw his chance to square his account with the girls. Turning to the girl next to him, he said:

"Please let me out."

Naturally the four arose, one after another, to let him by. When they were once on their feet he settled back in his seat and grinned, while the rest of the audience roared with glee.—Exchange.

WOMAN AS FIT AS MAN FOR SOLDIER

Dr. Dudley A. Sargent Contends Sex Is No Handicap.

RATHER HE HOLDS IT A HELP

Harvard University Expert on Physical Training Declares His Experience of the Feats of Girls Proves That It Is Impossible to Set Limits to Their Endurance.

Women could be made as fit for military duty as men, in the opinion of Dr. Dudley A. Sargent of Harvard university, who has given more than half a century of study to the problem of physical training of young folk. He holds that sex is no handicap to military training and cites many examples of physical feats performed by women.

"Every day," said Dr. Sargent, "I am astonished at the physical and mental possibilities shown by young women yet in college and those who are already out in the world making good. Almost daily I find it necessary to revise my carefully worked out theories and formulas as to what young women can do until now I find it safest not to suggest the limits of their capabilities.

"In one of the sad stories that has just come to us of the terrible Lusitania tragedy we have accounts of several women who swam about for many hours until rescued. What they did any able bodied, well trained woman might have done. At the time of the sinking of the Empress of Ireland in the Gulf of St. Lawrence a child only ten years old swam and floated about in the water for several hours and seemed none the worse for her adventure.

Capable of Marvelous Endurance.

"All theories to the contrary, women are capable of marvelous endurance, and so on this score cannot be rated ineligible for training for military service. But in spite of the actual proof to support this contention, many persons will shake their heads and say that I am forgetting that women are the bearers of the race and that their penalty for physical hardships will be sure and far-reaching.

"Nature, in giving to her a special task—or privilege—has endowed her with the necessary bodily strength.

"Woman's sex is not a handicap, either mental or physical, unless woman chooses to make it one.

"The great stretches of Russia could show up countless stolid faced, big muscled, sturdy women, who plow fields, reap the crops, make the black bread and bear the children and who have never even heard that they are a weaker sex.

"There are in most of our large cities today foreign born women who are familiar to us chiefly as picturesque figures on the streets as they are homeward bound with a week's fuel balanced gracefully on their heads. They walk upright and easily, and the careful observer will note a sturdiness that will surprise him.

Better Equipped Than Man.

"Physiologically the healthy woman is better equipped by nature to withstand cold and exposure than the average man. Every one knows that in regions of severe climate men wear heavier clothing and more of it than women.

"To say that a woman's pride is keeping her warm as she sweeps up the street on a blustering zero day with open coat, thin shirt waist, exposed neck and thinly stockinged feet is not altogether true, for nature is aiding her. She will, of course, suffer from unwise exposure, but not to the same degree that a man would.

No Wonder.

She—How pale the moon is! He—Yes. It's been out late for several nights.—Boston Transcript.

Submarine Warfare Must Go On, Germany Tells News Service

Berlin Foreign Office Says Kaiser Wants to Reach Agreement with United States. May Claim Right to Sink Ships Carrying Ammunition to Kill Germans

Berlin, (via Rotterdam), June 24.—The suppression of the Deutsche Tageszeitung for aggravating the American situation is considered of the greatest international significance. According to an exclusive statement given me by the Foreign Office, the drastic action taken in regard to the Tageszeitung means a continuance of the Kaiser's policy of avoiding unnecessary complications with neutral powers, especially the United States. A prominent statesman of the Wilhelmstrasse said to me:

"The motive underlying the suppression of the Tageszeitung is the German Government's honest desire to consider American interest fairly without abandoning their own rightful privileges. Several newspapers have persevered in handicapping the Government's peaceful endeavors. The Tageszeitung has been especially vindictive, and since the Lusitania sinking it has persisted in aggravating the difficult German-American situation.

"The suppression, however, must not be interpreted by Americans as indicating the abandonment of submarine warfare by the German Government. It was aimed solely at preventing excesses by newspapers, whether conservative or radical, tending to increase the complications. The time and extent of the suppression are uncertain, but the punishment must be considered as a warning to all trouble-making newspapers.

"While the government has been anxious, in good faith, to continue the negotiations with the United States for a mutually satisfactory settlement, without receding from a policy which will enable us to retain our self-respect, and at the same time, without losing sight of the object of the war, these newspapers have discredited Germany's statesmen and have denounced them as spineless weaklings, anxious to discontinue submarine warfare.

"The American Government seems to overlook the fact that new war instruments demand the applying of new legal rules, as was done at the latest Hague congress in reference to aeroplanes. Germany cannot discontinue submarine warfare without abandoning her most important weapon. The correct attitude of the Hearst newspapers in this connection is appreciated by fair minded men on both sides.

"It is not our intention to hurt, unnecessarily, the feelings of any neutral nation, but we will not permit anybody to interfere with our submarine operations.

"We do not intend to torpedo neutral vessels. If any such case has happened, it was due to a mistake on our part, for which we will atone, or it was the fault of the vessel trying to escape, in flying false colors, or in not properly displaying neutral signals.

"We do not sink neutrals for fun. We are sorry for every mistake, but we would consider it a favor if neutrals would get out of our way, and thus avoid getting hurt by accident.

"Even English merchant vessels are torpedoed only in cases of absolute necessity.

"No American will deny us our rightful privilege of sinking vessels carrying ammunition liable to destroy thousands of German lives.

"In the meantime, until the Lusitania investigation is concluded, the newspapers must carefully refrain from aggravating the situation.

"This is the principal object and the significance of the suppression of the Tageszeitung."

GERMANY AND AUSTRIA REJOICE OVER VICTORY

Berlin, June 24.—The news that Lemberg had been carried by Austrian and Hungarian troops was received today with great jubilation throughout Germany and Austria. All Berlin is flag-bedecked, bands are playing to cheering crowds, and church bells are ringing.

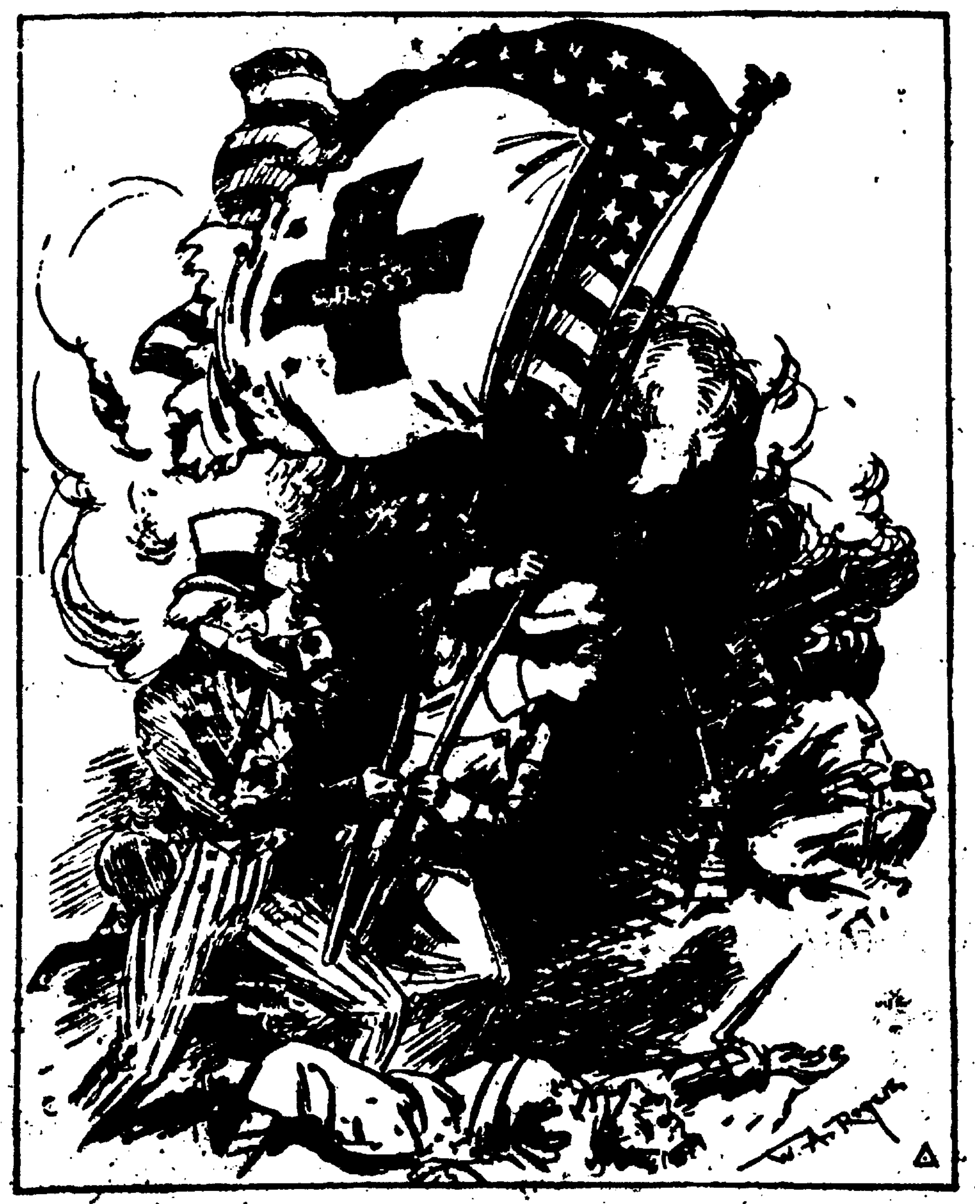
The Kaiser and Emperor Francis Joseph of Austria-Hungary, exchanged long telegrams of felicitation. The Sultan of Turkey telegraphed at length both to Berlin and Vienna.

The school children of Germany and Austria will be given a holiday tomorrow.

A special correspondent of the Cologne Gagette telegraphs that the Russians, before the general retreat began, hurriedly sent for all the artillery they move. This was done instead of endeavoring to cover the retreat of the artillery and saving all of it. Part of the cannon were useless on account of poor ammunition. Continuing, the correspondent says:

"It was after the artillry had been sent to the rear that the panic-stricken troops began their bight. Wagons and supply trains blocked the roads. Meh detached the horses from these vehicles and roed away on them, heedless of the crowd of soldiers of all arms crowding back to the rear. Generals and colonels were helplessly carried away. Units were disbanded and the army became a mere mob. It was readily to be seen that a catastrophe was unavoidable."

NEUTRALS ON THE FIRING LINE.



—Rogers in New York Herald.

NEW AUSTRIAN ARMY ATTACKS PLAVA HEIGHTS

Rome, June 24.—It is evident from the continuous activity at two critical points that new Austrian forces are coming into play. At both Freikofel and Plava the Austrians are making determined stands. The Archduke Eugene, of Austria, commander-in-chief of the Austro-Hungarian forces, has reorganized two army corps destined for mountain warfare, with an active strength of 50,000.

The Italian positions on the heights above Plava are being most fiercely attacked. An advance at this point would be very serious for the Austrians, as it would mean the envelopment of Gorizia. The bridgehead won by the Italians also threatens Tolmino from the south.

The inundations caused by the closing of the dam at Sagragdo were of great assisttance to the Austrians. The delay gave them ti strenghten their positions. The destruction of the dam by the Italian heavy artillery has caused the water to run off into the sea, and the Austrian line is again seriously threatened at this point.

JUNIOR CLASS DANCE A FITTING FINALE

After the commencement exercises last night, the junior class of Fulton High School gave a dance at Davis' hall, which was attended by about fifty couples, the majority of whom weer alumni of the school or school students. The music was furnished by a special orchestra led by Professor Reynolds. A program of 20 dances was played and the affair was still in progress early this morning.

The dance was the last event of the high school term and was a fitting finale to an enjoyable social season. The floor was well filled, but not uncomfortably so, with beautifully-gowned young ladies and young men in nformal dress, and the committee is to be congratulated upon the success of the affair. Many visitors from out of town were present.

Harold O'Brien was chairman of the committe on arrangements which comprised Messrs. Joseph Johnson, Nicholas Wallace, John Reynolds, Joseph Boland, Joseph Mangeot and Nelson Hopkins.

FAMILY TO CAMP THE ENTIRE SUMMER

W. C. Morgan, the First st. jeweler, is making alterations and preparations at his summer camp north ot the city on the site of the Smokeless Powder Gun club, for the summer season. Mr. Morgan and his family wil ltake possession of the Camp Saturday and Mr. Morgan will commute to business during the summer.

AMONG THE FIRST IN CLASS

Miss Pauline E. Joslin, daughter of Edward Joslin, will return home tomorrow from Rome where she was graduated Monday night from the Academy of the Holy Name in that city. Miss Joslin was graduated among the first in her class. Mr. Joslin attended the commencement exercises at Rome Monday night. The graduating class will hold its final banquet tonight.

Why He Was There.

"And why do you now come and propose marriage to me?" said the sweet young thing. "Did that other girl you were in love with throw you down?"

"N-n-no," stammered the young man; "her father threw me out."

MISS KATE GILBERT MADE BRIDE OF LEWIS RICE

Last evening at the Gilbert home in South 4th st., Miss Kate Gilbert, daughter of Mr. A. G. Gilbert, became the bride of Lewis Rice.

The ceremony was performed at 7 o'clock beneath a canopy of cedar, roses and smilax, the Rev. W. L. Sawtelle of Troy officiating. Mrs. Russell A. Rogers presided at the piano.

The bride was charming in a gown of white satin en train with lace garnitures. She wore the full bridal veil and carried white brides roses.

The maidofhonr was Miss Marion Beardsley of Sheldon, Conn., and she wore a frock of pink silk and carried pink sweet roses. Master William Morton and little Miss Janet Lewis, both in white, carried cedar ropes marking the path of the bridal party.

Grove Gilbert attended the groom and George Rile and Edwin Snow actend as ushers.

A wedding supper followed the ceremony, and Mr. and Ms. Lewis left later in the evening amid a shower rice and confetti.

Friends of the young people are many throughout this section, all of whom join in the chorus of good wishes.

Fulton Keynotes

E. M. Fritsch, the principal of the Batavia High school, is spending a few days with J. William Branche of this city, en route to his home in Amsterdam.

* * *

Secretary Heydecker of the Chamber of Commerce is busy today showseveral factory representatives about the city. The visitors are looking over, factory sites here.

Too Long a Look Ahead.

"I tell you," said the man who was wearing a last year's hat, "it's pretty hard on a fellow to have a wife who never looks ahead."

"Oh, I don't know!" his companion sadly replied. "Sometimes I think there's such a thing as looking ahead too much. Now, take my wife, for instance. She always buys clothes that are two sizes too large for our boy, so that he can grow into them next year."

"Well, you oughtn't kick on that."

"I wouldn't if they ever lasted long enough to be a fit."

REMITTITUR FILED IN LUX-HORTON CASE

Yesterday's Oswego Times says:

"The remittiture from the Appellate Division in the case of Charles A. Lux vs. Byron C. Horton, involving valuable property in Orwell, this county, in connection with the development of the Salmon river power was filed in the county clerk's office today.

"The decision was handed down in January and was a denial of the appeal by the defendant from the decision of Justice Emerson denying a new trial. A per curiam opinion by Justice Foote of the Appellate Division so modified the judgment of the lower court (Justice Emerson), as to make a practical victory for the defendant. A settlement of the order of the court has been delayed for several reasons. Udelle Bartlett is attorney for the Horton interests.

"The case involves many intricate legal questions and has been in the courts for the past five years. It was first tried by Justice Emerson here in special term in September, 1912. The original action was to impress a trust on real estate, the difference of opinion being over the terms of a deed passed between the Messrs. Horton and Mr. Lux. Louis Marshall of New York, who pleaded the case of Leo M. Frank before the United States Supreme Court, is attorney with Justice Henry Purcell of Watertown, for Mr. Lux.

OSWEGO HOSPITAL NURSES GET THEIR DIPLOMAS

Oswego.—Graduation exercises of the nurses of the Oswego Hospital Training School were held at 8 o'clock Tuesday night at Normal hall. The hall was well filled with friends of the graduates and of the hospital. The following young ladies received diplomas, qualifying them to practice as registered nurses: Misses Agnes Geenan, Constantia; Edna E. Ladd, Scriba; Mabel M. Greenwood, South West Oswego; Mary A. Doran, Oswego; Mary L. Kraeutler, Oswego; Verna A. Hatch, Greenwich, N. Y.; Helen M. Adair, Canada. It is the largest class ever graduated from the training school.

WATERTOWN MAKES 1200 CARTRIDGE CASES WEEKLY

Watertown.—Twelve hundred brass cartridge cases are in the process of being turned out this week at the New York Engine Company's plant preliminary to the opening of work on the order for 200,000. Machines are being adjusted and everything made ready for the weeks to come when a large force of men will work day and night shifts.

The cartridge cases now being manufactured are about three inches in length and about five inches in diameter, weighing perhaps three pounds or so. Where they are to be shipped even the officials of the Air Brake Company are in ignorance as shipping orders will only be disclosed upon the arrival of the inspector. The cases are to be fitted with the projectile and filled with high explosive at some other place besides Watertown. They will each carry a projectile weighing in the neighborhood of 60 pounds and also filled with a high explosive which will be set off by a fusee arrangement.

PUBLIC MARKET TO OPEN

Watertown—This city's public market has not yet opened, although the chamber of Commerce is ready to comply with the requests of venders of garden truck. So far this season vegetables are being peddled about the streets, but it is believed that within a week the venders will be glad to return to the market.

PAPER STRIKE ON AT CARTHAGE MILL

Carthage. June 25.—A strike was called late yesterday at the West End Paper Company mill in Carthage, N. Y. It was brought about, it is stated, because an increase in wages was refused. Another case alleged is that the West End Paper Company is supplying contracts for a paper company whose employes are on strike.

Opinions

Fostering Preparedness

If more employers would follow the course announced by the Lincoln National Bank and several commercial houses recently there would be less danger of "unpreparedness." A letter to Major General O'Ryan from the president of the bank promised that its employes who were members of the National Guard or Naval Militia would receive leave of absence for military service without loss of pay and without having the time thus lost from work deducted from their vacation allowances.

One of the reasons why it is difficult to obtain recruits for the National Guard is the objection of employers to having their young men liable to military duty at times inconvenient to the concerns. It is, of course, against the law to discharge an employe for doing his duty in the military organization to which he belongs but there are ways to get around the law, as employers and workers well know. The expense of belonging to the guard and the time necessary for drills and camp training seem sufficiently onerous to the average young man, so that he thinks twice before taking the risk of incurring his employer's ill will also by deserting work for military duty when he is needed at his daily task.

Fortunately, business men are coming to realize that it has been a short-sighted policy to frown on militia service. The Merchants' Association has a standing committee on military affairs, which is conducting a campaign among the members of that organization to encourage them to give their approval to the enlistment of their employes in thep ractical fashion pursued by the Lincoln National Bank. More interest in National Guard service and more enlistments would go a good way towards bolstering up the country's military resources.—N. Y. Times.

Georgia's Hishonor

The attitude of the Atlanta mob toward Governor Slaton is a blot on the reputation and honor of the State of Georgia. Martial law has had to be proclaimed in order to protect the Governor from violence at the hands of those who resent his action in commuting the death sence passed on Leo M. Frank.

Such a situation is a reproach to civilization and democracy in the Empire State of the South. The Governor is invested by the state's constitution and laws with the power to review criminal sentences, to grant pardons and to issue commutations. He acted in compliance with his official duties and with his own sense of justice in declining to have the death sentence executed. Even if his judgment was entirely at fault, it was a judgment reached by legal methods and of exactly as much legal force as was the sentence which it modified. It is illogical and subversive of the fundamental principles of government to give a governor the power of commutation and pardon and then to treat him as a lawbreaker when he exercises it legitimately and conscientiously.

There is a strong belief in Georgia and a much stronger belief in the rest of the country that the Frank sentence was not justified by the evidence in the case. Governor Slaton's sincerity in sharing that opinion cannot be questioned. But even if he stood alone in refusing to concur in the execution of a verdict which he considered unjust, he should be honored rather than abused, respected instead of being threatened with mob furry. He is a public man trying to do right in a difficult situation and risking much for the sake of his convictions. Such courageous executives are needed. Their worth is usually vindicated after the popular antagonisms which they arouse subside. We do not believe that Governor Slaton has sacrificed his career by living up to the promptings of his conscience. The people of Georgia will honor and reward him when sober second thought succeeds the vindictive clamor of the moment.N.Y. Tribune.

Steer this way for the Insurance that spells peace of mind—our Automobile Accident and Liability Insurance.

The accident that generally occurs is the unavoidable one—but that does not stop the "hold up" suit that costs money to defend against—BUT our insurance protects you against property and personal damages and the company fights the case.

DAVID & MASON AGENCY
[illegible] N. FIRST STREET

HATS OFF BOYS

The various reasons for buying at home that are being published in this newspaper over the signature of the Chamber of Commerce are worthy of perusal, and judging by the comment one hears, if the ground ear is applied, would signify "Buying at Home" is a topic under lively discussion.

The Times acting as a courier, or messenger, for the retail merchants of this city as the one "home daily" has a distinctive honor in that no messenger in Fulton ever before daily made its trip into hundreds of local homes bidding the mighty host to take account of itself, to educate and expedite a prosperous, loyal Fulton. When the people of the city receive their message to join in the forward march, and appreciate the daily interest manifested through the offices of the city's representative organization—the Chamber of Commerce—is it fair to overlook the messenger?

Big men nowadays, it is said, are big because they get others to do their work. Napoleon said, "I win my battles with my marshals."

The Evening Times in its capacity as marshal doffs its hat to no superior or prouder message bearer. Its birthright and character give the stamp of approval.

Hats off to our Retail Merchants—and too, to the Home Paper.

A REAL SECRETARY OF STATE

That President Wilson would retain Mr. Lansing as Secretary of State was almost a foregone conclusion. A political appointment to this post at this juncture would have gone against the grain with the public. The country has not yet recovered, and will not soon recover, from the disastrous effects of confiding the conduct of our foreign relations to a politician who looked upon his office as a mere sinecure earned by partisan activities.

The critical condition of our relations with Germany makes it imperative to have an experienced and competent diplomatist at the head of the State Department. Mr. Lansing has the ability and the training as an international lawyer which are needed in the conduct of the department's business. He possesses, in addition, a familiarity with the details of the various negotiations now pending which it would have taken a secretary appointed from the outside much precious time to acquire. He was the logical choice for the secretaryship and the country will be glad to see logic considered and professional capacity recognized in the selection of that member of the Cabinet who most of all needs to be a self-reliant specialist.

But if that rule is accepted without question in an emergency like the present one, why should it not be accepted at all times and by every President? Nobody can tell in advance whether or not an administration is going to have fair weather for four years in foreign affairs, and it is taking chances to put in the Secretary of State's office a man with no experience or qualifications as a working capital. International relations are a pitfall and a mystery to a politician of Mr. Bryan's class. Why tempt fate by throwing on such an appointee burdens which he must either dodge or devolve on some subordinate?

The country should never have another Secretary of State who does not measure up in knowledge and training to the special requirements of that very difficult post.—N. Y. Tribune.

ORVILLE WRIGHT WAS GIVEN HONORARY DEGREE

Hartford, Conn., June 25.—Orville H. Wright, the aeroplane inventor, received the honorary degree of doctor of science at the eighty-ninth commencement at Trinity College Tuesday.

Commencement was observed without a salutatorian from the graduating class, Thomas H. Robinson of Waterbury, whose scholarship won him the honor, being barred from it and from graduation because of failing to pass the gymnasium requirements. Honorary degrees were conferred as follows: Master of Arts, Leigh Robinson Gignilliat, head of Culver School, Culver, Ind.; Doctor of Science, Orville H. Wright, aeroplane inventor, of Dayton, Ohio; Doctor of Letters, William H. C. Carlton, head of Newberry Library, Chicago; Doctor of Laws, Marcus H. Holcomb, Governor of Connecticut.

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

Albany, June 24.—According to statistics gathered by Charles H. Betts of Lyons, a delegate to the Constitutional convention, in the States where capital punishment has been abolished crime has decreased.

Delegate Betts opposed the continuation of capital punishment in this State and advocated the proposed constitutional amendment which seeks to eliminate it at a hearing before the committee on Bill of Rights. He presented some valuable facts concerning the results following the abolition of hanging and electrocution as presented by various States.

It will be remembered that during several sessions of the legislature of this State attempts were made to pass a bill providing that capital punishment be discountenanled. The measure failed of passage, however in each ure failed of passage, however in eash instance. Public sentiment was aroused to a high pitch and those who advocated life imprisonment for capital crime and those who believed that a life for a life should be the State's method of procedure, clashed at the committe hearings. These same forces are at prersent at odds with relation to the action of the delegates to the convention upon the proposition.

At the present time there are three proposed amendments to the Constitution advocating the abolition of capital punishment. One was presented by Mr. Betts, one by Delegate William R. Baynes of Brooklyn and the third by Delegate Richard H. Curran of Rochester.

There are four states in the Union which have abolished capital punishment: Wisconsin, Michigan, Maine and Rhode Island. It is shown by Delegate Betts that in these states capital crimes have materially fallen off, while in the State still adhering to the electrocution or hanging punishment, murder cases have appeared to increase.

No statistics are obtainable from the States of Minnesota, Kansas, Washington and the Phillippine Islands, which have also abolished the system of capital punishments quite recently, Delegate Betts says. He points out that the Tennessee legislature voted to abolish the death penalty during its session of the present year.

"As a matter of fact," says Mr. Betts, "the death penalty has already been practically abolished by the enlightened conscience of the people. In the county where I live, Wayne county, there has been only one conviction for murder in the first degree in the whole history of that county and that was more than fifty years ago. In the county of Ontario there has been but two or three convictions and executions in the history of that county, while in the county of Yates there has never been one, so that in the district which I represent in the constitutional convention, at least, the death penalty has already been practically abolished by the enlightened conscience of the people."

Delegate Betts says that the county judge in his county has declared to him that it is almost impossible to get a jury to sit on a murder case on account of the instinctive opposition to the death penalty.

"The theory on which the death penalty is retained is that it is necessary for the protection of society," continues Mr. Betts. "If this were true there would be some reason for its being retained. On the other hand, if it is false, as I believe it is, then there is no excuse for the continuance of this cruel and inhuman practice."

WANT TO BE CITIZENS

Justice Hubbs will hold a naturalization term of Supreme Court at the Court House tomorrow. The following applicants for citizenship will be examined:

John Wallace, fourth hearing; Chas. C. Chubb, Michael Kapenekas, Fulton; Pietro Rodriquez, third hearing; John Tobolka, Santoro Picone, Alfred Percy Wise, John Musico, Andrew Kocziszki, Luigi Riccoi, Jesse Anderson, Oswego.

Finish the evening meal by eating Cookies made amidst sanitary surroundings. The Black bakings are as "good as mother's."—adv.

In equal suffrage Kansas, the Governor has announced that Genevieve Chalkley will be one of the two appointive members of the State Industrial Welfare Commission.

It is as if Governor Whitman had appointed Florence Kelley or Josephine Goldmarck to serve on the newly created New York Industrial Commission with John Mitchell.

* * *

In Kentucky, the Republicans have written a woman suffrage plank in their platform. Fearful of progressing at too dizzy a rate, the platform expressly leaves the individual Republican free to vote against it and sets the distant date of November, 1917. Still it is another rift in the Solid South.

* * *

In Illinois, the recent election of Justices of the State Supreme Court shuts the door of hope in the face of the interests that have been seeking to have presidential and municipal suffrage for women declared unconstitutional in that State.

A year ago the State Supreme Court upheld it by a majority of one. This election puts on the bench a safe and ample majority.

According to Jane Addams' two years' experience with woman suffrage in Illinois has increased its popularity so that there are now hardly any open opponents to be found in the state. The bill introduced into the last legislature to repeal the law never got out of the committee.

* * *

1915 is the centenary of the birth of Elisabeth Cady Stanton, who lighted the torch of a woman-including democracy at Seneca Falls in 1848. It was Mrs. Stanton who insisted at that famous convention that woman suffrage be included in the platform which demanded that women have a legal right in their wages and their children.

"But, Lizzie," protested Lucretia Mott, the Quakeress, "thee will make us ridirulous." And it did for they became the butt of ridicule from Maine to Texas.

It is of interest to note that the torch which was lighted by the mother sixty-seven years ago is now being carried by the daughter, Harriet Blatch, who is carrying a literal torch of bronze from Montauk Point to Buffalo. The series of mass meetings held all along the way will end in a monster one at Buffalo on July 31. The torch was made and designed by Aliee Stocks of the New York School of Applied Design for Women.

* * *

"Old politicians," said the late Robert Burdette, "are afraid of California's women voters, and good citizens are delighted with them."

"When women begin to use their brains and think for themselves," said Maude Adams, "they believe in woman suffrage."

STATE FARM NOTES

The oldest student enrolled in the farm demonstration schools conducted last witner by Cornell University was eighty-two years old, and the youngest fourteen.

* * *

According to the United States crop reports the wheat production of New York will be a little greater than last year; oats nearly ten per cent greater, and barley slightly less.

* * *

Census figures show that New York is first in population, first in value of manufactured products, and eighth in value of all crops, being surpassed by Illinois, Iowa, Texas, Ohio, Georgia, Missouri and Kansas, in the order given.

* * *

Seventeen-year lolusts are likely to appear soon in New York State. The federal department of agriculture states that Green, New York, Richmond, Schenectady, and Westchester counties are likely to be visited, and that of these, Richmond county is reasonably sure to have a serious outbreak. The damage done by the cicadas, or locusts, is due to the egg punctures made by the female cicadas in the twigs of trees. The twig-ends de and in the case of young growths, the symmetry and even the vitality of the trees may be seriously impaired.

CURTAIN OF FIRE HUNG BY SHELLS

Correspondent Tells of Visit to 'Arras Fighting Line.

TERRIFIC HAVOC BY FRENCH

"Wonderful German Trenches" Not Found Except as to Officers' Quarters—Frenchman Coolly Digs Carrots in Direct Line of Fire of the Machine Guns.

One of the most striking and interesting dispatches from the battle line in France was that published by the New York Times from its special correspondent, Wythe Williams, who describes the trenches north of Arras, where some of the fiercest fighting of the war has recently been taking place.

"On this trip," writes Mr. Williams, "I covered a large stretch of territory that until a few weeks ago—some places only a few days ago—Germany had claimed as her own by right of conquest. I walked through miles of trenches that only last February I peered at through a periscope fearfully, because any instant the periscope was likely to be shattered by a hostile bullet.

"The result of this long walk taught me many things.

"In their stories of the marvelous German trenches humorists went so far as to have them installed with baths and electric lights, but we have all believed them to be dry, with comfortable sleeping quarters and as hygienically perfect as the German organization ever made anything.

Elegant Officers' Quarters.

"What I can new say is that the correspondents who permitted this legend to go over the world must have been grandly entertained by the Germans in special sections of their trenches set aside as quarters for the officers.

"This part of 'the labyrinth' I visited was to have formed part of the new boundary line of Germany. The Germans dug themselves in to stay.

"I found myself in a mud ditch, much narrower than any I had ever traversed. The bottom, instead of being corduroy lined, was rough and uneven, making very hard walking.

"Then we came to a wide place where a sign announced the headquarters of the German commandant. The sides of his underground cavern were all solid concrete, with cement [illegible] walls separating four rooms. Paper and artistic burlaping covered the walls and ceilings, and rugs were on the floors. The furniture was all that could be desired. There was a good iron bed, an excellent mattress, a dresser with a pier glass and solid tables and chairs.

"The rooms consisted of an office, dining room, bedroom and a kitchen, with offshoots for wine, and sleeping quarters for the orderlies and cook. ...ence should have the best accommodation transportable to the firing line, but the fare of the common soldier, I should judge, averaged quite a third below that of the French—both privates and officers, all of whom share the common lot, with straw for bedding and either mud or stars for the roof.

Terrible Little Destroyers.

"The second great lesson I learned is that the 'rideau de fer' is the most terrible thing ever devised by man.

"Behind the infantry lines there seems to be an endless row of 'seventy-fives.' These terrible little destroyers can whirl in any direction so when the order comes for the 'rideau de fer' at any point literally hundreds of guns within a few seconds are converging their fire there, dropping a metal curtain through which no mortal enemy can advance.

"In this section the French dropped nearly a quarter of a million shells in one day. Unlike the English shrapnel, which makes little impression against earthworks, the French use explosive shells almost entirely.

"As I walked over this section after the curtain had been lifted I was absolutely baffled for descriptive words. All the earth in that vicinity seemed battered out of shape. The dead needed no burial there. Down under the wreck and ruin the dead all lie covered just where they fell.

Grubbing After Carrots.

"I saw a man grubbing in the soil so directly in the path of the shells that I don't believe they missed blowing off his head by more than two feet. An officer called out to him, 'Come out of that before you are killed!'

"The man then raised his head and looked our way. He was a soldier. His cap was slanted over one eye, his pipe dangled from his mouth.

"'What are you doing there?' the officer called. The man raised his dirty fist to his cap and said, 'Digging carrots.'

"I noted the attitude of the German prisoners. As a French officer approached a German soldier, true to his years of iron discipline, leaped to his feet and stood rigid as a poker, but never the raising of a hand to cap, never the salute to the Frenchman.

"Of a German noncommissioned officer I asked, 'How long do you think Germany can hold out against so many enemies?'

"He stood very straight, looked me directly in the eye and said, 'Germany knows she is beaten, but she will fight to the last cartridge.'"

FIRES IN ICEHOUSES.

They Are Easily Started and Particularly Hard to Handle.

Icehouses, despite their damp contents and their simple structure, have a high place among special fire risks. No kind of building is such a paradox. Apparently an icehouse is as safe against fire as a pump log or a mud scow; yet give the flames but half a chance and nine times in ten they work a total loss.

Under ordinary conditions an icehouse fire starts easily. The walls rise without masonry direct from the ground; grass fires and brush fires creep into contact with the bare wood. Dry straw and hay lie all about. Damp sawdust within often takes fire of itself. Tramps, never over careful in their smoking, seek shelter in the buildings. The saw tooth roofs could not be better planned to catch sparks from passing trains.

And when the fire has started, it is uncommonly hard to master. In most cases it gets an overpowering headway before the fighters can assemble. Hydrants are often lacking. If the buildings are full of ice and the covering straw, the firemen can work only from the outside; if the buildings are empty, the great spaces give the flames both draft and sweep. And the walls, by their peculiar construction, double or triple with twelve or eighteen inch spaces within, packed with tan bark or other combustible filling, usually baffle all attempts at reaching and extinguishing the well fed fire within them.—Boston Herald.

The First Houseboats.

The first houseboats in this country were developed on the Mississippi river and were called "shanty boats." As the name implies, they are more or less of a shelter or shanty built on a small boxlike scow or float of logs, usually containing but one room, in which cooking, sleeping, living, trading and very often gambling were conducted. These shanty boats often started from St. Louis or points farther north and drifted with the current, assisted and steered with long sweeps all the way down the river to New Orleans. Here they were sold or deserted by their owners, it being practically impossible to get them back up the river against the current without towing, the cost of which was prohibitive.—H. W. Lowerse in Countryside Magazine.

Burned Out Fuse Plugs.

When a house fuse plug "blows" out and there is no other at hand take a bit of tin foil—the covering from a pack of tobacco or chewing gum will do—and fold it once, making the strip about one-half inch wide; then lay it over the contact points of the plug and screw the plug into the receptacle. This will make a connection and will not produce any more body than if the ordinary fuse wire were used.—Popular Mechanics.

Her Allowance.

"Do you give your wife an allowance?" "No. She takes it."—Chicago Herald.

LITTLE TIMBER LAND DESTROYED BY FIRE

Albany, June 25.—Of the 13,700 acres of mountain land burned over by the recent forest fires in the Adirondacks, less than 200 acres were timber lands, C. B. Pettis, superintendent of the state forests, reported to the Conservation Commission. The remainder was brush land, open plains of land which have been burned before. The fires on state property, he reported, were insignificant.

The commission recently put into commission five fire partol automobiles by the use of which it is hoped to reduce the number and extent of forest fires in the future by speedily detecting them and rushing fire fighters to extinguish them.

Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

What is the cause of motors failing to pick up, misfire, etc., after slowing down for a short distance?

Quite often loading up of fuel in the inlet passages causes this condition, but more frequently poor carburetor adjustment. A carburetor, especially one with two jets, can be adjusted for quick pick up.

I have a four cylinder motor in which the crank shaft is slightly out of alignment. Is it practical to use this shaft as it is?

If the crankshaft is out of alignment so that it is noticeable in engine operation, it will pay to have the shaft repaired, if that is possible, or have a new shaft installed. You can overcome the difficulty for awhile by taking up the misalignment in the bearings, but with the crank shaft itself sprung, the trouble will return.

Should the use of hard water, containing lime, in the radiator of a car be avoided?

Water containing lime should be avoided. Use rain water instead. Water with any considerable amount of salts, whether soluble or insoluble, should not be used.

Under ordinary conditions about what length of service in miles should the three speed selective type of gearset give before needing replacement or becoming excessively noisy?

A gear set usually operates for more than 10,000 miles before it needs attention, and many have been run more than this without requiring more than a change of oil.

When my car is standing and the engine is running with the brakes set there is a knock in the gears. What causes this?

You state that there is a knock in the gears when the motor is running idle, but you do not say whether you mean the timing gears or the gears in the gear box. If it is the timing gears that are making the noise the trouble must be caused either by the gears being loose on their shafts or else the bearings are loose. In order to find where the trouble is it will be necessary to go over the motor. If the knock is in the gears in the gear box it must be caused by loose bearings.

Will you please tell me whether in making connection between two wires it is preferable to splice the wires or loop the ends and hook the loops together?

Splicing the wires has the advantage of making a joint that is compact. Such a joint takes up very little more space than the wire itself, and a spliced joint is also very easy to insulate, as it can be very readily wrapped with tape. This joint makes a good electrical connection and also is more flexible than the loop type. The main advantage of the loop joint is that it is not so easily pulled apart.

Is the amount of current consumed for ignition constant or do different engine speeds or different road conditions cause it to vary?

The consumption of current is proportional to the motor speed. For instance, at 600 revolutions twice as many sparks are required as at 300. However, no more current is required to produce a single spark at 600 or 3,000 for that matter than is required at 300.

My car gives me a lot of trouble through overheating. I am unable to run over eight or ten miles before the water boils in the radiator. The timing is right, the fan works properly, also the pump. There is no obstruction in water lines, and there seems to be nothing wrong in the timing or water circulation. The magneto is advanced as far as possible and I am using a lean mixture. What is the matter?

You have named practically all the conditions that might cause overheating, yet since the trouble is still there it would seem that the search has not been thorough enough. Overheating may be due to a defect in the cooling system, rich mixture, retarded spark, improper lubrication or incorrect valve timing and possibly a slipping clutch or excessive friction in the chassis. Under the first head there are several places where there might be difficulty. First determine that the water is circulating properly by emptying enough water out of the system to uncover the return connection to the top of the radiator. Then with the motor running note whether the water flows freely. If it does not, fill the radiator full of water and run the motor until the water boils. Then feel the various parts of the cooling system, noting the relative temperatures. For instance, if there is an obstruction in the return water header, such as a piece of loose rubber, the water on one side of the obstruction will be hot and on the other cool. Similarly, if the pump is not operating due to a broken vane or a sheared pin that holds the vane to the shaft, then the return header will be very hot, while the lower part of the radiator and the connection from thence to the pump will be cool. If the radiator is clogged up, the top should be very hot and the bottom cooler than usually. It may be that the fan belt is too loose.

Children's day exercises are to be held at the church Sunday evening, June 27.

The church was crowded at the Closing day exercises Friday evening. The children doing credit to their teacher, Mrs. Fae McDougall, and Mrs. Stella Gates, who helped train them, and to themselves. Miss Fannie McDougall and Miss Mary O'Connor graduated from this school and many others from the grades. District Supterintendent Gardner presenting the diplomas and also giving an address in closing the exercises which were enjoyed by all. The receipts of the ice cream social following the entertainment were $17.15.

Quarterly meeting was held here Sunday with District Supertendent Miller present. An interesting sermon by Mr. Miller was enjoyed by a good-sized congregation.

Miss Gertrude Ingersoll returned Saturday from teaching in Nyack for the summer vacation with her parents, Mr. and Mrs. T. E. Ingersoll.

The following scholars took Regents' examination: Misses Mary O'Connor, Fannie McDougall, Eva Holbrook, Hazel Holbrook, Mildred Gates, Rebecca Allen.

The barn of Linus Dubois was struck by lightning Tuesday and burned to the ground. There is a small insurance.

Mrs. George Gates and family entertained her grandfather, John Barnes, and his son, Clarence Barnes and wife of Fulton Sunday. They came by auto.

Mrs. Maude Umbeck of Phoenix returned home Monday after spending a day or so with her parents, Mr. and Mrs. H. L. Brown. Her nephew, Ira Stvens, accompanied her home.

Mrs. Betsy Wright is somewhat better his week.

Mr. Henry Kinne, jr., and family of Fulton have moved out to the farm of his father here.

Henry Kinne, sr., is staying with his son, Henry. He is improving from his illness.

Haviland Sikes is ill and it is feared he has diphtheria. Dr. Terpening of Fulton has sent a culture to Albany to ascertain positively. It is a mild case.

Mr. and Mrs. Ira Baker and child of Solvay were Sunday guests of his aunt, Mrs. H. L. Bowen and family.

Mrs. Stanley Bateman is convalescent.

Mr. and Mrs. William Bateman of Volney Center were Sunday guests of his brother, Stanley B.

VILLAGE PROTESTS RATES

Mexico—The local board of fire insurance agents has forwarded a protest to the State Board of Fire Underwriters asking that the increase in rates for the village made in the revised tariff for Oswego county be restored. It is claimed that the rates are without reason, particularly as the village has but recently installed a municipal water system and now has ample fire protection.

BROCKVILLE PROTESTS CONGRESSMAN'S PLAN

Relative to Congressman Mott's plan to a big warship on Lake Ontario, the Ogdensburg Journal says: The proposition to increase the fleet of "war ships" now on the Great Lakes will undoubtedly arouse the ire of the Brockville Times, which has been protesting for years against the "violation" of the treaty between the United States and England which binds both countries not to maintain forts or war vessels on the Great Lakes. Perhaps the Times will see in the latest move to increase the "lighting power" of the lake fleet an insidious attempt on the part of Uncle Sam to seize Canada at a time when Johnny Bull has his hands full on the Continent. But Brockville can be expected not to surrender without a struggle.

Ta-ra-ta-ra! Order out the home guard!—Palladium.

NO ESTIMATE OR GUESS WILL GO

Shippers Must Declare Actual Value of All Consignments

Very soon the actual value of every shipment carried by an express company will have to be declared by the sender, under the application of the Cummins amendment to the interstate commerce act. The amendment was to become effective June 2d, but it probably will be July 1st before the express companies are able to supply the new forms required to all their offices. In New York city the forms have been in use for a day or two. Fulton's supplies probably will come along early next week.

It is important that shippers who use the express companies become familiar with the provisions of the Cummins amendment without delay. The new requirements are clearly set forth in a circular of instructions that has been sent by one of the companies to its officials, agents and employes.

Rules Laid Down for Shipper.

The circular is as follows:

Under the conditions brought about by the passage of this law, a specific declaration in writing, of the actual value of each and every shipment is necessary.

When goods are hidden from view by wrapping, boxing or other means and the express company is not notified of the character thereof, the shipper's declaration of such actual value may be made by notation "Not exceeding $50.00," or "Not exceeding $50.00, or 50 cents per pound actual weight," as the case may be, to be entered in the blank space following that portion of the receipt reading "Value herein stated and warranted by the shipper to be." Said notation, when entered in the receipt by an employe of the company, must be made in writing; when entered in the receipt by the shipper, it may be either written or stamped.

Receipt must be signed by the shipper or his representative in blank pose, before delivery of the receipt.

If the shipper is not present when the receipt is issued, his representative must sign for the shipper. To illustrate: If a shipment is made by John Jones and tendered by James Smith, the name "John Jones" must be entered immediately following the words "received from," and "James Smith" must sign on the line provided for shipper, "John Jones, by James Smith."

Should shipper or his representative refuse to state the value or subscribe to the notation "Not exceeding $50.00, etc., if such is the case, or if he declares a value which the agent or employe receipting for the shipment knows to bel ess than the actual value the shipment must be refused.

The amount of a C. O. D. or an invoice accompanying the shipment may no longer be accepted as a declaration of the value of the shipment.

Shipments of Live Stock

Live Stock Contract—Supplement No. 1 to official express classification No. 23 also contains a new form of live stock contract issued to conform to the requirements of the new law.

Particular attention is directed to the notice to shippers, at the head of the new form, reading as follows:

"The shipper must state the actual value of the shipment, which value must be inserted in the contract. This company's charges on live animals, live birds, live stock and reptiles are based upon the actual value per animal, bird or reptile, which value must be declared by the shipper on each animal, bird or reptile in the shipment, and in case the shipment consists of more than one animal of exceptional value, each animal must be described by name or registration number and the actual value thereof stated in the contract."

Under the new regulations the shipper cannot lawfully ship at released rates by declaring a value less than actual value; declaration of the actual value is a necessity, and in the event a shipper refuses to declare the actual value, or declares a value which the agent or employe receipting for the shipment knows to be less than the actual value, the shipment must be refused.

Special contract for the transportation of paintings and statuary, concealed fromv iew and of a value over $550—The same requirement is necessary in the declaration of the actual value of such shipments as applies in the case of live stock.

Third-class matter—The true value, which must not exceed $10, or the notation "Value not exceeding $10," must be placed on all packages of third-class matter by the shipper, and entered on the receipt.

Shippers special forms of receipt used under agreement—Where special forms of shippers' receipts are now being used under agreement, such forms may be continued until otherwise instructed, but shipper must make a declaration of value thereon as provided in item No. 1.

PLAN TO MAKE JULY 5 PROCTOR DAY IN UTICA

Utica, June 25.—Residents of East Utica believing that proper recognition by the public should be shown Thomas R. and Frederick T. Proctor for their large public benefactions are planning to hold a celebration on July 5, to be known as Proctor day, to which the whole city will be cordially invited to lend its presence, and to continue the celebration every year.

The East Utica Public Library was donated by Frederick T. Proctor and Roscoe Conkling and Proctor parks were gifts to the city of Thomas R. Proctor. Frederick T. Proctor developed the beauties of Frederick T. Proctor Park, which is the garden spot of the city, though this park has not been formally turned over to the city. Mr. Proctor has, however, always generously allowed the public to visit the park and enjoy its loveliness.

For these things and because of their public-spiritedness in other ways the fathers of the idea of holding a Proctor day celebration believe that some sort of recognition should beg iven them. A meeting was held at the home of William E. Doyle, 919 Rutger street, on Monday evening, when the matter was launched and plans were begun for the holding of exercises on July 5 on Albany square in front of the East Utica Public Library and at beautiful Frederick T. Proctor Park.

S. LIPSKY & SON

FIRST STREET — FULTON

FULTONIANS SIDESWIPED BY A DINKEY CAR

That former mayor John Boland and Deputy County Clerk John J. Little were not seriously injured Wednesday in Oswego when a trolley car sideswiped the men as they were standing in E. 1st st., is due more than likely to the slowness by which traffic moves in the city than to their ability as jumpers.

The men were awaiting the arrival of the car bound south, when the dinkey car bobbed from the alleyway alongside the trolley terminal, the rear end sweeping and bumping both of them in an emphatic and forcible manner. While no bones were broken in the bodies of either of the men, they both sustained some severe bruises which will incapacitate them from doing any manual labor. Mr. Boland was able today to look after business and Mr. Little went to his official duties in Oswego as usual, but both of them realize that homething has happened.

Mr. Little's bodily injuries are not the least of his worries, as during the melee he lost his gold watch and a handsome charm, both of which were presented to him by the members of his family.

FEED DEALERS MEET AT UTICA TODAY

Utica, June 25.—The fifth annual convention of the Tri-State Retail Feed Dealers' Association is in session at Hotel Utica commencing yesterday morning at 10.30 o'clock, when the address of welcome was made by Mayor James D. Smith. The opening prayerr will be made by the Rev. Sherman Haven of Sangerfield and the response to the address of welcome will be made by the Hon. Wilson S. Moore of Candor. This will be followed by roll call, reports and other routine business.

Several Western manufacturers will be present at the Friday sessions, which begin at 10 a.m. when papers will be read on "Co-operation Between Manufacturers and Retailers." The morning session will end with the election of officers to succeed the following: President, Charles L. Carrier, Sherburne; vice president, John C. Harrington, Montrose, Pa.; secretary, H. M. King, Waterville; treasurer, M. J. Mudge, Afton. Additional member of executive committee, E. C. Jones, Bullville.

K. OF C. BAND OF THIRTY-FIVE MEMBERS

The Oswego Council, Knights of Columbus has organized a band comprising thirty-five pieces. Fred W. Preston, for years connected with bands and orchestras, will be leader, and James E. Colbert is chosen manager.

30,000 THERMOMETERS FOR ARMY SURGEONS

Watertown.—Thirty thousand clinical thermometers have just been completed at the thermometer plant of the Randall-Faichney company in State street and shipped to New York, from which place they will go Thursday to England on the steamship New York, to be used by the army physicians and surgeons in the hospitals.

This order is only one of many large ones received by the local company, however, since the war in Europe started last August, and many thousand of clinical thermometers made in Watertown are now being used in the hospitals of England, France and Russia. Shipments from the local factory are being made nearly every week, and the business of the company is exceptionally good.

THIEF LEAVES TRAIL OF SCENTED MONEY

Manhattan, Kan.—Mrs. Mary Smith who conducts a restaurant here, was robbed a few nights ago of $51. The money was taken from a box of heavily scented face powder in which Mrs. Smith had concealed it. The same night the ticket agent at the Union Pacific depot sold a negro a ticket to Junction City and noticed that the money he received was heavily perfumed.

The agent was able to give a description of the negro to the officers, and several business men of Junction City remember receiving some of the perfumed money. Because he shed tainted money as he went, the negro has been trailed to Kansas City, but here his roll apparently gave out, as no further trace of him has been found.

THE QUIRK TODAY

The following synopsis of the sterling and dramatic Lubin photodrama, "Eagle's Nest," written and played for years by Edwin Arden, in which Mr. Arden and Romaine Fielding, Lubin's adventurous director are featured, shows the extent to which Lubin goes without apparent limit in producing features for public approval. The east in full:

Jack Trail, Edwin Arden; Robert Blasedon, Romaine Fielding; Rose Milford, Eileen Sedgewick; Goeffrey Milford, Harry Kenneth; Sheriff Haggett, Clark Comstock; Sierra Suze, Josie Sedwick; Slater, Robin Williamson; Dibsey, Ed. Sedwick; Philip Dane, J. E. Crofut; Mrs. Dane, Josephine West; Mr. Silsbee, Arthur Phillips; Mrs. Silsbee, Anne Ford.

Suppertime comes, you're not ready for it? Then order from the grocer Black's fresh-every-afternoon rolls and buns.—adv.

The VICTOR system of changeable needles enables you to meet every acoustic condition

$15

What's the use of waiting until you feel like paying $100 or $200 for a Victor-Victrola when you can hear all the Victor music and fun NOW on this genuine $15

Victor-Victrola

Get it today

Come in and hear it any way. We're glad to demonstrate it to you.

It gives you perfect control of the tone volume and enables you to adapt every record to the acoustic limitations of any room.

The different kinds of Victor Needles give you different and distinct gradations of tone. Without this changeable needle system, it would be necessary to have several instruments, each with a different tone volume, to give this variation.

You can use the full-tone needle, the half-tone needle, or the fibre needle, to suit the individual beauty of each record to its particular acoustic surroundings.

You choose the volume of tone and play each record as loud or soft as *you* personally wish to hear it, without in the least degree changing the artist's interpretation.

Come in and hear your favorite music played with the different needles and you will fully appreciate the infinite variety of charm afforded by the Victor system of tone control.

VICTROLAS $15 to $250—Terms to suit your convenience, if desired—VICTORS $10 to $100

LOCAL WOMEN WILL ATTEND BIG BANQUET

Mrs. Ray Briggs and Mrs. James Gardner of this city, will leave for Ilion, N. Y., tomorrow morning and tomorrow night they will attend the banquet which will be given by the Remington Arms Company of that place to their employes, in honor of the opening of the large factory recently finished at Ilion. The new factory is over 900 feet long, and the banquet will be held in the interior of the building. The work of installing the machinery in the new plant will begin next week.

Ray Briggs and James Gardner as well as several other local men are now in the employ of the Remington company. Mrs. Gardner and Mrs. Briggs will attend the banquet as guests of the company.

Among the Fultonians in the factory are Harry Wilcox, Horace Burdick, Edward Smith, Ralph Waugh and others. Most of these men are former employes of the Hunter Arms. The Ilion factory is working night and day at present in an effort to fill several war orders.

OUR FLAG TO FLY ON EVERY OCEAN

Great Movement Launched to Increase Trade Fleet---Expands National Wealth

The utter lack of an efficient American merchant marine has been forcibly brought home to the nation through the medium of the world wide war now raging. While the question of the urgent need of American ships to carry American manufactured goods and farm products has been agitated for years, still the average citizen has felt that the matter was of no special interest to him and that it was only a political move.

That we have been derelict in our duty, as a nation, in not providing legislation for the proper upbuilding of a great merchant marine is just beginning to be understood by the people.

Will Carry Message to All.

Through the desire and need for American supremacy on the high seas there has developed within a few months a great movement to carry the message into every corner of the land. Men prominent in every walk of life are identifying themselves with the cause, and the Kansas farmer as well as the workman in the Ohio factory is to be shown how it is to his interest

P. H. W. ROSS.
[President of the National Marine league of the United States.]

that the United States should have more ships for the transportation of the products of land and factory to foreign shores.

Prodigies of marine expansion have been performed by Germany and Japan within the last quarter of a century, and it is urged by the founders of this movement that now is the time when this country should bend all its energies to the task. Following a long period of continental development, it is said that the power and wealth of the nation can be doubled by the acquisition of an adequate merchant marine.

The organization that will have charge of spreading the gospel of our marine expansion is the National Marine League of the United States, with headquarters at Washington. P. H. W. Ross, for many years a country banker, is president of the league and has taken active charge of its affairs. The league is absolutely nonpartisan in character and does not represent any interest or party. Its sole purpose is to educate the people of the nation to the great need of more ships and through them to bring home to congress the dire necessity for a recodification of our maritime laws, so that the "foreign shipping proposition" may be made sufficiently attractive for American citizens to invest their capital, labor and lives therein.

Mr. Ross Speaks.

At the first meeting of the newly created federal trade commission, recently held in New York, Mr. Ross appeared by invitation, to present the purposes of the league and its relationship to the economic conditions of the country.

"Upon the foreign trade of our country depends not only the financial prosperity concerned," said Mr. Ross, "but the well being of every woman and child in the United States regardless of occupation and locality. The grave questions of regularity of employment for the laborer, continuity of run of mill for the mill owner, stability of the domestic market for the farmer, all depend upon the regularity of sale of the things labor and capital conjointly make and the things the farmer raises from the surface of, or the miner digs from beneath the soil of America.

"Regularity of sale of all American products is not only the key that unlocks nation wide and permanent prosperity to all workers, but is the solvent of the problems of our nonworkers, of our unemployed. The attendant evils of idleness—viz., crime, discontent, the 'white slave' traffic—all are chiefly attributed to irregularity of employment. They are aggravated in our case because we open the portals of our country to all the white people of the earth, inviting them to cast their lot with us, and, by implication, assuring them of steady, honorable employment if they come. They do come. Do they get their contemplated steady jobs? I leave it to your own observation and the annals of our charity organizations and suppression of vice societies to answer that question.

"It is not true to affirm that our domestic or home market commerce will provide sufficient avenues of employment to give 'steady jobs' to all who are out of work. Invaluable as the home market is, it is always hectic in its movement. Moreover, the productive capacity of our manufacturing establishments has been developed to such extraordinary efficiency that in normal times we can make in four months as much as the home market can absorb in twelve.

Need Foreign Trade.

"Furthermore, domestic commerce labors under this fatal economic defect. It does not reduce our country's foreign indebtedness by one 'jot or tittle.'

"Pennsylvania may sell California $10,000,000 worth of steel products, for example. It is fine business as far as it goes, but nevertheless not one iota of our indebtedness to foreign nations is offset thereby. The volume of our indebtedness to foreign nations opens up a big chapter. Suffice it to say that every citizen in the country is taxed to provide the interest on every conceivable thing we use or consume, save the air we breathe. Fifty per cent of the interest and dividends on American securities is paid to foreigners.

"How can this terrible outgo be offset save by vastly increased exports of American products? There is no other way except by counter investment by Americans in foreign securities, and this avenue of equalization is not open to the average citizen.

"Hence it follows that augmented exports of America is not an academic question, a thing merely to be desired. It is an inescapable necessity upon which hangs the whole fabric of American well being. It is the evolutionary stage of growth at which 100,000,000 people in America have arrived; their necessities cannot be denied.

"This country only exports 5 per cent of its products and even that trifling percentage of export is obstructed by innumerable difficulties attendant upon our lack of control of the ocean transportation of our goods.

"An adequate export trade, available for the average manufacturer, as well as the very few exceptionally large industries, is impossible of attainment unless America has an adequate merchant marine of her own, and thus controls the ocean transportation and foreign delivery of her products.

Citizens Back Ensign.

"Citizens of other countries have stood back of their respective ensigns, to the very great honor, glory and commercial supremacy of those countries. America must do the same; not should, but must. The wheel of destiny has brought our nation to the irrevocable course.

"The federal trade commission has power to make such a study of the governmental conditions and institutions (such as boards of trade, ministries of marine, etc.) in foreign countries as have resulted in successful merchant navies in those countries, with the purpose of establishing an appropriate maritime board, bureau or council for America and of recommending such legislation to the congress as will result in the creation of an overseas American merchant marine.

"The members of the National Marine league do not approach the subject from the viewpoint of any business interest or organization of party, of capital or of labor, but each in the sovereign capacity of a citizen of the republic.

"Through the demand of its citizens, the United States can bring its maritime development to a parity with its wonderful continental development in a manner that will lead to the use of the vast maritime resources of our own country and the employment of our own citizens in the creation of the instrumentality—a merchant marine of our own."

Queer Plants.

The searcher for curiosities among plants finds much to interest him in Kew gardens. There are primroses which blister the hand if stroked, leaves divided into two sections which snap together and imprison any insect which alights upon them, plants which live absolutely on air without any root in the ground, walking plants, sleeping plants and plants which grow whiskers. And all these marvels can be seen by any visitor for nothing.—London Graphic.

BRIDGE REMOVAL TO MAKE IMPROVEMENTS

Contractor Rosoff, who is in charge of the work of filling the old canal bed here, announced this morning the remainder of the Oneida st. bridge will be moved as soon as the S. L. and N. railway company moves its tracks. Mr. Rosoff conferred with the railway company officials in Syracuse yesterday, and urged that they begin work immediately. This the company promised to do. The tracks will be moved to a point further south, and the company will erect a trestle across the canal bed at that point.

As soon as the trolley tracks are moved, Contractor Rosoff will erect a roadway for the maintainance of traffice across the bridge. I. Alderman, who is removing the bridge, will put his gang at work again, and the last section of the Oneida st. bridge will be taken down. As soon as the canal bed is filled to the new street level, work will be started lowering the hump at the intersection of 1st and Oneida sts. The rise at that point will be taken off, the work on the 1st st. portion begining at a point opposite the Waldhorn block, and on Oneida st. at O'Brien's corner. When the improvement is completed the street level will onlly be a few feet higher than the present level of the canal bed which has been filled almost to the required point.

MRS. JANE COVILLE

Mrs. Jane Coville, widow of the late William Coville, died at her home, 209 Seneca st., this morning after a long illness. Mrs. Coville was well known as the oldest woman resident of this city, having just passed her 91st year. She was born in Canada but came to this city when six years old and has resided here ever since.

She is survived by two daughters, Mrs. Justin Hamilton of Auburn, and Mrs. Charles Atwood of Fulton.

Rev. J. W. Barrett of the First M. E. church will officiate at the funeral which will be held from the late home tomorrow afternoon at 3 o'clock. The burial will be made in Mt. Adnah.

CITY ASSESSORS HELD AN INFORMAL MEETING

The city assessors held an informal meeting in the office of City Clerk Scudder this morning. The assessment rolls have been completed and in accordance with the provision of the city charter, will be on file at the office of the city clerk July 1.

Several large proprieties, principally manufacturing plants, will be assessed this year to a greater amount than in previous years, it is said. In the main, however, the assessments will differ very little from former years.

Community Notes

Mr. and Mrs. Bert Slauson left the city today for Lycoming where they will remain for a few days.

* * *

Members of the Y. P. B. are requested to make payment of their dues at the meeting in the Baptist church tonight. It is essential that compliance be made to this request on account of the approaching convention and celebration.

* * *

Dr. and Mrs. Schlappi of E. Broadway and 3d st. have returned from a ten days' visit at Constableville, N.Y.

* * *

Dr. C. Floyd Haviland, who is now visiting his parents in this city, has been appointed superintendent of the Connecticut Insane hospital at Middletown. He will enter upon his duties next month.

* * *

Miss Ada Thayer of Cayuga st. has returned from Rochester.

* * *

Misses Minnie and Jennie True have returned home from their Washington trip. They were accompanied home by their brother Gordon who will remain for a short time.

* * *

Mrs. John Snell of Baldwinsville has been the guest of relatives in this city.

* * *

The M. E. Sunday school and church picnic today on the Oswego Falls fair grounds.

BUILDING COMMITTEE TO HOLD FESTIVAL

The Zion Episcopal church building committee will hold an ice cream festival on the lawns of the Elks club some time in the near future, probably on Saturday evening, July 3, although no definite date has been selected as yet. The use of the lawn was donated to the church by John Stevenson, Exalted Ruler of the Elks.

It is probable that several novel features will be arranged by the committee in charge and further details will be announced later. Burt Atkinds is chairman of the committee.

LEAVE ON MOTOR TRIP TO MAINE

Dr. H. M. Doane and Mrs. Marion Dickerman left today on an auto trip which will include some of the most interesting parts of Maine.

The trip will cover about 1200 miles and the date of return during the first week in July.

GRATITUDE

The Fulton Evening Times expresses gratitude for the liberal support given its endeavors to launch in this city a daily newspaper. This expression of good will is extended to the people in every walk of life---to those who were at first skeptical of the advisability of beginning the publication of this newspaper, and to those who believed that *Fulton* should have in addition to its weekly newspapers a daily that would place the town in the same *category* as other towns of the same *size* of *Fulton.*

NOT AN EXPERIMENT

The Fulton Evening Times is no longer in the experimental stage. Since December 17, 1914, it has issued more than 150 numbers, or approximately 375,000 copies, which represents in the neighborhood of 37,500 pounds of paper made at the big mill of the Oswego Falls Pulp & Paper Co. It will be seen by these figures and the fact that the payroll of Fulton Evening Times is expended with the merchants of the city, that here is an industry of no mean proportions---one that deserves the support of the people, and we are pleased to report, that this newspaper

IS GETTING SUPPORT

Because the citizenship of this city has the proper amount of civic pride to impel it to support a home institution. There are many reasons why our subscribers are numbered by the hundreds, chief of which is that The Evening Times is counted upon as the medium wherein local news is the leading feature, and wherein the people feel that they have a defender of their rights.

The Evening Times is Winning its Way, too Because it is

"A HERALD OF PROGRESS"

A Mystery

Being a Story of How a Murder Case Was Not Solved.

By DONALD CHAMBERLIN

My telephone bell rang and, going to the instrument, I took up the receiver.

"Is that you, Thompson?"

"Yes."

"I'm Parker. I wish you to come down and stay in the house with me tonight. I'm alone and nervous."

"Certainly, old man. What's the matter with you?"

"I can't ask you to dinner, for I haven't a servant in the house."

"Well, I'll be over about 9 o'clock. Will that do?"

"Yes; much obliged."

Parker was the junior partner in a large jewelry firm and a man who never shrank from any duty involving danger. Therefore I was surprised at his shrinking from sleeping in a house alone. He was a widower without children, and though he lived in the house he had occupied with his wife, he took his meals at his club, hiring no servant except for day work. I fancied he must be ill, or he would not have asked any one to sleep in the house with him.

At 9 o'clock I rang his doorbell, and he admitted me himself. He appeared neither ill nor troubled. He led me into an apartment he used for a smoking room, where he produced cigars, and we sat down for a smoke. I waited some time for him to tell me why he wished for some one to sleep in his house with him, but he did not, chatting on ordinary topics until I rose to go to bed. Then I asked him what had made him nervous.

"There is a story connected with it, and I don't feel like telling it tonight," he said. "We are all connected with some disagreeable episode and are apt to make too much of it. Doubtless in a few days or a few weeks I shall think nothing of the one in which I am concerned. Why take up a lot of time going over it with you, especially since it would be unpleasant for me to do so?"

I excused him and went to my room, having told him that I must be up early in the morning and off, for my time for going to business was 7 o'clock, while he did not need to do so till 9 o'clock. I bade him good night, telling him that if he should be wakeful to come into my room for a chat. He said he expected to sleep soundly, and with that we parted.

In the morning I went out, treading softly that I might not awaken my friend, and emerged from the front door before most persons were stirring. A milkman drove up at the time and carried a bottle of milk to a rear door. He looked at me, and I spoke to him, expressing surprise that he should leave milk at a house where no meals were served, whereupon he told me that Mr. Parker drank a quart of milk every day at home.

I called up Parker the same evening by telephone to ask him if he required my services again, but there was no response to the call. I thought nothing of this, for there was no one besides himself to answer, and I presumed he was not at home. Several days passed, and I heard nothing from him. Then on taking up my morning paper I saw under large headlines a statement that he had been found murdered in his bed. The man who left the milk at his back door, seeing that the bottles remained unemptied where he had left them, notified a neighbor, who broke into the house and found Parker stabbed to the heart. A loaded revolver was under his pillow that had not been used.

Horrified, I started immediately to go to the house where the murder had been committed. On the way I met the milkman in company with a policeman. On seeing me the former said something to the policeman, which I did not hear, and the two stopped before me.

"You're wanted at Inspector O'Connor's office," said the policeman.

"I'm going to the house of a friend of mine who has been murdered. I'll call later at the inspector's office."

"You'll have to go with me now," was the reply.

Then for the first time it dawned upon me that I was under arrest for Parker's murder; that he had been killed the night I had slept at his house; that the milkman had seen me coming out the morning after the murder had been committed. The situation flashed upon me and the danger in which it placed me. I am sure I turned pale, and I felt my legs tremble beneath me.

Not a human being knew of my having been called upon by Parker to stay at his house the night he was murdered. I had been seen leaving it early in the morning of the murder. There had not been another person in the house during the night than myself except the murderer. What a pity I had not insisted on Parker's telling me the story connected with his objecting to sleep in the house alone! The circumstance attending my being there, together with the revolver found under his pillow, made it plain as the sun in heaven that he had feared some enemy. But all this was a blank to the rest of the world. An explanation made in a courtroom unsupported by a single clew pointing in the same direction would be set down as a fabrication. However, since I had been a friend of Parker, since my reputation was good, since I could not see how any motive on my part for the crime would be judged would save me. But the case went to trial nevertheless.

It is astonishing how in such cases so much may be made of so little. Parker's wife before she married Parker had been a flame of mine, but he had known all about it, and we had often spoken of it during his wife's lifetime. The prosecuting attorney got hold of this intimacy and built up on it a theory of motive for the murder, handling it so plausibly that it had a marked effect not only on the jury, but on the spectators and those who followed the trial in the newspapers.

He pictured the volcano of jealousy that had smouldered in my breast till the opportunity came, when I could strike for revenge. So graphic, so picturesque was his description of my condition that he almost convinced me.

The pistol found under Parker's pillow should have confirmed my evidence, for I was put on the stand in my own defense, but the prosecuting attorney claimed that I had placed it there for that express purpose. He even attempted to prove that the pistol had belonged to me and brought forth a witness who swore that he had seen it in my possession. This was a clincher on his theory and naturally turned many against me who had previously believed in my innocence.

However, it was impossible to convict me on such evidence. At the conclusion of the trial the judge virtually directed the jury to acquit me. Nevertheless they wrangled over my case for two days, then reported that they could not agree. I was finally discharged with the understanding that I would not again be tried, but in the eyes of the public I was a condemned murderer.

The object of my life now became the finding of Parker's murderer. But where should I look for him? My counsel had made inquiries that might lead to any one who had a grudge against Parker and had failed completely. But there was no reason why I should not go on hunting. I secured access to Parker's papers and spent hours in careful examination of them. Not a word in them gave the slightest clew to any enemy. The police had exhausted the matter of evidence of any tracks the murderer might have left behind him at Parker's house. He had not even left a footprint.

I hired detectives to work with me and directed them to watch every one who had been in any way connected with the murdered man. These persons were continually reporting clews which turned out not to be clews and which they invented for the purpose of remaining in my pay. If Parker had ever had any difficulty with any one he had kept it to himself. That he feared some one was evident from his having called upon me to remain one night at his house and that he had told me there was a story connected with his having done so.

Meanwhile I lived a life of horror. A few of my nearest friends stood by me, but I knew that there were times when some of them shrank from being seen in my company. I could see that I was being pointed out as Thompson, the murderer. What means I possessed were gradually shrinking away under the expense attending my search and the fact that I had given up every other occupation. I became despondent as to ever clearing myself and was thinking of hiding my identity in a foreign land when fate did for me what I could not do for myself. A clew was revealed to me.

One morning the newspapers announced that Judge Morehouse had killed a burglar in self defense in his own house. The evening papers stated that the man killed was not a burglar, but one who had sought the life of the judge through revenge. Years before, Morehouse giving a jury instructions on which they were obliged to convict a criminal accused of defalcation, had sentenced him to a term of ten years in the penitentiary. The term had expired a few months before, and the criminal had been since looking for an opportunity to carry out a threat he had made to kill the judge whom he considered in part the cause of his conviction.

The next development edged closely upon my case. It was that the criminal had been financial manager of the firm in which Parker was a partner. At this point I saw vindication for me. Plunging into an investigation, I unearthed the fact that Parker had discovered the defalcation. I did not learn that he had taken any especial part in securing the conviction of the defaulter, but I surmised that there might have been something galling in Parker having run him down and exposed him.

A natural theory was that the convict, having been discharged from prison, had first killed Parker, then waited for the murder to blow over before attempting to kill the judge. An important point with me was to compare the date of the convict's discharge with that of Parker's murder. Securing the former record, I found that the murder had occurred the second night after the convict's discharge.

Unfortunately the criminal had been shot dead by the judge, so I could get no confirmation of my theory from him. But my circumstantial evidence was so strong that it was believed by all. Every mail brought me letters of congratulation, and I was restored to favor with all my friends and acquaintances.

In time I carried my theory further to account for Parker having called for me to sleep in his home the night he was killed. Doubtless the convict had threatened him at the time of his defalcation; but Parker had not spoken of it, or if he had the fact had passed into oblivion. But Parker doubtless remembered the threat and knew the date that the convict would be liberated. This I surmised was the reason he called upon me for companionship, if not for protection.

Who Defended the Works?

By F. A. MITCHEL

When the Germans were beseiging Paris in 1871 one part of the force came to the very outskirts of the city and encountered a portion of the defenses, something like a revolutionary barricade blocking a street. There was only room for a single company, and its captain before making an attack stood off and, raising a pair of binoculars, examined the works.

They were composed of paving stones, pieces of timber and such other articles as had been brought together for an improvised fortification. But the captain could not see a single man on the parapet. This he did not like. There was the look of a trap about it. If he moved his troops forward he must do so over a distance of some 500 or 600 yards between two walls not thirty feet apart and straight as an arrow. He could not deploy his men by the flank, and as for scattering along the street they would be one behind another, and a shot would bring down every man in line.

Moreover, the captain noticed a dark spot in the works, which indicated that a single stone had been removed in the very center of the fortification. He assumed at once that the aperture was for the muzzle of a cannon, which would sweep the street, doubtless, with the scattering projectiles of the period. That meant that before a force of eighty men—the number under the captain's command—could reach the barricade a large proportion of them would be killed or wounded.

The captain called his first lieutenant, handed him his glass, directed him to take a look at the breastworks and then asked him what he thought about an attempt to carry them. The lieutenant examined the works, then, lowering his glass, remarked:

"What are the orders, captain?"

"The orders are to move forward."

"Then we must move forward, but those who live will have moved backward."

The captain's only response was an order to advance.

Shoulder to shoulder, the men marched on—for, as has been said, they could not scatter—till about a third of the distance had been traversed. Then a puff of smoke issued from the dark spot in the center of the works, and a storm of missiles broke upon the advancing line of Germans. A third of the company fell, and another dozen limped or staggered to the rear.

The rest pressed on, but a few minutes were lost in reforming, or, rather, closing, the gaps that had been made. With steady step they marched till they had covered half the distance between their starting point and the fort. There was light where the dark spot had been, and they knew that the piece had been retired to be reloaded. This gave them courage. It was an old fashioned muzzle loader, and time must be spent after every discharge in reloading. The captain gave the order to double quick, but before they had covered a dozen yards there came another hailstorm, and another twenty men were put out of the fight.

This was terrible slaughter, and the force recoiled. Some stood ready to retrace their steps; others started back. The second lieutenant stood in rear and, striking some of the fugitives with his sword, drove them back toward the enemy. The captain was among the wounded and lay in a pool of his own blood. The first lieutenant cried at the top of his voice "Forward, men!" and started at the head of some thirty soldiers to make the rest of the distance and storm the fort, though the move was now a forlorn hope, for he expected that on reaching it he would find it defended by double the number of those who were making the attack.

When within fifty yards of the barricade there came another storm of missiles. Half the Germans were laid on the stones of the street, while the other half broke and fled. The lieutenant called to them in vain. Preferring death to following them in flight, he turned and ran forward to the fort, expecting every moment to be shot down. He reached the barricade and, with a pistol in one hand, his sword in the other, climbed to the summit. There he stood, bewildered by the sight that met his view.

Not a man was behind the stones. The gun which the recoil from the last shot had driven backward a few feet was there, a thin film of smoke issuing from its vent. Leaning against it was a girl about twenty years old. She looked up at the lieutenant as though expecting instant death. Involuntarily he uncovered.

"Mademoiselle," he stammered in broken French, "where are the men who have been defending this barricade?"

"I have been defending this barricade, monsieur," was the reply.

"You—alone?"

"I—alone. Through a blunder the force that was to have held this work was ordered elsewhere."

"Mein Gott! Has a whole company been driven back by a—a girl?"

At this moment a company of French soldiers came around a corner at double quick. The lieutenant succeeded in making good a retreat, hearing cheers behind him:

"Vive mademoiselle!"

Having joined his commander, he led them again to the attack and finally captured the barricade. He looked for the girl who had defended it alone, but she was not there.

SILK WEAVING IN AMERICA.

Sample of Ribbon Making by an American Manufacturer Which Compares Very Favorably With the Ribbons Which Come From the Looms of Europe. Ribbon Woven at Big Fair.

WAR, which brings with it so much of gloom, bloodshed and heartache, is never wholly an unmitigated evil. It is interesting to trace in history its economic effect upon our own country, and in one particular case the distribution of the silk industry in our own country after the French revolution.

Prior to the French revolution France had almost a monopoly of the silk industry, but when that country was torn by one of the terrible wars of modern times France was found by the silk weavers to be uncongenial for their peaceful occupation, and they sought refuge in other countries, some of them eventually coming to America.

Of course prior to this time the Earl of Southampton, who was treasurer and counsel to the Company of Virginia, was authorized by James I. of England to breed silkworms and manufacture silk in Virginia. This was about the year 1608 or 1609, but a

A SECTION OF RIBBON.

shipwreck overtook an expedition sent out by the Virginia company, and it was four years later that the actual beginning of silk culture was made in America.

Silk is unique in this respect. Its raw material is produced by the cheapest labor in the world, the silkworm being the busy little weaver, but the finished product is among the most costly of merchandise.

To the genius of Charles Marie Jacquard we owe our present facility in the weaving of figured silks and ribbons. Before the Jacquard invention silk weaving of figured goods was indeed a complicated labor.

At the Panama-Pacific exposition there is a ribbon loom in operation which shows great strides in the easy handling of figured ribbons. The section of ribbon shown here is acknowledged to be a masterpiece of ribbon weaving. It would be impossible to give in so short a space any adequate notion of how the weaving is done, but a person interested in the subject could get much information and entertainment out of either the encyclopedia or by obtaining a book which treats of the silk industry in the United States.

PREPARATION OF LETTUCE

When lettuce comes from the market clean in cold water and look it over carefully to see that all dirt and insects are removed. Place on a piece of dampened cheesecloth, then roll up and put on the ice, when it will be ready for use and will often stay fresh for a week. Some persons complain of sleepiness after eating lettuce. This is due to the lactucin in lettuce, which the milky juice contains. This juice may be removed by cutting from the lettuce the lower end of the heads or stalks and then standing the lettuce in cold water for several hours before using. Keep the head intact when you wish to quiet nerves or induce sleep.

The following is a pretty lettuce relish for luncheon or dinner and may be served in a small cut glass dish: Line the dish with lettuce leaves, upon which place either ripe or green olives and tiny red tomatoes. Chill with cracked ice. The olives and tomatoes may be taken with the fingers at any time during the meal.

Ham Balls.

One cupful of boiled potato, one onion and one cupful of ham, chopped. Season with salt and pepper, add a well beaten egg and a little milk. Form into small balls, roll in meal and fry in hot, deep fat. Serve on buttered toast.

A TABLE OF LOGARITHMS.

Its Use In Working Out Complex Mathematical Problems.

A logarithm is an exponent, and an exponent is a number showing how many times another number has been used in any multiplication. Ten times 10 equals 100. It was used twice, and its exponent is 2. Ten cubed equals 1,000, and its exponent is 3; while 10 to exponent 4 equals 10,000, and so on out toward infinity. But suppose that we wish to use 10, say 1¼ times or 1⅝ times instead of twice. Then the exponent must be computed, and exponents thus computed are always printed in tables.

Thus, as I am now writing, the paper, as always, by day and by night, is very near a precious book, a table of logarithms for all numbers from 1 to 108,000, computed out to seven decimal places. To give examples of their use, suppose that you wish to multiply 8 by 11. Look in the table and you will find the logarithm of 8 to be .9030900, and the logarithm of 11 to be 1.0413927. Add these and the sum will be 1.9444827. Look along the column and it will be seen that this is the logarithm of 88.

Easy. But suppose you wish to multiply two strings of figures of from 5 to a dozen. In the great standard mathematical sciences, such as astronomy, physics and chemistry, the multiplication and division of immense numbers are required. Thus, let us square the number 31558149—that is, multiply itself by itself, a tedious job. But this toil can be saved by the use of logarithms. Thus, the logarithm of 31558149 is 7.4991289, taken directly from the table. Then, to square any number multiply its logarithm by 2, and this logarithm multiplied by 2 equals 14.9982578. Now, by looking in the table, the number of which this is the logarithm is 995916962096951. Hours of work are performed in a few minutes.—Edgar Lucien Larkin in New York American.

STONE MEASURE.

There Is No Regular Unit, and It Fairly Revels In Variety.

Owing to the variety of uses to which stone is put, there is no regular unit of measurement employed by the quarrymen, the stone being sold by the cubic yard, cubic foot, ton, cord, perch, rod, square foot, square yard, square, etc. Building and monumental stone, especially the dressed product, is usually sold by the cubic foot or the cubic yard, although this unit varies with the class of stone and with the locality; a large quantity of rough stone is sold by the perch, cord or ton.

Rubble and riprap, including stone for such heavy masonry as breakwater and jetty work, are generally sold by the cord or ton. Fluxing stone and stone for chemical use—as for alkali works, sugar factories, carbonic acid plants and paper mills—are sold by the long ton. Flagstone and curbstone are sold by the square yard or the square foot, the thickness being variable and dependent on the orders received. Granite paving blocks are sold invariably by number, but the blocks are not of uniform size, the value depending on the size of the block and the labor necessary to cut into the shape desired. Other paving material is sold by various units, such as ton or cubic yard.

Crushed stone is usually sold by the cubic yard or ton, the short ton being more generally used. The weight of a cubic yard of crushed stone varies from 2,300 to 3,000 pounds, the average weight being about 2,500 pounds. In certain localities crushed stone is sold by the "square" of 100 square feet by 1 foot, or 100 cubic feet. Crushed stone is also sold by the bushel, 21½ bushels representing a cubic yard of about 2,700 pounds.—Geological Survey Bulletin.

The Senate Barber Shop.

Here's an odd thing about the United States senate barber shop: Although the number of senators has hardly increased at all, the number of shaves has increased at a surprising rate in recent years. The reason is simply that the senate is now inhabited largely by comparatively young men with smooth faces or wearing mustaches at most, and they are obliged to get shaved every little while, whereas the old style senator with a riot of whiskers never had occasion to visit a barber shop except every few months to get his hair trimmed.—Cincinnati Enquirer.

Disgusted.

One day while her grandfather was paying a visit to Florence's home the little girl said to him:

"Gran'pa, your talk about 'perseverance winning' is all nonsense."

"Well, well, child!" cried the grandfather. "Why do you say that?"

"Why," said the little girl, "I've worked all the afternoon blowing soap bubbles and trying to pin them on mother's hat."—New York Times.

A Little Ambiguous.

Musician—You didn't get around to my recital last night. Friend—No. I had a splitting headache. However, everybody told me I should have gone, because you would have made me forget all other suffering.—Richmond Times-Dispatch.

Heard on the Train.

"What book is that you are reading, Jim?"

"'The Sorrows of Satan.'"

"Well, I'll say this for you, Jim; you always do take considerable interest in the troubles of your friends."—Boston Transcript.

Wise men say nothing in dangerous times.—Selden.

Charming and Dainty As Only Youth Can Be

EVENING FROCK.

STRIKING frock of rose colored faille classique with short waisted bodice, softly draped and with winglike puff sleeves of cream lace. There is also a garniture of pink chiffon roses and buds on both bodice and skirt. A full straight skirt of cream daphne silk is primly plaited around the bottom. Over this is worn a second skirt, open at the front, of faille classique closely gathered, the bottom cut in deep points.

Belts and Sashes.

Belts and sashes may be fashioned from the same material as the gown or suit with which they are worn, or sometimes leather or silk is used for contrast. Leather belts are particularly good on cloth or linen costumes, while the soft ribbon sashes are especially lovely on frilly summer frocks.

One of the greatest needs for summer wear is a ribbon sash or girdle. A girdle and sash of shell pink satin is trimmed with French blue shirred ribbon in a lover's knot design and delicate pink roses. The design is used on the two sash ends and repeated on the front of the girdle.

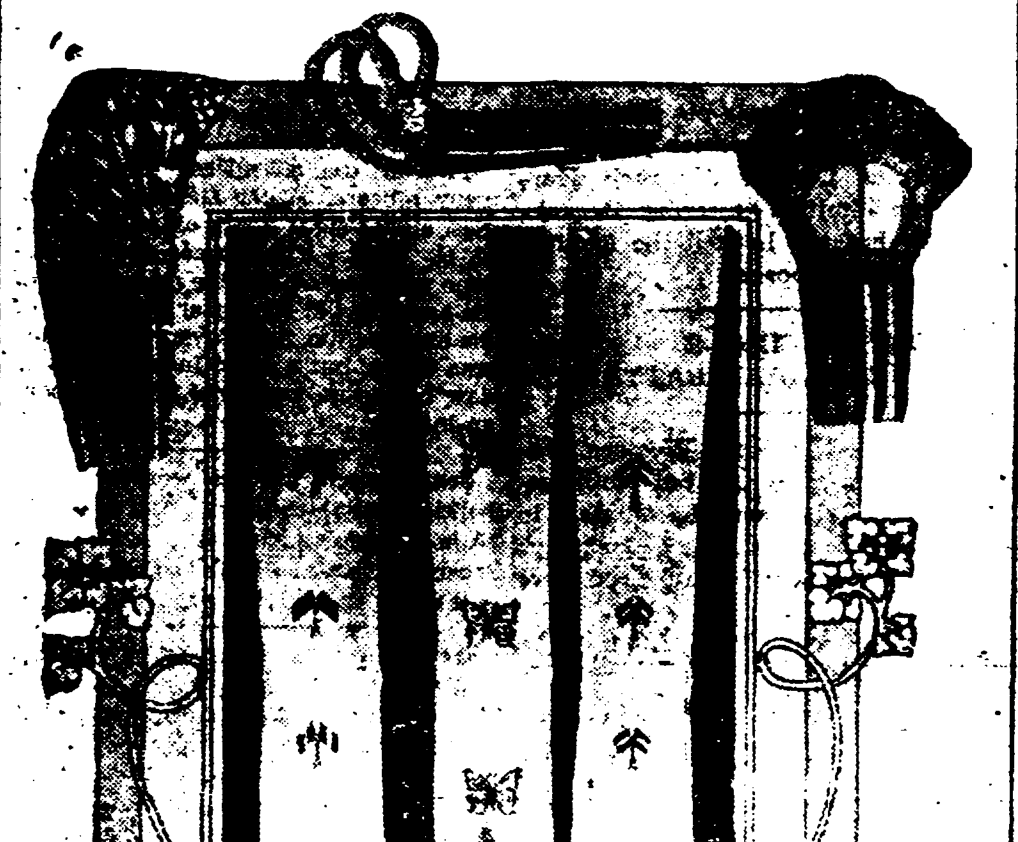
Three New Bathing Caps.

The Tipperary bathing cap is a high model, finished at the top with a long rubber tassel, which hangs straight down the front of the cap. The cap is boned in the front to keep it high and straight and acts as a support to the tassel.

The jockey shaped bathing cap is made in a combination of blue and green, also red and black. The only trimming on this cap is a button.

The Castle cap for beach wear is made in bright green satin, lined with rubber, effectively trimmed with small roses fashioned from green and black satin.

Hosiery and Combs That the Fourth of July Girl Will Wear



HANDSOME TOILET ACCESSORIES.

DO you see the little flags on the ankles of two pairs of the hose illustrated? Well, these are the hose that the patriotic summer girl is going to wear. Butterflies spread their wings upon the pale in the center. The stockings are of finest, purest white silk. The combs illustrated are of tortoise shell. The tops are incrusted with brilliants.

A PAIR OF NEW BOOTS.

They Figured In an Amusing Case of Mistaken Identity.

It may be doubted if there ever occurred a more amusing instance of mistaken identity than that afforded by Theodore Hook, and it came about through a pair of boots. Hook was traveling along the south coast of England and arrived in the course of his journey at Dover.

Alighting at the Ship hotel, he changed his boots, ordered a slight dinner and went out for a stroll through the town. Returning at the appointed time, he was surprised to find the whole establishment in confusion. A crowd had collected outside the door. The master of the house was standing at the foot of the stairs with two candles in his hands, and on Theodore's entrance he walked backward before him and conducted him into the principal saloon, where all the waiters were standing and a magnificent repast had been provided.

The wit was much amused at the dignity to which he had been promoted, but, being an easy going fellow, made no scruples and, sitting down, did full justice to what was set before him. Next day he signified his intention of departing and ordered a coach, when, to his astonishment, a carriage and four drove up to convey him to his destination. He inquired with some apprehension what he was to pay for all this grandeur and was no less astonished than gratified when he received a low bow and the answer, "Nothing whatever, your royal highness."

He was never more thoroughly mystified, but the next night on taking off his boots, which he had bought in London ready made just before he went to Dover, he found "H. S. H. the Prince of Orange" written inside them. They had been originally made for the prince, who was then in England suing for the hand of Princess Charlotte, and notice had been given that all his expenses while in the country should be set down to the charge of the government.

The End In View

If you mean to act nobly and seek to know the best things which God hath put within the reach of men you must fix your mind on that end and not what will happen to you because of it. —George Eliot.

The Wrong Car.

There is the old story of the man who boarded three cars, only to discover that none of them was the car he wanted. Boarding a fourth in a high state of irritation, he waxed a trifle profane in his conversation with the conductor. A severely pious looking old man sitting near the door overheard and remarked a little sharply:

"My friend, did you know that you are on the road to perdition?"

"Well, if I'm not on the wrong car again!" was the retort of the unabashed passenger.—Every Week.

Not Infallible.

The new system of memory training was being taught in a village school, and the teacher was becoming enthusiastic.

"You see," he said, addressing the bright pupil, "in order to fix a thing in your mind you should conjure up some sort of picture in your mind's eye, representing what you want to bear in mind."

"Yes, sir," said the bright pupil. "It sounds very nice, and I've no doubt the advice is excellent if you could tell me what it means."

"Well, for instance," said the teacher, "supposing you want to remember the name of a poet—Bobby Burns. Fix in your mind's eye a picture of a policeman in flames. See—Bobby Burns!"

"Yes, I see, sir," said the bright pupil. "But how is one to know that it does not represent Robert Browning?" —London Globe.

He Was Sarcastic.

A man in the English veteran reserves was called up recently. After a week at his new quarters he was brought up before the officer commanding for not cleaning his rifle one day. Said the officer commanding: "Hem, you're an old soldier re-enlisted, I see. I suppose it will be many years ago since you were reprimanded? What was your last offense? Can you remember what it was?"

The old soldier, with irony on account of the repeated assertions to his age, replied, "For not cleanin' my bow an' arrow, sir!"

Rust.

Rust is a compound of oxygen and iron that only forms in the presence of water.

WOMEN'S WHIMSIES.

Beaded, brocaded and plain velvet or satin bags are the mode, made in reticule shapes, quite large and finished with a long tassel at the bottom or with ribbon drawn tops.

One wrinkle is to wear Egyptian designed amulets done in rhinestones set in flat settings of antique gold or silver or even of jet or ivory, appended to long chains made of the same jewels.

These accompany trailing, scarflike evening gowns made of gorgeously colored chiffons, brocaded crapes or satins of a particularly soft quality.

For those who possess lace scarfs, no matter what the shape or length, quality or type, the season's latest adventure reveals a liking for these frivolous neck or shoulder fixings for wear with the new gowns for dinner and evening wear.

DINNER FOR THE FOURTH OF JULY

Decorations and Dainties Which Will Prove Unique and Novel For a Patriotic Repast—Beautiful Flags Lend Color to the Scheme—One Hostess Has Linen Flag Tablecloth.

WHEN the sentiment of the celebration is to be portrayed in the decorative scheme it will be found that a Fourth of July dinner will be especially interesting to plan and serve. Patriotic decorations are so readily secured and so easily arranged that it will not require much ingenuity to plan an exceedingly interesting entertainment at slight cost.

There may be patient search required to secure cannon shaped receptacles for flowers and for table service, and it may be necessary in some instances to have certain articles of decoration and tableware made to order to carry out the patriotic spirit, but one has the satisfaction of knowing that such articles may serve for many seasons and are good to have on hand when the ambitious hostess delights in preparing pleasant surprises for her guests with each return of the various holidays demanding patriotic sentiment.

For unique entertainments of this character a certain ingenious hostess has a beautiful made to order linen table cloth in the form of a large flag. The colors of the star spangled banner are carefully selected and warranted to wash without fading. The red, white and blue linen has retained its bright tintings after repeated laundering, and when the festive table is spread with this unique and beautiful cloth the hostess does not find it necessary to worry over accidental spots and stains, knowing the durability of her treasured bit of patriotism.

Beautiful silk flags of varied sizes are retained from year to year to decorate chandeliers and to drape at the windows and doorways, and many of the dishes are of permanent value in patriotic forms, while others are prepared especially for the occasion of more fragile material.

At the most unique of her Fourth of July dinners the baked squabs had cranberry jelly molded in cannon form, arranged as a garnish around the great platter. The vegetables were served in patriotic dishes, some made in cannon ball form, others decorated in dainty flags in china paintings, while the large vegetable dishes containing mashed potatoes, etc., were garnished with a little ruffle of parsley around the edge, in which were stuck at close intervals tiny silk flags. Facing each guest stood two small silver cannon, which belched out salt and pepper. Each guest had a silk American flag as a napkin, and the finger bowls were round cannon balls slightly flattened on the bottom to stand erect and with small openings in the top and of such dark red glass to be almost black in appearance.

One of the most charming and original features of the table decorations consisted of miniature reproductions of famous revolutionary forts with their roofs covered with flowers. These were the only flower vases used in the entire scheme of decoration. Pictures of the famous forts served as copies, and these were faithfully reproduced in cardboard of the right texture and finish to "take" water color paint. It was then an easy matter for the amateur artist of the family to paint the gray walls and towers and outline windows and loopholes. A cardboard ship's hulk and a famous man-of-war were also cleverly constructed and painted, with their interiors, like those of the forts, concealing generous bowls of water to keep the flowers fresh.

The sweets and salted almonds were served in crystal ships. After dinner the gentlemen lighted their Havana cigars at a silver cannon with a flame fed by wood alcohol cleverly concealed, and the after dinner coffee was served in cups shaped like conning towers. Wherever the dishes or the decorations proved difficult in displaying the patriotic scheme, garnishes and accessories displayed numerous tiny silk flags, which were purchased by the hundred at a small cost.

Red, white and blue bunting may be made to serve various fields of usefulness when the patriotic display of the occasion extends to other rooms besides the dining room, and when porch and lawn festivities are important features of the entertainment. It is sometimes possible to secure a good quality of fast color bunting printed in the three colors in stripes, but even more satisfactory are the solid color, washable buntings. These may be cut in strips of the desired size and the red and white and blue sewed together in the various forms demanded for special draperies. Martial music should also be an important feature of the occasion, whether a paid orchestra or home talent officiates, and plentiful bunting draperies should conceal the musicians' corner.

Fads and Fancies.

Grosgrain and faille are much in demand for tailored suits, and a silk poplin, supple and charming of texture, yet with enough body to lend itself well to tailoring, is also beginning to find a place among tailoring fabrics and some admirable costumes fashioned from this material have been brought out this season.

D/34

GRATITUDE

The Fulton Evening Times expresses gratitude for the liberal support given its endeavors to launch in this city a daily newspaper. This expression of good will is extended to the people in every walk of life—to those who were at first skeptical of the advisability of beginning the publication of this newspaper, and to those who believed that *Fulton* should have in addition to its weekly newspapers a daily that would place the town in the same *category* as other towns of the same *size* of *Fulton*.

NOT AN EXPERIMENT

The Fulton Evening Times is no longer in the experimental stage. Since December 17, 1914, it has issued more than 150 numbers, or approximately 375,000 copies, which represents in the neighborhood of 37,500 pounds of paper made at the big mill of the Oswego Falls Pulp & Paper Co. It will be seen by these figures and the fact that the payroll of Fulton Evening Times is expended with the merchants of the city, that here is an industry of no mean proportions—one that deserves the support of the people, and we are pleased to report, that this newspaper

IS GETTING SUPPORT

Because the citizenship of this city has the proper amount of civic pride to impel it to support a home institution. There are many reasons why our subscribers are numbered by the hundreds, chief of which is that The Evening Times is counted upon as the medium wherein local news is the leading feature, and wherein the people feel that they have a defender of their rights.

The Evening Times is Winning its Way, too Because it is

"A HERALD OF PROGRESS"

A Mystery

Being a Story of How a Murder Case Was Not Solved.

By DONALD CHAMBERLIN

My telephone bell rang and, going to the instrument, I took up the receiver.

"Is that you, Thompson?"

"Yes."

"I'm Parker. I wish you to come down and stay in the house with me tonight. I'm alone and nervous."

"Certainly, old man. What's the matter with you?"

"I can't ask you to dinner, for I haven't a servant in the house."

"Well, I'll be over about 9 o'clock. Will that do?"

"Yes; much obliged."

Parker was the junior partner in a large jewelry firm and a man who never shrank from any duty involving danger. Therefore I was surprised at his shrinking from sleeping in a house alone. He was a widower without children, and though he lived in the house he had occupied with his wife, he took his meals at his club, hiring no servant except for day work. I fancied he must be ill, or he would not have asked any one to sleep in the house with him.

At 9 o'clock I rang his doorbell, and he admitted me himself. He appeared neither ill nor troubled. He led me into an apartment he used for a smoking room, where he produced cigars, and we sat down for a smoke. I waited some time for him to tell me why he wished for some one to sleep in his house with him, but he did not, chatting on ordinary topics until I rose to go to bed. Then I asked him what had made him nervous.

"There is a story connected with it, and I don't feel like telling it tonight," he said. "We are all connected with some disagreeable episode and are apt to make too much of it. Doubtless in a few days or a few weeks I shall think nothing of the one in which I am concerned. Why take up a lot of time going over it with you, especially since it would be unpleasant for me to do so?"

I excused him and went to my room, having told him that I must be up early in the morning and off, for my time for going to business was 7 o'clock, while he did not need to do so till 9 o'clock. I bade him good night, telling him that if he should be wakeful to come into my room for a chat. He said he expected to sleep soundly, and with that we parted.

In the morning I went out, treading softly that I might not awaken my friend, and emerged from the front door before most persons were stirring. A milkman drove up at the time and carried a bottle of milk to a rear door. He looked at me, and I spoke to him, expressing surprise that he should leave milk at a house where no meals were served, whereupon he told me that Mr. Parker drank a quart of milk every day at home.

I called up Parker the same evening by telephone to ask him if he required my services again, but there was no response to the call. I thought nothing of this, for there was no one besides himself to answer, and I presumed he was not at home. Several days passed, and I heard nothing from him. Then on taking up my morning paper I saw under large headlines a statement that he had been found murdered in his bed. The man who left the milk at his back door, seeing that the bottles remained unemptied where he had left them, notified a neighbor, who broke into the house and found Parker stabbed to the heart. A loaded revolver was under his pillow that had not been used.

Horrified, I started immediately to go to the house where the murder had been committed. On the way I met the milkman in company with a policeman. On seeing me the former said something to the policeman, which I did not hear, and the two stopped before me.

"You're wanted at Inspector O'Connor's office," said the policeman.

"I'm going to the house of a friend of mine who has been murdered. I'll call later at the inspector's office."

"You'll have to go with me now," was the reply.

Then for the first time it dawned upon me that I was under arrest for Parker's murder; that he had been killed the night I had slept at his house; that the milkman had seen me coming out the morning after the murder had been committed. The situation flashed upon me and the danger in which it placed me. I am sure I turned pale, and I felt my legs tremble beneath me.

Not a human being knew of my having been called upon by Parker to stay at his house the night he was murdered. I had been seen leaving it early in the morning of the murder. There had not been another person in the house during the night than myself except the murderer. What a pity I had not insisted on Parker's telling me the story connected with his objecting to sleep in the house alone! The circumstance attending my being there, together with the revolver found under his pillow, made it plain as the sun in heaven that he had feared some enemy. But all this was a blank to the rest of the world. An explanation made in a courtroom unsupported by a single clew pointing in the same direction would be set down as a fabrication. However, since I had been a friend of Parker, since my reputation was good, since I could not see how any motive on my part for the crime would be judged would save me. But the case went to trial nevertheless.

It is astonishing how in such cases so much may be made of so little. Parker's wife before she married Parker had been a flame of mine, but he had known all about it, and we had often spoken of it during his wife's lifetime. The prosecuting attorney got hold of this intimacy and built up on it a theory of motive for the murder, handling it so plausibly that it had a marked effect not only on the jury, but on the spectators and those who followed the trial in the newspapers.

He pictured the volcano of jealousy that had smouldered in my breast till the opportunity came, when I could strike for revenge. So graphic, so picturesque was his description of my condition that he almost convinced me.

The pistol found under Parker's pillow should have confirmed my evidence, for I was put on the stand in my own defense, but the prosecuting attorney claimed that I had placed it there for that express purpose. He even attempted to prove that the pistol had belonged to me and brought forth a witness who swore that he had seen it in my possession. This was a clincher on his theory and naturally turned many against me who had previously believed in my innocence.

However, it was impossible to convict me on such evidence. At the conclusion of the trial the judge virtually directed the jury to acquit me. Nevertheless they wrangled over my case for two days, then reported that they could not agree. I was finally discharged with the understanding that I would not again be tried, but in the eyes of the public I was a condemned murderer.

The object of my life now became the finding of Parker's murderer. But where should I look for him? My counsel had made inquiries that might lead to any one who had a grudge against Parker and had failed completely. But there was no reason why I should not go on hunting. I secured access to Parker's papers and spent hours in careful examination of them. Not a word in them gave the slightest clew to any enemy. The police had exhausted the matter of evidence of any tracks the murderer might have left behind him at Parker's house. He had not even left a footprint.

I hired detectives to work with me and directed them to watch every one who had been in any way connected with the murdered man. These persons were continually reporting clews which turned out not to be clews and which they invented for the purpose of remaining in my pay. If Parker had ever had any difficulty with any one he had kept it to himself. That he feared some one was evident from his having called upon me to remain one night at his house and that he had told me there was a story connected with his having done so.

Meanwhile I lived a life of horror. A few of my nearest friends stood by me, but I knew that there were times when some of them shrank from being seen in my company. I could see that I was being pointed out as Thompson, the murderer. What means I possessed were gradually shrinking away under the expense attending my search and the fact that I had given up every other occupation. I became despondent as to ever clearing myself and was thinking of hiding my identity in a foreign land when fate did for me what I could not do for myself. A clew was revealed to me.

One morning the newspapers announced that Judge Morehouse had killed a burglar in self defense in his own house. The evening papers stated that the man killed was not a burglar, but one who had sought the life of the judge through revenge. Years before, Morehouse giving a jury instructions on which they were obliged to convict a criminal accused of defalcation, had sentenced him to a term of ten years in the penitentiary. The term had expired a few months before, and the criminal had been since looking for an opportunity to carry out a threat he had made to kill the judge whom he considered in part the cause of his conviction.

The next development edged closely upon my case. It was that the criminal had been financial manager of the firm in which Parker was a partner. At this point I saw vindication for me. Plunging into an investigation, I unearthed the fact that Parker had discovered the defalcation. I did not learn that he had taken any especial part in securing the conviction of the defaulter, but I surmised that there might have been something galling in Parker having run him down and exposed him.

A natural theory was that the convict, having been discharged from prison, had first killed Parker, then waited for the murder to blow over before attempting to kill the judge. An important point with me was to compare the date of the convict's discharge with that of Parker's murder. Securing the former record, I found that the murder had occurred the second night after the convict's discharge.

Unfortunately the criminal had been shot dead by the judge, so I could get no confirmation of my theory from him. But my circumstantial evidence was so strong that it was believed by all. Every mail brought me letters of congratulation, and I was restored to favor with all my friends and acquaintances.

In time I carried my theory further to account for Parker having called for me to sleep in his home the night he was killed. Doubtless the convict had threatened him at the time of his defalcation; but Parker had not spoken of it, or if he had the fact had passed into oblivion. But Parker doubtless remembered the threat and knew the date that the convict would be liberated. This I surmised was the reason he called upon me for companionship, if not for protection.

Who Defended the Works?

By F. A. MITCHEL

When the Germans were beseiging Paris in 1871 one part of the force came to the very outskirts of the city and encountered a portion of the defenses, something like a revolutionary barricade blocking a street. There was only room for a single company, and its captain before making an attack stood off and, raising a pair of binoculars, examined the works.

They were composed of paving stones, pieces of timber and such other articles as had been brought together for an improvised fortification. But the captain could not see a single man on the parapet. This he did not like. There was the look of a trap about it. If he moved his troops forward he must do so over a distance of some 500 or 600 yards between two walls not thirty feet apart and straight as an arrow. He could not deploy his men by the flank, and as for scattering along the street they would be one behind another, and a shot would bring down every man in line.

Moreover, the captain noticed a dark spot in the works, which indicated that a single stone had been removed in the very center of the fortification. He assumed at once that the aperture was for the muzzle of a cannon, which would sweep the street, doubtless, with the scattering projectiles of the period. That meant that before a force of eighty men—the number under the captain's command—could reach the barricade a large proportion of them would be killed or wounded.

The captain called his first lieutenant, handed him his glass, directed him to take a look at the breastworks and then asked him what he thought about an attempt to carry them. The lieutenant examined the works, then, lowering his glass, remarked:

"What are the orders, captain?"

"The orders are to move forward."

"Then we must move forward, but those who live will have moved backward."

The captain's only response was an order to advance.

Shoulder to shoulder, the men marched on—for, as has been said, they could not scatter—till about a third of the distance had been traversed. Then a puff of smoke issued from the dark spot in the center of the works, and a storm of missiles broke upon the advancing line of Germans. A third of the company fell, and another dozen limped or staggered to the rear.

The rest pressed on, but a few minutes were lost in reforming, or, rather, closing, the gaps that had been made. With steady step they marched till they had covered half the distance between their starting point and the fort. There was light where the dark spot had been, and they knew that the piece had been retired to be reloaded. This gave them courage. It was an old fashioned muzzle loader, and time must be spent after every discharge in reloading. The captain gave the order to double quick, but before they had covered a dozen yards there came another hailstorm, and another twenty men were put out of the fight.

This was terrible slaughter, and the force recoiled. Some stood ready to retrace their steps; others started back. The second lieutenant stood in rear and, striking some of the fugitives with his sword, drove them back toward the enemy. The captain was among the wounded and lay in a pool of his own blood. The first lieutenant cried at the top of his voice "Forward, men!" and started at the head of some thirty soldiers to make the rest of the distance and storm the fort, though the move was now a forlorn hope, for he expected that on reaching it he would find it defended by double the number of those who were making the attack.

When within fifty yards of the barricade there came another storm of missiles. Half the Germans were laid on the stones of the street, while the other half broke and fled. The lieutenant called to them in vain. Preferring death to following them in flight, he turned and ran forward to the fort, expecting every moment to be shot down. He reached the barricade and, with a pistol in one hand, his sword in the other, climbed to the summit. There he stood, bewildered by the sight that met his view.

Not a man was behind the stones. The gun which the recoil from the last shot had driven backward a few feet was there, a thin film of smoke issuing from its vent. Leaning against it was a girl about twenty years old. She looked up at the lieutenant as though expecting instant death. Involuntarily he uncovered.

"Mademoiselle," he stammered in broken French, "where are the men who have been defending this barricade?"

"I have been defending this barricade, monsieur," was the reply.

"You—alone?"

"I—alone. Through a blunder the force that was to have held this work was ordered elsewhere."

"Mein Gott! Has a whole company been driven back by a—a girl?"

At this moment a company of French soldiers came around a corner at double quick. The lieutenant succeeded in making good a retreat, hearing cheers behind him:

"Vive mademoiselle!"

Having joined his commander, he led them again to the attack and finally captured the barricade. He looked for the girl who had defended it alone, but she was not there.

SILK WEAVING IN AMERICA.

Sample of Ribbon Making by an American Manufacturer Which Compares Very Favorably With the Ribbons Which Come From the Looms of Europe. Ribbon Woven at Big Fair.

WAR, which brings with it so much of gloom, bloodshed and heartache, is never wholly an unmitigated evil. It is interesting to trace in history its economic effect upon our own country, and in one particular case the distribution of the silk industry in our own country after the French revolution.

Prior to the French revolution France had almost a monopoly of the silk industry, but when that country was torn by one of the terrible wars of modern times France was found by the silk weavers to be uncongenial for their peaceful occupation, and they sought refuge in other countries, some of them eventually coming to America.

Of course prior to this time the Earl of Southampton, who was treasurer and counsel to the Company of Virginia, was authorized by James I. of England to breed silkworms and manufacture silk in Virginia. This was about the year 1608 or 1609, but a

A SECTION OF RIBBON.

shipwreck overtook an expedition sent out by the Virginia company, and it was four years later that the actual beginning of silk culture was made in America.

Silk is unique in this respect. Its raw material is produced by the cheapest labor in the world, the silkworm being the busy little weaver, but the finished product is among the most costly of merchandise.

To the genius of Charles Marie Jacquard we owe our present facility in the weaving of figured silks and ribbons. Before the Jacquard invention silk weaving of figured goods was indeed a complicated labor.

At the Panama-Pacific exposition there is a ribbon loom in operation which shows great strides in the easy handling of figured ribbons. The section of ribbon shown here is acknowledged to be a masterpiece of ribbon weaving. It would be impossible to give in so short a space any adequate notion of how the weaving is done, but a person interested in the subject could get much information and entertainment out of either the encyclopedia or by obtaining a book which treats of the silk industry in the United States.

PREPARATION OF LETTUCE

When lettuce comes from the market clean in cold water and look it over carefully to see that all dirt and insects are removed. Place on a piece of dampened cheesecloth, then roll up and put on the ice, when it will be ready for use and will often stay fresh for a week. Some persons complain of sleepiness after eating lettuce. This is due to the lactucin in lettuce, which the milky juice contains. This juice may be removed by cutting from the lettuce the lower end of the heads or stalks and then standing the lettuce in cold water for several hours before using. Keep the head intact when you wish to quiet nerves or induce sleep.

The following is a pretty lettuce relish for luncheon or dinner and may be served in a small cut glass dish: Line the dish with lettuce leaves, upon which place either ripe or green olives and tiny red tomatoes. Chill with cracked ice. The olives and tomatoes may be taken with the fingers at any time during the meal.

Ham Balls.

One cupful of boiled potato, one onion and one cupful of ham, chopped. Season with salt and pepper, add a well beaten egg and a little milk. Form into small balls, roll in meal and fry in hot, deep fat. Serve on buttered toast.

A TABLE OF LOGARITHMS.

Its Use in Working Out Complex Mathematical Problems.

A logarithm is an exponent, and an exponent is a number showing how many times another number has been used in any multiplication. Ten times 10 equals 100. It was used twice, and its exponent is 2. Ten cubed equals 1,000, and its exponent is 3; while 10 to exponent 4 equals 10,000, and so on out toward infinity. But suppose that we wish to use 10, say 1¼ times or 1⅝ times instead of twice. Then the exponent must be computed, and exponents thus computed are always printed in tables.

Thus, as I am now writing, the paper, as always, by day and by night, is very near a precious book, a table of logarithms for all numbers from 1 to 108,000, computed out to seven decimal places. To give examples of their use, suppose that you wish to multiply 8 by 11. Look in the table and you will find the logarithm of 8 to be .9030900, and the logarithm of 11 to be 1.0413927. Add these and the sum will be 1.9444827. Look along the column and it will be seen that this is the logarithm of 88.

Easy. But suppose you wish to multiply two strings of figures of from 5 to a dozen. In the great standard mathematical sciences, such as astronomy, physics and chemistry, the multiplication and division of immense numbers are required. Thus, let us square the number 81558149—that is, multiply itself by itself, a tedious job. But this toil can be saved by the use of logarithms. Thus, the logarithm of 81558149 is 7.4991289, taken directly from the table. Then, to square any number multiply its logarithm by 2, and this logarithm multiplied by 2 equals 14.9982578. Now, by looking in the table, the number of which this is the logarithm is 995916962096951. Hours of work are performed in a few minutes.—Edgar Lucien Larkin in New York American.

STONE MEASURE.

There Is No Regular Unit, and It Fairly Revels in Variety.

Owing to the variety of uses to which stone is put, there is no regular unit of measurement employed by the quarrymen, the stone being sold by the cubic yard, cubic foot, ton, cord, perch, rod, square foot, square yard, square, etc. Building and monumental stone, especially the dressed product, is usually sold by the cubic foot or the cubic yard, although this unit varies with the class of stone and with the locality; a large quantity of rough stone is sold by the perch, cord or ton.

Rubble and riprap, including stone for such heavy masonry as breakwater and jetty work, are generally sold by the cord or ton. Fluxing stone and stone for chemical use—as for alkali works, sugar factories, carbonic acid plants and paper mills—are sold by the long ton. Flagstone and curbstone are sold by the square yard or the square foot, the thickness being variable and dependent on the orders received. Granite paving blocks are sold invariably by number, but the blocks are not of uniform size, the value depending on the size of the block and the labor necessary to cut into the shape desired. Other paving material is sold by various units, such as ton or cubic yard.

Crushed stone is usually sold by the cubic yard or ton, the short ton being more generally used. The weight of a cubic yard of crushed stone varies from 2,300 to 3,000 pounds, the average weight being about 2,500 pounds. In certain localities crushed stone is sold by the "square" of 100 square feet by 1 foot, or 100 cubic feet. Crushed stone is also sold by the bushel, 21½ bushels representing a cubic yard of about 2,700 pounds.—Geological Survey Bulletin.

The Senate Barber Shop.

Here's an odd thing about the United States senate barber shop: Although the number of senators has hardly increased at all, the number of shaves has increased at a surprising rate in recent years. The reason is simply that the senate is now inhabited largely by comparatively young men with smooth faces or wearing mustaches at most, and they are obliged to get shaved every little while, whereas the old style senator with a riot of whiskers never had occasion to visit a barber shop except every few months to get his hair trimmed.—Cincinnati Enquirer.

Disgusted.

One day while her grandfather was paying a visit to Florence's home the little girl said to him:

"Gran'pa, your talk about 'perseverance winning' is all nonsense."

"Well, well, child!" cried the grandfather. "Why do you say that?"

"Why," said the little girl, "I've worked all the afternoon blowing soap bubbles and trying to pin them on mother's hat."—New York Times.

A Little Ambiguous.

Musician—You didn't get around to my recital last night. Friend—No. I had a splitting headache. However, everybody told me I should have gone, because you would have made me forget all other suffering.—Richmond Times-Dispatch.

Heard on the Train.

"What book is that you are reading, Jim?"

"'The Sorrows of Satan.'"

"Well, I'll say this for you, Jim; you always do take considerable interest in the troubles of your friends."—Boston Transcript.

Wise men say nothing in dangerous times.—Selden.

Charming and Dainty As Only Youth Can Be

EVENING FROCK.

STRIKING frock of rose colored faille classique with short waisted bodice, softly draped and with winglike puff sleeves of cream lace. There is also a garniture of pink chiffon roses and buds on both bodice and skirt. A full straight skirt of cream daphne silk is primly plaited around the bottom. Over this is worn a second skirt, open at the front, of faille classique closely gathered, the bottom cut in deep points.

Belts and Sashes.

Belts and sashes may be fashioned from the same material as the gown or suit with which they are worn, or sometimes leather or silk is used for contrast. Leather belts are particularly good on cloth or linen costumes, while the soft ribbon sashes are especially lovely on frilly summer frocks.

One of the greatest needs for summer wear is a ribbon sash or girdle. A girdle and sash of shell pink satin is trimmed with French blue shirred ribbon in a lover's knot design and delicate pink roses. The design is used on the two sash ends and repeated on the front of the girdle.

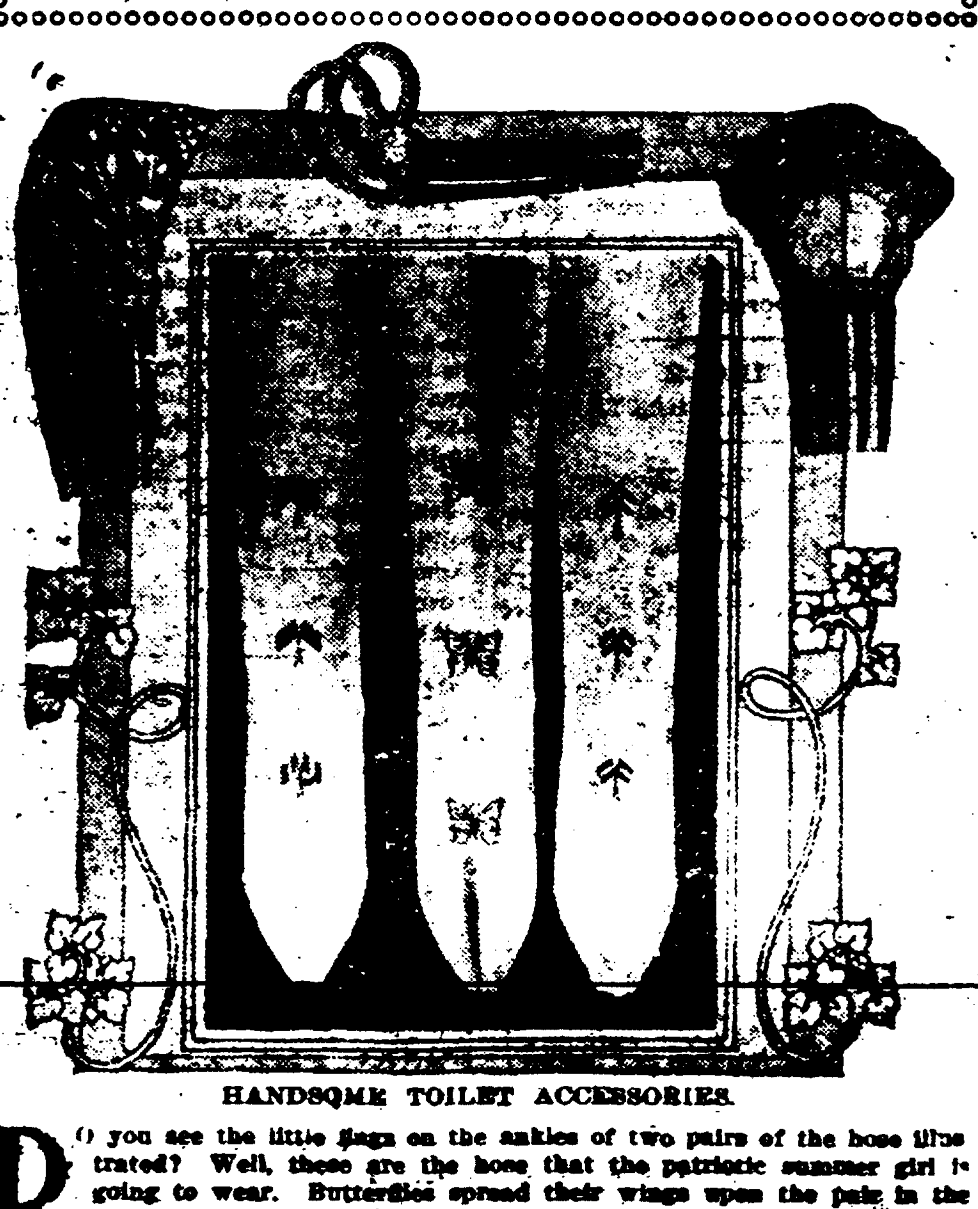
Three New Bathing Caps.

The Tipperary bathing cap is a high model, finished at the top with a long rubber tassel, which hangs straight down the front of the cap. The cap is boned in the front to keep it high and straight and acts as a support to the tassel.

The jockey shaped bathing cap is made in a combination of blue and green, also red and black. The only trimming on this cap is a button.

The Castle cap for beach wear is made in bright green satin, lined with rubber, effectively trimmed with small roses fashioned from green and black satin.

Hosiery and Combs That the Fourth of July Girl Will Wear



HANDSOME TOILET ACCESSORIES.

DO you see the little flags on the ankles of two pairs of the hose illustrated? Well, these are the hose that the patriotic summer girl is going to wear. Butterflies spread their wings upon the pair in the center. The stockings are of finest, purest white silk. The combs illustrated are of tortoise shell. The tops are incrusted with brilliants.

A PAIR OF NEW BOOTS.

They Figured In an Amusing Case of Mistaken Identity.

It may be doubted if there ever occurred a more amusing instance of mistaken identity than that afforded by Theodore Hook, and it came about through a pair of boots. Hook was traveling along the south coast of England and arrived in the course of his journey at Dover.

Alighting at the Ship hotel, he changed his boots, ordered a slight dinner and went out for a stroll through the town. Returning at the appointed time, he was surprised to find the whole establishment in confusion. A crowd had collected outside the door. The master of the house was standing at the foot of the stairs with two candles in his hands, and on Theodore's entrance he walked backward before him and conducted him into the principal saloon, where all the waiters were standing and a magnificent repast had been provided.

The wit was much amused at the dignity to which he had been promoted, but, being an easy going fellow, made no scruples and, sitting down, did full justice to what was set before him. Next day he signified his intention of departing and ordered a coach, when, to his astonishment, a carriage and four drove up to convey him to his destination. He inquired with some apprehension what he was to pay for all this grandeur and was no less astonished than gratified when he received a low bow and the answer, "Nothing whatever, your royal highness."

He was never more thoroughly mystified, but the next night on taking off his boots, which he had bought in London ready made just before he went to Dover, he found "H. S. H. the Prince of Orange" written inside them. They had been originally made for the prince, who was then in England suing for the hand of Princess Charlotte, and notice had been given that all his expenses while in the country should be set down to the charge of the government.

The End In View

If you mean to act nobly and seek to know the best things which God hath put within the reach of men you must fix your mind on that end and not what will happen to you because of it. —George Eliot.

The Wrong Car.

There is the old story of the man who boarded three cars, only to discover that none of them was the car he wanted. Boarding a fourth in a high state of irritation, he waxed a trifle profane in his conversation with the conductor. A severely pious looking old man sitting near the door overheard and remarked a little sharply:

"My friend, did you know that you are on the road to perdition?"

"Well, if I'm not on the wrong car again!" was the retort of the unabashed passenger.—Every Week.

Not Infallible.

The new system of memory training was being taught in a village school, and the teacher was becoming enthusiastic.

"You see," he said, addressing the bright pupil, "in order to fix a thing in your mind you should conjure up some sort of picture in your mind's eye, representing what you want to bear in mind."

"Yes, sir," said the bright pupil. "It sounds very nice, and I've no doubt the advice is excellent if you could tell me what it means."

"Well, for instance," said the teacher, "supposing you want to remember the name of a poet—Bobby Burns. Fix in your mind's eye a picture of a policeman in flames. See—Bobby Burns!"

"Yes, I see, sir," said the bright pupil. "But how is one to know that it does not represent Robert Browning?" —London Globe.

He Was Sarcastic.

A man in the English veteran reserves was called up recently. After a week at his new quarters he was brought up before the officer commanding for not cleaning his rifle one day. Said the officer commanding: "Hem, you're an old soldier re-enlisted, I see. I suppose it will be many years ago since you were reprimanded? What was your last offense? Can you remember what it was?"

The old soldier, with irony on account of the repeated assertions to his age, replied, "For not cleanin' my bow an' arrow, sir!"

Rust.

Rust is a compound of oxygen and iron that only forms in the presence of water.

WOMEN'S WHIMSIES.

Beaded, brocaded and plain velvet or satin bags are the mode, made in reticule shapes, quite large and finished with a long tassel at the bottom or with ribbon drawn tops.

One wrinkle is to wear Egyptian designed amulets done in rhinestones set in flat settings of antique gold or silver or even of jet or ivory, appended to long chains made of the same jewels.

These accompany trailing, scarflike evening gowns made of gorgeously colored chiffons, brocaded crapes or satins of a particularly soft quality.

For those who possess lace scarfs, no matter what the shape or length, quality or type, the season's latest adventure reveals a liking for these frivolous neck or shoulder fixings for wear with the new gowns for dance and evening wear.

DINNER FOR THE FOURTH OF JULY

Decorations and Dainties Which Will Prove Unique and Novel For a Patriotic Repast—Beautiful Flags Lend Color to the Scheme—One Hostess Has Linen Flag Tablecloth.

WHEN the sentiment of the celebration is to be portrayed in the decorative scheme it will be found that a Fourth of July dinner will be especially interesting to plan and serve. Patriotic decorations are so readily secured and so easily arranged that it will not require much ingenuity to plan an exceedingly interesting entertainment at slight cost.

There may be patient search required to secure cannon shaped receptacles for flowers and for table service, and it may be necessary in some instances to have certain articles of decoration and tableware made to order to carry out the patriotic spirit, but one has the satisfaction of knowing that such articles may serve for many seasons and are good to have on hand when the ambitious hostess delights in preparing pleasant surprises for her guests with each return of the various holidays demanding patriotic sentiment.

For unique entertainments of this character a certain ingenious hostess has a beautiful made to order linen table cloth in the form of a large flag. The colors of the star spangled banner are carefully selected and warranted to wash without fading. The red, white and blue linen has retained its bright tintings after repeated laundering, and when the festive table is spread with this unique and beautiful cloth the hostess does not find it necessary to worry over accidental spots and stains, knowing the durability of her treasured bit of patriotism.

Beautiful silk flags of varied sizes are retained from year to year to decorate chandeliers and to drape at the windows and doorways, and many of the dishes are of permanent value in patriotic forms, while others are prepared especially for the occasion of more fragile material.

At the most unique of her Fourth of July dinners the baked squabs had cranberry jelly molded in cannon form, arranged as a garnish around the great platter. The vegetables were served in patriotic dishes, some made in cannon ball form, others decorated in dainty flags in china paintings, while the large vegetable dishes containing mashed potatoes, etc., were garnished with a little ruffle of parsley around the edge, in which were stuck at close intervals tiny silk flags. Facing each guest stood two small silver cannon, which belched out salt and pepper. Each guest had a silk American flag as a napkin, and the finger bowls were round cannon balls slightly flattened on the bottom to stand erect and with small openings in the top and of such dark red glass to be almost black in appearance.

One of the most charming and original features of the table decorations consisted of miniature reproductions of famous revolutionary forts with their roofs covered with flowers. These were the only flower vases used in the entire scheme of decoration. Pictures of the famous forts served as copies, and these were faithfully reproduced in cardboard of the right texture and finish to "take" water color paint. It was then an easy matter for the amateur artist of the family to paint the gray walls and towers and outline windows and loopholes. A cardboard ship's hulk and a famous man-of-war were also cleverly constructed and painted, with their interiors, like those of the forts, concealing generous bowls of water to keep the flowers fresh.

The sweets and salted almonds were served in crystal ships. After dinner the gentlemen lighted their Havana cigars at a silver cannon with a flame fed by wood alcohol cleverly concealed, and the after dinner coffee was served in cups shaped like conning towers. Wherever the dishes or the decorations proved difficult in displaying the patriotic scheme, garnishes and accessories displayed numerous tiny silk flags, which were purchased by the hundred at a small cost.

Red, white and blue bunting may be made to serve various fields of usefulness when the patriotic display of the occasion extends to other rooms besides the dining room, and when porch and lawn festivities are important features of the entertainment. It is sometimes possible to secure a good quality of fast color bunting printed in the three colors in stripes, but even more satisfactory are the solid color, washable buntings. These may be cut in strips of the desired size and the red and white and blue sewed together in the various forms demanded for special draperies. Martial music should also be an important feature of the occasion, whether a paid orchestra or home talent officiates, and plentiful bunting draperies should conceal the musicians' corner.

Fads and Fancies.

Grosgrain and faille are much in demand for tailored suits, and a silk poplin, supple and charming of texture, yet with enough body to lend itself well to tailoring, is also beginning to find a place among tailoring fabrics and some admirable costumes fashioned from this material have been brought out this season.

Specials for the Next 10 Days
at PATTERSON'S

Having purchased at a great reduction the surplus stock of a large dress and waist manufacturer previous to their semi-annual inventory we shall offer dresses and waists on Saturday at marvellously low prices and continue the sale until all are disposed of. Prices as follows:

1 lot Ladies' Waists, values to $1 each, for, each..........50c
1 lot Ladies' Waists, values to $1.50 and $1.75, for, each..$1.00
1 lot Ladies' Waists, values to $2.50 each, for, each.......$1.25
1 lot Ladies' Dresses, were up to $1.50, for, each..........82c
1 lot Ladies' Dresses, were up to $3.00, for, each.........$1.98
1 lot Ladies' Dresses, were up to $4.00, for, each.........$2.98
1 lot Ladies' Dresses, were up to $5.00, for, each.........$3.98
1 lot Ladies' Dresses, were up to $8.98, for, each.........$4.98

ONEIDA STREET, FULTON

The Weatherwax Quartet

THIS is a picture of the famous Weatherwax Quartet, booked to furnish the music the afternoon and evening of one day at Chautauqua. They are all full brothers, and it is regarded as peculiar that in one family voices should develop ranging from high tenor to deep bass. They are a versatile bunch, too, and not only put up a strong vocal program, but double in brass with trumpets, and two of them are splendid readers.

NEW ARRIVALS via THE BIKE EXPRESS

TWO REGIMENTS PROTECTED GOVERNOR SLATON TODAY

Atlanta—Two regiments of Georgia militia were under arms to protect retiring Governor John M. Slaton today. It was feared there were some in the vast crowd here for the inauguration of Judge Nat M. Harris who were disposed to violence because of the commutation of Leo M. Frank's death sencen.

Frank passed a quiet day at the state prison farm. He is still employed about the building and will be kept there for some time to come, until his health is much improved. Then he will be shifted to work in the fields, where it is believed that he will greatly improve his physical condition. Frank is expected to give out a statement soon.

Fireworks! Fireworks!

WHOLESALE AND RETAIL

CHAUTAUQUA IS GREAT DEMOCRATIC INSTITUTION

No country in the world has such an institution as the Chautauqua. It is distinctly American. It is splendidly democratic.

The Chautauqua assemblies, particularly in the central and western states, are most inspiring. It gives one a thrill of pardonable American pride to see farmers, mechanics and village people congregating by thousands to take their outing in the woods, not in dissipation nor idleness, but in enthusiastic study. In what other earthly country is such a spectacle?

If anybody is entitled to a niche in the Amerrican Hall of Fame it is the venerable John H. Vincent, the originator of the "Chautauqua idea," the most distinctive and creditable American idea I know of.

What myriads has the Chautauqua helped. What lives it has brightened! What ambition it has kindled! What real riches—riches of mind and heart, the best of all riches—has it added to our country.—By Dr. Frank Crane, New York Globe and Commercial Advertiser, June 10, 1915.

HIRAM LODGE MEMBERS TO ATTEND CHURCH

The members of Hiram Lodge, F. & A. M. will attend divine service at the First Congregational church in a body Sunday morning. The service will be held at 10.30 o'clock, and Rev. Charles Olmstead, pastor of the church, will preach a special sermon.

The Masons of the world attend church service in a body once each year on St. John's Sunday.

Tonight the Masons will entertain the officers of the Grand Lodge at the local club rooms. Routine business will be transacted and a light lunch served.

AUSTRIAN IN ALPS SUFFER HEAVY LOSSES

Milan.—Another attack on the Italian position on Mount Freikofel has failed. The Austrians were driven back, leaving 200 dead behind.

This means that the attempt to carry this position, supported by heavy artillery fire, was serious. It also proves the great importance attached by Austrians to the summit held by Italians.

The Austrians make daily desperate efforts to dislodge their opponents from other positions in the Carinthian Alps. These attacks have failed and the Italians madef urther progress in this exceedingly difficult moun tain warfare by capturing another heighth at Cresta Verde.

The Italian army, after a rapid advance in the first few weeks, is now up against a more serious opposition. Its task is to attack formidable defences, including scores of fortresses long ago erected at great expense by the Austrians.

Artillery is now playing an important part in these operations. Guns of all calibres are pounding at numerous Austrian strongholds which have been put in condition for stubborn defence and have beeen supplied with heavy guns.

Prolonged artillery duels constitute the second stage of the Italian campangn, but several famous Austrian forts have already been seriously damaged.

Butterflies.

Butterflies are said to be very sleepy headed. They go to bed early and get up late.

FRENCH DELEGATES ASSAIL ARMY HEADS

Paris.—Animated scenes occurred in the Chamber of Deputies today when M. Accambray, in discussing the war appropriation, criticized the Ministry of War.

He declared defects had been proved in shell making. He affirmed that the sanitaryr service of the army was responsible for the deaths of many soldiers. He regretted, he said, that national resources were being extravagantly disbursed, and deplored the lack of foresight displayed in preparing for adequate supplies and munitions.

Protests from the right and the center frequently interripted M. Accambray, while the left, largely Socialist, applauded. The scene was the stormiest in Parliament since the war began.

Premier Viviani admitted the Government had made mistakes, but it was always willing to correct them when a way to do so was pointed out, and added:

"The present hour is no time for words of pessimism. France will go to the very end. The task will be hard, and it may be long, but we shall go through. We have a valiant army, admirable leaders, and the nation possesses patience and confidence incomparable. Let every one be at his post, some to fight and some at home whose duty it is to pronounce no word of discouragement."

WATER TOO THIN, FISH TURN INTO BALLOONS

Albany, N.Y.—This fish story is told at the conservation department of the State of New York:

Pop eye, an affliction which lifts fish out of water, has appeared at Bemus Point, N.Y., due to too much air in the water. The air caused fishes' eyes to protrude. They then began to inflate under the skin.

When Dr. Tarleton H. Bean, State fish culturist, arrived the fish were swimming about helplessly on top of the water. He relieved them by removing air from the water.

SLADE BROTHERS TO GO ON TRIAL TODAY

New York.—David and Maxwell Slade, attorneys for Rae Tanzer in her $50,000 breach of promise suit against James W. Osborne was placed on trial this morning in the United States District Court on the charge of conspiring to obstruct justice.

Assistant District Attorney Hershenstein admitted yesterday the government has not located the mysterious Oliver Osborne.

500 LOST BY SINGLE CANADIAN BATTALION

Toronto.—The First Western Ontario Battalion was all but annihilated in the action nerr La Bassee, in northern France, on June 15 last, says a semi-official account received here today.

Out of between 600 and 700 men the battalion lost in killed and wounded nearly 500, including twenty officers.

7 FISHING CRAFT SUNK BY GERMAN SUBMARINE

London. — Seven fishing vessels known as drifters were sunk by a German submarine off the coast of Scotland last night. Most of the crews of the fishing boats were saved.

The crews of tow of the boats were taken aboard the American steamship Llama, which reports the drifters were sunk at a point east of the Skerries.

8,831,000 MEN LOST IN WAR BY FIVE BIG POWERS.

Dr. K. Ziegler, imperial German consul at Denver, Colo., has issued the following figures as the losses in the great war as compiled from Red Cross records up to March 1:

Total losses—Germany, 1,572,000 men; Austria, 1,225,000; France, 2,116,000; Great Britain, 433,000; Russia, 3,485,000.

Grand total of losses, 8,831,000 men.

Totals of the dead—Germany, 482,000; Austria, 341,000; France, 484,000; Great Britain, 118,000; Russia, 728,000.

Grand total of the dead, 2,146,000.

Totals of the maimed—Germany, 97,000; Austria, 83,000; France, 430,000; Great Britain, 49,000; Russia, 482,000.

Grand total of the maimed, 1,150,000.

Totals of the wounded, not maimed—Germany, 700,000; Austria, 618,000; France, 718,000; Great Britain, 185,000; Russia, 1,500,000.

Grand total of the slightly wounded, 3,781,000.

Totals of the prisoners—Germany, 233,000; Austria, 183,000; France, 485,000; Great Britain, 83,000; Russia, 770,000.

Grand total of the captives, 1,764,000.

Returns issued in Berlin as to the prisoners of war held by Germany up to June 14 put the aggregate at 1,610,000, divided as follows:

Russians, 1,240,000; French, 255,000; British, 21,000; Belgians, 41,000; Servians, 50,000.

FINDS GUN, BUT GIVES LIFE.

French Aviator Locates Piece That Shelled Dunkirk, but Dies of Wounds.

The French air man who located the fifteen inch German gun that bombarded Dunkirk succeeded by only the narrowest margin in bringing information in and paid for it with his life.

Flying at a height of 2,200 yards, the biplane went about twelve miles behind the German lines. A storm of shrapnel burst around the machine, and a shell carried away part of the tail and tore a large hole in the lower plane. The observer, however, had time to locate a deep ditch roofed over with concrete, from which peeped the big gun that was sending half ton shells into Dunkirk, miles away.

The aviator was bleeding from a wound in the stomach when he landed, but had the energy to make a comprehensive report. He said, "I am satisfied," and then died.

ENFORCE BRITISH CURFEW.

Authorities Fine Coast Residents For Having Lights in Windows.

The stringency of the precautions now taken in England under the provisions of the defense of the realm act against German raids is illustrated by the prosecution of thirty persons in Swanage, a watering place on the south coast, for displaying lights at prohibited hours. These persons—occupiers of shops, private houses and a hotel—were fined $5 each.

Two of the offenders were retired army officers, Major General J. Ruggles, eighty-eight years old, and Major E. G. West. The former did not escape payment of his fine on account of his age, nor did the latter by reason of his explanation that "every precaution was taken, but a blind in a small window in the nursery was left up about an inch."

Some expert advises women in the political arena to learn when and how to hold their tongues—in other words, when and when not to say what they think.

Of course the busy United States arsenals are working for that world peace which looms large in our national dreams.

It looks now as though that world court would need a disappearing forum, flanked by the biggest guns on earth.

Thaw's war was also shunted off the front page by the doings of kings and emperors.

No hardship to be neutral when there are the weather and baseball to argue over.

NEW YORK GIRL IN ZEPPELIN RAIDS

Miss Reis at School in England Sees Bombs Burst.

NIGHTLY SCARED FROM BED

On Return Home From Ramsgate She Tells of Siren Alarms, Explosions of Missiles and Rush of Frightened Scholars to Safety of "Bombproof" In Cellars.

A girl with red cheeks and sparkling eyes, who alternately hugged her father and sought a glimpse of the Statue of Liberty as she came home on an American liner, told how for months she watched Zeppelins sweep over her school in Ramsgate, England.

She was Miss Clara Reis, fifteen years old, the daughter of Benedict Reis, a New York manufacturer. For two years she has been a pupil at Somerset House school, Ramsgate, the only American girl in that settlement of many schools.

"My," she gasped, "it was exciting. We were chased out of bed almost every night by bells and sirens. I'm mighty glad to get home, for now I can sleep a whole night through without expecting a bell."

Many of the Zeppelins flying over the different sections of England cross in the vicinity of Rasmgate, and for that reason there are many alarms sounded, and the land and sea batteries open up on the gray, long envelopes of gas that whir so gently through the air.

On Tiptoe All Night.

It was on May 17 that Miss Reis had her greatest and most "exciting" experience, after which she and the other girls just refused to go to bed, tiptoeing about instead and munching candy until daybreak.

"It was 2 o'clock in the morning," she said, "when, my gracious, what a racket! Our bell just rang and rang, and all the sirens blew, and the teachers and maids called to us to get up quickly. Our clothes were arranged neatly for expedience, and we dressed quickly and then went in to help the little children.

"Some of the other girls and I went to the window and got behind curtains and peeked out. We saw up in the sky three Zeppelins just going along, with those bobbing cradles underneath, and from all of them were coming a perfect stream of bombs. After the bombs left the Zeppelin a little ways they burst into flames and lit up everything.

"The guns near by and the guns from off the harbor fired and fired. For two hours it seemed they stayed around, and we were hurried downstairs, where we couldn't be harmed. Finally at 4 o'clock more sirens blew to assure everybody that everything was all over, and we were told to go back to bed. The littler girls went, but I just couldn't, and some of us talked until morning."

London Raiders Fly By.

It was this raid on Ramsgate which passengers on board the Nieuw Amsterdam, of the Holland-America line, witnessed when they were held up off the Downs. Two persons were killed many were injured and there was much damage to property.

The night the Zeppelins made their last raid on London, reaching within half a mile of the Bank of England, one of them flew almost directly over the school, Miss Reis said, and shells from the vessels in the harbor shrieked over them.

"The girls were scared then," she said, "and we had to go into the safety vault."

Many companies of British soldiers are billeted in Ramsgate, Miss Reis said.

As an added duty the girls at the schools are making knitted things and now have added to that, hospital dressings. They also have added letter writing to the soldiers who are far away in battle.

"We saw an advertisement of one—a Red Cross surgeon he was," Miss Reis said, "and we rather liked that letter and we answered him. He answered through a teacher, and she read us lots of letters, but he couldn't tell us much about the war, worse luck, for he was in honor bound not to."

TRENCHES ARMOR PLATED.

Austrians Make Most Amazing Defense Works Seen in War.

No trenches and defensive works in the war equal in strength and perfection of workmanship those made by the Austrians along the Isonzo, on the line to Trieste, dispatches say. The intrenchments, sometimes in several lines and often in masonry or in concrete re-enforced by metallic sheeting, are protected by steel armor and a network of mines or batteries often placed below the earth.

They are all connected with underground passages. The men are able to fire from under cover and at the same time they are supported by artillery in the hills behind them.

Moscow Riots Cost $20,000,000.

Nearly 500 stores and factories and more than 200 dwellings were wrecked during the anti-German demonstrations in Moscow recently. The damage inflicted in the city is estimated at $20,000,000.

WAR DOGS CARRY ROPES TO WOUNDED.

Trained French Animals Won't Give Aid to Fallen Germans.

A remarkable story of the new use to which police dogs (now called war dogs) are put by the French comes from the Vosges.

An experimental squad of twenty dogs, the account says, is stationed near the front line of trenches, whence they are sent singly at night to range over the ground between the French and German lines in search of wounded Frenchmen, whom they have been trained to distinguish.

Each dog carries a small bottle of brandy tied to his body and also has a light attached to his collar. When a wounded man is found the man pulls the string, to which a coil of rope is fastened, ties the rope around his body and is then pulled back to the French trenches. The dogs work quite silently. So far none has been noticed by the enemy. They never assist Germans.

The authorities, it is said, purpose to extend the scheme to the rest of the front as enough dogs are trained—the training takes from six to eight weeks—hoping thus to save thousands of wounded who would otherwise be condemned to a lingering death by the impossibility of reaching them in positions exposed to the enemy's fire.

One rescue was recently made by Marcel Monniot, the Paris international rugby football player and oarsman, who saved a wounded officer who was lying exposed near a German trench. When Monniot announced his intention of bringing him in his comrades told him he would certainly be shot by the Germans, as it was broad daylight and the ground afforded no cover. Monniot replied:

"Don't worry. There's a fellow over there who rowed against me last year in the Frankfort eight. He's a good sport and will tell the others not to shoot."

Lighting a cigarette, he strolled slowly across the thirty meters to the German trench, picked up the officer and started to return. Sure enough the Germans did not fire, but Monniot was mentioned in dispatches and decorated with the Croix de Guerre.

Chief of Police Rings Curfew at 8 o'clock Tonight; All Kiddies Must be Off Streets at That Hour

MEMORY FAILED QUIMBY AT HEARING; CHARGED WITH LARCENY OF LAMPS

George Quimby, an Oswego letter carrier, got a rude shock yesterday when he was arrested charged with petit larceny on a warrant sworn out by Robert Morrison of the West Side Garage corporaton, this city. The arrest was the sequel to a moment of great thoughtlessness on the part of Quimby, according to the story Morrison told Judge Wilson in City Court last night, when Quimby was arraigned.

Morrison is manager of the West Side garage, operated by J. J. McGuiness and several local men, and he was about to close the garage one night last week when Quimby drove up in his car with one of his front lamps out of commission. Morrison alleges that Quimby asked for new lamps, and Morrison selected four from the stock and fitted them to the car. After he had the lamps lighted, Quimby started the engine and while Morrison's back was turned attempted to make a getaway without paying for the lamps, according to Morrison. The garage manager leaped upon the running board of Quimby's car but was met with a blow in the chest that sent him upon his back in the road, and Quimby drove off.

Morrison managed to get the license number of the car and the garage owners wrote Secretary of State Hugo and learned the owner's name. Quimby was served with the warrant yesterday.

In City Court last night, Quimby entered a general denial and a plea of not guilty to petit larceny. He said he owned the car but did not remember buying any lamps in this city. Morrison, however, is positive that Quimby is the man. He was remanded parole in the custody of his counsel until July 14 when his case will be tried. Barnes and Mouringham of Oswego repfresented Quimby.

Italian Troops Invade Austria, Occupying Seven Towns; Shells Batter Fort

Milan, June 26.—The Italian army continues to make marked advances in the east, the west and the north. Splendid progress has been made in the Val Sugano, where Carsano, two miles north of Borgo, has been occupied.

This shows that the column following the course of the river Brenta have penetrated in a westerly direction nearly thirteen miles into Austrian territory. In their onward march they have occupied Tezze, Grigno, Ospedaletto, Strigno and Castell Nuvo.

At Borgo the Italians will be within twenty-two miles of Trent and also will occupy a favorable position at an important center, with good motor roads leading into the valleys of Cave and Campobello.

Progress also has been made in the Valle Cismon, where the Italians now occupy Monte Belvedere, which gives them command of the entire Fiera di Prinere group. Similarr progress has been made in the Val Vezzena under the Austrian forts of Folgaria and Lavarone, where the Italian batteries have reduced to silence the forts of Spizverle, Buraverle and Lanci.

Meanwhile the systematic bombardment of Fort Hensel at Malborghetto, which has been going on for a fortnight, is giving excellent results. First the upper works and then those at the base were dismantled. Italian shells are now pounding at the vital parts of this great fortress and the cupola, in which the Austrians had a t welve-inch gun has been demolished.

The Austrians are so hard pressed at Piezzo that they have begun the construction of fresh lines of defense upon which the Italians have advanced as far as Javoreck, between Monte Nerro and Piezzo.

The summit of the mountains, which is about 5000 feet high, has not yet been occupied, but the Alpini have got a firm footing on eastern slope, which endangers seriously the position of the Austrians at Piezzo.

The Italian operations are continuing successfully also on the southern Isonzo front where, from their positions at Gradisca and Monfalcone, the troops have moved forward, and have driven the Austrians from the last points they held at the extremity of the Carso hills, where the Austrians threatened the railway line between Gradisca and Monfalcone.

The retreat of the Austrians at those points leaves the Italians in full control of direct communication between the two towns, as well as command of the highways of Ronchi.

Other important points occupied are Globna, north of Plava, and the entire course of hilly spurs between Sagrado and Monfalcone.

BUY IN FULTON

REASON NUMBER 12

Because the Fulton Merchant Pay His Share of your City, County and State Taxes

The merchants of Fulton contribute their full quota to the support of Fulton city. They help you pave the street in front of your house; they help you support the public or parochial schools; they help you have good water and clean milk; they help you pay our policemen and our firemen; they help you make Fulton a pleasant, inhabitable place in which to live. Moreover, they help Oswego county and the Empire State just as you help. Our Government is "of the people, by the people and for the people." Our merchants are our people, and they support our government. The Government is necessary for the protection of our rights, for the very protection of our propety and ou lives. It must be supported. Should we not rather support those who help us support our Government than those whose taxes are paid, and spent, in another community?

CHAMBER OF COMMERCE

EMERICK SHARE BROUGHT $1210

John W. Marno of Boston Purchased Trustee's Interest in Parker Co., Bankrupt

The final chaper in the history of the Parker Transmission and Appliance Company, bankrupt, of this city, was completed this morning when the trustee's share in the patents and appl ances of the company, as well as the trustee's share in a law suit brought against James H. Dunn and James L. Doherty, as sold to John W. Marno, of East Boston, Mass. Mr. Marno is an inventor.

When the sale opened at 10 o'clock this morning in the office of Claude E. Guile, attorney for the trustee, Louis W. Emerick, three bidders were present: Mr. Marno, Allan Webster, an attorney of Springfield, Mass., and Robert Pendergast of this city. Mr. Webster, it is said, was acting as agent for James H. Dunn, one of the defendants in the suit brought by the trustee. Mr. Pendergast was also acting as agent for an out of town purchaser, it is reported.

Mr. Marno's bid was $1210 was high, and motion for the consummation of the sale will be made this af- [illegible] Guile.

The purchaser now controls the trustee's interest in the many Parker patents, most of which are for transmissions, sliding gears, and transmission devices for automobile and other gasoline engines. The Parker transmission appliances are patented in the United States, Great Britain, Canada, Austria, France, Germany, Italy and Belgium. In addition to the patents already granted, Mr. Marno purchased the trustee's interest in several patents which have been applied for.

The Parker company went into bankruptcy about a year ago. The company made automobile transmissions but owing to the high price of the transmissions, they did not sell readily in competition with other and cheaper transmissions.

30 CLERKS NEEDED TO MAIL BIG FORD BONUS

Detroit, June 26.—The Ford Motor Company is making preparation to attend to a little office detail in connection with the $15,000,000 bonus to be distributed among Ford owners in August.

The company is about to write 300,000 checks for $50 each to be mailed to owners throughout the world. A staff of thirty stenographers will be employed six weeks at the task.

ATTEMPT TO ROB STORE CONVINCING PROOF THAT ACTION IS NECESSARY

Chief of Police Dyer announced this morning that the Curfew law will be strictly enforced in this city commencing tonight. This law forbids children under the age of 15 on the streets of the city, or abroad at night after 8 o'clock unless accompanied by parents or guardian.

Chief Dyer said this morning, "We have not enforced the Curfew law in some time, as it is a little severe. But it has come to the point where we must enforce it as the smaller children of this city are not being watched by the parents as carefully as they should be. Last night two children, neither over twelve years, were arrested in the down-town section while they were trying to break into a store. This was after midnight.

"Something must be done at once. Beginning tonight, every child under the age of 15 years who is found on the streets alone unaccompanied by an older person will be taken to the City Hall and detained there until the arrival of the parents. If the parents refuse to look after their chilldren, the police will."

The Chief was asked, "Suppose a child comes down town at 7 o'clock and goes into the moving pictures, which let out at 9 o'clock will that child be detained?

The Chief answered that the moving picture houses were obliged to refuse admittance to children under 15 unless they were accompanied by an older person, and further stated that any child abroad after the hour set by law, will be taken in charge.

Parents are therefore advised to inform their children as to the new mandate, in order that Little Clarence and Baby May will not fall into the police drag-net and spend many weary hours in the calaboose before their fond parents rescue them.

Possession of River Stubbornly Contested by Austro-Germans

London, June 26.—The most significant development in the Galician theatre in the last twentyfour hours has been the Russian counter offensive on the Dniester river. Buffeted by the Austro-Germans along the Tanew, around Rawa Ruska and east of Lemberg, they have shown their remarkably resilient characteristics by turning on the Germanic allies between Halicz and Zuranna and beating them back across the river.

The middle Dniester now is the crucial sector of the eastern front. Until the recapture of Lemberg the opposing armies here were comparatively small, but with the rellase of large numbers of men from the capital both sides have brought up strong reinforcements. A breaking of the Russian line, it is believed, inevitablly would lead to the destruction of the four, and possibly five, corps that hold the front from Halicz to Mikalajow, and to this fact is attributed the almost superhuman efforts that are being made both by General von Linsingen and Grand Duke Nicholas.

North of the Dniesterr and still farther north, over the frontier in Poland, the Austro-Germans are sweeping forward. Whatever the outcome of the struggle in the south the Russian armies have met with such reverses that, in the belief of London military writers, from the standpoint of the Allies the western theatre seems to be the only quarter which holds out the possibility of a decisive action during the summer.

The French and German assertions relative to the fighting on the westerrn front are widely at variance. Military observers here believe that the French still have their eyes on Lille, with its factories and railrroad lines, and advance the theory that the recurrent and persistent attacks week in and week out along virtually the same section of the German front prove this.

The initiative in the east still rests with the Austro-Germans. Few military writers care to hazard a guess of what their next move will be. It is argued by them that the situation in the west may at any moment become pressing and that Germany and Austria may be forced to be content with having recovered Galicia and broken the Russian offensive without seeking further to humiliate her at this time.

Opinions

Submarines

German submarines are no better than those of the United States. Sponsor for this statement is Simon Lake, who invented the even-keel type of submersible. The Germans, he says in the New York Times, have had "dreadful engine trouble in their underwater boats, but they have kept quiet about it and have worked for general averages." It may be mentioned that the Kaiser's submersibles, like ours, are of the even-keel kind—that is, they sink in a horizontal position instead of "diving."

Mr. Lake thinks that the most effective defense the United States could have would be a huge fleet of underwater craft. He believes that such a flotilla would not only keep our shores inviolate, but would prevent any large naval battle between dreadnoughts. As no battleship would dare approach, if our coast waters were thickly infested with submersibles, our own dreadnoughts would not have to go into action, and, therefore, many lives would be saved.

There is considerable truth in Mr. Lake's contention. A vast fleet of up-to-date submarines would probably make a nearly perfect means of defense for our coasts. But a navy has other duties than those of defending shore lines. If this country should become involved in a war it would be most important that our merchant ships should have the freedom of the seas. The present war furnishes an example. With the land forces evently matched, it is probable that England's supremacy on the seas will give the victory to the Allies. The markets of the world are shut to Germany and open to France and Great Britain. As the strain of waging modern war is terrific, it is thught that Germany may before long come to the end of her resources.

Submarines have a limited range of travel, and they could not prevent our ships fom being attacked in midocean or when approaching foreign neutral ports. Dreadnoughts still have an important part to play in naval warfare, and this country should be well supplied with them. At the same time, our lack of military strength makes an adequate coast defense imperative, and Mr. Lake's idea regarding a "screen" of submersibles should receive due attention from the government.—Rochester Democrat.

How Canada Bears the War

As in character, so in material resources, real values are most clearly discerned in periods of stress. Canada in war-time furnishes an illustration of this,. In the western provinces many of the values are fictitious, there has been much speculation, including wild-cat dealings in real estate, and the crop conditions are uncertain. The West is, therefore, keenly feeling the pinch of the European conflict. On the other hand, one discovers few signs of financial stringency in the argricultural districts of the province of Ontario, in which prosperity is honestly established in the soil and the trade that it supports.

Some young men have been drawn from the farming districts of Canada for the war abroad, and the interest in the titanic struggle has thus been quickened throughout the Dominion. One may see evidences of war in hundreds of horses corralled at Windsor, or soldiers guarding power plants on the Niagara frontier; but not even in those districts, and much less in such a garden spot as the county of Kent, is one llikely to discover, even if one looks hard, any sign of business distress as a result of the appeal to arms to which Canada has responded so vigorously. On the contrary, on farm and in shop there is a spirit of business enterprise unknown there a decade ago. Fine country homes are supplementing great barns; rural district, village and town are availing themselves of modern improvements; the telephone is everywhere, and the automobile serves and entertains countless country and town folk.

To be sure the war would unquestionably be severely felt by even so sturdy a province as Ontario if it were near a theater of military operations. As it is, however, large numbers of Canadians are perhaps even more prosperous than they would be if there were no war, because of the higher prices they are obtaining for their products. The hard times they fear are still in the future. They have enough and to spare, and they are sparing much for the relief of those who war robs of food and raiment and home, security and happiness, kith and kin, health and life. As for positive material loss, their wealth is so real and indispensable that they seem not yet to have suffered any. —RochesterDemocrat.

Lansing Secretary of State.

The appointment by President Wilson of Robert Lansing to be Secetary of State, to succeed William Jennings Bryan, will meet with general popular approval. He possesses exceptional ability as an expert in international law, is thoroughly familiar with the personnel and organization of the Department of State, is conversant with the confidential details of the important negotiations conducted since the Wilson administration began, and has a wide knowledge of policies under previous administrations and an especially intimate acquaintance with Mexican and Far Eastern problems.

Mr. Lansing was born in Watertown, N. Y., on October 17, 1864. His father was a lawyer of prominence. An ancestor was John Lansing, who represented New York in the constitutional convention of 1787, and later was chancellor of the State of New York. Robert Lansing graduated from Amherst College in 1886. In college he was a member of the Psi Upsilon fraternity. He studied law and, after being admitted t othe bar in 1889, practiced with his father in Watertown, under the firm name of Lansing & Lansing. In 1892 he was appointed associate counsel of the United States in the Behring Sea fur seal arbitration. In 1896-97 he was counsel for the Behring Sea Claims Commission. In 1903 he was solicitor for the United States before the Alaskan Boundary Tribunal. In 1909-1910 he was counsel for the United States at the North Atlantic Coast Fisheries Arbitration at The Hague. In 1912-1914 he was counsel for the United States at the American and British Claims Arbitration. He also served as counsel for the Mexican and Chinese legations in Washington.

Mr. Lansing succeded John Bassett Moore as counselor for the Department of State on March 20, 1914. He has been openly regarded as President Wilson's mainstay on questions of international law in all the difficult diplomatic negotiations of the United States since the European war began. While the phraseology of notes to Great Britain and Germany have admittedly been the work of President Wilson and former Secretary Bryan was consulted from time to time during the course of their preparation, it is no secret that the President was in almost constant communication with the counselor for the State Department on the many intricate points of international law. Mr. Lansing has commanded the respect and admiration of the foreign chancelleries in Washington to a marked degree.

Mr. Lansing's writings on international law have attracted wide attention. Since 1902 he has been an associate editor of the American Journal of International Law. While he has always been a Democrat, he has never been a partisan. On January 15, 1890, he married Eleanor, daughter of John W. Foster, Secretary of State under President Harrison. He is a member of the American Society of International Law, American Political Science Association, National Geographical Society and the Holland Society of New York.

Personally Mr. Lansing had no political backing whatever, which is another reason for satisfaction over his appointment. President Wilson is to be congratulated on having the opportunity afforded him to secure a man of such splendid qualifications. In case of death of the President and Vice President Mr. Lansing, under the succession law, would become President. Last Tuesday the new Secretary attended the Colgate commencement, where he was given the well merited degree of LL. D.—Utica Observer.

WHEN GOD IS FOUND

There are those who say that our age and our race have lost God. If that be true, what will result when we have found Him again, and how shall we find Him?

When God is found again the hills and plains will be sacred in the beauty He gave them, and no advertisement of cigars, or soap, or whiskey, or patent medicine will be deemed holy enough, or lovely enough, or necessary enough to adorn the countryside through which our trains must pass.

When God is found again there will still be crude harsh labors for us, forceful, dangerous and ugly tasks—other wise there would be small chance of heroism—but the bodies and souls of our kind will not perish in the fires of our factories, and the smoke ascending from their chimneys will not be symbolic of a human holocaust. For the laborers will be allowed to labor sanely and will be rightly rewarded.

When God is found again society will have learned the law of cause and effect, and will no longer manufacture crime and then left up hands of vengeance against the criminal. Society will rather seek the redemption of those born in filth and nurtured in squalor and sin, and will provide for future births in virtue and health.

When God is found again nations will no longer murder each other nor will they arm themselves for the preservation of selfishness, but will purge themselves of individual lusts, and blot out their boundaries by love so that all citizens may be citizens of the world, protected under any flag. And in those days there will be but one army and one navy, equipped for the restraint of evil and the furtherance of justice, and the taxes of the people will be small, and every man will be a prince of peace and every woman a staunch soldier of the God Who is found.

When God is found the white slave will be delivered from bondage, for her destroyer will become her brother, and the world will be a world of wives as well as husbands, of mothers as well as fathers, a world of women and men, with equal rights and opportunities.

When God is found there will be a great blossoming of genius, a florescence of pictures and poems and songs and symphonies and inventions, and many gardens will be planted upon the face of the earth. The dogmas and cults will be few, but prayers and praises many.

But God will not be found until we go out to seek Him, a vast human throng with a divine purpose, with our hands held in other hands, or with our arms about one another's shoulders, close-knit comrades, with eyes seeking one vision, and lips and hearts singing in unison the pæan "Together."

Marguerite O. B. Wilkinson.

"Drink causes poverty. Members of the St. Vincent De Paul Society of the Roman Catholic Church in their charity work find that most of the cases of poverty are occasioned by drink," asserted Bishop J. M. McGavick of the diocese of Chicago, at the recent convention of the Catholic Total Abstinence Union of Illinois.

"I believe the best work that a man of God can do to promote temperance is to pray for it, remembering that prayer is like faith—it needs good work to make it effective," said Bishop Paul P. Rhode on the same occasion.

* * *

The economic argument for total abstinence is having strange confirmation. The Boston papers last month, in chronicling the departure of the schooner "Orleans" for West Africa, noted that the underwriters who insured the cargo required that every man who signed the articles as a sailor for the voyage should also sign the pledge. The reason? The cargo was two hundred gallons of rum! But who will underwrite the poor blacks whom that liquor will brutalize?—The Christian Herald.

* * *

The benefits of the prohibition of the sale and manufacture of intoxicating liquors have been so great in Greensboro that in my judgment there could not at present be found a corporal's guard in Greenboro that would be willing to go back to the old regime.

At the time that the saloons were voted out, it was predicted that business would stagnate, that rents would go down, that there would be much vacant property, etc. None of these predictions came true. On the contrary, Greensboro continued to prosper, business improved, real estate values increased, and while none of the material disadvantages that were prohesied came true, the community has made vast improvement in every way. There followed a better moral tone, more civic pride, better community tone, more civic pride, better community conditions, and Greensboro is today a thousand times better place in which to live than it was before prohibition was enacted. I doubt if any man could be found in Greensboro who would advocate a return to saloons.

The blessings of prohibition, material, civic and moral, have been so great, and it has proven to be a community asset of such value that there is no slightest danger or probability of return to the old conditions. Prohibition in Greensboro is a fixture.

GRACIOUS PETER!

"Why are you dragging around that Edison 3,000,000-candle power searchlight?" Diogenes was asked.

"I am searching for an honest man,' replied the philosopher.

And the heavens wept.

Expert Advice for the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

My rear axle makes a noise, especially when turning a corner. I have had new housing and gears put in, also new bevel gear driving pinion. When I screw the pinion as tight as I think it ought to go it binds. What is the matter?

This condition is due to the shifting of the large differential gear, so that it moves away from and toward the driving pinion. The cause of this is usually a loose truss rod, which permits the housing halves to separate. The left half of the housing should be removed and the bolts reset and tightened, and then the truss rod taken up as far as possible to form a rigid construction. If you are not familiar with the work do not attempt it and under no circumstances should you try to readjust the gears to compensate for the loose rod.

Are chain carbon removers as good as the scraping method?

Much has been said against this method of removing carbon from the cylinders, but it has been tried with very satisfactory results, no harmful effect on the motor being noticeable. It certainly is a quick and effective method and equal in every way to the result obtained when the cylinders are removed and scraped. Many people are afraid that if they use this method there is danger of the chain catching in the valves or that small pieces of the chain will become broken off and score the cylinders. Both experience and careful thought on the subject, however, will show that there is no possibility of the chain catching in the valves of any poppet valve motor. Of course it would not do to use the chain in a rotary or sleeve valve motor, because it would get caught between the edge of the valve and the edge of the ports and be ground to pieces, and at the same time the valve would be injured. Furthermore, there is no possibility of small pieces of chain breaking off and scoring the cylinders for the reason that the chain is not brittle. It will bend before it will break. Nor is the material hard enough for the remover to scratch the cylinder as it is battered about. The chain will only remove the carbon from the top of the piston, the cylinder head and that part of the bore that is above the piston travel. The valve pockets must be scraped, but as these are easily accessible this is not an objection.

How are platinum points fastened to screws of a magneto?

One method is to hard solder the points in place. The first step is to cut two small slots at right angles in the end of the two members carrying the points. Then by the aid of the brass solder the points are fastened in place.

Kindly tell me something about long and short intake manifolds. Which is the better?

The short manifold usually is better, showing superior results at low speeds with wide open throttle and equally good results at high speeds. When the throttle is wide open at low speeds, a condition existing when the car is on a heavy pull, the liquid gasoline in the manifold must be lifted a greater height in the long manifold, and hence there is a chance of loading up, due to the liquid fuel dropping back against the throttle. The condition really is caused by the air velocity being insufficient to carry the fuel to the motor. With a short manifold the fuel need not be lifted very high, and hence there will be no loading up or collecting of gasoline in the manifold.

What is the life of the average storage battery when used for starting?

A starting and lighting battery will last for three to four years, if properly cared for. Each year the battery will need new separators.

How can I change a low compression motor to a high compression one?

The compression may be raised by several methods. It is hardly advisable to make this change, because your motor has been designed for a certain compression, and if you raise it, say ten pounds, you will submit the cylinders to a greater strain than they were designed for, the pressures on the cylinder walls will be greater and the wear on the bearings more. If your motor is not giving sufficient power you should find out what is the matter with it rather than raise the compression.

Probably the best method is to rivet a plate to the top of the piston or the cylinder, whichever is more convenient. Placing the plate on the piston adds weight to the reciprocating masses, while if it is attached to the cylinder head there is danger of interference with the flow of the gases in and out. In either case be sure that there is clearance enough between the piston and the cylinder to allow the plate to be put into place. If the plate is attached to the piston it should be made of aluminium for the sake of lightness.

Lengthening the connecting rods or increasing the crankshaft throws will also increase the compression. But neither of these methods is as simple or as cheap as the first one suggested.

BORROWED MONEY PAID BACK AND YET OWED

New York.—Justice Frederick E. Crane of the Supreme Court, Brooklyn, decided yesterday against the Eagle Savings and Loan Company in a case brought by Gustave M. and John E. Miller to re-form a mortgage.

The two brrothers—when twenty-one and twenty-three years old—in April, 1905, applied for a loan of $2850 on real estate security, on which they were to pay $25.65 a month. Their application for the loan read for "not exceeding 144 months."

The Millers paid for almost ten years, then discovered they had paid $3050 and still owed $2350—on the loan of $2850. Then it was found the mortgage read "until the maturity of the aforesaid 34.2 class A shares of the capital stock of said corporation."

The Court says the application, received and approved by Elwin S. Piper, vice president of the company, contained words "meaningless, a mere subterfuge, and meant to deceive.

Judge Crane adds that the rule of law is simple, "that a party cannot profit by his own fraud and deceit."

CITY BEAUTIFUL

Will Have Ancient Wonders in a Modern Setting.

ACROPOLIS IN BOULEVARD.

English Landscape Architect Plans Government Center and Other Attractions on the Lines of Economic as Well as Aesthetic Development.

Thomas H. Mawson, the English landscape architect and city planner, who has recently returned to London from Athens, has given the following information as to his great town planning scheme:

"I had the honor of placing certain tentative proposals before their majesties, the premier and the mayor, and the suggested developments were approved. These were the result of three months' study and work, and the ideas are now to be embodied in a preliminary set of plans, which I hope to submit in three months.

"I have made a thorough study and investigation of the archaeological problems, because archaeologists are those with whom a modern town planner has chiefly to contend. I have studied the matter with Dr. Karo, the famous archaeologist responsible for the excavations of the German School of Archaeology in Athens and a leading authority on ancient remains. I spent considerable time with Dr. Karo going over every yard of the ground likely to be affected by the new city plan and have mapped out with him the area over which excavations will be conducted.

"The scope of the work of reconstructing the city will be even more extensive than was originally expected, as the largely increasing population that is flocking into Athens demands very extensive street planning for the future.

"It is now agreed that there must be very considerable clearing of undesirable property in the neighborhood of the Acropolis, around which a great boulevard is to be constructed. Before, however, much demolition takes place it is proposed by the mayor, M. Beneckes, who has lived a great deal in England and has been much interested in the question of the housing of the people, especially in Bournville, Port Sunlight and other garden cities, that an extensive housing scheme shall be developed—a scheme planned on the latest English models, but adapted, of course, to the climatic conditions of Greece."

Mr. Mawson said that he has submitted to the authorities rough suggestions for dealing with the new government center, saying that the starting point of the plan will be the new union railroad station, into which it is proposed to bring the several lines of railway now running into Athens. The suggestion respecting the site of the station has met with general approval and probably will be adopted.

"It will afford a panoramic view of great beauty of the most interesting portion of ancient and modern Athens and will give a visitor a fine—and probably lasting—impression of the city," he continued. "One view will include the Temple of the Winds, another the Acropolis, another the Temple of Theseus and another the new government center. The Lycabettus will form another view, while still another vista will lead up to the beautiful park.

"The new houses of parliament, the various ministries and other important buildings in the government center are now receiving much careful attention. I have had several interviews recently with M. Gennadius, the Greek minister in London, who has taken great interest in this part of the work."

Provision is made in the scheme for well placed first class hotels, and it is anticipated that the extended suggestions will lead to the removal from ancient Athens of numerous small factories and the grouping of them in a new area, where they will be in direct communication with the railways. Thus heavy traffic will largely be taken from the roads in the ancient city.

Mr. Mawson believes that the population of Athens will in ten years reach half a million and that the railway traffic will have increased fivefold. He also contends that the replanning scheme will be on the lines of economic as well as aesthetic development.

Government by Commission.

Government by commission, first carried out in the United States, has been hailed as an almost revolutionary step in the science of city administration, but a step even in advance of this has been conceived by the city of Leeds, England. This city, with a population of 500,000, has a low death rate, clean streets, an excellent street railway system and gas works, the latter two municipally owned. Now the city has delegated its administrative power to an executive committee of seven aldermen, which committee has appointed J. B. Hamilton, former manager of the street railway department, as city manager. To date the change in city management has effected a saving of $30,000, and "Manager" Hamilton proposes by effecting the same methods that he would in the administration of a large business to make a still further saving.—Milwaukee Civics and Commerce.

TLE FOR SUCCESS.

It is a time of sharp competition and villages and towns as well as cities are compactly organized. Active, well equipped and well financed commercial bodies are alert in every community. They are striving for self advancement and are overlooking no opportunity. Superior advantages do not count for full value unless presented forcibly. * * * To improve our opportunities, to enjoy fully our natural advantages and our work of preparation, we must fight as other citizens are fighting, only harder, to prove to the stranger what we know is true.—Augusta (Ga.) Chronicle.

FOR QUICKER ACTION.

Keokuk Industrial Organization Reduces Red Tape and Saves Time.

Under a new form of organization the Keokuk Industrial association has aimed to reduce the amount of red tape usual in commercial organization work and to minimize the time required for the various committee meetings, thus hampering the private business affairs of each committee member as little as possible.

The executive committee as reorganized is made up of five members, these being the officers of the association. This is the quick acting body of the organization. Five departments were created for the consideration of the five main divisions of activity—viz, industrial affairs, city affairs, financial affairs, public relations and association affairs. Each member of the executive committee was assigned to one of these departments. The usual committees of the organization were continued, but were distributed among the above departments, the basis of distribution being the nature of the committee work.

The department heads have authority in conference with the manager of the association to take such action as may be deemed advisable in handling the different items of business which come up for consideration. A meeting of the executive commitee resolves itself into a cabinet meeting for the consideration of policy, reports and results. The general policy of the association, all appointments, all legislative matters and the final indorsement of all efforts are handled by the board of directors.

Specific items of business are discussed and handled by the head of a department without leaving his office. The manager of the association takes to him the correspondence and other necessary information. They go over the matter in detail, and the manager makes his recommendations. After conclusions are reached the manager is authorized to handle the matter as agreed upon or to instruct a committee in that department to do so. This plan saves fully one-half the time formerly occupied by members of the executive committee at the committee meetings, has greatly increased the volume of work accomplished and assures immediate dispatch. Under this plan it is also said to be increasingly possible to keep all the members of the organisation active, the different committees being kept more busy than ever handling the work assigned.—American City.

PREVENTING SLUM AREAS.

A City Should Control the Layout of Streets Beyond Its Borders.

One of the most important powers a city can have if it is to prevent the development of slum areas in the future, urges the Bulletin of the National Housing Association, is that giving it the right to control the layout of streets beyond its borders. The size of blocks and the width and arrangement of their boundary streets often exercise a determining influence on the character of the housing.

If the street is too wide and expensive land overcrowding and the erection of tall dwellings to carry the burden are almost inevitable. On the other hand, if the streets are too narrow, or if no main arteries are provided, or if the lot units are too small, the speculators may make quick sales to small buyers, but the city will have a long future full of trouble when it absorbs the new, misfit development.

Toronto has provided against all these difficulties by securing a city and suburbs planning act, which gives it the power to control all subdivisions within five miles of the city limits with respect to the width and number of streets and the direction in which they run and the width and depth of lots. Pennsylvania has a similar law for cities of the third class, giving them jurisdiction for three miles beyond their borders.

Home Finding Bureau.

A growing community is invariably confronted by the problem of housing its incoming population, says Dr. Carol Aronovici in the Town Development Magazine. Business organizations are frequently responsible for an abnormal influx of workers who wander about the city in search for a home.

We have labor exchanges and stock exchanges and clearing bureaus for charities, but the idea of a clearing bureau for information regarding the availabilities of homes has been left to the real estate dealer and the advertising page of the newspaper.

An active business organization should always be in a position to furnish at a moment's notice complete information regarding the housing facilities available in the community, and a home finding bureau or department should be an integral part of its machinery.

THE CITY BEAUTIFUL

CIVIC EMBELLISHMENT NECESSARY FOR CITIES.

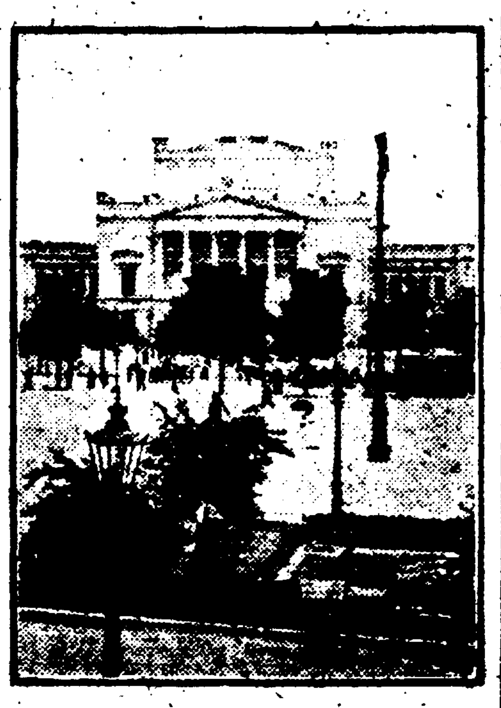
Streets Should Be Given Proper Attention In Every Detail.

However well a city may be planned, its avenues laid out and its parks provided in liberality, it will fail of realizing its full advantages unless its streets are properly embellished, kept clear of nuisances and given proper attention in every detail.

Such embellishment consists, among other features, of boulevards, esplanades, bridge and park approaches, water gates, quays, plazas, squares, bay fronts, terraces, monuments, statuary, fountains, trees, grass plots, artistically designed electroliers, trolley poles and other structures and details.

The combination of such features makes up the impression given by the streets, and just at this point carelessness, neglect or inadequacy in the treatment of small structures or other objects is likely to destroy the whole effect and spoil what has been accomplished at the cost of much time, skill, labor and expense.

A rigid policy of exclusion of all unnecessary objects and the ornamentation or concealment of those that must remain should be followed. The most careful attention must be given to each



AUGUSTUS SQUARE IN LEIPSIG.

and every minor detail, and once the method of treatment is determined upon it must be carried out. If, for instance, house numbers are to be of a certain style the style must be made known and the requirements enforced and not be permitted to be avoided or neglected by householders. No details should be overlooked and under no considerations should new obstructions be given a place on the street unless demanded by the utmost necessity.

Perhaps the most important features of civic embellishment are the boulevards, esplanades, plazas and the use of grass plots, shrubbery and trees on the streets.

Trees and other vegetation are highly desirable features of civic embellishment and should be employed wherever it is possible to utilize them. They temper the heat and the glare, afford agreeable shade, relieve the eye, improve the air, reduce the violence of the wind and limit the force of the rain, conceal defects and necessary structures, lessen the dust, improve the vistas and offer unending sources of variety and interest.

Among the various structures and minor utilities which are a necessary part of the equipment of streets and which must be provided for and treated in the proper spirit are tramway stations, elevated railroad structures, subway entrances, safety isles, meteorological stations, news stands, comfort stations, advertising kiosks, electroliers, trolley poles, letter boxes, fire and police alarm boxes, hydrants, street signs and various forms of advertising signs.

The proper method of treating most of these items has already been sufficiently indicated, but a further consideration of some of the items may be useful, for it is always possible to treat all such equipment in such a way as to make it serve an aesthetic as well as a utilitarian purpose.

Trolley poles in cities using the overhead system, if properly designed, can be made a highly ornamental feature of street equipment, despite their condemnation by many landscape architects. Indeed, certain civic engineers, after struggling with the problem of the street car on boulevards and being unable to solve it, suddenly turned about and announced the impressive discovery that the street car was in reality a decorative feature of the first aesthetic importance. The same naivete may be expected when the effect of suitably designed trolley poles is discovered.—Frank Koester.

Statues For Juveniles.

Superintendents of public parks the country over are beginning to follow the English idea of setting aside tracts for the sports of young people, and those having such matters in charge are urging that the statuary gracing public playgrounds should be of the sort to appeal to boys and girls.

Chicago, for example, has long had a statue in Lincoln park before which many a little one has paused, well nigh in reverence. It is that of Hans Christian Andersen, the famous writer of tales for children. The statue not only interprets the personality of the children's favorite author, but leads young and old to hunt up his biography and his stories and read them anew.

CHILDREN'S MARKET A CIVIC ENTERPRISE.

Young Folks of Norwalk, Conn., Conduct Vegetable Displays.

A children's market is the latest innovation in the civic enterprise of Norwalk, Conn. This market is conducted Saturday mornings from 8 to 10 o'clock on the main street in front of the Norwalk hotel by the garden committee of the Norwalk Civic league. On display are all sorts of garden truck grown by the youngsters of Norwalk in their own gardens. For several years the committee has awarded prizes for the best six children's gardens in town. A few weeks ago the chairman, Miss D. S. Pinneo, hit upon this additional inducement to juvenile industry.

Prices are fixed by a representative of the Civic league after inspecting the wares offered and consulting with nearby tradesmen. Account is kept of each child's sales, and at the end of the season a prize will be given to the youngster with the best record.

"The market is part of our plan to beautify Norwalk," said Miss Pinneo, chairman of the garden committee. "We encourage the children to plant gardens, supplying the seeds free as an inducement. Our inspectors make sure that the children are doing the work themselves. So far, so good. But then our small farmers had the fruits of their labors and no outlet. So we planned this market, and we are delighted with the results. There has been a decided increase in trade since the opening day a few weeks ago."

JAPANESE CITIES BACKWARD.

Do Not Compare With American Municipalities in Civic Improvements.

Following is an extract from a consular report from Consul George N. Wish, stationed at Kobe, Japan:

Japanese cities are very backward with respect to municipal improvements as compared with American cities. There will be a large field in this direction some of these days, however, for American enterprise. There is no city in Japan with a sewage system and none that I know of in which the streets are lighted or paved. Just now the city of Kobe is engaged in two large works, the harbor works and waterworks, which have been lagging considerably for lack of funds. No city can undertake anything of this kind without the permission of the central government at Tokyo.

The incidence of taxation in Japan is very high, while the wealth per capita is very low, and the government at Tokyo has been making strenuous efforts at retrenchment in order to relieve the strain and adjust the finances. There are in this consular district one city of 1,250,000 inhabitants, three of about 450,000 and numerous smaller ones, so that when the time is judged favorable there will be a very large amount of this kind of work undertaken. I should advise Americans who are interested in these various lines to keep in touch with the general financial situation in Japan.

With regard to city roads, there are no curbs outside of the foreign concession, and they are only repaired with shingle from the seashore. This answers the purpose, after a fashion, as there is no heavy wheeled traffic, and consequently the need for pavement is not very pressing. One firm in Kobe laid down at its own expense a short strip of asphalt paving as an experiment, which induced the city to pave in this way the principal shopping street for a short way, and the tramway company has put down granite blocks in one particularly busy street.

PLAYGROUNDS IN CITIES.

Rapid Growth of Amusement that Lessens Juvenile Disease and Crime.

A report given out recently by the Playground and Recreation Association of America includes the following interesting statements:

Thirty years ago playgrounds were almost unthought of. Today it has been proved that almost any city, with the help of the association's experienced field men, can secure not one playground, but a municipal recreation system side by side with the school system.

Jane Addams and Dr. Charles W. Eliot, in a letter regarding the association, have said:

"There are few opportunities for contributing more effectively to the lessening of juvenile disease and crime, producing social and industrial efficiency and increasing the joy of life."

Birmingham, Ala.; Dayton, O.; Ishpeming, Mich.; Kansas City, Mo.; Lynchburg, Va.; Montreal, Canada; Red Bank, N. J.; Scranton, Pa.; Sioux City, Ia.; Tampa, Fla., and Wheeling, W. Va., have all established year round recreation systems during the past twelve months, and Indianapolis, Ind., and Rochester, N. Y., have had assistance in trying to develop more comprehensive municipal recreation.

Eighty-three American cities have now what all communities need—play leaders employed throughout the year. Twenty-four million of the country's 30,000,000 children live in communities where playgrounds or other organized recreational activities are not available throughout the year. For over 21,000,000 of these children there are not even summer playgrounds.

A RECURRENT PUZZLE.

It would appear that about the last thing with which one could charge an American citizen would be a lack of ingenuity and originality. Forward looking, quick of mind, essentially inventive, the American is keen to resent any such apparently unwarranted imputation. In one respect, however, he has shown himself singularly hidebound and imitative.

Whether it be an inherent though unadmitted conservatism or a strong devotion to deep rooted habit and prejudice, the American has, at all times and in every clime of this broad country, displayed a tendency to borrow a name by which shall be known the town in which he takes up his habitation. Thirty-one Washingtons, twenty-two Madisons, twenty-three Oaklands, sixteen Lincolns, twenty-one Columbias, even ten Bostons, prove his lack of originality in this particular field.

When, therefore, one of these cities—in spite of the fact that there are fully a score of other cities of the same name—puts out a trade organ or a prospectus without qualifying the city name with any state address, it sometimes proves rather difficult to determine just which of the multitudinous Columbias, Lincolns, or Oaklands is referred to by the publication.—Town Development Magazine.

JUVENILE DELINQUENCY.

Judge of Buffalo's Children's Court Scores the Railways.

Sixteen lines of steam railway enter the city of Buffalo, completely encircling it, writes Judge George E. Judge of the children's court, Buffalo, N. Y., in the American City. There are 725 miles of railway trackage within the city limits. In some of the railroad yards we find eighteen to twenty tracks and standing upon these tracks miles and miles of cars loaded with every conceivable article of merchandise. To protect this property a few railway police are employed. These men work long hours and receive small pay. Our newspapers frequently inform us that some of these railroad police are themselves arrested and convicted of burglarizing cars.

Thirty per cent of the boys appearing in our children's court in 1913 were charged with offenses against railroad

A DANGEROUS BACK YARD.

property. The cost to the state of New York and county of Erie of caring for boys convicted for crimes against railroad property and sentenced to institutions from Buffalo was $11,000. Offenses of this character will increase year by year until the railroad property is properly protected, and this neglect on the part of the railroads will continue to be responsible for making criminals. Leaving out the cost in money to our state, the saving of these valuable lives by removing the temptations which cause boys as well as adults to become criminals is worth more than can be computed in dollars and cents. It is a common sight in our railroad yards to see dozens of women and children, sometimes on moving trains, throwing off coal or walking alongside of the tracks, gathering up coal which has fallen or has been thrown from the cars. These women are often arrested and brought into court in groups of ten or twelve, and upon inquiry the judge finds that they have families of children dependent upon them for care.

If the railroads would wall in their yards and station watchmen at the necessary openings the greatest contributing factor to juvenile delinquency would be removed and the number of criminals in all of the railroad centers of this country greatly lessened.

Utility In City Plan.

Many cities have been built on more or less idealized plans, and, while in some cases the result has been pleasing, from an aesthetic point of view the tendency has been to pay too little consideration to individuality and little, if any, to practical considerations and industrial developments.

The utility of the city, as distinguished from its beautification, demands a greater degree of attention than has been accorded it, and the response to this demand by German cities has been largely responsible for their progress.

A HUGE SUCCESS

Boosters in One Small Town Sold About 675 Tickets on One Day

Le Roy, N.Y.—The LeRoy Gazette-News says:

The endeavors of the "Chautauqua Boosters" llast Thursday in their whirlwind campaign for the sale of season tickets for the Le Roy Chautauqua, week of June 25 to July 1, may well be considered an unqualified success. About twenty-four salesmen, composed of business men, ministers and professional men, met at Murdoc's jewelry store at 8 o'clock in the morning, secured their tickets, intructions and the list of names assigned them and fifteen minutes later were "on the job" busy as bees. The forenoon campaign called for work within the village and nearly all the salesmen had covered their territory at noon when they met at Lally's for lunch and reports. The team composed of Calvin N. Keeney and Alex Sutherland showed the largest returns for the time spent, with $156 worth of tickets disposed of. J. G. Gilfillan and E. M. Perkins were a close second with $148. The total sales in the forenoon approximated $800.

In the afternoon the teams climbed into automobiles and started a country wire campaign many of them not getting back into town until late in the evening. Reports the following morning indicated that the day's sales had amounted to very nearly $1200. About seventy-five tickets have been sold since that time, and there remain about seventy-five to be sold to bring the number up to the amount guaranteed by the committee.

Principal William M. Dunn, chairman of the committee, stated this morning that aside from a little territory that was not covered last Thursday, owing to lack of time, and which is to be worked, there woulld be no further organized campaign for the sale of tickets. The guarantee number is certain to be reached before the opening date, and he advises those who have not as yet secured their tickets to obtain them at once from the places where they are on sale, if the minimum price of $2 is desired. Tickets arer on sale at the Bank of LeRoy, the LeRoy National bank, John Murdock's store and the Rochester Grocery. After the guarantee number is sold no more will be available at $2 for adults and $1 for children.

Le Roy is to be congratulated upon the energetic campaign made and the generous support given the movement.

BALDWIN-MOREHOUSE

At the home of Mr. and Mrs. Albert Morehouse in Volney last Thursday took place the marriage of Miss Florence E. Morehouse to Paul A. Baldwin of Mt. Pleasant. Rev. H. D. Holmes performed the ceremony.

The couple left on a trip to Boston.

RECITAL GIVEN AT LIBRARY LAST NIGHT

Last night at the library the pupils of David Carroll gave a recital and the auditorium was filled with guests. After the pupils had completed their program other numbers were given.

Miss Genevieve McCormick gave a vocal solo, "A Winter Lullaby"; Miss Marion Lake gave a group of three songs, "Daddy," by Behrens; "Rittornella," by Clauson, and the "Sweet of the Year," by Satler.

Edward Carroll was heard in a recitation, "Signing the Declaration of Independence," and David Carroll gave a piano solo.

OSWEGO HOPEFUL OF G. A. R. ENCAMPMENT

According to the Oswego Times, Oswego has reason to be quite hopeful of securing the 1916 G. A. R. state encampment.

The 1916 encampment will be the most important held in many years as it will mark the semi-centennial of the State department. Not only would the State G. A. R. meet but the Woman's Relief Corps and the Sons of Veterans also, making a gathering of at least 3000 persons.

Fulton Men Working in Auto Factories

Young men who are about to take Horace Greely's famous advice, "Go West, young man," should interview Byron Smith, Leo Quinn and William Scanlon of this city who returned yesterday from a western tour of two months. The three young men have been working in Detroit and they can inform prospective travelers in regard to the conditions and industrial activity there.

Smith worked on the Ford Motor Company plant making bodies; Quinn was employed in the Studebaker plant at the same task, while Scanlon was employed as tester in the Studebaker plant. All three young had no difficulty in landing jobs for with the 1916 out-put rush on the factories are working overtime every night.

Philo Paige of Park st. and Fred Chesbro who left this city for Detroit about a month ago still hard at work. Chesbro has obtained a good position in the Studebaker company as assembler. Maurice Scanlon is also working in one of the large automobile plants.

MORGANS TO LIVE IN HOUSE 14 FEET WIDE

New York.—The son of one of the richest men in the world lives in one of the narrowest houses in this city. That is, he will live there when he returns from his honeymoon.

Junius Spencer Morgan, son of J. P. Morgan, has leased the four-story brownstone residence at No. 123 East 36th st., just east of the big Morgan mansions. The house ss fourteen feet wide. Young Mr. Morgan's bride was Miss Louise Converse, of Boston.

Congregational Church

Rev. Charles Olmstead, Pastor

A special sermon to the members of Hiram Lodge, F. & A. M., will be preached at the morning service, and at noon there will be a missionary service in conjunction with the Sunday school, the subject for discussion to be "The work of the Congregational Sunday School and Publication Society." A special program will be used which is furnished by the society.

Chrristian Endeavor at 6.30.

The pastor's evening sermon subject will be "Trifling Things."

Presbyterian Church

Charles S. Robertson, Pastor

Morning prayer at 10.

Worrship by families at 10:30, sermon theme, "The Trees of the Garden Hiding the Lord of the Garden."

Bible school at noon.

The last vesper service until September will be held at 5 o'clock, sermon theme, "The Spirit of Christ."

State St. M. E. Church

Rev. H. D. Holmes, Pastor

Morning services at 10.30 o'clock. Subject of mermon, "Urgent Need." Sunday school at 12 o'clock.

THE CLEVELAND & BUFFALO TRANSIT CO., Cleveland, Ohio

German Reply to "Promise Due Regard for Neutrals"

The Hague, June .6.—A report received here from Berlin says that Germany, in her reply to the American protest in the Lusitania case, will declare that she will stand out for the freedom of the seas but will try to have due regard for the rights of neutrals and, incidentally, will show her appreciation of the friendship of the United States.

What is described as President Wilson's willingness to mediate to bring about a modification of Great Britain's food blockade of Germany, is accepted as a further mark of such friendship.

Germany, it is said, will intimate rather broadly that perhaps she was mistaken in her assertion that the Lusitania was armed, and she will show that she is willing to modify her methods of submarine warfare, so far as regards neutral merchantmen, provided that her submarines are secured from attacks by such merchant ships and that the misuse of neutral flags is stopped.

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

Albany, June 25.—It is the consensus of opinion of the majority of the delegates to the State Constitutional Convention who are willing to talk, that three important proposed amendments will go down to defeat. These propositions are a single house of the legislature, senators-at-large and a redistricting of the Senat and Assembly districts.

All three of these propositions are about ready to be launched upon the delegates for debate and the next two weeks will very likely record the defeat of one or all of them, if the prediction that is rife at this time is verified.

Objection to a legislature composed of but one house is based upon the belief that there would be no check upon the law-makers of such potency as is at present supplied by a second law-making body. Fault is found with the propostion to create senators-at-large on account of the likelihood of a favored few being designat-

might assist them. The result has been a series of amendments, motions and points of order whihh have bewildered all asve the rlerks and the experts among the delegates.

There will be a sharp struggle when the re-apportionment proposition finally uomes up for disposition. It is said that the delegates from the up-State districts will oppose it and representatives of Tammany Hall announced that they were against it also. The proposition has worthy advocates nothwithstanding.

SAYS GERMANY LACKS MEN TO FIGHT ITALY

Rome, June 26.—Colonel Barone, the distinguished military critic, discussing the effect of the fall of Lemberg, reveals the distribution of the Austro-German forces. He says that before the movement which resulted in retaking Przemysl Germany was opposing the British and French with 1128 battalions of 1000 men each. Against Russia were 708 German and 680 Austrian battal ons. In the last three months Germany diverted sixty-nine battalions from the western to the eastern front; and also employed against Russia four new army corps constituted since the beginning ot the year, numbered 38 to 41.

In these new corps were seventy-two battalions. Therefore, he estimates the German reinforcements on the Russian front comprised 141 bat-

G. O. P. SENATE THE SLOGAN

Important Feature in 1916 ---Senatorial Elections in 32 States

Washington.—Much more is at stake in the next campaign than the election of a Republican President and House of Representatives. The political complexion of the United Statees Senate must be changed if the Republican party is to be placed in a position to enact its policies into law.

Unless this is done the Underwood tariff and other injurious legislation which the Democratic party has inflicted upon the American people cannot be repealed.

There are 32 State in which senatorial elections are to be held next year. These 32 states are now represented in the senate by 17 Democrats, 14 Republicans and 1 Progressive. The latter, Senator Poindexter of Washington, has announced his affiliation with the Republican party, so that the figures should stand 17 to 15. ... the present Democratic majority ... is 16, Republican suc- ... mocrats must be ... ve the Repub- ... accomplishment ... the determined

... Senators come ... rida, Indiana, ... issippi, Missou- ... a, Nevada, New ... Ohio, Tennessee, ... a and Virginia. ... y four—Florida, ... nd Virginia—are ... c. Senate would suc- ... y effort to repeal ... Tariff Law and thus ... to suffer for two ... its provisions. The ... had enough of the free ... fallacies of the Democratic ... and only with the repeal of the present tariff law will prosperity return. The European war has served some of the purposes of a protective tariff and has created an enormous demand for American production, but no nation can easily base its economic policies upon the assumption that other nations will continue a war indefinitely.

The tremendous Republican gains in the last election, when the overwhelming Democratic majority of nearly 150 in the House was almost completely wiped out, makes the election of a Republican House next year a foregone conclusion. But the Senate must also be Republican. This is to be the slogan of the next campaign.

A HUGE SUCCESS

Boosters in One Small Town Sold About 675 Tickets on One Day

Le Roy, N.Y.—The LeRoy Gazette-News says:

The endeavors of the "Chautauqua Boosters" llast Thursday in their whirlwind campaign for the sale of season tickets for the Le Roy Chautauqua, week of June 25 to July 1, may well be considered an unqualified success. About twenty-four salesmen, composed of business men, ministers and professional men, met at Murdoc's jewelry store at 8 o'clock in the morning, secured their tickets, intructions and the list of names assigned them and fifteen minutes later were "on the job" busy as bees. The forenoon campaign called for work within the village and nearly all the salesmen had covered their territory at noon when they met at Lally's for lunch and reports. The team composed of Calvin N. Keeney and Alex Sutherland showed the largest returns for the time spent, with $156 worth of tickets disposed of. J. G. Gilfillan and E. M. Perkins were a close second with $148. The total sales in the forenoon approximated $800.

In the afternoon the teams climbed into automobiles and started a country wire campaign many of them not getting back into town until late in the evening. Reports the following morning indicated that the day's sales had amounted to very nearly $1200. About seventy-five tickets have been sold since that time, and there remain about seventy-five to be sold to bring the number up to the amount guaranteed by the committee.

Principal William M. Dunn, chairman of the committee, stated this morning that aside from a little territory that was not covered last Thursday, owing to lack of time, and which is to be worked, there woulld be no further organized campaign for the sale of tickets. The guarantee number is certain to be reached before the opening date, and he advises those who have not as yet secured their tickets to obtain them at once from the places where they are on sale, if the minimum price of $2 is desired. Tickets arer on sale at the Bank of LeRoy, the LeRoy National bank, John Murdock's store and the Rochester Grocery. After the guarantee number is sold no more will be available at $2 for adults and $1 for children.

Le Roy is to be congratulated upon the energetic campaign made and the generous support given the movement.

BALDWIN-MOREHOUSE

At the home of Mr. and Mrs. Albert Morehouse in Volney last Thursday took place the marriage of Miss Florence E. Morehouse to Paul A. Baldwin of Mt. Pleasant. Rev. H. D. Holmes performed the ceremony.

The couple left on a trip to Boston.

RECITAL GIVEN AT LIBRARY LAST NIGHT

Last night at the library the pupils of David Carroll gave a recital and the auditorium was filled with guests. After the pupils had completed their program other numbers were given.

Miss Genevieve McCormick gave a vocal solo, "A Winter Lullaby"; Miss Marion Lake gave a group of three songs, "Daddy," by Behrens; "Rittornella," by Clauson, and the "Sweet of the Year," by Satler.

Edward Carroll was heard in a recitation, "Signing the Declaration of Independence," and David Carroll gave a piano solo.

OSWEGO HOPEFUL OF G. A. R. ENCAMPMENT

According to the Oswego Times, Oswego has reason to be quite hopeful of securing the 1916 G. A. R. state encampment.

The 1916 encampment will be the most important held in many years as it will mark the semi-centennial of the State department. Not only would the State G. A. R. meet but the Woman's Relief Corps and the Sons of Veterans also, making a gathering of at least 3000 persons.

Fulton Men Working in Auto Factories

Young men who are about to take Horace Greely's famous advice, "Go West, young man," should interview Byron Smith, Leo Quinn and William Scanlon of this city who returned yesterday from a western tour of two months. The three young men have been working in Detroit and they can inform prospective travelers in regard to the conditions and industrial activity there.

Smith worked on the Ford Motor Company plant making bodies; Quinn was employed in the Studebaker plant at the same task, while Scanlon was employed as tester in the Studebaker plant. All three young had no difficulty in landing jobs for with the 1916 out-put rush on the factories are working overtime every night.

Philo Paige of Park st. and Fred Chesbro who left this city for Detroit about a month ago still hard at work. Chesbro has obtained a good position in the Studebaker company as assembler. Maurice Scanlon is also working in one of the large automobile plants.

MORGANS TO LIVE IN HOUSE 14 FEET WIDE

New York.—The son of one of the richest men in the world lives in one of the narrowest houses in this city. That is, he will live there when he returns from his honeymoon.

Junius Spencer Morgan, son of J. P. Morgan, has leased the four-story brownstone residence at No. 123 East 36th st., just east of the big Morgan mansions. The house ss fourteen feet wide. Young Mr. Morgan's bride was Miss Louise Converse, of Boston.

THE CLEVELAND & BUFFALO TRANSIT CO., Cleveland, Ohio

German Reply to "Promise Due Regard for Neutrals"

The Hague, June 6.—A report received here from Berlin says that Germany, in her reply to the American protest in the Lusitania case, will declare that she will stand out for the freedom of the seas but will try to have due regard for the rights of neutrals and, incidentally, will show her appreciation of the friendship of the United States.

What is described as President Wilson's willingness to mediate to bring about a modification of Great Britain's food blockade of Germany, is accepted as a further mark of such friendship.

Germany, it is said, will intimate rather broadly that perhaps she was mistaken in her assertion that the Lusitania was armed, and she will show that she is willing to modify her methods of submarine warfare, so far as regards neutral merchantmen, provided that her submarines are secured from attacks by such merchant ships and that the misuse of neutral flags is stopped.

THREE WEEKS with Madeline Traverse

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

Albany, June 25.—It is the consensus of opinion of the majority of the delegates to the State Constitutional Convention who are willing to talk, that three important proposed amendments will go down to defeat. These propositions are a single house of the legislature, senators-at-large and a redistricting of the Senat and Assembly districts.

All three of these propositions are about ready to be launched upon the delegates for debate and the next two weeks will very likely record the defeat of one or all of them, if the prediction that is rife at this time is verified.

Objection to a legislature composed of but one house is based upon the belief that there would be no check upon the law-makers of such potency as is at present supplied by a second law-making body. Fault is found with the propostion to create senators-at-large on account of the likelihood of a favored few being designated and the people of the State being denied true representation as they see and define true rpresentation. Opposition to a re-apportionment appears to have grown out of the beflief that if Greater New York should be permitted to dominate the legislature as the result of having the balance of power, that the Democratic organization in that city would extend their organization throughout the State.

Whether there is ground for the above arguments is a subject which does not enter into the question of opposition, it exists and has grown since the proposals were presented.

It is known that an effort is being made to keep politics out of the Constitutional convention and it is fair to forecast that it will not be obnoxiously prevalent, nevertheless when an important issue is imminent it is not so difficult to place that issue above political significance whether it actually be removed or not. It may be that the proposed re-apportionment may be thus treated, yet there are those of the convention who are ready to admit that it is their belief that politics at least assisted the inspiration prompting that proposed amendment to the Constitution.

The plan is to bring up the proposals dealing with senators-at-large and a single legislative body and either defeat or accept them before making an issue of the reapportionment proposal. If this scheme is carried out the discussion which has been set down for June 30th on the re-apportion porposition must necessarily be again postponed.

If not technical, the method with which the Constitutional convention has dealt with the reapportionment question has at least been lompler, manifold in its parlimentary kinship and obtuse to the public. The parlimentarians of the lonvention, in their endeavors to advodate or oppose the might assist them. The result has been a series of amendments, motions and points of order whihh have bewildered all asve the rlerks and the experts among the delegates.

There will be a sharp struggle when the re-apportionment proposition finally uomes up for disposition. It is said that the delegates from the up-State districts will oppose it and representatives of Tammany Hall announced that they were against it also. The proposition has worthy advocates nothwithstanding.

SAYS GERMANY LACKS MEN TO FIGHT ITALY

Rome, June 26.—Colonel Barone, the distinguished military critic, discussing the effect of the fall of Lemberg, reveals the distribution of the Austro-German forces. He says that before the movement which resulted in retaking Przemysl Germany was opposing the British and French with 1128 battalions of 1000 men each. Against Russia were 708 German and 680 Austrian battal ons. In the last three months Germany diverted sixty-nine battalions from the western to the eastern front, and also employed against Russia four new army corps constituted since the beginning of the year, numbered 38 to 41.

In these new corps were seventy-two battalions. Therefore, he estimates the German reinforcements on the Russian front comprised 141 battalions. The troops moved from the western front comprised twenty-four battalions of the Guards, eighteen of the Tenth Corps, nine of the Fifty-sixth Division, nine of the One Hundred and Nineteenth Division and nine of the Bavarian Eleventh Division.

In spite of what the Germans say regarding the great number of reserves, Colonel Barone believes the probable reason why Germany has not declared war against Italy is that she has insufficient troops for a campaig non the Italian frontier.

SEES SIGN OF BREACH IN BENTLOW CASE

London, June 26.—The London Times, commenting on the German "family squabble," over the suspension of the Deutsche Tageszeitung, says:

"It was newspaper controversies which proved fatal to Count Caprivi when the Cologne Gazette criticized Count Eulenburg and the Camarilla, and to Prince von Buelow when his majesty's famous interview made its highly inopportune appearance.

"The precedents are ominous, but on the other hand the supreme war lord may really share views of his Chancellor. He may be afraid of complications with the United States and think it high time to put a curb upon the recklessness of Admiral von Tirpitz and his adherents.

"This is the first open sign of a serious discrepancy in the judgments of the German military and civil authorities on the war."

CARMAN OUT TO WIN BACK 10-MILE RECORD

New York—Clarence Carman will go after his lost ten-mile record tonight at the Sheepshead Bay Velodrome, where he meets Georges Seres the French champion, and Jimmy Moran in a paced race for te best two out of three heats at ten miles each.

JANE VANDERPOOL COVILL

The funeral of Jane Vanderpool, widow of William Covill, was held this afternoon at 2.30 o'clock in the family residence, 709 Seneca st., with the Rev. J. W. Barrett, pastor of the First M. E. church, officiating. There was a large attendance of friends and also many beautiful floral offerings. Among the latter were a "Gates Ajar," a standing anchor, a casket bouquet and several other large bouquets.

Mrs. Covill was a member of the Women's Relief Corps and the casket was draped with a large American flag.

The bearers were Justin Hamilton, of Auburn; John Storm and John Atwell, of this city, and Earl B. Townsend, of Utica, relatives of the deceased.

Interment was made in the family plot in Mt. Adnah cemtery.

THE QUIRK TODAY

Today that favorite actor, Carlyle Blackwell, will appear in a five-reel masterpiece from the novel of Jack Futrelle, who lost his life when the Titanic went down. This is a story of an inspiring romance of love, politics, capital and labor, with a star cast. Tomorrow a Shubert feature, "The Marked Woman," with Barbara Tennant and a remarkable cast will be offered in five parts. Other reels will make up a big program.

G. O. P. SENATE THE SLOGAN

Important Feature in 1916 —Senatorial Elections in 32 States

Washington.—Much more is at stake in the next campaign than the election of a Republican President and House of Representatives. The political complexion of the United Statees Senate must be changed if the Republican party is to be placed in a position to enact its policies into law.

Unless this is done the Underwood tariff and other injurious legislation which the Democratic party has inflicted upon the American people cannot be repealed.

There are 32 State in which senatorial elections are to be held next year. These 32 states are now represented in the senate by 17 Democrats, 14 Republicans and 1 Progressive. The latter, Senator Poindexter of Washington, has announced his affiliation with the Republican party, so that the figures should stand 17 to 15. As the present Democratic majority in the Senate is 16, Republican successors to nine Democrats must be elected in order to give the Republicans control. The accomplishment of this result is now the determined effort of Republicans.

The 17 Democratic Senators come from Aridona, Florida, Indiana, Maine, Maryland, Mississippi, Missouri, Montana, Nebraska, Nevada, New Jersey, New York, Ohio, Tennessee, Texas, West Virginia and Virginia. Of all these States only four—Florida, Mississippi, Texas and Virginia—are assuredly Democratic. In five other States—Maine, New Jersey, New York, Ohio and West Virginia—it is practically certain that Republicans will be elected. Maine has swung back into the Republican column and in the last election New York and Ohio returned Republican Senators, while New Jersey and West Virginia, in by-elections, have demonstrated that they are back again in the Republican fold.

This leaves only eight States—Arizona, Indiana, Maryland, Missouri, Montana, Nebraska, Nevada and Tennessee—in the doubtful column, and in each one of these States the Republicans have more than a fighting chance of success. If they carry four of these eight States they will control the Senate.

The outlook is most encouraging. The election of Senator Newlands of Nevada last year was a matter of doubt for some days, so close were the figures. The Republicans ought certainly to carry Nevada next year. Indiana, now that the Progressive party has disintegrated, is almost sure to be in the Republican column again, while the Bryan-Hitchcock feud in Nebraska affords the Republicans an excellent opportunity for carrying that State. It was formerly safely Republican. Missouri and Tennessee offer splendid fighting ground, while Maryland had a Republican Senator until recently. With the tide running strongly in favor of the Republicans several of these States ought to elect Republican Senators.

But victory will not be secured unless Republican voters in these states are thoroughly aroused to the necessity of electing Republican Senators.

The election of a Republican president and a Republican House of Representatives would be an empty honor. A Democratic Senate would successfully block any effort to repeal the Underwood Tariff Law and thus compel the country to suffer for two years more under its provisions. The country has had enough of the free trade fallacies of the Democratic party and only with the repeal of the present tariff law will prosperity return. The European war has served some of the purposes of a protective tariff and has created an enormous demand for American production, but no nation can easily base its economic policies upon the assumption that other nations will continue a war indefinitely.

The tremendous Republican gains in the last election, when the overwhelming Democratic majority of nearly 150 in the House was almost completely wiped out, makes the election of a Republican House next year a foregone conclusion. But the Senate must also be Republican. This is to be the slogan of the next campaign.

Simeon E. Baldwin Says Insurance Would End Wars.

Photo © by American Press Association.

At the recent conference on international arbitration, held at Lake Mohonk, N. Y., Simeon E. Baldwin, ex-governor of Connecticut, suggested that insurance would end wars. "Insuring nations against pecuniary loss in wars would tend to discourage war for the capitalists, and granting the insurance would then work for peace in the interests of their bank accounts," said Mr. Baldwin.

Ex-Governor Baldwin is famous in New England as a lawyer. He has been chief justice of the supreme court of Connecticut, president of the American Bar association and has written books on law and history. In 1911 he was elected chief executive of Connecticut and on the expiration of his two year term was chosen to succeed himself. He is a Democrat.

The governor's father, Roger Sherman Baldwin, was also a noted lawyer in his day. In 1839 he was the principal attorney in a suit that was celebrated not alone in this country, but in Europe. Slaves, a ship load of them, on the way to Cuba, poured out of the hold at a signal, overcame the officers and took possession of the vessel. An American ship, finding them adrift, towed them into the harbor of New York. Spain claimed that the slaves were the property of Spanish planters and speculators. Abolitionists in the north defended the Africans. The case went to the United States supreme court finally and was argued for the black men by Governor Baldwin's father, John Quincy Adams being his assistant. His skill, learning and thoroughness caused the renowned Chancellor Kent to say that he was one of the ablest jurists of his time.

Crown Prince of Greece.

In the event of Greece taking up arms in the European war Prince George, heir apparent to the throne of the Hellenes, is likely to become a figure of importance. His father, King Constantine, has been reported to be in feeble health, and in the event of the king's death or incapacity Prince George would be either king or regent. The young man was born in July, 1890, and is therefore twenty-five years of

Photo by American Press Association.

PRINCE GEORGE OF GREECE.

age. During the Balkan wars a couple of years ago the young prince was an active participant in the fighting.

On his father's side Prince George is of Danish and Russian blood. He was born at Athens, is a member of the Greek national church and is thoroughly Greek at heart, as his father is also. His mother was Princess Sophia of Prussia, sister of the present German kaiser, so Prince George is a nephew of Emperor William II. Relationship, however, doesn't count for much in European affairs once the sword is drawn, so it is not improbable that the crown prince may eventually find himself opposed to the forces of his imperial uncle.

Hunting For Diamonds.

About 1,000 two-inch tickets are used in this game, says Scouting. These are marked with a blue pencil in the shape of a diamond, and numbers ranging from one to thirty are marked inside the diamonds. These are supposed to be diamonds worth so many dollars—if a diamond has a figure nine in it, it is worth $9.

Another lot is marked with the diamond only, without the figures; these are smaller "diamonds" and are worth only $1 each. The third lot are left entirely blank and are supposed to be diamond quartz, being worth only 25 cents each.

The "diamonds" are scattered all over the woods, in the branches of trees, among prickly bushes, in pools of water and other hiding places. The game commences at a whistle signal, the troop starting from different ends of the woods and working every inch of the ground hunting for the "diamonds."

The patrol finding "diamonds" of the greatest total value is declared the winner.

The Golden Robin.

Among the most brilliantly dressed, as well as sweetest singing birds that summer anywhere in the United States is the Baltimore oriole, or golden robin.

The nest of this beautiful bird is very interesting, and displays great skill in the making. In shape it resembles a long pouch, and is swung hammock fashion from two twigs at the extremity of a lofty, drooping branch. It is formed of vegetable fiber and wool, closely interwoven, then securely sewed in place with very strong stitches. The thread used for the sewing is usually long horsehairs, though, especially if the nest is within close range of civilization, bits of string, thread or silk floss are used. The mother bird does the building, while her mate searches for and brings the material.

Conundrums.

What goes most against a farmer's grain? The reaping machine.

What relation is that child to its own father who is not its own father's own son? His daughter.

What does a young lady do when she gets into church? Looks for the hims (hymns).

What beats a good wife? A bad husband.

What is the best thing out? A conflagration.

Why is life the greatest of riddles? Because we must all give it up.

Why is a lady's dishabille like a postman? Because it's a morning wrapper.

Telegraph Bee.

Here is a game for boy scouts on a rainy day in camp. Let the scouts arrange themselves around a table with a telegraph sounder on it. One of the scouts operates the sounder and sends letters in the Morse code to the other scouts, each in turn. If a scout fails to know the letter he is placed at the end of the line. In order that all the boys may take part it is best for the operator to send letters slowly to the tenderfoot, faster to a second class scout and fastest to a first class scout. The line will be continually changing, and the boys are sure to be interested. —Scouting.

Hidden Dress Goods.

1. The verse was musical. I composed it long ago.
2. I prefer the drama to singing. Hamlet is my favorite role.
3. I sent Bob Linscott on up the hill.
4. That evil is the lesser, George thinks.
5. I bought the fossil. Keep it for me, please.
6. He is a tinsmith by trade.
7. We heard the guns pop. Lincoln was near.

Answers: 1. Calico. 2. Gingham. 3. Cotton. 4. Serge. 5. Silk. 6. Satin. 7. Poplin.

Work For Boy Scouts.

Boys might work off their zeal for hunting by declaring war on rats. If old granaries or warehouses are available they might indulge in a wild rat hunt. Rats accomplish a great deal of destruction, and in port cities, at least, they are credited with carrying many dangerous diseases. If a troop could clear its village of the pests it would be a creditable service.

Changed Words.

Without changing letters turn a viscid substance into an undesired domestic animal, wrathful into a means of restraint, duration into a send forth, fashioned into a kind of cheese, a piece into a snare, a singer of old times into dull colored.

Answers.—Tar, rat; mad, dam; time, emit; made, Edam; part, trap; bard, drab.

Results.

"That woman is so ill tempered that she seems to reflect it in everything about her housekeeping."

"Yes, I've noticed even her bread is more or less crusty."—Baltimore American.

Two Points of View.

To a woman in love little things seems big, and to a man in love big things seem little.

Children Cry FOR FLETCHER'S CASTORIA

A Mythical Lover

By MARTHA V. MONROE

My dear, you being my most intimate friend, I write you first of all to announce my engagement. Harry after hanging about me for two years has at last proposed. How much longer he would have continued to do so had I not by my own skillful manipulation brought him to terms I don't know. As it is, I had a hard time landing him and did so only after a number of efforts had failed.

Now, I wish to assure you, my dear, that if you have occasion to bring a man to terms, do not adopt any of the old fashioned methods that are well known—that is, if you are playing a man who is as adept at the game as you. I tried a number of them on Harry, and he was too smart for them all. First I told him that I was intending to study the law and would make a vow of celibacy that I might be wedded only to my professional work. He laughed me to scorn; drew ironical pictures of my arguing a case before a jury; said he would like to be the judge before whom I pleaded a case, and all that.

About the time of this first failure the European war broke out, and I threatened to go abroad and take care of sick and wounded soldiers. He said he was thinking of going to France and enlisting in the Foreign legion. I didn't go as a nurse, and he didn't go as a soldier. He had met my bluff with one of his own.

Then Howard Wentworth came to town, and of all the girls here he seemed to prefer me. Taking advantage of his preference, I encouraged him, especially in presence of Harry. What did the scamp do but devote himself to Agnes Woodruff. I was frightened for fear she would get him away from me and dropped Mr. Wentworth immediately. After I had done so Harry gradually ceased to pay marked attention to Agnes, but I knew that he was still more or less devoted to her, and it worried me.

Having heard that Aunt Caroline had been in her youth skillful at the game of hearts, I confessed my failures and my anxiety to her and asked her to help me.

"The trouble with your expedients," she said to me, "is that they are too palpable. One of those you have tried is excellent, but you did not apply it in the right way. I refer to your attempt to pique your lover by accepting the attentions of another man. You should not have called in the attentions of a real admirer, but an imaginary one."

Not understanding what Aunt Carrie meant, I asked her to explain. She did so and gave me the identical method by which she brought Uncle John to terms twenty years ago. I made up my mind to try it.

My first move was to nerve myself to treat Harry with indifference for a stated period. This being a part of a general plan, I was enabled to play the part pretty well. I was careful not to overact it, in order that he might not see through what I was up to. Having apparently grown more indifferent to him for three or four months, I accepted an invitation from Elinor Trask to make her a visit. I remained away six weeks, and when I came home I talked a great deal to my intimate girl friends about a fascinating fellow I had met, or, rather had not met, during my visit, giving them the impression that I had been much taken up with him. Of course they spread a report that I was either engaged or was likely to be engaged, and it reached Harry's ears.

Nevertheless so confident was he that he could drop me and take me up when he pleased that he placed but little confidence in my preference for him having been diverted to another channel. He came to see me on my return from my visit, twitted me on having lost my heart during my absence and asked for a description of this "Adonis," as he called my mythical lover, who had been so fortunate as to win such a prize as myself. I turned the conversation upon other topics. Harry asked me to go to the theater with him the next evening. I told him so decidedly that I had a previous engagement that he did not ask for another evening.

Harry did not call again for some time. Meanwhile I was talking to my chums about the fascinating man I had met, confident that what I said would reach the man I really loved. The next time he called on me I telephoned to a florist, with whom I had left an order for flowers to be filled on call, to send them at once. Half an hour later the flowers came and were brought into the room to me where I was sitting with Harry. Pretending to be anxious about them, I opened the box containing them. Inside was a little envelope. I seized it and without opening it held it in the palm of my hand.

This was altogether too much for Harry's equanimity. He demanded to see the card of the sender, and I refused to give it to him. He turned very red, then pale, and I saw that an emotional storm was raging within him. I let him go on till he had committed himself, after which he lost all interest as to who sent the flowers, for we were engaged.

I assure you, my dear, I am very happy, and Harry says he is very happy, and, as for my mythical lover, I think it is perfectly honorable for me to have used him, for he can't be a bit disappointed.

For the Children

Willie Chiels, Holder of an Enviable Position.

Photo by American Press Association.

When can you find a boy who does not envy Willie Chiels of New York city? Perhaps there are a few, but they are very few, and they hold places similar to that occupied by Willie. "Babe" Chiels, as he is familiarly known, is mascot of the New York American baseball club. Imagine a boy being a member of a professional baseball club! Think of the pleasure of being dressed in a regulation uniform and empowered to have charge of the bats; then the joy of knowing the heroes of the diamond personally and being received as and considered one of themselves. All this grandeur and good luck have come to "Babe" Chiels, the official mascot of the Yankees. It is fine to be a stage driver, a railroad brakeman or deckhand on a steamboat, but none of these positions compare in honor with the mascot of a big league baseball club. The man beside Willie is Manager Donovan of the New York Americans.

The First Gem.

The pearl is the one gem that comes to man perfect from the hand of nature, and to this its great antiquity as a gem is largely due. Precious stones whose beauty and brilliancy depend on polishing and cutting would naturally be discovered and utilized later.

The discovery of the diamond, for instance, probably dates within historic times. Though known earlier, it was not generally included among the gem treasures of royalty even as late as the seventh century.

It is quite probable that the pearl was the first gem known and treasured by prehistoric man since the search for food must have been the first occupation of the earliest of the race, and the shining pearl would thus have been discovered in river mussels if not in marine oysters. Certain it is that the Old Testament and the ancient written histories allude to pearls and that remoter evidence is found in the tombs and excavated cities of still earlier eras. The Egyptians, Babylonians and Assyrians held the pearl in an esteem verging on reverence.

The Witty Father.

A family, including a young man just home from college, was seated at the dinner table, on which were two nice roasted chickens, one at each end. The father, a practical man of the world, asked his son if he was learning at college.

"Yes, indeed," the son replied. "Why, I can make two count three."

"Nonsense, my boy. It can't be done."

"But, father, I can prove it. For instance, the chickens. This is one chicken at your end of the table."

"Yes," said the father.

"And that is two at mother's end."

"Well?" said the father.

"Well, two and one are three."

The father was puzzled for a moment, but only a moment, for he quickly recovered and said:

"Well, I will take this chicken; wife, you take that one, and, son, you can have the third."

Columbia Leads.

Columbia leads.
In freedom's cause she takes the foremost
place;
"Excelsior" is the motto in the race.
She shouts it far and wide.
The world awakes.
Downtrodden millions follow at her call,
And tyrants see the writing on the wall;
They must take heed or great will be
their fall;
They cannot stem the tide.

Columbia leads.
In gentleness of reign she has no peer,
And those inclined to right need have no
fear
Of her chastising hand;
But woe to those
To whom she bids the oppressing hand to
stay
And heed her not; she'll surely find a way
To chasten those at no far distant day
Who heed not her command.

Columbia leads.
Guide her, O Lord, in this her leading role
With right and might to strive to reach
the goal.
To thee our nation pleads—
Lead thou us on
Through weal or woe, where'er our path
may be;
Let freedom's banner wave o'er land and
sea,
And grant, O Lord, our lot may ever be
[illegible]
—F. W. G. Mayers.

HOW TO MAKE A VERY HANDSOME CROCHETED EDGING CALLED "THE GRETNA."

Abbreviations.—Ch., chain; d. c., double crochet; tr., treble.

Use crochet cotton No. 30. This pattern is an inch wide.

First Row.—Make a chain the length required, turn. * 3 spaces of 2 ch. and 1 tr., missing 2 stitches below, 10 ch., 1 tr. in next stitch below, repeat from * turn.

Second Row.—Five ch., 1 tr. in second space, 3 ch., 1 tr. in same place, * 3 ch., 3 tr., 3 ch. and 3 tr. in 10 ch., 3 ch., 1 tr., 3 ch. and 1 tr. in second of 3 spaces below, repeat from *, turn.

Third Row.—Five ch., * 2 tr. in space of 3 ch. (between 3 tr.), 10 ch., 1 tr. in same space, turn, work 14 d. c. under 10 ch., 1 d. c. in the next 5 ch., turn, work 5 loops of 5 ch. and 1 d. c. in each third d. c., then 1 tr. in same space of ch. below (between two 3 tr. groups), 5 ch., 1 tr. in 3 ch. space below, 5 ch., repeat from *.

Work a footing, 3 ch., miss 3 stitches, and 1 tr. in next.

WEDDING GIFTS.

How to Make the Hearts Glad of Newlyweds by Appropriate Presents.

Summer brides are almost as numerous as summer flowers. What to give the future newlyweds is the question agitating many a mind at present.

There are so many things suitable for wedding gifts that there should be no difficulty in choosing useful presents if the donors only spend a little thought and care in their selection. The first point to be considered in buying a wedding present is the future and present means and station of the bride. Does she come from a family that is amply able to furnish all her needs for the new home? Is she to marry a man of money who can provide his home with the finest things on the market or, on the contrary, does the girl come from a family of limited means to marry a man in practically the same circumstances?

You would buy entirely different articles for the latter than you would for the former. The girl who either has plenty of money or is marrying money is usually given personal gifts, such things as jewelry or wearables, or else extra luxuries for her home, such as single silver spoons or serving forks or set pieces or handsome bits of china. On the contrary, the girl of moderate means who expects to furnish her new home a little at a time is only too grateful to have her friends help furnish it with their presents.

If you are buying a wedding gift for a bride of limited means don't give her a pretty but foolish vase or a dainty but useless bit of pottery. Help her by giving something she can use and is only too glad to have. For instance, a pretty luncheon set need not be a very expensive gift. Then there are sets of long strips in flowered or figured linen to be used for little home dinners or for lunch. China sets are always useful and welcome, and if the buyer's purse is limited there are simple but dainty tea, coffee or breakfast sets to be had at fairly low prices.

For the donor who cannot pay more than $10 or perhaps less there are many things which will be acceptable. One bit of advice to buyers of wedding gifts is this—do not buy any pictures, for your taste in pictures may be quite different from the bride's.

Lamps are lovely presents and can be found for as low as $3. The donor of a lamp need not fear duplication, because the bride can use many lamps in her home, but the buyer must be sure to find out whether gas or electricity is to be used in the new house. Covers for tables can be had at $2 or $3 each and very dainty ones too. An acceptable gift for any pair of newlyweds is a set of Poe, Dickens or other classic master.

Any presents in silverware or pretty glassware are acceptable and useful. Then there are many things for bedroom usage. Bureau, window and bed sets in dainty mull of white and pink or blue are as welcome as can be. Toilet articles, manicure sets or mirror, brush and comb are always acceptable. All these things are well within the means of almost any buyer.

More expensive gifts are lovely rugs, beautiful cushions, linen bed sets, etc. Such gifts as these can be duplicated or tripled without fear.

How and Why to Use Crepe de Chine For Underclothing.

Crepe de chine as a material for underclothes is thoroughly established. The charming, almost untrimmed models in the heavy quality, which have been seen recently, are giving way to the lighter weights, lace trimmed or ribbon run, which are more appropriate to the warmer weather.

Untrimmed garments in this weight are also procurable for those who have adopted the simple line in lingerie, which the pussy willow taffeta, requiring no ornamentation beyond its beautiful self, first taught us to like. Advocates of crepe de chine for summer wear, and there are many, extol its noncrushable qualities.

It is well to remember, in buying silken undergarments, that a flesh color or pink is preferable to white, as washing only makes it prettier, while the white is almost sure to become yellow with continued trips to the laundry.

Lovely as the silken materials undoubtedly are, practical as they have shown themselves, there are women, after all, for whom linen remains the material par excellence for [illegible] clothes.

Self Tone Plaid Silk Frock

Designed by Joseph, New York.

A CHARMING gown may be developed in blue self tone plaid silk. The short bolero is slashed to show an attractive gold color silk lining and is worn with a white georgette crepe blouse. The blouse has one of the latest novelty collars, which is especially becoming to one with a long, slender neck. The collar is a double frilling of white net, and a narrower ruffling of net continues down the front of the blouse. Small jet buttons could also be used to trim the blouse. This gown has a full overskirt of the plaid silk with an under petticoat of plaited silk.

ANNA MAY.

Economy Hints

A penny saved is a penny earned.—Benjamin Franklin.

EVERY housewife in these days is interested in the question of reducing household expenses. She is willing to trade a little extra work for the money it will save. There is one place in the house that cleanliness pays, and that is around the gas stove.

The air holes of the gas stove should be cleaned frequently, as, in the rushing in of the air to mix with the gas and give the flame, particles of dust are carried with the air, and these clog the vent. Unless there is the right amount of air supplied there is considerable loss in heat energy, more gas than necessary is consumed and a longer time is required for cooking.

The flame of the gas stove should be a clear blue, through which you can see. If it is a red or a yellow the air mixture is not the proper one, and steps should be taken at once to give a larger supply of air to the flame. Wash the burners in hot water, to which a liberal supply of washing soda has been added, or with hot water and a strong soap that will cut grease.

It is a simple matter to take the burners off of most of the gas stoves, but if this seems a difficult thing to do they may be washed on the stove. The burners in the oven should be treated in the same way. After washing them rub the burners with crude oil or with drippings which have no salt in them. This will prevent rusting as well as give a black appearance to the part.

The oven should be thoroughly washed out and then lighted with the gas flames. Open the door during this process, for the heat without air would cause the moisture to gather on the sides and the top of the oven.

A thorough cleaning of this sort should be given the gas range at least every ten days. This will be sufficient if a whiskbroom is used on the stove every day and the top of the stove wiped carefully after cooking. The appearance of a clean range is enough to pay for the trouble in the eyes of many housewives, but when in addition to this there is added the saving of gas and consequently of money, and a longer period of service for the gas range, it should become a part of the regular household duties.

BEAUTIFUL LAMP SHADE.

How to Make One That Has Some Novel Features.

Have you a child's discarded parasol in the house? If so, bring it to light and transform it into a handsome lamp shade for electric light. The very latest and most beautiful shades are exactly this shape, and once the handle is removed from the parasol the rest is easy.

So take the handle as carefully as possible and then remove the covering. The frame will probably look hopeless to the amateur interior decorator, but she must get a strong piece of cord and take it around the edge of the frame, holding down each rib firmly. In doing so she should pull the cord rather tight between the ribs so that the shape becomes more bellied than formerly.

The next step is to rip away one of the sections of the covering and press it well, especially along the seams. This is the pattern by which all the new sections are cut.

A soft, thin india silk makes the best kind of covering for a lamp shade, and the most satisfactory colors are old rose, orange brown and yellow tones.

When cutting the sections follow the pattern exactly, but cut an inch or so longer at the wide end. Next baste each section carefully together and stitch up on the machine. Place the finished cover over the frame and secure at the top temporarily. Draw the material down each rib and turn up the surplus to form a hem. Stitch the hem and insert a narrow elastic. The cover is now complete, ready for the frame.

Sew it at the top and finish with a covered button mold, a pompon or any small ornament at hand. With very strong thread secure the cover to the ribs and then with the fingers draw the fullness away from the ribs at the center. There will be little or much fullness, according to the bell effect given.

$2,000,000 HOUR WAR'S COST.

Total For First Year Will Be $17,400,000,000, Says French Economist.

Paris. — Captain Edmund Thery, widely known as an economist, estimates that the total military expenditures for the first year of the war will be 50,000,000,000 francs ($10,000,000,000) for the seven allies and 37,000,000,000 francs ($7,400,000,000) for Germany, Austria and Turkey.

This makes an average of 7,250,000,000 francs ($1,440,000,000) a month, 242,000,000 francs ($48,400,000) a day, 10,000,000 francs ($2,000,000) an hour.

He believes the economic powers of Great Britain, France and Russia can support the strain much more easily than their opponents.

HOW TO USE SEVERAL LITTLE HINTS EFFECTIVELY.

Salt is a good absorbent, as the housewife will discover if she runs for the salt receptacle when ink is spilled on the carpet or on the tablecloth, and puts on salt, renewing the salt as fast as it absorbs the ink. If the salt is put on the ink promptly it is generally so effective that practically no ink stain remains.

An added flavor is given to after dinner black coffee if each lump of sugar to be served with it is rubbed with a piece of lemon peel a few moments before time to bring on the coffee. Orange peel adds a delicate touch to the afternoon tea if the sugar to be used is rubbed with it a little while before it is served.

Dishes in which eggs have been prepared or batter and dough mixed in should be rinsed with cold water before they are washed. If put in hot water before the cold water is applied the heat will cook the eggs or the flour paste sufficiently to make it stick to the dishes.

Potatoes used instead of soap will keep the hands clean and the skin soft. The water in which potatoes have been boiled is a good wash for table silver and keeps it bright with little or no exertion on the part of the housewife.

FASHION FANCIES.

How to Select Cottons For Your Summer Frocks.

The woman who must select her dresses with an eye to the future would do well to plan a few frocks of the new crisp cottons. There is a positive trend toward self supporting weaves, probably the natural result of the prevailing modes—fluffy ruffles and rippling skirts. And while the clinging crepes, soft voiles and other supple fabrics will continue to be very fashionable during the summer, the indications are that their supremacy will wane with the season and in another year will be entirely superseded by the crisp weaves having sufficient dressing to give light and airy effects. In this class the organdies hold a high place, and the shops are showing a large line of those pretty cottons in attractive floral patterns. In lawns, dimities and batistes there are also large assortments to select from.

In the softer materials crapes still have a strong hold on popular favor, and whether in embroidered figures or printed patterns they are fashionable. Voiles, especially in the printed forms, are still greatly favored. Linens will probably be scarce later on, but just now there are plenty to select from. In the novelty weaves there are the Cossack linen and the covert linen that make up into such smart suits, and where a fabric with body is desired there are the piques, cotton velours and Bedford cords to select from.

Floral designs are favored in printed fabrics this season, but stripes will also be modish and are well represented in the present displays. A decided pattern shows alternate stripes of black and white, each one and one-half inches wide. Black and white effects are very fashionable and many of the new cottons show black flowers scattered over a white surface.

Even though the printed patterns will be so popular, every woman wants one or two white dresses in her wardrobe and the probabilities are that when she gets into the shops she will select material for several dresses because the displays are almost too alluring to resist. The transparent organdies that became popular last summer are being shown in both plain and embroidered effects. Voiles are in high favor and are being shown in endless varieties. In fancy white cottons the favorite snow flake patterns, known as neige, are again very popular. And then there are the cords, checks and stripes. Those carried on in groups and irregular effects that make up into such charming frocks are prominent.

How to Make a Real Strawberry Shortcake of Biscuit Dough.

The strawberry in its shortcake form is deservedly popular, but not, pray, the cake dessert palmed off in place of the genuine biscuit basis on which all good shortcakes depend. Any dough mixture like that for baking powder biscuits, only made a little richer, is far more delicious combined with the berries than any piece of sponge or other cake. It takes only a half hour to complete a strawberry shortcake of two hot biscuit crusts, thickly buttered, spread with mashed berries and garnished with whole ones. Any woman with two hands should be ashamed to offer an imitation shortcake of stale sponge cake when a delicious biscuit dough is so easy to make.

How to Make Lunch Cloths of Embroidered Damask.

Some of the newest lunch cloths are being shown of embroidered damask. The material itself is unfigured, but the embroidery is usually elaborate. A very silky mercerized cotton is employed for working out the design, and this, with the soft sheen of the mask, makes a very rich cloth.

These cloths are more practical when made in the size of a large centerpiece, for then the individual plate and tumbler doilies of plain lace edged damask can be used to protect the polished table surface and are more easily laundered than the heavily embroidered cover.

For the Children

Master Gilbert W. Kahn as an English Officer.

Photo by American Press Association.

Recently there was held in New York an entertainment called a Lafayette fund fete. It was under the auspices of rich and socially prominent people and had for its object the raising of money to aid the wounded soldiers of France. The entertainment was principally of tableaux and living pictures, children dressed in colonial costumes and uniforms being the actors. The boy in the picture represents an English lieutenant of the colonial period, and there were scores of youngsters in equally brilliant and handsome costumes. The boy's name is Gilbert W. Kahn, son of Otto H. Kahn, who is prominent in social and financial circles in New York city.

A Fight With a Cougar.

In company with an Indian a Port Angeles (Wash.) man went fishing for salmon in a rocky river. Suddenly a big cougar appeared at the entrance to a cave and, with a roar, crouched to spring at the Indian.

The white man threw his fish spear at the cougar, while the Indian ran for his life.

The spear entered the animal's neck and ear, and thus the man held him at a distance and tried to drown him. But the cougar was too strong and agile for that, and finally the spear came out of its hold.

For four long hours the man and the cougar fought, the cougar walking around and around and every once in awhile making a spring, which the man every time repulsed with the spear.

The combat only ended when the Indian returned, after a twelve mile trip, with a gun. His first shot wounded the beast in the side; the second lodged in its head and killed it.

Arctic Dogs.

Far up north on the wild and snowy wastes is the home of the Eskimo or arctic dogs. Although many of them are half savage, scarcely more than reclaimed wolves, they are wonderfully cunning and enduring. With the reindeer they are the beasts of burden, valuable to their owners and a great help to explorers and travelers in these cold, trackless regions. Over the untrodden frozen plains these dogs can travel at the rate of seven to eight miles an hour, drawing a good sized load and keeping up the pace for several days. In summer they are turned loose to shift for themselves and are far more care free than in the winter season, when they must toil for their masters.

Sheep Intelligence.

However stupid we have learned to consider sheep, they are not devoid of sympathy and charity one for another. A shepherd was driving home a flock of sheep when he noticed one of them lagged behind and bleated piteously. Then he saw another of the flock run back and walk with it until they overtook the rest. On examining the animal that had stayed behind he found that it was blind and must have called for help, in some manner making an appeal that met with immediate response.

Fairyland.

I wonder if a girlie must,
In fairyland, always wear
A dress with lace and trimming fussed
And ribbon bows in her hair.

I wonder when she talks too fast
If some one is there to say
That children always should speak last
And elder folks quick obey.

I wonder if she takes the hose
And carelessly wets her head,
If she is robbed of all her clothes
And put at once in her bed.

I wish there was some way to know
About such unpleasant things.
If fairies treat small children so
I'd ask no fairy for wings!
—Philadelphia Record.

THE JOHNSON WAY IN STATE GOVERNMENT

The Johnson Way in the administration of State affairs has brought the Government back to The People in more ways than generally are conceived in the use of the expression "Returning the Government to The People."

The general understanding of the phrase is that the power of The People is convened wholly to the exercise of the Initiative, for the making of laws; the Referendum, for the passing upon laws made by the Legislature; and the Recall, for the discharge of faithless public servants.

* * *

These are powerful weapons, but the Johnson Way of governing the State does not stop there. It brings the Government to The People in a physical sense, as well as arming them for the making of laws, the blocking of bad laws and the dismissal of culpable or unsatisfactory officials.

Powerful public-service corporations have been regulated in the interest of the public good; the powers which formerly did the governing now are governed. Protection has been given the weak and the poor, the women and the minors; little children are allowed a greater measure of opportunity to enjoy their childhood, to develop into useful men and women and valuable citizens.

* * *

To the widows more protection and more assistance have been extended.

Court procedure has been simplified, in the interest of The People as well as the Court.

The greatest strides in education in the history of the State have been made since the introduction of the Johnson Way. Textbooks now are free, this feature alone meaning hundreds of thousands of dollars every year to the poor, and giving to every child an equal opportunity.

* * *

Workmen have been freed from the clutches of the industrial system of old by the compensation, insurance and other laws placing the burden upon the industries instead of upon the men, the women and little children.

Slavery for the child has been abolished by bringing into existence the child-labor laws. The weak and helpless have been protected by the perfecting of the Juvenile Court laws.

The Johnson Way removed the political bosses, and gave into the hands of The People the weapons with which forever to keep the path cleared.

* * *

One could go on and on, with an almost endless recital of the things the Johnson Way have provided and they have brought back to The People the Government of California. The spoils system went out when Johnson came in; business efficiency, honesty and thoroughness took its place.

But the thing that counts most—because it brings The People in personal contact with the State Government—is the Johnson Way of giving every person, no matter how poor and lowly, a chance equal to any in bringing his grievances before the departments of the State.

* * *

This can be illustrated in the methods used by the State Water Commission, the State Railroad Commission, the State Labor Bureau and the Sate Immigration and Housing Commission.

These C[illegible]artments and Bureaus—and there [illegible]ffairs along the same line as do [illegible]nt of the State back to The People in the physical sense.

By JOHN L. DAVIS

The Sacramento Bee's Staff

To them the poor widow may make complaint, and it receives prompt attention, investigation and action.

* * *

The old way eliminated the poor widow, the poor man or the poor child. The only resort for the righting of wrong and determining matters in the old days before the Governor established the Johnson Way was to go to the Courts.

The poor, while not barred from the Courts because they were poor, were barred nevertheless because they were financially unable.

Now this has been changed. Here's an illustration of one way this is done:

A short time ago a widow in a northern county suddenly realized that her little ranch was being deprived of water for irrigation by a large corporation which appropriated all the water of the creek.

She had lived on the place for many years. Her husband a quarter of a century ago built ditches, bringing the water from the creek which bordered the ranch, and distributed it over the acres.

Under irrigation the land was made to yield good crops, and when the husband died the wife continued to farm the place. It was her all, and, with the little help she was able to hire, she made a good living and saw no wolf before her door.

But the corporation diverted the water above the little farm. They did not consult her, but went about appropriating it in the way they used to in the old days.

* * *

This widow had heard of the Johnson Way. She had been told that The People, not the corporations, rule California, and believing this she wrote to the Water Commission, stating her troubles.

Under the old way she would have been obliged to seek redress in the Courts.

Under the old way he would have been forced to journey to a distant city—and probably go into another county—while the trial was being held.

* * *

Under the new way this is what happened:

The complaint was taken up immediately by the Commission and an investigation ordered. A member of the Commission was delegated to proceed to the county to hold an investigation at the scene of the origin of the complaint.

Instead of compelling the widow to go into Court, or to the Commission, the Commission went to the scene of action, made its investigation on the ground, where all conditions surroundings the case were at hand, and where all the witnesses resided.

This is the way the State Government has been brought back to The people. It gives to the poor an equal chance with the rich and the powerful; it seeks to adjust controversies on a basis of exact justice; and, to arrive at that, it goes to the scene of action for its information.

* * *

Another example of this method of administering the Government of California in the Johnson Way is the practice of the State Railroad Commission.

If a complaint comes from a distant county against rates of a public-service corporation—the Commission has power over these—The People are not summoned to come to the Commission, but the Commission goes to The People.

* * *

An instance of this occurred at the Capitol only a few days ago. A suburban land company that had installed a water system on its sub-division wanted to secure permission for water rates.

The rates desired were filed, with application for the right to establish them. The settlers on the land objected to the rates, and filed their objections with the Commission.

Under the old way the company would have gone ahead and made its rates. No application would have been made to the Railroad Commission—there was no supervision by the State over public-service corporations, or any other class of corporations—and the people living in the district would have been obliged to take the rates or bring an action in the Courts.

* * *

This particular case brought a Railroad Commissioner and a water-rate expert to the scene of action. A hearing was held, both sides presented arguments. Men and women—laymen, all of them—told their story to the Commissioner, giving reasons for their objections, and the application for approval of the rates was thrown out. The company was told to bring in another, if it desired to secure permission to operate the water supply system.

Had this case come up under the old system in use prior to the Johnson administration, it probably would have been running—"creeping" probably would be more proper—in the Courts for years. In the meantime the water company would have gone ahead collecting its rates; and, finally worn out by initiating delays and expense, The People would have given up the fight.

* * *

Whoever in the old days heard of a working woman being listened to, and as the result of her plea the power of the State being used for the collection of wages some heartless employer sought to withhold?

Today when an employer endeavors to cheat a man, a woman or a child out of wages, the State gets into action through the office of the Labor Commissioneer and his deputies. There is such an office in Sacramento, and through the help of the Deputy Labor Commissioner scores of women have been able to collect money they honestly earned.

* * *

In the old days the poor, friendless immigrant in the State was the victim of "sharks," bunco artists and various other rogues. They were given only such relief as the police were able to give; but now the State maintains a special body to look out for these people who find themselves in California, ignorant of the customs and the natural prey of the dishonest and designing.

Protection for these people, justice and the righting of the wrongs, the punishment of the wrong-doers, now are among the functions of the State Commission of Immigration and Housing.

Under the old way the State institutions, the State Printing Office and various other departments were considered legitimate feeding grounds for those unscrupulous concerns which made a practice of getting "all the traffic would bear."

The State, therefore, paid half a d[illegible] prices for supplies, there was no competition, the favored few got the contracts and charged what they pleased, and the money came from the pockets of The People.

The Johnson Way put a stop to that sort of thing. The business was brought back to The People by the introduction of the competitive system in the awarding of contracts.

Favoritism was banished, and competition took its place, resulting in reductions in prices for supplies of all kinds from 40 per cent to 60 per cent on the average, and in some cases several hundred per cent.

* * *

The result has been that the State has saved hundreds of thousands of dollars in the purchase of such supplies as it needs; the business houses have been given an opportunity to compete for the business, and, in addition, the standard of the quality of supplies has been raised. Contracts are allowed on specified standards only, instead of permitting the supplying concerns to furnish whatever they please.

The Johnson Way built up a healthy competition for State business, eliminated the political middleman who got his rake-off for landing the contracts, and raised the quality; until now the State receives better goods at less cost than under the old system of patronage, politics and favorism.

* * *

Efficiency has been the watchword of the Administration, both in business dealings and in the service it exacts.

The State offices in the old days were the incubators of politics, where political pull and the power "to deliver" counted more than ability to do the work or fitness for the duties exacted.

Under the Johnson Way, Civil Service standards of efficiency first must be met before appointment to a position can become effective. Ability, fitness for the service, energy, and character now are the qualities the State exacts; not the "pull" of a ward politician or a big corporation.

* * *

In this, the Johnson Way has brought the State Government back to The People, where it belongs.

The State now exacts the same degree of service from its departmental employes as do the big business concerns throughout the country. They must do a dollar's worth of serivce for the dollar paid in salary.

With the standard of efficiency in the administrative departments raised 100 per cent, the natural consequence is a corresponding improvement of service. Thus, The People today are benefited to the extent the service of the State has been improved.

* * *

Thse are a few illustrations, taken at random, to show what the Johnson Way has done in the State of California.

There are hundreds of other instances and concrete examples which might be quoted; there are scores of regulatory and humanitarian laws which have been enacted.

Many changes have been made in the administration of institutions—such as Hospitals, Homes and Prisons—which improved conditions governmentally in this State, giving to The People of California the most progressive administration of any State in the Union.

The Johnson Way accomplished in four years more than several of the other progressive State have accomplished in the last thirty years of progressive administrations.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of Chas. H. Fletcher and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhoea. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

LEST WE FORGET

A Speaker Who Had the Punch

Mayor to Make Early Appointment of Chairman of Board of Censors

Mayor Fox announced Saturday that he would name another chairman for the Fulton Board of Moving Picture Censors to take the place of Irving Galusha, who resigned because of adverse newspaper criticism, and on account of the fact that he found the work required too much time. The Mayor has as yet given no inkling of the identity of the new appointee, but he will announce the name of the new chairman before Wednesday when he will leave the city on a short trip.

The first moving picture censoring board came to grief about one week after it began an active campaign here. The board took exception to a feature picture which was showing at one of the local theatres, in which Mary Pickford, said to be the highest priced paid film star in the profession, was appearing. Although it is reported that the manager of the theatre was ordered to show the picture to the censors before the public was allowed to view it, he did not comply with this demand, evidently taking the stand that he was not legally compelled to do so. The picture was shown and proved to be very tame, and entirely devoidof anything which would offend. After this faux pas which, incidentally advertised the commission in a manner displeasing to several members of it, two of the members resigned at once and shortly afterward, Mr. Galusha's resignation was forwarded to the Mayor. Since that time the commission has been defunct to all intents and purposes and the morals of the public at large have been exposed to the dangers of uncensored films. No complaints, however, have been received against any films shown in the city and the general impression seems to be that the theatres here are unusually discriminating in engaging films.

It is understood, however, that the Mayor still is inclined to believe the films need censoring, although statistics taken by interested parties prove that nine out of the ten films shown here have been censored by two reputable boards.

The theatre operators are awaiting the new appointment with great curiosity. It is said the Mayor will appoint one of the members of the local clergy as chairman of the board.

"Reformer" Would Have the Traffic Regulations Observed in This City

Between the fool pedestrians and the fool drivers it is a wonder that accidents within the congested business districts of our city are not more frequent than they are. There are times when careful drivers must take the wrong side of the street to avoid obstructions of various kinds or to escape being run into by some careless driver who is over-speeding and is on the wrong side of the road. A large per cent of the auto drivers pay no regard to the rules of the road and they speed around the corners sometimes on two wheels, instead of four, evidently intent on saving their rubber regardless of the consequences.

Pedestrians are equally careless of themselves and oftentimes you will see some old sleepy head standing still in the middle of the street gazing vacantly in to the heavens until he is nearly hit by a passing auto which he jumps back from after it has passed by, provided he has awakened from his day dreams, and more likely than not, he ends his jump directly in front of an auto speeding in the opposite direction. Such occurences are daily seen on our streets.

Then, there is the empty headed woman who starts across the street regardless of the fact that there may be several moving vehicles coming in both directions which have to dodge her as best they can, and perhaps to a halt, to avoid hitting her. This practice would be fraught with less danger were such persons to cross the streets at the corner crossings instead of midway between them, as is the too frequent practice with persons on foot.

Another danger lies with parents who permit their children to play upon streets where autos are constantly passing. On West 1st between Phillips and Voorhees streets small children literally swarm the street to their great danger and the annoyance of those who drive upon it.

As to the police, they appear to take no special interest in regulating the traffic upon our streets, for if they did it would soon be

CO-OPERATION

Extract From a Speech by Lucius Wilson at The Clark House, March 10, 1915

(Reprinted from the files of The Evening Times)

"The citizen must be able to understand the interests of the community, must be able to subordinate his own will to the general will, must feel his responsibility to the community and be prepared to serve it by voting, by working, or, if need be, by making sacrifices."

With these words Lucius E. Wilson, of the American City Bureau, closed one of the most remarkable addresses ever heard in Fulton. This was at the first noon luncheon of the Chamber of Commerce at the Hotel Clark this noon. The talk took hardly thirty minutes. But it was thirty minutes of straight-from-the-shoulder, man-to-man talk such as no speaker from another community has ever dared to utter in Fulton. It was thirty minutes of sound sense and analytic exposition of the causes and effects of one kind or another of civic spirit.

"It is generally conceded," said Mr. Wilson at one part of his talk, "that the great need in Fulton today is co-operation instead of a general tendency toward divergence. A successful Fulton business man said to me this morning:

" 'I have been engaged in business in Fulton for nearly twenty years. I have yet for the first time to hear any resident of the city wish me success. Everything that I have accomplished has been accomplished by fighting, by opposing, and by closing my ears and pushing forward.'

"These words," commented Mr. Wilson, "might truthfully be reiterated by other business men in Fulton. Those who have succeeded have grimly battled against this prevailing spirit of "sink or swim, live or die, survive or perish.' Those who have failed have left the city feeling that it is a poor place in which to live. They were wrong, absolutely wrong. Fulton is a good city. But it has been lacking in that co-operation which would have made men who failed to go away with the spirit of good losers.

"All the co-operation in the world cannot make a poor business man succeed. Neither can opposition and indifference make the good business man fail. But the poor business man will fare better and the good business man will prosper on a larger if the spirit of co-operation predominates.

"If you are a true citizen of Fulton you are interested in the development of Fulton. If you are interested in the development of Fulton, you are interested in what the Chamber of Commerce can do for this city."

Cold Storage Man is Invited to Speak Before Division of Agriculture

Following the enthusiastic meeting of the Division of Agriculture on Thursday evening in which is was evident that there was a real demand for a cold storage plant in Fulton, invitation was extended to W. B. Frear, of Williamson, N. Y., to address the Chamber in the near future. Mr. Frear is a large fruit and vegetable grower who has interests in this part of the country as well as in Williamson. He is well posted upon matters relating to cold storage, and is interested in one or more cold storage plants.

The Division of Agriculture hope that Mr. Frear will accept their invitation. If he does they will have an open meeting of the Division to which the members of the Chamber and probably the public will be invited, as the matter is of great importance to the shippers in this vicinity.

As soon as Mr. Frear's acceptance is received the Division will announce the date of the meeting. If he does not accept efforts will be made at once to secure another speaker.

Character Building Most Important, Says Minister to Fulton's Masons

Fifty members of Fulton Council, Free and Accepted Masons, attended church services at the First Congregational church yesterday morning. The Masons met at the lodge roms in the Quirk building at 10 o'clock and marched across the upper bridge to the church in a body. All the members wore regalia.

The center aisle was reserved for the members of the order and th choir rendered special music befor and after the sermon by the Rev. Charles Olmstead, pastor of the church.

The sermon was founded on the text from Nehemiah II., 18th verse, "Let us rise up and build," and was a masterly appeal for unity, strength and high purposes among the members of the order.

Mr. Olmstead said that recently while thinking over what he should say to the members of the Masonic fraternity he saw a mason passing by his house who carried the implements of his trade. This kindled his imagination and he decided to preach a sermon on building.

"Turning to the old Book I was surprised to find out how much it had to say about building," said Mr. Olmstead. "A builder must understand his work. He must be equipped with the proper tools and meet the obstacles which confront him. He must have visions. There is no need of a builder only as there is need of something to build. The great call today seems to be for the building of character. Nothing else is so important, so worthy of effort.

"I do not suppose character can be standarized. But we can all measure up to the loftiness of the Christian idea. We may honor all men but the brotherhood we are exalted to love.

"The next question is that of how our work shall be done. It is easy to tear down. It takes neither genius or skill. The true builder sees in the debris material for a new Jerusalem. Start out today with any high purpose and you will be met with the response 'This is not the time. Times are too hard.'

This sounds plausible. War is the disturbing influence. The financial stringency forbids doing more than to mark time.

"Nehemiah thought differently. He did not even call a meeting, haye a resolution passed, that the walls of Jerusalem should be rebuilt, have that resolution spread upon the minutes and published in the Jerusalem Standard, the Israelite Times or the Jericho Herald.

"Instead he said, 'Let us rise up and build.'

"You men know what are some of the enemies of our nation. I think I love you the most for the enemies you have made. Any kind of teaching which ignores the world, the flesh and the evil one, any kind of system which dopes the human conscience in any enemy to be resisted and a foe to be crushed.

"In this great work of bringing in a higher manhood all should join. A few cannot do the work. Some say "Well, I will pay the minister.' To such I should like to return the money and with it the responsibility which they believe is attached to their gift.

"A little more keenly we can feel the needs of the hour, sympathize with our fellowmen, seek to remove them from temptation, seek to give them inspiration and aid. That is your work. You can keep pegging away while scoffers pour contempt upon your toil. This is not a time for soft words and flattering phrases. I congratulate you on the great external success your order has attained. I have heard it said that if you carry out your ideals there will be nothing left to desire. Then carry them out.

"The day of duty will soon be gone. We too may reach the goal. We may make our homes and find our work, 'Let us rise up and build.' "

At the close of the sermon Rev. Mr. Olmstead quoted a poem entitled, "Let Me Live in a House by the Side of the Road." The quotation was most eloquently rendered.

HUNTER ARMS TO OPEN, SAYS THOMAS HUNTER

Following a newspaper announcement that the Hunter Arms Company plant would re-open on full time today many employes of the company went to the factory this morning but learned that the plant would not open. Thomas Hunter, one of the officials of the company, in a conversation over the telephone with a reporter yesterday stated that the plant would re-open on or before next Monday, July 5. "This is definite information," said Mr. Hunter, "and authentic. You may say that I said it."

"What will you manufacture?" the reporter asked.

"That I am not at liberty to state," said Mr. Hunter. "The nature of our produce will be anounced later in the week. But I will say that the plant will be open again next Monday and it is very probable that we may open before that time."

On the other hand, it was reported today that another official of the company announced that the plant would not open next Monday, and said that nothing had occurred yet which would enable the company to set any opening date.

A few mechanics went to work at the plant today, but they will occupy themselves with making repairs to the machinery.

Our Shortage in Aircraft

The military value of the Zeppelin seems still matter for much doubt. The dreadnought has not entirely proved its worth. Even the submarine, with all its background of accomplishment, has not emerged from the experimental stage. But if there is anyone who continues to question whether aeroplanes are as necessary to modern warfare as guns, he may be set down as one who stopped reading the newspapers on August 1,

And yet, in the country-wide condemnation directed against the unpreparedness of our navy, and to a lesser degree of our army, there has been surprisingly little reference to our utter deficiency in aircraft. We take the more pleasure, therefore, in printing in another column of this issue a letter emphatically calling attention to this ridiculous and almost criminal condition. In neither navy nor army are there machines enough or pilots enough to accomplish at the utmost 1 per cent of the reconnoissance necessary to a campaign in actual warfare, to say nothing of a reserve supply to replenish the machines and pilots lost in fighting. Pitted against a first class enemy, even though his forces numbered no more than ours, American troops and American warships would be in the position of a householder under a bright light duelling with a hidden burglar, or in that of our volunteers in the Cuban campaign, the smoke of whose powder revealed their positions to an enemy using smokeless powder and therefore unseen.

Happily, though Congress has begrudged a scant million and a third to the combined services, to remedy a deficiency challenging many times this amount, the Aero Club of America has succeeded in interesting private owners of aeroplanes in the situation. Already it has procured the loan of [illegible] machines and the subscription of [illegible] to train volunteer pilots and to supplement what aid the Army and Navy departments can extend in the matter of aviation training to the national guard and naval militia.

It is a good beginning, for which the Aero Club deserves well of the country. The latter, to show its appreciation, can do no better than to swell the subscriptions and the number of machines loaned pending the next session of Congress (an extra session called shortly, let us hope), when Congressmen should be overwhelmed with the popular demand for generous provision in the matter of military aviation as in that of every other modern arm of defence. —N. Y. Tribune.

Blockade Fair, Says England

Secretary Lansing made public last night the text of the memorandum just received from the British Government in justification of the manner in which American commerce had been treated in the measures taken by the allied Government to restrict trade with Germany and Austria.

While Ambassador Page explains in his cablegram transmitting the memorandum that it is not an answer to the principles set forth in the American note of March 30, but merely an explanation of concrete cases of detention of cargoes to and from the United States, the tenor of the communication is such as to inspire no hope that the British Government intends at the present to relax the vigor with which it has been enforcing the restrictive measures against American trade under the so-called Order in Council blockade.

The memorandum deals only with the detentions of cargoes to and from Germany and the United States in British ports, minimizes the gravity of these interferences, discusses various special concessions made in favor of American citizens, and indicates Great Britain's willingness to accord special treatment to American importations from Germany, shipped via a neutral port, and bought and paid for before March 1, but there is nothing in the memorandum to indiate that the British Government proposes to comply with the expectations of the United States with regard to modifying the practices under the Order in Council so as to adjust these practices to the recognized rules of international law or to remove the menace to the rights of trade and intercourse between neutral nations.

Without answering directly the principle set forth in President Wilson's note of March 30, pointing out the matters of "grave importance to neutral nations" involved in the restrictive measures of the allied governments under the Order in Council policy, the memorandum is so phrased, Washington believes, as to accord little hope that the real response, when its comes, will be satisfactory to the United States. There is no evidence of the intention of the British government to concede its full adherence to the principles of international law enunciated by President Wilson when he stated the attitude of the United States Government, and ojcials in Washington fail to observe in their early reading of the memorandum any compromise by the British Government.—Utica Observer

JUST FOR REMEMBRANCE

"Reason Number 12" of the "Buy in Fulton" talks to the people of this city which have been appearing each day in this newspaper for a period of two weeks must have been built up by its sponsors from the conditions as they should exist rather than from the present facts. Just for remembrance, the following are statements contained in "Reason Number 12."

"The merchants of Fulton contribute their full quota to the support of Fulton city. They help you pave the street in front of your house; they help you support the public or parochial schools; they help you have good water and clean milk; they help you pay our policemen and our firemen; they help you make Fulton a pleasant, inhabitable place in which to live," etc.

When Lucius Wilson was in Fulton he said:

"The growth and prosperity of a town is largely reflected in the growth of its local paper."

If the reader happened to scan the contents of "Reason Number 12" which appeared exclusively in The Evening Times of last Saturday he must have seen that the Retail Trades Division of the Chamber of Commerce is trying to master a situation for its membership when as everybody with ordinary powers of observation knows it is unable to master itself.

In the first place, the plea is made in "Reason Number 12" that we should "Buy at Home" because the merchant whose store is in Fulton does a number of things to help in maintaining a town on the banks of Oswego river. But is the reader aware of the fact that the enthusiasm displayed by the Retail Trades Division in its plea to the people is inconsistent and incompatible from the fact that instead of confining the advertising appropriations of the retail establishments to the upbuilding of the home popers—the local newspapers—the Division's membership is guilty of spending money for the support of "another community?"

Lucius Wilson inspired the men of this city; he enthused them with the spirit of co-operation, which means "Cmmunity Building." He told them how growth and prosperity is reflected, but Lucius Wilson's messages have been evidently forgotten. That his advice to rally to the support of the local newspapers did not sink beneath the skin of many of the men of this town is exemplified in the columns of the newspapers published elsewhere and circulated in the city each day. In those newspapers one may find represented the expenditure of many dollars in advertising, spent by the merchants of Fulton, "in another community," for the mistaken purpose of selling goods to the people of this city, but which in reality, brings to the attention of the newspaper readers' eyes the fine large advertisements of the big city merchant.

Yes, the merchants of Fulton do many things for the maintenance of home institutions, but that "Reason Number 12," and its predecessors with the same line of thought fails to enumerate that they are, collectively and consistently, doing all in their power to reflect the progress of this city in the support given the newspapers printed and published at home and which are home industrial enterprises.

If the merchants of Fulton would fire the people of Fulton with the degree of enthusiasm which should ultimately bring to them a full measure of success, they must first of all realize that they and not the masses of the people are among the worst offenders against the slogan, "Buy in Fulton."

THE GARY PLAN SPREADS

Gary, Ind., being a model town, built by the United States Steel Corporation, has a model school system. The system was at first a theory, but practice has shown that it is entirely workable. The plan has spread to other cities, New York being the most noteworthy recent convert. The metropolis will spend nearly $2,000,000 to adopt the plan in a dozen schools.

The Gary school plan provides for regular class rooms and in addition workshops, gymnasiums, playgrounds, museums and libraries. The idea is to teach the children "how to live and how to earn a living." A feature of the plan is that it keeps children off the street.

The school day will be lengthened from four to five hours to six hours and 20 minutes. The pupils will have the same length of study as at present, the rest of the time being devoted to play, and to the other features of the school. All of the departments of the school will be in operation at the same time, so that if one were to visit the gymnasium and stay there all day, he might obtain the impression that all that was done at the school was to exercise the body. As a matter of fact, a pupil will devote a part of his time to study and a part of the other activities.

The scheme solves the problem of overcrowding. In New York it is estimated that 1,500,000 pupils can be taken care of where 750,000 are now instructed, and the work will be much better. There will be no more part time pupils.

In order to adopt the plan a city must appropriate more money to make the start, but as the product is greatly increased and the quality is improved, it appears that the cost is cheaper than the old method.—Utica Press.

THOS. MOTT OSBORNE NOT TO QUIT PRISON

New York.—Reports that Thomas Mott Osborne is to quit as warden at Sing Sing prison because of friction with Deputy Warden Charles Johnson and Superintendent of Prisons John B. Riley were denied by Mr. Johnson at the prison yesterday.

"There's been no friction over drafts of prisoners," declared Johnson, "nor have there been any differences over discipline or anything else. We send away drafts every week. Warden Osborne is not going to resign. I understand this whole story started in Albany. Somebody could not have had much to do."

NOT 1,000,000 BUT 4,000,000

Kitchener Raised Four Times as Many Troops as Has Been Admitted

In the July American Magazine appears an exceedingly important article entitled "Lord Kitchener's Great Bluff." It is a report of how England has secretly raised an army four times as big as she has admitted. The details of the story include an interesting account of the tremendous part that advertising played in persuading men to enlist.

The author of the article is J. Herbert Duckworth, of whom the editors of The American Magazine say in a note:

"Mr. Duckworth is an Englishman belonging to a family of well-known London and Liverpool journalists, but for the past ten years, with the exception of two years in London, he has lived, most of the time, in New York, where he has been connected with newspapers. At the outbreak of the war he went to England, where he has remained most of the time. During the winter, because of his unusual opportunities for getting inside information pertaining to England's part in the war, he came confidentially into possession of the facts in this article. On account of the strict censorship imposed by Lord Kitchener, no English journal has published them, and in truth, few Englishmen have known the real facts. Indeed, Mr. Duckworth himself has been unwilling, until now, to communicate publicly what he has learned."

Following is a brief extract from Mr. Duckworth's article:

"How Kitchener's Army was secretly increased from one million to four million men right under the very noses of the ubiquitous German spies is one of the most amazing stories of the war.

"This grim joke on the Kaiser was concocted by Lord Kitchener himself. He commandeered the services of the press to assist him to carry out the great bluff.

"When the British Secretary of State for War first conceived the idea of putting into the field four million men, he realized that it would be a grave strategic blunder to allow the enemy to know what was really afoot. Rather, the game should be to call for a million men, and then press-agent the world with stories llamenting the fact that, at last, the British Empire was about to crumble up because the men of England had not the pluck to defend it. The scheme worked out admirably.

"The campaign of silence was conducted on strictly scientific lines. The newspaper editors were first warned that any indiscretion would mean a court-martial, under the Defense of the Realm Act, on charges of having 'spread reports likely to interfere with the success of His Majety's Forces.' They were instructed to publish only the recruiting returns sent out by the War Office. Independent census-taking was strictly forbidden. All articles on the new army, and even pictures of soldiers, had first to be submitted to the censor. A permit was required even to own a camera.

"One London editor refused to 'stay put.' He published a picture of some soldiers without permission of the censor. Lord Kitchener sent for the offender.

"'A second indiscretion,' he explained, 'will mean a court-martial and jail.'

"'On what charges?' stuttered the astonished editor.

"'Never mind,' answered Lord Kitchener; 'we will clap you into prison first, and find the charges after the war is over.'

"When it came to moving the new troops to France extraordinary precautions were taken to mislead the spies. The regiments were not all transported from Southampton to Boulogne or Havre. Instead they were shipped from what were really out-of-the-way and inconvenient ports—Bristol, Avonmouth, Cardiff, Swansea and Barrow, for example—to French ports as far from the firing line as St. Malo, Brest, and even Bordeaux on the west coast and Marseilles on the Mediterranean.

"The engine drivers were changed every twenty miles or so, and the captains of the troop ships received their final instructions by wireless after they had put to sea."

Expert Advice for the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

My rear axle makes a noise, especially when turning a corner. I have had new housing and gears put in, also new bevel gear driving pinion. When I screw the pinion as tight as I think it ought to go it binds. What is the matter?

This condition is due to the shifting of the large differential gear, so that it moves away from and toward the driving pinion. The cause of this is usually a loose truss rod, which permits the housing halves to separate. The left half of the housing should be removed and the bolts reset and tightened, and then the truss rod taken up as far as possible to form a rigid construction. If you are not familiar with the work do not attempt it and under no circumstances should you try to readjust the gears to compensate for the loose rod.

Are chain carbon removers as good as the scraping method?

Much has been said against this method of removing carbon from the cylinders, but it has been tried with very satisfactory results, no harmful effect on the motor being noticeable. It certainly is a quick and effective method and equal in every way to the result obtained when the cylinders are removed and scraped. Many people are afraid that if they use this method there is danger of the chain catching in the valves or that small pieces of the chain will become broken off and score the cylinders. Both experience and careful thought on the subject, however, will show that there is no possibility of the chain catching in the valves of any poppet valve motor. Of course it would not do to use the chain in a rotary or sleeve valve motor, because it would get caught between the edge of the valve and the edge of the ports and be ground to pieces, and at the same time the valve would be injured. Furthermore, there is no possibility of small pieces of chain breaking off and scoring the cylinders for the reason that the chain is not brittle. It will bend before it will break. Nor is the material hard enough for the remover to scratch the cylinder as it is battered about. The chain will only remove the carbon from the top of the piston, the cylinder head and that part of the bore that is above the piston travel. The valve pockets must be scraped, but as these are easily accessible this is not an objection.

How are platinum points fastened to screws of a magneto?

One method is to hard solder the points in place. The first step is to cut two small slots at right angles in the end of the two members carrying the points. Then by the aid of the brass solder the points are fastened in place.

Kindly tell me something about long and short intake manifolds. Which is the better?

The short manifold usually is better, showing superior results at low speeds with wide open throttle and equally good results at high speeds. When the throttle is wide open at low speeds, a condition existing when the car is on a heavy pull, the liquid gasoline in the manifold must be lifted a greater height in the long manifold, and hence there is a chance of loading up, due to the liquid fuel dropping back against the throttle. The condition really is caused by the air velocity being insufficient to carry the fuel to the motor. With a short manifold the fuel need not be lifted very high, and hence there will be no loading up or collecting of gasoline in the manifold.

What is the life of the average storage battery when used for starting?

A starting and lighting battery will last for three to four years, if properly cared for. Each year the battery will need new separators.

How can I change a low compression motor to a high compression one?

The compression may be raised by several methods. It is hardly advisable to make this change, because your motor has been designed for a certain compression, and if you raise it, say ten pounds, you will submit the cylinders to a greater strain than they were designed for, the pressures on the cylinder walls will be greater and the wear on the bearings more. If your motor is not giving sufficient power you should find out what is the matter with it rather than raise the compression.

Probably the best method is to rivet a plate to the top of the piston or the cylinder, whichever is more convenient. Placing the plate on the piston adds weight to the reciprocating masses, while if it is attached to the cylinder head there is danger of interference with the flow of the gases in and out. In either case be sure that there is clearance enough between the piston and the cylinder to allow the plate to be put into place. If the plate is attached to the piston it should be made of aluminium for the sake of lightness.

Lengthening the connecting rods or increasing the crankshaft throws will also increase the compression. But neither of these methods is as simple or as cheap as the first one suggested.

MOUNTAIN CLIMBERS MAY BE LOST

Conway, N.H.—great anxiety is being felt here for a party of six young men and women who started to climb Madison, in the White Mountains, on Tuesday and have not yet been heard from. Soon after they started guides returning from a hut on the mountain reported a violent snow and sleet storm, which covered the top of the mountain. The party had only a few sandwiches and are inexperienced mountain climbers.

Those known to be in the party are Loren Goulding, son of Superintendent L. D. Goulding of the Conway Lumber Company; Srnest and Martha Fefeld, brother and sister, the former a young Boston lawyer; a Mr. Waterman, of New York city, and two young women from New York, one named Hanson. They intended staying over night in the hut at the top and returning the following day.

When nightfall approached on Wednesday anxiety was felt for the party, and when they had not returned yesterday searching parties were started out. It is feared that all have perished.

...THEIR ZUIDER ZEE

Dutch Busy on Big Scheme Despite War.

COST WILL BE $75,000,000

Will Reclaim Half Million Acres of Land on Which 250,000 Persons Are Expected to Find Homes—Railroad on Embankment Will Connect North Holland With Friesland.

Despite the war Holland is proceeding with the giant project of pumping the Zuider Zee dry. Thus will be reclaimed 500.000 acres of land, on which 250,000 persons are expected to find a home. The cost will be about $75,000,000. The work will occupy thirty-three years.

Holland owes her independence today largely to the fact that 38 per cent of her surface is below sea level. Any neighbors that covet Holland's magnificent seaboard know that to conquer they have to reckon not only with the Dutch army, but with the sea the Dutch would let in between themselves and the invaders.

The Zuider Zee itself is a result of the bursting of the dyke. This happened in the thirteenth century, and in addition to Holland being cut virtually in two and Friesland being separated from the rest of the country by a turbulent sheet of water, hundreds of villages were submerged and some 80,000 persons drowned. In 1421 there were terrible inundations, in which seventy-two villages were swept away, with the loss of nearly 100,000 lives.

When the Dykes Burst.

More terrible still was the disaster of 1570, when at one time it looked as if the greater part of the country would be blotted out of existence by the angry seas. A continued and violent gale from the northwest had long been sweeping the Atlantic waters into the North sea and had piled them up on the fragile coasts of the provinces. The dikes, taxed beyond their strength, burst in every direction. Dutch Flanders to a considerable distance inland was suddenly invaded by the waters of the ocean.

Dort, Rotterdam and many other cities were for a time almost submerged. Along the coasts fishing vessels and even ships of larger size were floated up into the country, where they entangled themselves in groves and orchards or beat to pieces the roofs and walls of houses. Over 100,000 persons perished.

A great dam or embankment is now being built across the north end of the sea from Wieringen, in North Holland, to Piaam, in Friesland.

World's Longest Embankment.

It will have a length of nearly fifteen miles, easily making it the longest of sea embankments. On the inner, or Zuider Zee, side it is to carry a double line railway and a road for ordinary traffic, thus affording easy access between North Holland and Friesland. Communication with the North sea will be maintained by thirty-three large sluice gates and a couple of locks for shipping.

The construction of the embankment is alone expected to occupy nine years.

Within the embankment four areas known as the northwestern, southwestern, northeastern and southeastern are to be drained and reclaimed, each of which is to be apportioned to the province which it adjoins. These reclaimed sites will have an area of 54,270, 78,800, 127,125 and 269,410 acres, respectively, or a total of 529,605 acres, of which 436,025 are clay and sandy soil suitable for farming.

The northwestern area will be the first to be drained, and the method of procedure will be as follows: After the great embankment has been built along its northern end it will be divided into four parts by construction of low inner dikes, from each of which water will be pumped out separately. For this work four steam pumps of 1,900 horsepower each will be erected.

BRITISH FOOD PRICES SOAR.

Cost of Living Jumps 43 Per Cent as Result of War.

Prices of foodstuffs in Britain have advanced 43 per cent all round since the beginning of the war. Bread has gone higher still. It is now 18 cents a four pound loaf, which in peace times was only 10 cents.

According to figures furnished by the British board of trade it would appear that certain articles of food have increased much more in England than in either Berlin or Vienna. A comparison of the increase in the same articles in the various cities is as follows:

	—Per Cent.—		
	London.	Berlin.	Vienna.
Beef, hind quarters	67.8	11.8	40.0
Pork	44.7	45.7	192.0
Butter	26.1	26.3	121.0
Potatoes	34.1	75.6	3.4
Sugar	84.45	8.0	6.7

Would Vaccinate Federal Employees.

The public health service has issued a warning to the 400,000 government employees in the United States to get vaccinated against typhoid fever during the summer months. It states that seventy-five government workers die every year from the disease.

CENSUS BUREAU TELLS WHERE WEALTH OF NATION LIES.

The following figures, taken from a census table, show where the $200,000,000,000 wealth of the United States is to be found:

Real property and improvements taxed	$98,362,813,569
Real property and improvements exempt	12,312,519,502
Live stock	6,238,388,985
Farm implements and machinery	1,368,224,548
Manufacturing machinery, tools, etc.	6,091,451,274
Gold and silver coin and bullion	2,616,642,794
Railroads and equipment	16,148,532,502
Street railways, etc.	4,596,563,292
Telegraph systems	223,252,516
Telephone systems	1,081,433,237
Cars not owned by railroads	123,362,701
Shipping and canals	1,491,117,193
Irrigation enterprises	360,865,270
Privately owned waterworks	290,000,000
Privately owner central electric light and power stations	2,098,613,122
Agricultural products	5,240,019,651
Manufactured products	14,693,861,489
Imported merchandise	826,632,467
Mining products	815,552,238
Clothing and personal adornments	4,295,008,593
Furniture, carriages and kindred property	8,463,216,222

The six New England states are credited with sharing to the extent of $11,805,422,012, New York with $25,011,105,223, Illinois $15,484,450,232, Pennsylvania $15,457,530,277, Ohio $8,906,432,943, while Delaware is lowest with $307,948,613.

REVOLT IN INDIA WAS HATCHED IN AMERICA.

Hindus Foiled In Plot Say They Had Aid of Germans Here.

The full story of a carefully planned effort to effect a revolution in British India, hatched, it is said, in California, has been revealed in court proceedings under the new defense of India act at Lahore. Eighty-one persons are charged with "conspiracy to overthrow by force the lawful government of India."

The attempt at revolution, according to the witnesses, was launched under German auspices at a meeting of 5,000 or 6,000 East Indians at Sacramento in August, 1914.

"It was thought," declared one witness who was present at this meeting, "that as a great war had broken out in Europe it was a good chance for East Indians to demand their rights and, if necessary, to use force." The witness was one of a party of seventy Indians who sailed from San Francisco on Aug. 29 for Hongkong en route for India.

The Sacramento meeting was one of a number held at various places in America after the failure of the attempt of Gurdit Singh to obtain the entry of 400 Indian laborers into Vancouver, contrary to law, and their return to the east.

Following the arrival at Hong Kong of the party which sailed from San Francisco on Aug. 29, Indians went to various ports of the far east with a view to seditious propaganda.

A general rising in the Punjab was fixed for Feb. 21, but on Feb. 19 suspicion fell on one Kirpal Singh, who had arranged to go and excite the troops at Main Mir. The conspirators were surrounded at a house in Lahore and the plot was frustrated.

MAKE VEILS FOR SOLDIERS.

Women of South Africa Protect Their Men From Mosquitoes.

While the women of Europe have been knitting socks and making antigas respirators the women of South Africa have been equally busy making veils for the army of the Cape Colonies.

The chief enemies of the army steadily pushing into German Southwest Africa are the swarms of deadly disease carrying insects—mosquitoes, sandflies, and so on. Veils cover the soldier's head and neck and are tucked into his tunic.

Veil making at afternoon tea parties, though less exciting, has entirely cut out the diamond hunting which used to be the entertainment at Kimberley women's gatherings.

USES MULE TO LOCATE OIL.

Colonel Green Has Novel Method of Finding Spot For New Wells.

Colonel E. H. R. Green of New York and Dallas, son of Mrs. Hetty Green, firmly believes that there is nothing like a mule for locating a new oil field.

The other day Colonel Green and a party of Dallas men associated with him in an oil venture went out to locate a site for the first well. He selected a mule as master of ceremonies. The mule was driven into the field and allowed to take his own time in coming to a stop.

Where the mule first started to graze a stake was driven and plans begun for the erection of the first derrick. If oil is struck the mule will be placed on a pension.

WIFE BEATER IS WHIPPED.

White Man Gets Fifteen Lashes at Post In Maryland.

To Charles S. Dove of Middlebrooke belongs the distinction of being the first white man to be whipped in Montgomery county, Md., for wife beating. Fifteen lashes upon his bare back were administered in the Rockville jail yard by Sheriff Peyton Whalen in the presence of the jail physician and a number of witnesses.

Several of them drew blood.

A REAL WAR GAME.

"Genrul, don't you want a couple army nurses?"
"Naw! You can git a job wid de enemy, though. We ain't goin' to have no casualty list!"

—Rehse in New York World.

Soldier's Morning Song

Breaking day, breaking day,
Lights me to my bed of clay.
Soon the trumpets will be blowing,
Soon my life blood will be flowing,
Mine and many a comrade's brave.

Scarce begun, scarce begun,
All my pleasant life is done.
Yesterday on proud horse prancing,
Today the deadly bullet lancing,
Tomorrow in the narrow grave!

Yet how soon, yet how soon
Fadeth all beneath the moon.
Dost thou boast youth's goodly showing,
Lips and cheeks with color glowing?
Ah, how brief the rose's breath!

* * * * * * * *

Therefore still, therefore still
Go I forth to do God's will.
In the hour of battle steady,
And, if he shall call me, ready,
Ready for a soldier's death.

—William Hauff, translated by Anna Bunston.

SEES PERIL OF FAMINE THREATENING AMERICA.

Botanist Says Population Is Outgrowing Food Supply Twenty to One.

There is grave danger that a famine will descend upon the United States some time in the near future, according to Professor John M. Coulter, head of the department of botany of Chicago university. Population is increasing twenty times faster than the food supply, he finds.

"We ought to have enough foodstuffs in this country to feed the world," said Professor Coulter. "Instead we soon shall not have enough to feed ourselves. This growing discrepancy between food production and population is the basis of the high cost of living.

"Four remedies present themselves to prevent famine in the United States. First, we should develop scientific methods of soil cultivation. We must manipulate the soil properly and farm intensively, as the Europeans do. By scientific treatment of the soil crops can be increased 300 per cent in the United States.

"Second, we must plant on every area the crop which will give the maximum yield in that section. Stop planting wheat in corn land, and don't try to raise potatoes in swamps. Too many farmers plant their crops without knowledge of what their land is suited for.

"We must, in the third place, develop drought resisting crops. This is the work of the professional botanist and is to be accomplished through experiment.

"Then, at last, we must produce disease resisting crops, for plants, like animals, are subject to ills of the flesh. This, too, is the work of the botanist.

"If these suggestions are carried out with reasonable thoroughness the high cost of living will vanish as concerns foodstuffs."

$1,300,000 FOR SUFFRAGE.

Women to Get More Than Expected From Mrs. Leslie's Estate.

Appraisal of the estate of Mrs. Frank Leslie, who was the Baroness de Bazus, indicates that the legacy to the women's suffrage cause will be much more than the expected $1,000,000. It will be at least $1,300,000 and probably more.

The appraisal shows Mrs. Leslie's personal estate amounted to $1,737,477, but her realty holdings were $30,000 more, making a total of $1,767,477. The bequests to friends and relatives named in the will, the sums paid to avoid contests and the expenses will not, it is thought, amount to as much as $400,000.

The big sum is left to Mrs. Carrie Chapman Catt to be used for the women's cause according to her discretion.

HIS WATCH A "TORPEDO."

Coincidence Brings Lusitania Survivor a Curious Memento.

N. N. Alles, auditor of the Hotel St. Regis, New York city, a survivor of the Lusitania, said on his return that he was four hours in the water after the liner sunk, part of the time on a raft, and was twelve hours in his wet clothes before he could get dry clothing.

"My watch stopped at 2:30 a. m.," he said, "and I shall always keep it that way as a memento of my narrow escape. I had only $2.50 in my pocket when I landed at Queenstown, and I spent $1.50 of that on a watch. When I opened the case to look at the works I found that the watch was made at Wurttemberg, Germany, and had the trademark 'Torpedo' engraved inside as a guarantee of its good quality. I thought this a strange coincidence."

RURAL MAIL AUTOS AUG. 2.

Postoffice Department Will Start Service With 105 Machines.

Official use of the automobile for distributing mail in rural communities in many parts of the United States will begin on Aug. 2. Orders have been signed by the postmaster general authorizing the putting into service of 105 machines, and preparations are being carried forward by the postoffice department for installation of the auto in this branch of the service wherever the roads will permit.

Of the routes selected to date for automobile mail delivery, forty-four are in Oklahoma, twenty-eight in Georgia, nineteen in California, eight in Texas, three in Florida, two in Pennsylvania and one in Louisiana. These aggregate 5,500 miles.

KEEP STREETS CLEAN.

There is little use in cleaning streets if it is no one's business to see that they are kept clean. Pavements that are clean in the morning will be filthy before night if every passerby is permitted to throw papers, cigar stubs and other refuse upon them at will. There are ordinances against practices of this sort. Why are they not enforced? It is true that the officer on the beat cannot see everything. But if every offender caught in the act were promptly arrested and fined a salutary fear of violating the law would quickly prevail.—Philadelphia Ledger.

Wonderful Stonework.

What is claimed to be the finest stone mason work in the world is to be seen in the ruins of Inca palaces in the city of Cuzco, Peru. Portions of fourteen palaces of Inca rulers line the streets, and much of the walls of the Temple of the Sun has been incorporated into the Church of San Domingo. These walls are of finely cut blocks laid in courses without cement. It has often been said that the joints in this wall will not admit the point of a knife blade. Not only is this true, but a needle, or even a hair, cannot be inserted between these great blocks. The microscope shows that these stones were wrought with tools of champi, an alloy of copper and tin.

Cows the Size of Sheep.

The smallest cows in the world are found in the Samoan islands. The average weight does not exceed 150 pounds, while the bulls weigh about 200 pounds. They are about the size of a Merino sheep.—Chicago Journal.

AIR RAID IMPERILS BANK OF ENGLAND

Zeppelins, Led by Autos, Get Near Heart of London.

HIT NOTED EAST END CHURCH

Airships Only Few Minutes From St. Paul's Cathedral, Houses of Parliament, Westminster Abbey and King's Palace—Ninety Bombs Kill Four, Injure Seventy and Cause Many Fires.

By mail have come details of the attack on London by German Zeppelins, particulars of which the British censor would not allow to be published in England or cabled to this country.

In all it would appear ninety bombs were dropped, apparently by airships, which, it is believed, were guided by spies in automobiles specially lighted. The raiders got within a mile of the Bank of England and St. Paul's cathedral and three miles of Westminster Abbey, Buckingham palace and the houses of parliament. They hit a church, a crowded theater, killed four persons, wounded seventy and set a few fires, but are thought to have proved that raids on London may be successful yet.

First Bombs at 10.30 P. M.

The German air raiders apparently reached land at Leigh-on-Sea, which is two miles from Southend. There they dropped five bombs about 10:30 p. m., but did little damage, as the explosives fell on the open downs near the town. They were next reported over Brentwood and from that town easily reached north London, only a few minutes' flight away. Stratford, which is well within the metropolis, was the subject of their attentions, but little property damage was done there, the bombs falling on waste land.

The raiders then continued their flight until they were over Dalston junction, a very important railway junction with a heavy night traffic of freight trains which necessitates many signal lights. Near the junction there is a marsh, which marks the site of natural springs known from the days of the Romans, and instead of striking the railway lines most of the bombs fell in the marsh.

Swinging more to the east, the raiders scattered bombs over Shoreditch, which is on the edge of the city of London, and it was here that they accomplished the greatest damage to life and property, setting fire to several private residences and shops and killing four persons and injuring many others.

Crowded Theater Is Hit.

An incendiary bomb bounced from the roof of the Shoreditch Empire Music hall, leaving the place virtually unscathed, but causing a panic in the theater audience. A small house standing near the theater was burned, apparently by the bomb, which bounded from the roof. The most important structure hit was the ancient Church of St. Mary, Whitechapel, right in the heart of the thronged East End. The spire was slightly cracked by an incendiary bomb.

Through Hoxton the zigzag course of the Zeppelins could be traced by a series of fires which they left in their track. Along Commercial road many business houses suffered. One of the luckiest escapes was that of a big whisky distillery. With its great vats of spirits and its storerooms filled with case goods it might have proved an easy victim for an incendiary bomb, but the lone bomb which struck the place went through a galvanized iron roof into a deep tank filled with water.

Most of the bombs used were of the incendiary type, and a few which did not explode have been examined by the British authorities. These are filled with tarred hemp soaked in coal oil. But evidence has been found showing that some of the shrapnel bombs of the type carried by aeroplanes were used.

Three Fall on Freight Depot.

Three incendiary bombs were dropped in the big freight station of the Great Eastern railway at Bishopsgate about half past 11. They came through the glass roof without shattering the glass, but cutting holes as smooth as if made with a glass cutter. Two of them started fires, which the workmen put out with buckets of water. The third was thrown into a pail of water before it had done any damage and taken to the police station as an exhibit.

The inhabitants of the poorer regions where the bombs fell were in an ugly mood, and many Germans had to be hurried to the police stations for protection. Two shops owned by Russian Jews were attacked by the crowd in the belief that the owners were Germans.

Next morning the only sign of a pursuit of the raiders was found in the mud flats off Leigh-on-Sea, where a British aeroplane was stuck fast in the mud after being compelled to descend on account of engine trouble.

Their course brought the Zeppelins within two or three miles of Woolwich Arsenal and also the Enfield factory, where great quantities of munitions are being made, and of the fa[illegible] naval observatory and school [illegible], but no attack was at[illegible] except at Enfield, and there [illegible] fall wild.

TO REBUILD RUINED TOWNS

Frank Koester Will Help to Replan Devastated European Municipalities.

Already projects are on foot to replan some of the destroyed Belgian towns as well as some of the towns on the Russian frontier. Frank Koester of New York is making arrangements with foreign city planning experts to co-operate in this work.

Mr. Koester has had a long foreign and American experience in city planning. A German by birth, he has been one of the pioneers in America of

Photo by American Press Association.

FRANK KOESTER.

a comparatively new art which originated in Europe and in which Germany has made great strides. He delivered addresses at the congress for city planners at Dusseldorf in Germany in 1912 and at the international conference of city planning and city maintenance at Ghent, Belgium, in 1913. He was awarded a gold medal at the world exhibition in Paris in 1900 for architectural and engineering plans. He is the author of several works, among them "Modern City Planning and Maintenance," "Hydroelectric Developments and Engineering," "Electricity For the Farm and Home" and "The Price of Inefficiency."

BACK YARD GARDENS.

National Bureau of Education Advocated the Making of Home Gardens.

If every back yard in every large city in the country could be made to produce fruit and garden vegetables for the home the cost of living would receive the most depressing shock of all its ruthless career.

For the national bureau of education the idea is not a dream. The bureau believes that schoolchildren, backed by competent teachers of gardening employed by the public schools, can make the home garden an immensely important factor in domestic economy.

"Experiments already made by the bureau of education," declares Commissioner Claxton, "show that with proper direction an average child between the ages of six and twenty can produce on an eighth of an acre from $50 to $100 worth of vegetables. A third of the children in the city schools might easily produce $300,000,000 worth a year."

An agent of the bureau has returned from a tour of the south, west and east. Out of thirty-two cities visited fourteen have adopted the home garden along lines suggested by the bureau of education. Nine others are planning home gardens under the direction of women's clubs and playground associations.

"God first planted a garden," says Bacon, "and indeed it is the purest of all human pleasures."

JULY FOURTH

Sanity in Other Years Resulted in Saving Lives and the Maiming of Children; Restrictions Needed Here.

The annual orgy of fire and noise occurring each Fourth of July has again come under the ban of the National Fire Protection Association. This year the campaign began in May and the effect of the work of the large and powerful national organization [illegible] throughout the nation is [illegible] the gratifying statistics found [illegible].

Last year, however, the aggregate of deaths and injuries incident to the celebration of the Fourth was greater by several [illegible] than the year before. In fact, last year's casualties constitute more than 43.6 per cent of the total for three years.

In but few of the smaller municipalities has there been suitable legislation enacted. The Journal of the American Medical Association says: "In 1914 three little boys died from tetanus (lockjaw); sixteen persons, mostly little girls and small children, were burned to death by fire from fireworks; five persons were killed by firearms; six by explosions of gunpowder, guns or torpedoes; four by cannon, and five died from blood poison resulting from injuries caused by fireworks. Among those injured but not killed, thirty-six were totally blinded, thirteen lost one eye each, thirteen lost legs, arms or hands, and sixty-seven lost one or more fingers.

In a circular letter issued by the National Fire Protective Association cities are advised before the arrival of the Fourth of July to institute a thorough cleaning of rubbish, and all sale of explosives then restricted as to time and place, the police and public wardens might have at least a fighting chance to minimize the disastrous results of our public folly during the years it may require to inspire in our people a desire for a rational kind of celebration. And such a desire must be inspired. It is the duty of every city to arrange for its people suitable amusements or exercises definitely calculated to educate them in a rational observance of this historic holiday. Habits of folly can be most easily aliminated by a substitution of something better. The things a city can do to interest its citizens in a sane and wholesome celebration are unlimited, and the municipalities which in the past two years have taken steps in this direction are already receiving national praise for their wisdom and their high sense of civic responsibility.

The following table shows to what extent human lives have been sacrificed to Independencee Day in America:

Year	Dead	Injured	Total
1903	466	3983	4449
1904	183	3986	4169
1905	182	4994	5176
1906	158	5308	5466
1907	164	4249	4413
1908	163	5460	5623
1909	215	5092	5307
1910	131	2792	2923
1911	57	1546	1603
1912	41	947	988
1913	32	1131	1163
1914	40	1466	1506

A novel advertising scheme has been adopted by the Lambertville Potteries Company of Lambertvile, N. J., manufacturers of bathroom facilities. The company is, at present, sending an automobile over its eastern territory, the rear end of which is enclosed in glass, within which is displayed one of the company's specialties. The display case is also equipped with an electric light for night displays.

C. Arnett, secretary of the company, who is also a prominent real-estate operator in Lambertville, Plainfield and Netherwood, N. J., and P. J. Faherty, treasurer of the company, are in charge of the display. They have located the agency for their product with Mehegan Bros., plumbers, of this city. The display cas left at noon for Oswego, and the proposed route will take them into Maine.

INSPECTOR'S NIFTY CRUISER IN LOCKS AND RIVER

The inspector's yacht, State Department of Public Works with General Wotherspoon, Myron Stranahan, local canal superintendent, and several guests aboard, steamed through the locks and down the river yesterday afternoon bound for Oswego. The craft bowled along at a 20 knot rate, and several canoeists farther down the river narrowly escaped being swamped.

The yacht is a 60-footer with 20 feet beam, beautiful lines and fitted with every convenience. She was built for canal and lake waters, but is large and stutdy enough to hold her own in deep-sea travel, being built on the lines of a revenue cutter. Awnings along the deck add comfort to the traveler on warm days.

The yacht passed the locks on her way back to Syracuse at noon today.

Pathfinders to Hold First Stag Day Wednesday

The Pathfinder Club will inaugurate the first of a series of Stag days at the club house suth of the city Wednesday afternoon. On this day the grounsd will be restricted to the men members of the club and their guests, and following an afternoon of out-door sports, an appetizing supper will be served by Steward Holmes. The members are invited to attend in sport costumes, and good clothes will be tabooed. Baseball will occupy the greater part of the afternoon according to the program, and for the first time this season two fast teams will get together. Two members of the club have been actively arranging their lineups for the coming tilt, and it is expected that a lively game will result.

The warm weather will doubtless infleunce many members to take advantage of the fine bathing at the island, while quoits and other outdoor sports will draw their quota of enthusiasts.

The first Stag day was too have been held last week, but the inclement weather, as well as the number of events scheduled for the city Wednesday night put a damper on the event. The Stag day will positively make its debut this week, rain or shine.

A NEW DEVELOPER

The Oswego Chamber of Commerce will proceed along development lines with the assistance of W. C. Marshall who arrived in Oswego aSturday as the successor of Lachlan Maclay. Mr. Maclay is now secretary of the Syracuse Chamber of Commerce. Mr. Marshall comes to Oswego from Cambridge, Mass.

Finish the evening meal by eating Cookies made amidst sanitary surroundings. The Black bakings are as "good as mother's."—adv.

INTO EXPENSES

They See Where State Has Been Mulcted by the Unscrupulous Road Contractors.

Albany, June 28.—How to obtain one hundred cents' worth of road for every dollar expended will form the topic for many of the speakers at the mid-summer meeting of the New York State Automobile Association which is to take place in Niagara Falls July 19th, according to an announcement which has been made from the association headquarters. The list of speakers for the time being has not been made public but it is asserted that when the names are announced they will be those of men not only of state wide prominence but of national note.

The New York State Automobile Association has taken the position that because of the constant changes in the highway department there has been a terrible waste of money in the buildings of roads. The Association has started a campaign prior to the opening of the constitutional convention to awaken the public to the realization of the enormous waste in the highway department. And it has been asserted by the officials of the association that one of the main purposes of the mid summer meeting at the Falls is to focus public attention upon the general situation of the highway department with a view of awakening public sentiment to a poitn where it will enforce upon the part of officials a more sane notion of what highway money is intended for.

The executive committe whichh is in direct charge of the plans of the meeting have received information to the effect that about seventy-five per cent of the motorists who will attend the meeting at the Falls will tour from various parts of the state. Because of the fact that a large number will arrive Sunday night an informal reception will be held that evening. The meeting will be called to order at ten o'clock Monday morning and an adjournment for lunch will be taken at one o'clock.

The afternoon will be used for a sight-seeing trip around the Falls and atomobiles will be provided for those who have not come in their own machines. Efforts are now being made by the Niagara Falls club to secure permission from the Canadian government to allow the guests to cross the river and go up the Canadian side. The return will be made in time to give thev isiting motor ists an opporunity to get their supper and attend the grand ball which will take place in the evening, closing the day's festivities.

Community Notes

Syracuse wholesalers and jobbers will be in the city tomorrow, to call upon their customers. They will lunch at the Clark House at noon.

Mr. and Mrs. William Hunt of Binghamton have been entertained by Fulton friends.

A crowd of 200 people witnessed the baptism by immersion of six candidates yesterday afternoon at Lake Neahtawanta. The candidates were baptised by Rev. C. C. Watson of the Free Methodist church.

Baptism by immersion is an unsual event here and the announcement of the ceremony attracted a great throng of onlookers as well as parishioners of the church and friends of the candidates.

After the ceremony, several of the candidates gave testimony and great enthusiasm and religious fervor was shown by those in attendance. The choir of the church rendered special music.

BOOSTER TRIP FOR THE CHAUTAUQUA

In several cities where Chautauquas have been held in recent years booster trips have been made through the surrounding country as a means of advertising the six day program. It is probable that such a plan will be worked out here.

The usual method is to secure a string of automobiles, load up with advertising material furnished by the Redpath Chautauqua system and take in a number of the smaller towns in all directions. This has been found to produce fine results for the Chautauqua, and it is the means of bringing to the city large numbers of visitors and Chautauqua patrons from adjacent territory.

GROCER-MAN NARROWLY ESCAPED COLLISION

Charles Hart, who is employed at Snyder's grocery, narrowly averted a collision with a passenger train at 9 o'clock Saturday evening at the Cayuga st. crossing.

The noise of the approaching train was not noticed by the man as the wagon in which he was riding rattled over the pavement so as to devert his attention.

The shouts of several taxicab men near by who saw the danger saved the man in the nick of time. No flagman was stationed at the time.

SCHENCK PARK

That triangular plot of ground at Worth and W. 1st sts., has at last been christened—a "dry" ceremony taking place.

The already pretty spot is to be further enhanced in beauty by a sheen of lawn, just as soon as goodness of heart moves some one with a team of horses to remove from somewhere one or more loads of good top soil to be spread over the ground's surface by the men who have interested themselves in making the plot presentable.

"Hereafter the park will be known as Schenck Park and unless all signs fail it will become of even more interest to the people living in its neighborhood.

SOUTHARD-CHILDS

Yesterday afternoon at 5.30 o'clock at the parsonage of the First M. E. church, Ernie Southard of Syracuse and Miss Hazel Augusta Childs of Granby were united in marriage. The Rev. J. W. Barret performed the ceremony. Miss Emma Albright and Verner Albright attended the couple.

Mr. and Mrs. Southard will make their home in Syracuse.

THE QUIRK TODAY

Elinor Glyn's novel, Three Weeks, translated in the language of all civilized countries, stands at the fore of all the modern vivid romances. It has been the most discussed novel of the past decade. Its beauty has been critcally conceded and its drama admitted by the most conservative. Paul, the wooer of a runaway queen, has taken his place among the heroes of fiction that men refer to with interest and women with animation. Sonia, the royal mate of a dissolute monarch, young, alluring, adventurous, is now a modern symbol of a love that scorns to count the cost. Sonia runs away from her castle and her king after the manner described in the book. She encounters Paul in the restaurant in Lucerne, Switzerland, precisely as recountered in the novel. The two, a queen without a country and a king without a throne—fall madly in love. She struggles against her enthrallment, and seeks to flee from temptation. But an accident halts her flight and the inevitable next meeting accurs.

Miss Madaline Traverse, who appears in the role of the temperamental queen, is regarded as one of the most attractive of the country's younger stars. Mahlon Hamilton, who plays the role of Paul, is one of the most popular of leading players of the native stage.

SEPTEMBER 28

To Vote on Constitution; Republicans First on Ballot; Voters Register Five Evenngs of the Week

The election machinery of the State will soon be in operation preparing for the annual battel of the ballots next November 2. The report of the constitutional convention will be submitted to the voters this fall and they will be asked to decide upon the organic law of the State for the next twenty years.

The primary elections this year will be held on September 28. All candidates of political parties must be nominated at the party primaries, but independent nominations may be made for any office by petition.

Amendments to the election law enacted at the last session of the Legislature change but little the machincry either as to nominations or elections. The chief changes are those reorganizing the office of the State superintendent of elections, providing for one instead of three State commissioners, eliminating numerous State deputies and other places and reducing the cost to the State and localities.

No time is specified by law when petitions designating candidates for nomination at the primaries may not be signed, and some local candidates arep reparing to start their petitions within the next two or three weeks.

This year on the election ballot machines, if they are used, the Republican candidates will occupy the first space or column for the first time in four years. The order in which parties appear on the ballot is determined by the vote cast for governor at the last State election. The Progressive position, which was third last year, is now sixth. The relative order is Republican, Democratic, Independence League, American, Prohibition, Progressive and Socialist.

The important dates connected with the primaries and election are as follows:

July 1—Last day for party officials in cities to file with the mayors the list of candidates for appointments as election officials.

August 27-September 7—Certificates of designation to be filed with the secretary of State and custodian of primary records.

September 13.—Last day for filing declinations of designation.

September 14—Last day for filing new designations after declination.

September 16—Last day for the secretary of State to transmit to custodians designations filed in his office.

September 1—Last day for appointment of election officials.

September 7—The day for designating polling places in the State by the commoun councils and town boards.

September 21-October 13—Independent nominations may be filed with boards of elections.

September 28—Primary day. Polls open from 3 to 9 p.m.

October 8, 9, 15 and 16.—Registration days in cities and villages of 5000 population or more. Polls open from 7 a.m. to 10 p.m.

October 9 and 16—Registration days in towns and villages of less than 5,000 population. Polls open from 7 a.m. to 10 p.m.

October 15—Last day of filing declination of independent nominations.

October 18—Last day for filing new nominations on account of declination or disqualification.

November 2.—General election. Polls open from 6 a.m. to 5 p.m.

Objections to designating petitions must be filed within three days after the petitions are filed.

CHAUTAUQUA POSTERS PLACED THIS MORNING

Posters were placed in the various business places this morning heralding the approach of the Chautauqua. This week, G. A. Davis, the man in charge of tickets will be in the city and an active distribution will begin. E. J. Penfield has been appointed chairman of the Chautauqua committee and will be in charge of general plans for the week.

The program announced promises rich returns for the investment of the price of a ticket. Not Fulton alone but the entire surrounding country should be grateful to those who originally backed the Chautauqua movement for Fulton.

Suppertime comes, you're not ready for it? Then order from the grocer Black's fresh-every-afternoon rolls and buns.—adv.

Dun's Review sums up last week in business thus:

Cross currents continue in business channels, but the tide of returning prosperity is gradually rising. Good news still predominates and further progress is manifest, notwithstanding the unseasonable weather at many points, and especially in the West. This retards the retail distribution of merchandise and tends to adversely affect the jobbing trade as well, while the agricultural outlook has been somewhat impaired by excessive rain. Harvesting of winter wheat is delayed and corn has received a setback, yet crop failures from too much moisture are comparatively rare, the other extreme having furnished the great records of loss. That the crop reports are not causing concern is indicated by the action of the grain options, wheat again falling below the dollar mark at Chicago. The depressing inuuences are the less keenly felt because they are believed to be temporary, and confidence in the future remains unshaken. Although July dividend payments will not equal last year's by approximately $4,700,000, it is a hopeful sign that of late several corporate interests have announced increased disbursements, two railroads operating in the Middle West being included in the list this week. In the aggregate, the revenues of the transporting companies continue below the totals of 1914—gross earnings for the first two weeks of June showing a reduction of 3.2 per cent.—but some systems are now making better returns and, as previously, most of the loss is on roads in the South.

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

Albany, June 28.—For the purpose of condemning highway bridges which are found to be unsafe for auto busses and auto trucks, a committee of the legislature will shortly make a tour of the State. The committee, which has just been completed, includes Assemblyman Chas. O. Pratt of Washington county, who may be said to be the father of the "safety first" slogan so far as it applies to patrons of motor buses.

During the recent session of the legislature, Assemblyman Platt introduced a resolution which provided for the appointing of a committee or commission to inspect highway bridges built in the early days of automobile traffic, holding that many were unsafe to bear the weight of heavily loaded trucks and busses. At that time he submitted evidence that several bridges had been wrecked by these vehicles menacing human life.

According to statistics in the possession of the State department of highways, there are thirty-three thousand highway bridges in the State. It is understood that one-third of this number are comparatively modern structures capable of bearing from ten to fifteen tons. It is to look into the condition of the remainder that the legislators were appointed.

"The fact that heavily laden outo trucks and busses use old highway bridges daily is a serious proposition,' said Assemblyman Pratt in discussing the mission of the new commission. "The ordinary automobile which passes over the highway bridges of the State are of course perfectly safe; nt is the machines when loaded which weigh twenty tons and upward which do the damage and at the same time endanger human life.

"A good many of the highway bridges have been standing many years and are entirely inadequate to stand the traffic strain which they are now subjected to since the auto trucks and busses, heavily laden, are constantly using them. Of course these bridges were never meant to bear such weight, yet they are suffered to remain to the detriment of human life possibly. The commission of which I am a member will endeavor to see to it that all of these structures are blocked at least to trucks and busses of over ten or twelve tons."

Assemblyman Platt has in his possession records of accidents which were caused by the breaking down of highway bridges while being crossed by heavy auto trucks.

About eleven thousand highway bridges have been erected since 1898 that date. These bridges represent varied types and sizes. Some are capable of bearing great weight, while others are comparatively frail for the highway traffic of today. There is no law providing for highway bridges of a uniform size and structure and it is the purpose of the investigating commission of the legislature to recommend that such a law be passed by the legislature of 1916.

It is the contention of Assemblyman Platt that the State highways are used by almost as many people as travel by train and for this reason he believes that all of the bridges spanning them should be of sufficient strength to bear the weight of any auto truck or buss built or likely to be built in the future. The committee of which he is vice chairman will organize next week and will start out upon its investigation.

ONE FULTON MAN GETS FINAL PAPERS

The Oswego Times gives the following account of the Saturday's happenings in the Naturalization Court:

"The United States has a king and his name is Wilson II, according to an applicant for citizenship in Justice Hubbs' naturalization term at the Courthouse Saturday. This answer to a question asked by the United States examiner costs the applicant a chance to become a citizen today. His case was adjourned until the last Saturday in January.

"The man was probably confused when he made this answer and will know better next time. But when asked the name of King Wilson's predecessor, the applicant said it was Wilson's father, who was also a king. This was too much, and Justice Hubbs gently told the man that he must study our form of government a little closer.

"Ten of the eleven applicants for citizenship appeared this morning and six were admitted. Most of the men said that they wanted to become citizens to secure more freedom for themselves and to give their children the blessings of free education and of American citizenship. All seemed fairly familiar with the government and laws.

"John Wallace, native of Poland, living in Fulton, failed to appear. This was his fourth hearing. The application was dismissed.

"The following were admitted: Pietro Rodriguez, Oswego; Charles Fred Chubb, Fulton; John Tobolka, Santore Picone, Alfred Percy Wise, Luigi Ricchi, Oswego. The applications of Michael D. Kapenekas, Andrew Kocziski and Jesse Anderson were continued until January. The application of John Musico was dismissed because he keeps a saloon."

MICHAEL ROSS SUES FOR INTEREST IN TUG

M. Ross of Ross & Brother, Oswego and this city, steamfitters, has been granted an injunction by Judge Coville to restrain Ross Coyne from disposing of the tug "Mignon." The injunction requires Mr. Coyne to hold one-half of the earnings of the tug for the plaintiff.

Mr. Ross claims that he entered into a co-partnership with Coyne for the purchase of the boat, which was formerly the tug Mahar or Butler, on the ground that they would divide the profits. At this time the tug was in the East Cove partly sunk. It was agreed, Mr. Ross claimed, that each should put in half the purchase price, $450, Mr. Ross also supplying a boiler, if needed. The tug was raised and brought to this city and Mr. Ross claims that Coyne refused to give him one-half interest, claiming that the tug was worth $1500 and he was going to keep it himself. Fanning & Fanning are attorneys for the plaintiff. Mr. Coyne was tugman for the H. P. Burgard Company on the barge canal contracts.

LITERACY TEST IS REQUIRED

Delegate Would Have Voters Able to Read and Write the English Language

By Frederic T. Cardoze

Albany, June 28.—In spite of the opposition which has arisen, William H. Young of Westchester Co., a delegate-at-large to the Constitutional convention, is confident that his proposed amendment to the State Constitution, requiring a literacy test for voters, will be adopted by the Convention. He bases this belief upon the fact that it is a fact well known that there are many illiterate voters in the State and that the number is likely to grow.

"It is not my intention to disfranchise anyone who now has the right to vote," says Mr. Young, "my proposed amendment is not to go into effect for some years to come, which shows that I have made ample provision for those who desire to reach the educational standard my proposition seeks to establish, not so high after all—I hold that all who vote should be able to read or write the English language."

Mr. Young has slightly modified his proposed amendment, for the original one provided that a voter must both read and write. It was pointed out that a paralytic might be able to read and yet unable to write; that a blind man might succeed in using a pen and yet be deprived of the power to read.

The legislature is given power under the Young proposed amendment, to legislate along such lines as it may see fit to establish the literacy test and to enforce its observance.

Interesting arguments are presented by delegates to the Convention relative to the advantages and disadvantages of the proposition promulgated by Mr. Young. Some take the position that when once naturalised an alien should be allowed to vote irrespective of his educational qualifications. Others take the position that many of the evils of the present election system is due to ignorance on the part of voters.

Mr. Young is firmly convinced that a man who cannot read or write cannot vote intelligently and that a vote cast by such a man is a detriment to the State. Interest in public affairs does not consist merely in voting once a year, he says, but in following the political events of the day in the papers and then intelligently exercising the franchise.

"The illiterate vote has ever been a thorn in the side of present day politics," says Mr. Young. "In an educated community such a condition should not continue to exist."

Mr. Young waves aside as ridiculous the slogan "every man is a king in his own little kingdom here in the United States." He says that if he is intelligent he is, but if ignorant he is not. He points out that the best citizen is the energetic one who strives to better his condition.

"If the people are educated they can meet any chance in the system of voting, no matter how intricate if it is intricate," continues Mr. Young. "I am convinced that the advocates of my proposed amendment will be many in number both in the convention and at the polls if my proposition is adopted. Most men want to better themselves and if the amendment goes through, night schools for adults may result or some other will be taken to instruct in reading and writing those who are now deprived of the benefits of these acquirements.

LIVESTOCK MEN SAID TO BE IN A COMBINE

Watertown.—Charges, of a combination in restraint of trade, claimed to exist between livestock meat buyers of Jefferson and Lewis counties, now under investigation by the attorney general's office, may result in criminal prosecution of dealers if the allegations are substantiated. A substantiation of the charges will end in injunction proceedings on the part of the State. Deputy Attorney General Edwin G. Griffin of this city, who came here from Albany to investigate the affair, said that information already obtained is deemed of sufficient import to warrant a further hearing, which has been set for tomorrow.

This proceeding is brought pursuant to the same law under which the attorney general recently investigated the prices of bread in New York city. That resulted in remedying the condition complained of and a considerable reduction in prices.

Curfew Law Gets Commendation of Father Lindsman

"I am glad to see the Chief of Police enforce the Curfew law," said Rev. Father John Lindsman at the Church of the Immaculate Conception yesterday. "I think it is a very good thing. We have altogether too many children running about the streets at night nowadays, for you will always find parents who care little for the pursuits and welfare of their children. I know of cases where boys and young girls have gone down the road to destruction simply because they were allowed to run around the streets at night."

Father Lindsman took occasion to commend the Carpenters' Union for the stand it has taken against Sunday picnics.

"Of course, it is not always the case," said Father Lindsman, "but too often the Sunday picnic degenerates into something else. When parties of men get together, there is usually drinking, which is bad enough any day, but deplorable on Sunday. Let us keep Sunday holy. We have too much of the Sunday movies, and especially at this season of the year, too many Sunday amusements. People leave the city on Sunday and fail to attend church. Then they go to some beach or other place and there is an accident. Let us keep this day holy."

It was announced that the Children of Mary Sodality will hold a cake-sale Friday afternoon at the Palmer-Hope hardware store in South 1st st. Ladies of the parish are invited to make donations to the sale.

VAN ALSTINE—DRURY

Durlin VanAlstine and Miss Elsie Drury, both of this city, were married at 6.30 o'clock Saturday night at the Baptist church rectory by Rev. M. G. Buck, pastor of the church.

The bride was accompanied by Miss Beatrice Elliott. Both wore traveling suits. Ellwood Beals acted as best man.

After a short trip, Mr. and Mrs. VanAlstine will reside on Gansevoort st., corner of West 2d st.

His Little Souvenirs.

Some few years ago a New York man who was extremely popular, but by no means wealthy, decided to give a dinner in recognition of hospitality showered upon him by his friends. He asked two women he knew to go to a jeweler's and pick out some pretty but not costly little souvenirs for the women guests. The host did not know it, but a detective accompanied the gifts to the house. Each woman found at her place at the table a handsome box. When these were opened there were cries of admiration. One woman drew out a diamond ring, another an emerald brooch, another a diamond crescent, a fourth held up a necklace of pearls, another a diamond tiara, and so on, until the output of the boxes represented about $50,000.

HELD UP A NECKLACE OF PEARLS.

The host had forced a smile when the first box was opened. As each trinket revealed seemed more costly than the last his jaw fell. Perspiration began to trickle down his face, which got so red that the women became alarmed. Then they explained that the jewels were a joke and were borrowed for the occasion.—New York Sun.

A Little Work.

A little work, a little play
To keep us going—and so, good day!

A little warmth, a little light
Of love's bestowing—and so good night!

A little fun, to match the sorrow
Of each day's growing—and so, good morrow!

A little trust that when we die
We reap our sowing—and so, goodby!
—George Du Maurier.

On the Job.

The little southern city had a reform school board made up of a college professor, a minister, two ladies addicted to uplift and an exemplary business man thrown in for balance. But, alas, the reformed school board had inherited many debts from bygone school boards, and one of the most serious liabilities was the negro school. Graft had received a large slice of the building appropriation.

"The best thing that can happen to this building," exclaimed the minister after looking it over, "is for it to burn down. Then we can at least get the insurance."

Some one tugged at his sleeve and a cautious voice whispered, "Say, boss, I's de furnace man—an' I reckon I kin fix dat up fo' you."—New York Post.

Had Seen Something Like It.

Miss Atkins was explaining to her class the difference between a common noun and an abstract noun.

"An example of a common noun is 'cat,'" she said, "for you can see it, while you cannot see an abstract noun. Now, for example, have any of you ever seen 'abundance?'"

This query was received in profound silence. Then a little fellow got up and said, "No, ma'am, I have never seen a bun dance, but I've seen a cake walk."

Forepaugh's First Horse.

Al. Ringling, eldest of the famous brothers of circus ownership, had the Forepaugh-Sells circus on tour, and was in the tall timbered territory. Following his daily custom, he left the lot and went for a walk around town just after the parade.

In the crowd in the public square he noticed a small boy crying and leading a lean, long haired, and bedraggled, overgrown pony. Mr. Ringling found out that he wanted to sell the pony to get enough money to take his folks to the show. So he purchased the animal for $5 and had it taken to the horse tent.

The next day when the side show opened there was a new feature. The pony, a little more bedraggled and with mane long and disheveled, was mounted on a platform surrounded by plush covered ropes caught at the corners with highly polished brass poles.

Over it hung a sign reading, "The First Horse Ever Owned by Adam Forepaugh," and through the wondering crowd that viewed the little horse circulated a boy selling its latest photographs.—Every Week.

Caught a Tartar.

Victor Emmanuel, king of Italy, is a keen fisherman and spent hour after hour with his rod, though the best of luck did not always attend his piscatorial expeditions. Once, after several hours' angling had brought him only three poor fish and he was returning to the castle, he was met by a peasant with a magnificent catch of trout. "You seem to be no great fisherman, to judge by your catch," commented the peasant: "I should say you were about as lucky as the king." "Why?" inquired his majesty. "Oh," replied the peasant, "he thinks a great deal of himself as a sportsman, but he is a poor body, much more fit to be a king than a fisherman."

French Aviator Locates Piece That Shelled Dunkirk, but Dies of Wounds.

The French air man who located the fifteen inch German gun that bombarded Dunkirk succeeded by only the narrowest margin in bringing information in and paid for it with his life.

Flying at a height of 2,200 yards, the biplane went about twelve miles behind the German lines. A storm of shrapnel burst around the machine, and a shell carried away part of the tail and tore a large hole in the lower plane. The observer, however, had time to locate a deep ditch roofed over with concrete, from which peeped the big gun that was sending half ton shells into Dunkirk, miles away.

The aviator was bleeding from a wound in the stomach when he landed, but had the energy to make a comprehensive report. He said, "I am satisfied," and then died.

ENFORCE BRITISH CURFEW.

Authorities Fine Coast Residents For Having Lights In Windows.

The stringency of the precautions now taken in England under the provisions of the defense of the realm act against German raids is illustrated by the prosecution of thirty persons in Swanage, a watering place on the south coast, for displaying lights at prohibited hours. These persons—occupiers of shops, private houses and a hotel—were fined $5 each.

Two of the offenders were retired army officers, Major General J. Ruggles, eighty-eight years old, and Major E. G. West. The former did not escape payment of his fine on account of his age, nor did the latter by reason of his explanation that "every precaution was taken, but a blind in a small window in the nursery was left up about an inch."

WAR DOGS CARRY ROPES TO WOUNDED.

Trained French Animals Won't Give Aid to Fallen Germans.

A remarkable story of the new use to which police dogs (now called war dogs) are put by the French comes from the Vosges.

An experimental squad of twenty dogs, the account says, is stationed near the front line of trenches, whence they are sent singly at night to range over the ground between the French and German lines in search of wounded Frenchmen, whom they have been trained to distinguish.

Each dog carries a small bottle of brandy tied to his body and also has a light attached to his collar. When a wounded man is found the man pulls the string, to which a coil of rope is fastened, ties the rope around his body and is then pulled back to the French trenches. The dogs work quite silently. So far none has been noticed by the enemy. They never assist Germans.

The authorities, it is said, purpose to extend the scheme to the rest of the front as enough dogs are trained—the training takes from six to eight weeks—hoping thus to save thousands of wounded who would otherwise be condemned to a lingering death by the impossibility of reaching them in positions exposed to the enemy's fire.

One rescue was recently made by Marcel Monniot, the Paris international rugby football player and oarsman, who saved a wounded officer who was lying exposed near a German trench. When Monniot announced his intention of bringing him in his comrades told him he would certainly be shot by the Germans, as it was broad daylight and the ground afforded no cover. Monniot replied:

"Don't worry. There's a fellow over there who rowed against me last year in the Frankfort eight. He's a good sport and will tell the others not to shoot."

Lighting a cigarette, he strolled slowly across the thirty meters to the German trench, picked up the officer and started to return. Sure enough the Germans did not fire, but Monniot was mentioned in dispatches and decorated with the Croix de Guerre.

SUBMARINES IN FIRST DUEL.

Austrian Undersea Boat Said to Have Destroyed Italian Submergible.

The battle between the Italian submarine Medusa and an Austrian submarine, in which the Medusa is reported to have been torpedoed and sunk, is said by naval authorities to be the first time in submarine history that one submarine has sunk another, and they rather marvel at the report, because in their opinions there are only two ways in which one submarine could sink another. Under the sea it is impossible for those in one submarine to see a similar vessel, as there is only a glimmer of light on the brightest of days that can penetrate the water and through the glass ports.

It is thought that the Medusa must have been at rest or moving slowly on the surface when the Austrian vessel came to the surface, and the officer in charge was able to get a range and get his boat in position before those on the Medusa were aware of the enemy's presence.

The Medusa was built in 1911 and displaced 241 tons when running on the surface. She could make thirteen nautical miles an hour on the surface and carried a crew of seventeen men.

A Hunter's Bluff

By M. QUAD

Copyright, 1915, by the McClure Newspaper Syndicate.

In the spring of the year 1868 a party of sporting hunters numbering thirty entered the elbow of Texas between New Mexico and the Indian territory.

While the Comanche Indians were bitterly hostile at that time they had been sadly reduced by smallpox and driven to the north, and old frontiersmen stated their belief that the party would not even see one.

I had been invited to make one of the party, but was detained for a couple of days. I then mounted my horse and picked up the trail and followed after, having no fear that I should run any danger in thus riding.

It had come noon of the second [illegible] and I had met with no adventure. [illegible] had baited and watered my horse [illegible] was ready to move on, when I hea[illegible] "Yi, yi, yi!" on my right, and I tu[illegible]ed around to see five Comanches c[illegible]ing out of the timber on their po[illegible] They were just half a mile away [illegible] had evidently discovered me.

When a man rides for his life [illegible] greatest fear is in overdoing the [illegible]ter. I had been five years on [illegible] plains and had a pretty fair stock [illegible] nerve, and I rode to favor my horse.

As the sun began to sink in [illegible] west they sought to shorten the [illegible]tance between us and bring me [illegible] rifle shot, but a word to the mus[illegible] checkmated this.

Had I been able to keep the trail after 3 o'clock I should have counted on finding the party by sundown, as we were getting over the ground at a rapid pace, but at about that hour I came to a rough, stony district, where the passage of the horses had left no trail, and I went ahead at random, planning to keep my distance from the river. It was to be a starlight night, and as soon as dusk came I urged my beast to a faster pace and bore more to the left. When I believed I had gained a quarter of a mile I swerved sharply to the right, rode for forty rods and then dismounted and gave Custer the word to lie down. We were both flat on the earth when the party of pursuers swept by, and the thud, thud, thud of their ponies' feet came very plainly to my ears.

I had a cold bite in my haversack, and after disposing of it stretched out and went to sleep, hoping I had given the red men the slip. I opened my eyes the next morning in astonishment. Seated in a circle about me were the five Comanches, while t[illegible] ponies were feeding with my horse. [illegible] lay on my back with my hands cl[illegible]ed under my head, and such was [illegible] astonishment that I could not m[illegible] Fortunately for me they took this [illegible] nerve. I looked from man to [illegible] and finally said in Comanche:

"Had I known you were Comanc[illegible] I should not have run away. I thou[illegible] you were Chickasaws on stolen ho[illegible] I shall be ready to go as soon [illegible] have eaten. I want to see the [illegible]manche country—the vast plains—[illegible] Canadian river—the mountains ful[illegible] caves and waterfalls—your c[illegible] Thunder Cloud."

One of them asked me if I belonged to the party ahead, and I told him no. He asked me how I dared start out alone for the Comanche country, and I told him that I had trapped the mountain lion and cut out and eaten his liver while still alive, and therefore feared nothing living. I could see that they were badly puzzled, and I increased their wonder by saying, as I finished my breakfast:

"Come. It is time to go. We have a long ride, and I am anxious to see your country."

When we set out, two in front and three behind, and no Indians were ever more puzzled. In later years I met one of them and he told me that their plan was to torture me as soon as I awoke. They were beat out of this by my queer remarks, intended just for that purpose. Several times during the day I expressed my impatience at our slow pace and asked them to get on faster, and when we went into camp I saw that I had them off their guard. After eating I sat apart from them to smoke and meditate and to give them an opportunity to compare notes. Just when the five got their heads toge[illegible] to discuss something they did not w[illegible] me to hear I arose and stepped b[illegible]ward out of the light of the fire, a[illegible] believe I was a hundred feet a[illegible] when they missed me.

I heard them scatter and beat ab[illegible] and while they were hunting for [illegible] I crawled along and got my gun. [illegible] crept away from the circle of the [illegible] and then got the shelter of a tree. [illegible] Indians beat about for a good h[illegible] hour, and then all came in, chagri[illegible] and disgusted. I lifted my gun [illegible] took fair aim at the leader. He w[illegible] down as my rifle cracked and was [illegible]lowed by a second and a third bef[illegible] the surviving two could comprehe[illegible] what was going on. Neither stopp[illegible] for his gun.

I stood guard all night, and wh[illegible] morning came was satisfied that [illegible] two who had escaped had no idea of returning. After a scanty breakfast I caught up the six animals, packed up everything of value, and then I headed to the southeast for the river, and at 3 o'clock rode right into the camp of the party, which had settled down for sport and had given me no thought. Next day a party of us rode over to give the bodies a more careful inspection, and we found on each one a silver government medal, given them during Lincoln's first term, as "good Indians."

Economy Hints

A penny saved is a penny earned.—Benjamin Franklin.

FOR those who possess fine old lace it may be well to suggest a good method for the renovating of the same at home. If so old as to be very tender the lace should be sent to a professional cleaner, who may also be a lace mender, but if in fairly good shape the lace may be immersed in warm suds made from some pure white soap and left to soak for an hour or so.

The lace should then be put through two or more rinsings, the final one to contain a pinch of borax, which gives just the right degree of stability to the lace, and it also has a bleaching propensity. It is a mistake to add bluing, for no matter how white and fresh real laces are they never have the bluish tinge which is always an indication of imitation laces which have been laundered in the usual way.

A delicate cream or even an ivory tone is something to be desired in old laces, and unless one has a particular fondness for dead white it will be found that the cream tone is infinitely more becoming. Therefore use no bluing.

To dry the lace use either a good sized bottle which has been wrapped about with strips of canton flannel or old linen and on this very carefully wind the lace, picking out the delicate edges and if necessary using extremely fine pins or needles here and there to keep the lace from narrowing or curling while it dries.

Sometimes an ironing board will be found to do just as well as the bottle.

KITCHEN SYSTEM.

How to Equip the Kitchen Properly and Eliminate Confusion.

Have you ever gone into a home or visited in one where the household was in a hubbub? Everything seemed quiet until an hour before meal time and then there came a terrible gale that blew from parlor to kitchen.

You probably wondered at first as to the reason for this. But when you visited the kitchen the difficulty explained itself. The kitchen had been neglected—in short, it lacked many of its proper tools. It was not standardized, and this neglect was shown in the utter confusion and disorder.

There are a number of fuels for cooking, such as wood, coal, gas, kerosene and electricity. Each individual housekeeper must decide for herself which fuel she prefers, but she should have two well equipped stoves if she can afford it. If she has but one it certainly should be properly equipped.

Among the articles to be kept near the stove are the teakettle, the salt box, the pepper shaker, the flour dredger, the pot covers, the large cast iron frying pan, the small wrought iron frying pan, matchbox, dripping pan, griddle and stove cloths.

Among the dishes to be kept near the table are pitchers, tea canister, coffeepot, measuring cups, potato masher, biscuit cutter, lemon squeezer, rolling pin and chopping bowl. You may provide yourself with all these things and waste much time when it comes to the actual cooking and baking. If your kitchen is large have two tables. One can be wooden, covered with an oilcloth top, and the other you can fold and unfold and move to any part of the room you like.

In the large kitchen drawer keep a knife box outfit. You will need all these utensils in cooking and you cannot take the time to wash them as you go along. These are three knives, three forks, one dozen aluminium spoons, cake turner, apple corer, vegetable knife and knife sharpener. Then you should have plenty of dishes in which to set food until you are ready to use it. Be sure to have containers for cooked food and supplies, such as a bread box, cake box and jars.

The miscellaneous things are not to be neglected. A clock, scissors, ice pick, garbage can and coffee can all have their places in the kitchen. Many of these utensils appear as nonessentials, but they are all helps.

How to Use the Fillet Crochet Medallions In Pillow Cover.

A most effective finish for a linen pillow, in which you wish to use the insets of fillet crochet medallions, would be a plain edge of fillet crochet mesh, about five blocks wide. The cushion should be finished first, so that the exact measurements could be ascertained, then the edge should be crocheted to fit the cushion and sewed to it where the back and front are joined.

Arrange the medallions, one in the center and one at each corner with an insertion of plain outer motifs with an insertion of plain two mesh fillet crochet.

The plain fillet mesh is seen in the newest crochet trimmed pieces as a finish and is used for scarfs, as well as pillows.

How to Make a Circular Shoulder Cape For Summer.

A charming little wrap for wear on summer evenings is a circular shoulder cape of satin, double faced by preference, made elbow length and bordered with several rows of marabout all the way round. It needs no other decoration or collar.

HOW SATISFACTORILY TO ADD TO YOUR SUPPLY OF TOWELS.

The woman who likes hand work can do no better than to make a supply of guest towels. Each is a small amount of work, and yet when they are grouped in half dozen lots they appear to be an accomplishment of no meanness.

An interesting finish for a guest towel was devised by a woman who had received a gift of some linen handkerchiefs finished with a little colored crocheted edge. She edged towel ends in the same way, using a heavy twisted mercerized floss in various colors for the purpose. A third of an inch from the ends of the towels, made of huckaback, two or three threads were drawn, and the crochet hook, of steel, was worked into this space. A picot edge was crocheted all across the end of the towel, and above it was placed a letter in the same color as the edge in satin stitch or cross stitch. These towels were decidedly effective and are not difficult to make.

Cross stitch designs of all sorts are still used on guest towels. Nothing is prettier than the wreath of blue, pink, green and yellow worked in cross stitch. There are also effective baskets and other conventional figures.

Special little towels are made for babies, and some of these show rabbits or chickens or ducks outlined in a panel at one edge, with the background formed of colored threads run into the huckaback.

ICEBOX PERIL.

How to Keep the Refrigerator Sweet and Clean at All Times.

Mrs. Housewife, in just what condition do you find the refrigerator you are using this season?

Three things must be found in a perfect refrigerating plant, and these much reach further than the ice chest. The plant must be sanitary, efficient and economical.

First, one must see that the box is properly placed, preferably in a light, airy place, and that the drainpipe is properly connected. Many builders do not give this any consideration, and many housewives do not seem to care where the pipe leads or into what it drains, only that it "goes" somewhere and thus does away with the "pan under the icebox." Far better a pan that runs over periodically than a drip pipe connected with a foul drain or sewer that will flood the box with sewer gas and poison its contents.

If the box is wood give it an "air bath" inside and out. Open all doors and dry every part before cleaning, then give it a thorough scrubbing with hot water, soap and borax. Remove shelves and allow box to cool and dry before using.

If the shelves are wood care must be exercised, for in these damp, water soaked shelves lurk bacteria. These invisible foes are difficult to destroy, and it is only by constant vigilance you combat them.

Wooden shelves absorb odors, and once they become impregnated with these it is almost impossible to get rid of them. If one must use wooden shelves give them an air and heat bath at least very week. Remove shelves and set at once in boiling water, keep at boiling point thirty minutes, set in hot oven for an hour and then rub all over with a solution of formaldehyde, wipe dry and put in sun for several hours.

Metal shelves with heavy coating of enamel are safe and easily taken care of.

Keeping all corners and sides, as well as dishes used, perfectly dry and clean; keeping the temperature of the box at a low degree and the air dry, will lessen the danger from bacteria.

See that food is put at once in the refrigerator. If this is left out to be nibbled by the fly that has come from some fever infested spot covered with germs, some of these must necessarily adhere to the damp surface of the meat. The cold in the box is powerless to stop the growth of germs, it can only retard it, and sooner or later the food becomes unfit for use.

Foods cooked or uncooked should not "stand around" the kitchen, but should be put at once in the cooling room of the refrigerator.

Partly decayed food should never be placed in the refrigerator. You do not succeed in "keeping" it, and you fill the food compartment with the bacteria laden air that settles upon the food in the box.

How to Use Some Simple Beauty Remedies Successfully.

Stains on the fingers that will not yield to ordinary methods can be removed by dipping the fingers in peroxide of hydrogen.

A healing ointment for rough skin is made by mixing thoroughly one part of bismuth to three parts of white vaseline.

Select a soap that has little alkali and no coloring in it. The best is also unscented. Such a soap will not harm the most delicate skin.

The constant use on the teeth of powdered charcoal or pumice stone is injurious, as such powders break the enamel, and the teeth will then quickly decay.

The greatest care should be taken of the teeth. Equal parts of castile soap, powdered orris root and precipitated chalk make a good and inexpensive tooth powder.

Gown of Copper Color Silk With Old Metal Belt

Designed by Joseph, New York.

THIS gown of copper color silk is edged at the bottom with a narrow accordion plaited ruffle of the same material. Both the skirt and waist of this gown fall in loose plaits, and the waist is worn with a sand color chiffon blouse. The frock is given a soldierly effect by having rows of metal buttons on the shoulders which give the appearance of epaulets. An old metal belt with a large center ornament is worn with this stunning copper color gown.

ANNA MAY.

The Difference.

"In many ways," observed Mrs. Cityflat, who was visiting a friend in the country, "I find that a horse is much like a man."

"Waal, I dunno," answered Farmer Squash as he applied a match to his corncob pipe. "I have found them quite different in some respects. For instance, a horse is worth more after he's broke."—Judge.

Theory and Practice.

"Dinglebat has original ideas about family government. He says every home should be a little republic where universal toleration prevails and every one has a voice in the government."

"Yes; his family is managed on that plan. But he and Mrs. Dinglebat have the same old wrangle every day as to who shall be president."

Katharine Ridgeway

THIS is Katharine Ridgeway, the great entertainer. She is one of the star attractions to appear at the Chautauqua here. She is said to rank at the very forefront of platform entertainers. Her manner is most pleasing, and every number abounds in thrills. She has established a reputation throughout the United States and has enjoyed a great number of return engagements. She is one of the most popular of readers and makes new friends wherever she goes.

MOLECULES AND HEAT.

Why Hot Water Dissolves Most Substances Quicker Than Cold.

Most housewives know that sugar will dissolve far more quickly in hot water than in cold, but very few know that salt will dissolve in cold water just as quickly as when the water is boiling. In this salt is somewhat of an exception, for most substances dissolve much more easily when water is hot.

The reason for this was a mystery in the middle ages, and it is only since the modern knowledge of molecules that it could be explained.

Heat is nothing more nor less than an increase in the speed with which the molecules are revolving. This is easily seen in molasses. When very cold it will hardly flow at all, when warmed it will pour slowly, but when boiling hot it will pour in a thin sirup almost as liquid as milk. In the same way boiling water is more liquid than cold water.

As dissolving a piece of sugar means that the sugar enters into the tiny spaces between the molecules of the water, the more quickly they are moving the easier it is for the sugar to get it. For, it must be remembered, you can fill a glass to a certain level and after that put in two, three or even four lumps of sugar and the glass will be no fuller than before.

The reason for this is shown by merely thinking of the process on a large scale. Suppose a bowl were filled full of marbles. You could pour a lot of bird shot into it without making the marbles rise any higher in the bowl. The shot would be filling in all the little cracks between the marbles, and if you stirred the marbles slowly the shot would little by little find its place. That is like the sugar in cold water.

But if the marbles were being whirled around rapidly the shot would rapidly fill every place and the bowl would be full of shot. Yet the marbles would not be any higher in the bowl. Then, after all that, you could pour water into the bowl and it would get into the small spaces between the round shot, and still the marbles would not be any higher in the bowl.

It is in this way that substances which have been dissolved find their way into the liquids into which they have been dissolved.—New York American.

A Luxurious Poorhouse.

Morden college, Blackheath, is the most luxuriously equipped almshouse in existence. Admission is strictly limited to merchants who have fallen on evil times. Mere clerks are not eligible, candidates being required to prove that they have been in a large way of business for themselves. Each member of the college draws a yearly allowance of £110 and on admission receives £25 worth of furniture for his two rooms, unless he prefers to bring his own. There are well trained men servants, and to every three members one maid servant is allotted. Members must attend a certain number of chapels and be in by 11 o'clock at night if they come in at all, but there is no other restriction on their liberty, and they can go away for weeks at a time if they choose.—London Chronicle.

Naming a City.

From the Cleveland Plain Dealer we learn that the modern spelling of the name of the city is due to the error of a type manufacturer who sent to the Cleveland Herald, in 1831, a new set of type which was too "fat," as printers say. In other words, too wide to allow the heading of the paper to be spelled in the old and correct way. As the correction of the mistake was a matter of about ten weeks, so slow were the transportation facilities of those days, the printer suggested that the first "a" be left out of the name. It was done, and thus the town received a new name.

"Flowery" Names.

Many of the Chinese names are of a "flowery" character. The Chinese minister at Washington for many years was Wu Ting Fang, a name which signifies "fragrant place." The name of the minister to England at the same time was Lo Feng Lo, meaning "a rich harvest," while the name of the contemporary minister to France, Yu Keng, signified "much gold." The regular name for a little Chinese girl baby is "My thousand ounces of gold."

The Modern Life.

Melpomene had just put her parents to bed.

"It is all a matter of kindness and patience," she explained. "I never struck either of them."

Still, few children display such tact in bringing up their elders.—Philadelphia Ledger.

Big Choice.

"What kind of breakfast food do you prefer?" asked the landlady.

"Well," responded the new boarder, "flannel cakes with maple sirup, country sausages, steak underdone, coffee, rolls and fresh butter."—Philadelphia Ledger.

A Strict Party Man.

"Do you promise to love, honor and cherish this woman?"

"Yes," said the politician. "Whatever the platform is, I subscribe to it."—Louisville Courier-Journal.

Expensive.

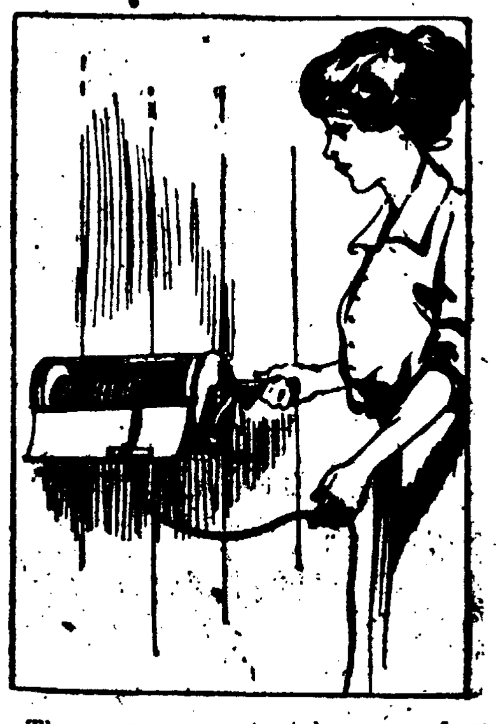
"Jiggs has a very wide acquaintance."

"I know it. I saw him on the street with her the other night."—Buffalo Express.

Nothing can allay the rage of biting envy.—Claudianus.

HINTS FOR THE BUSY HOUSEWIFE

Reel For Keeping Clothesline In Good Order.



The proper way to take care of a clothesline is to house it in such a way that it will be protected from the dust in the air and other causes which are likely to contaminate it. Thrown around in a loosely made hank formed over the hand and elbow, as it is most frequently done, the line becomes soiled and makes its mark on the clothes which are hung upon it to dry. By the new method the line is permanently secured to a spring reel, which is mounted on a cylindrical case, where it is protected from the weather. The usual size is supplied with 100 feet of rope, which may be drawn as desired and passed over the pulleys and hooks. It has also a crank and ratchet by which the rope may be tightened after being arranged for the clothes. The device is secured in place by a couple of hooks, and when it is desired for any purpose to remove it the apparatus may be taken down without the use of tools.

Cottage Pudding.

One-half cupful of sour milk, one level teaspoonful of soda, one cupful of sugar, one egg and flour to make a batter as stiff as ordinary cake batter. One-half cupful of sweet milk and one and one-half teaspoonfuls baking powder may be used instead of the sour milk. Flavor with any spice or vanilla. Bake in a wide, shallow pan and cut into two-inch squares. Have ready a sauce made with one pint of water, four tablespoonfuls of sugar and two level tablespoonfuls of flour rubbed into enough warm butter to make a cream. Have the water boiling, add the sugar and then the flour and butter, stirring rapidly. Flavor with lemon or vanilla. Put the cake squares into cereal dishes or saucers and pour the sauce plentifully around them.

Asparagus Salad.

Cook asparagus, taking large heads, until tender. Drain and chill; then cut in inch pieces. Make in the salad bowl a dressing in which the yolks of two hard boiled eggs are used with a teaspoonful of English mustard, salt, pepper and paprika to taste, a large spoonful of vinegar and three to four spoonfuls of olive oil, beating until thoroughly blended. Toss the asparagus in this and serve on lettuce leaves and on each plate put a little heap of minced hard boiled egg and some minced cucumber pickle.

Candied Cherries.

Make a light sirup, using half a pint of water to each pint of sugar, and let it come to a boil; cook for two minutes. Pour this over the fruit and let it all stand a day and a night. Drain, add to the sirup half the quantity of sugar used the day previous, and boil until it is dissolved. Pour this over the fruit and let it all stand for forty-eight hours. Repeat the process, letting the fruit stand in the sirup four different times. Then drain and pack in layers in boxes between waxed paper.—Country Gentleman.

Cafe Frappe.

Make one quart of very strong black coffee, strain and cool, and to this add a pint of cream stiffly whipped and sweetened. Turn into a freezer, pack in ice and salt and let it stand one and a half hours. Serve in tall glasses with a rosette of whipped cream on top, and with it serve madeleines or lady fingers.

Cocoanut Pie.

Beat together thoroughly two eggs, three tablespoonfuls of sugar and a pinch of salt. Add two cupfuls of sweet milk, pour into a deep pie tin, well lined with good pastry. Sprinkle over the top two tablespoonfuls of grated cocoanut. Bake until the custard is firmly set and serve cold.

Mending Woolen Goods.

When mending wool goods, use threads pulled from the same goods, and darn closely on the wrong side, being careful to follow the weave of the material. When it is finished, press under a damp cloth on the right side. If carefully done the darn will be hard to detect.

Removing Grease Spots.

For removing grease spots on black woolen clothing the following is excellent: Make a solution of borax and warm water and wash the soiled article in it, then rinse in clear water and dry.

D/34

TEXT OF KAISER'S APPEALS TO CZAR

International News Service Makes Public Official Translation of German Blue Book Which Embraces Proposals of Each Belligerant Nation

The International News Service [illegible] today the exact official text of the telegrams exchanged by Emperor William, Czar Nicholas, King George, Prince Henry of Prussia and their Chancellors and Ambassadors on the events of the great European war.

These telegrams are contained in a Blue Book just issued by the German Foreign Office with the object of showing that the Kaiser earnestly strove for peace until the last, but that he was forced to declare war in defense of the German Empire. The telegrams follow:

Kaiser's Early Offer To Promote Peace.

Emperor William to Czar Nicholas.

"July 28, 10:45 p.m.

"It is with the greatest apprehenhension I learn of the impression sion I learn of the impression caused in thy Empire by Austria-Hungary's proceedings against Serbia. The unscrupulous propgaanda that has been perpetuated for years in Serbia has led to the revolting crime to which Archduke rFancis Ferdinand has fallen a victim.

"The very spirit which had prompted the Serbians to murder their own Kind and his consort is still ruling in that country. Thou wilt undoubtedly coincide with me, that it isf or the common interest of both of us, thou as well as myself and also any other [illegible] that we insist, all those [illegible]y responsible for this [illegible]er should suffer their [illegible]erited punishment.

"On the other hand, I perceive well enough how difficult it would be for thee and thy government to oppose the current of public opinion. Remembering the cordial friendship uniting us for a considerable time, with a strong bond. I shall exert my whole influence upon Austria-Hungary to induce her to reach an open and satisfactory agreement with Russia.

"I confidently hope thou wilt support me in my endeavors to eliminate all difficulties which may yet arise.

"They sincere and devoted friend and cousin,

"WILHELM."

Czar Suggests Referenec to Hague.

Czar Nicholas to Emperor William:

"Peterhof Palace,
"July 29, 8:20 p.m.

"Thanks for thy conciliatory and friendly telegram, whereas the official communications made today by thy Ambassador to my Minister were framed in a very different one. Pray explain the difference. It would be more corrett to submit the Austria-Serbian problem to The Hague Conference.

"I rely upon thy wisdom and friendship. NCHOLAS."

Kaiser's Warning on Mobilization.

Emperor William to Czar Nicholas:

"July 30, 1 a.m.

"My Ambassador has been directeo to indicate to thy Government the dangers and grave consequences of a mobilization; I told thee the same in my last telegram. Austria-Hungary has only mobilized against Serbia, at that only a part of her army.

"If Russia should now mobilize against Austria-Hungary, as is actually the case, according to communicationsby thyself and thy Government, then my role as a mediator, which thou hast conferred upon me in so friendly a manner, and which I have accepted upon thy express request, will be jeopardized, if not rendered impossible.

"The whole burden of decision is now resting upon thy shoulders; they have to bear the responsibiltiy for war or peace.

"WILHELM."

Czar Defends Military Preparations.

Czar Nicholas to Emperor William:

"Peterhof, July 30, 1914, 1:20 a.m.

"I thank thee from the bottom of my heart for thy speedy answer. This evening I shall send up Tatishchoff with instructions.

"The military measure now becoming effective have been determined upon already five days ago for reasons of denfense against Austria's preparations. I hope from the bottom of my heart these measures will in no way influence thy position as mediator, so valued by myself.

"We need thy strong pressure upon Austria to bring her to an agreement with ourselves.

"NICHOLAS."

Czar Again Asks Kaiser's Intervention.

Czar Nicholas to Emperor William:

"Peterhof Palce, July 29, 1 p.m.

"I am very glad thou hast returned to Germany. At this so grave a moment I implore thee to help me. An outrageous war has been declated against a weak country, whichh fact has caused a tremendous indignation in Russia which I fully share.

"I know I soon shall be unable to withstand the pressuer exerted upon me, but be forced to take measures which are bound to lead to war. In order to prevent a disaster such as would be a European war, I beg thee in the name of our old friendship to do thy level best to restrain thy ally from going too far.

"NICHOLAS."

(Continued Tomorrow.)

Belts and Sashes.

Belts and sashes may be fashioned from the same material as the gown or suit with which they are worn, or sometimes leather or silk is used for contrast. Leather belts are particularly good on cloth or linen costumes, while the soft ribbon sashes are especially lovely on frilly summer frocks.

One of the greatest needs for summer wear is a ribbon sash or girdle. A girdle and sash of shell pink satin is trimmed with French blue shirred ribbon in a lover's knot design and delicate pink roses. The design is used on the two sash ends and repeated on the front of the girdle.

"Reformer" Would Have Traffic Regulations Observed

(Continued from Page One)

better regulated than it now is. Occasionally, a policeman may be seen at or near a street crossing looking at the traffic, but rarely does he do much more than look on and, as to putting drivers and pedestrians right, that is apparently an afterthought which comes to him after the violator is out of his reach.

A policeman stationed at a street intersection to control and regulate traffic should not stand on the walk at one of the corners [illegible] he should be at the center of the intersection of the street where he can control traffic. When Officer Fox gets on the job he takes to the middle of the roadway and drivers keep on the right side of the street and if they do not he warns them to do so and he sees to it that his warning is heeded. If the other policemen would follow the example of Officer Fox street traffic regulations would be speedily improved and soon would be properly regulated.

Pedestrians should be made to cross the streets at the corner crossings and they should not be permitted to leisurely walk across the street in mid-block.

South First street from Oenida street to Rochester street should be put under strict regulation and so should Oneida and Cayuga streets between Second and First be made safer for traffic. The city authorities should see that street traffic is regulated and our streets made safe to walk or drive upon.

REFORMER.

COUNSEL AND CLIENT.

A Lawyer's Right to Defend a Prisoner He Knows to Be Guilty.

Ought an advocate to defend a prisoner whom he believes to be guilty? Mr. Justice Darling in a case in which a solicitor was the plaintiff made some observations on this familiar problem which ought not to go unrecorded. He protested, says the London Globe, against the notion that a lawyer, whether barrister or solicitor, was under an obligation to cease to conduct a case which he realizes to be bad.

"If an advocate in the course of a trial for murder comes to recognize that his client is guilty is he," asked the learned judge, "to say to the court, 'Hang my client?'" Judges have seldom asked about the ethics of advocacy in open court. It was, however, in a considered judgment in the court of exchequer that Baron Bramwell made his famous contribution to the discussion.

"A man's rights," said the baron, "are to be determined by the court, not by his advocate or counsel. It is for want of remembering this that foolish people object to lawyers that they will advocate a case against their own opinions. A client is entitled to say to his counsel: 'I want your advocacy, not your judgment. I prefer that of the court.'" Mr. Justice Darling, in the jargon of the courts, concurs.

Laymen have usually been readier than lawyers to discuss the ethics of advocacy. "What do you think of supporting a cause you know to be bad?" Everybody knows Dr. Johnson's reply when Boswell asked him this question. "Sir, you do not know it to be good or bad till the judge determines it."

Less generally known is Sydney Smith's contribution to the discussion. "Justice is found experimentally to be most effectually promoted by the opposite efforts of practiced and ingenious men presenting to the selection of an impartial judge the best arguments for the establishment or explanation of truth. It becomes, then, under such an arrangement the decided duty of an advocate to use all the arguments in his power to defend the cause he has adopted and to leave the effects of these arguments to the judgment of others." This was said in an assize sermon the famous wit preached at York in 1824.

DARING BELLE BOYD.

Brilliant and Romantic Career of the Famous War Spy.

Stonewall Jackson's valley campaign was one of the great deeds of history. Not since Napoleon's time have men been so dazzled as they were by that great exploit of his. Yet Stonewall might have gone down the valley in defeat had it not been for a little college girl named Belle Boyd.

The Union general, Shields, was quartered at Miss Boyd's house. He held a council of war there. Miss Boyd bored a hole in the floor of her chamber, which was over Shields' room, and lay there with her ear to it throughout the night. The next morning Stonewall Jackson was in full possession of the plans for a great battle and was able to defeat the Union army.

She kept up her valiant work for the Confederates until the Union officers began to suspect her, and Jackson ordered her to move from her Shenandoah home to Winchester. She had been arrested by the federals and had flirted her way to liberty, for she was a pretty girl despite the libelous photographs of her. In Winchester Jackson conferred upon her a commission as captain in the Confederate army. By this time the whole north had become aware of the services she was rendering the Confederacy, and every officer and private was on the alert to get her. Yet she escaped until 1864, when she was caught on a blockade runner. Her captor lost his heart to her, deserted the navy and married her, and the Prince of Wales, afterward Edward VII., attended the wedding.—New York Times.

Encouragement.

He was very bashful, but she liked him and was willing to encourage him, and she saw her opportunity when he said:

"That's a beautiful dog you have there, Miss Ethel. Is he affectionate?"

"Is he?" she answered archly. "Here, Bruno! Here, good dog! Come and show Chatlie Smith how to kiss me."—Exchange.

Not as She Thought.

Fond Mother—Our Johnny is a great favorite with his teacher. Sympathetic Friend—Is that so? Fond Mother—Yes, indeed. Why, only the other day she told Johnny if there were another boy like him in the class she would feel entitled to demand an increase in salary.—Richmond Times-Dispatch.

Explained.

"This isn't my suit," said Hawkins to the pawnbroker. "This is a half dozen sizes smaller than mine."

"You are mistaken," replied the pawnbroker. "This is your suit, but it has been in soak so long that it has shrunk."

A Dark Hour Friend.

Jimson—Oh, yes; I knew old Simson. He was a good sort. He did a very kind action once for me when the clouds were dark and threatening and the world looked so black. Pimson—What did he do? Jimson—He lent me an umbrella.—Boston Globe.

Safety First at Sea.

In nautical parlance the phrase "The three L's" means "lead, latitude and lookout," these being the chief three things to be considered in keeping a ship from running aground.

RYANS SWEPT FROM THE FIELD

Painter Proved Invincible, Holding the Sack to the Last; Good Batting by the Red Men.

The Fulton Red Men swamped the Ryan Brewing Co. team of Syracuse on the Fair grounds diamond yesterday afternoon, the final score standing 14-5. The Fultonians pounded Taylor's shoots to all corners of the lot, while Johnny Painter had the Indian sign on the visitors and allowed only eight hits which he kept well scattered, besides striking out eleven men. Taylor fanned five and was touched up for seventeen fat bingles, many of which were extra base clouts.

There was nothing to it after the first 3 innings but Fulton. The spectators were regaled with some big league willow work. H. Ingamells, McCullom and several others performing well. McCullom, as usual, fielded his position faultlessly and found Taylor for three hits. Ingamells got four safeties. Bollway and Reed were the star performers for the visitors. A crowd of 250 witnessed the game which afforded plenty of thrills. Big Bill Kilburn, the former Amherst star, umpired and handled the indicator to the satisfaction of all concerned.

Umpire Kilburn.

DETECTIVES GUARDING VILLAGE PAPER MILL

Carthage, June 28.—Ten detectives from a New York detective agency have arrived in this village, and as many more arrived on an early train this morning, to assist in protecting the property of the West End Paper Co., the employes of which concern are now on a strike. The detectives will look after the mill property to see that no damage sd one to the machines, and will also be on the watch for any schemes of the strikers. Arrangements are being made to both feed and quarter the detectives in the mill.

One of the principal activities of the strikers is the boycoting of all merchants who furnish anything to the strikebreakers or the mill owners. It is understood that action along this line has been taken by the union and the strikers are being encouraged in the stand.

It is rumored about the village that the West End Co. will attempt to secure enough men to open the plant next week. When the walk-out occurred the plant was forced to shut down entirely. In the Champion mill, the majority of the men were non-union and only the 16 papermakers and back tenders went on the strike.

CARNEGIE IS UNDER SPECIALIST'S CARE

Andrew Carnegie's physician, a famous specialist, left New York for Bar Harbor last night to see his patient. For three months Mr. Carnegie has been under his care, both in New York, and at Point Acadie, Bar Harbor.

When Mr. Carnegie went to Bar Harbor for the summer it was explained the war prevented him from making his usual trip to Scotland, and he was recuperating from an attack of the grippe needed absolute quiet.

He has been guarded carefully against intrusion. When his opinion was sought on any subject, Mrs. Carnegie met the reporters herself. Mr. Carnegie, she said, was improving daily, but was not to be disturbed. Extensive grounds surround the house, which is the property of Mrs. George Vanderbilt, and Mr. Carnegie is able to get a bit of exercise on fine days at his favorite game—golf.

LYONS HAS LAMB WITH WITH FIVE FEET

Fred Albright, jr., of South Lyons has a freak lamb that is attracting the attention of side show managers from far and near. The lamb is five weeks old and has five legs. The extra leg is normal in shape but grows out of its side from between the ribs and two hoofs upon the one leg. The lamb was given up when it was born, as Mr. Albright did not think he could raise it, but he decided to try it and put the lamb on a bottle, and it is now strong and healthly. Mr. Albright so far has turned down all offers from side show men and is thinking seriously of exhibiting the animal himself at fairs and carnivals this fall.—Lyons Republican.

IN THE WORLD OF SPORT

Jim Coffey, Who Hopes to Meet Jess Willard.

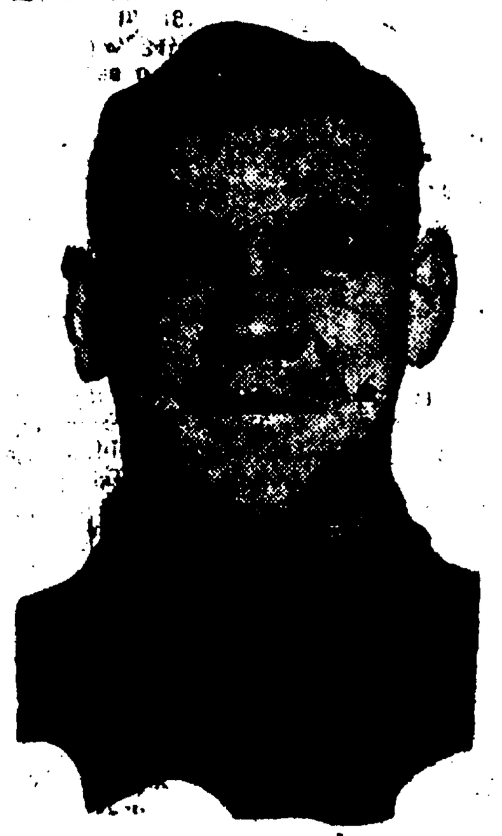

Photo by American Press Association.

Jim Coffey, the Dublin giant, leading contender for heavyweight honors, is undoubtedly the greatest fighter that Ireland has sent to America in recent years. He established his right to meet Jess Willard when he stopped Al Reich in the third round of a hard battle at Madison Square Garden, New York city. In his fight with Reich, Coffey demonstrated that he was able to take punishment a-plenty and come back for more. When Reich landed hard on Coffey's jaw in the second round the Irishman did not lose his head nor did he back up. Instead the blows seemed to rouse him to fury, and he came on in a fashion that soon had Reich in a bad way. With a few more battles under his belt he should prove a formidable antagonist for Champion Willard.

Maisel Fast on the Bases.

Fritz Maisel's recent feat in pilfering second, third and home at Philadelphia calls further attention to this remarkable young bundle of steel springs on the Yankee team.

It may be that Hans Lobert or Ty Cobb is a faint breath swifter at moving from the plate on to first. But, having gained first, there is no longer any argument as to the fleetest pair of feet from first to second or from second to third.

Maisel can get under headway at greater speed than any man in baseball. Fritz wastes no precious time warming into any stride. He starts much after the manner of a rubber ball rebounding from a brick wall. If Maisel can bat .275 this season he'll steal 100 bases.

Cobb batted .420 his best year and stole thirty-five bases. Collins, batting around .350, averages sixty steals. Maisel, batting under .240, stole seventy-four bases his first year with the Yankees.

Exposition Track Fast.

"When the athletes gather for the national track and field championships of the A. A. U., which will be held in San Francisco next August in conjunction with the Panama-Pacific exposition, they will have the pleasure of digging up the cinders on one of the fastest tracks ever constructed," says George Parker, the Olympic club sprinter. "The exposition track is undoubtedly the fastest ever built in the country, the wonderful resiliency and spring coming from the foundation of shavings and straw laid over sand. It is the only track in the country that has been specially built to conform to the new conditions of measuring tracks twelve inches from the curb, instead of eighteen, as used to be the case.

Vardon's Wonderful Score.

The [illegible]erful score of 64 has just been ac[illegible]ished by Harry Vardon, the fa[illegible]nglish professional golfer, on [illegible] course at the South Herts [illegible] Totteridge, England. Vardon [illegible] forty-five years of age, has be[illegible] brilliantly of late, which [illegible] splendidly for his arranged [illegible] the United States. On the occa[illegible] his latest performance, Vardon [illegible]t in 31 and came home in 33. H[illegible] mistake was an overstrong pu[illegible] which resulted in a 4 at the short[illegible] hole on the course. He tried for [illegible], so as to be out in 29.

To [illegible] Swimming Record.

Charle[illegible] Durborow, the long distance swimme[illegible] Philadelphia, plans to break the American fresh water record of 34¼ [illegible] held by himself, on May 30. He [illegible] to swim back and forth b[illegible] Chester and Philadelphia in [illegible] Delaware river until he covers [illegible] miles. The best performances over the same course are: Durborow, 34½ miles in 12 hours 44 minutes, in 1910; George Kistler of Philadelphia, 32½ miles in 11 hours 9 minutes, in 1901, and Sam Richards of Boston, 32½ miles in 13 hours 18 minutes, in 1904.

Thorpe For Jersey City Team.

Jim Thorpe, the world famed Indian athlete, is playing with the Jersey City International team this season. Manager McGraw of the New York Giants secured waivers on the Indian and turned him over to Manager Wiltse of the Jerseys.

A Speaker Who Had the Punch

VETERANS OF 184th IN ANNUAL REUNION ON FAIR GROUNDS

Attendance of Former Years Eclipsed by the Number of Men Who Came Here From Surrounding Cities and Towns

Almost every living member of the 184th Regiment, N. Y. Infantry, was present at the annual reunion of the association today at the Fair Grounds, Oswego Falls. Early this morning the veterans began to register their names, many with faltering hands, and many, alas, so crippled that some one else had to register for them. For the ranks are thinning out and during the past year especially the survivors of that grim war of '61-'65 have had the fact that death is inevitable brought home to them.

Nevertheless, it was with high spirits that the old men gathered at the reunion this morning. Many were the handshakes and reminiscences heard in all quarters.

This year has been the banner year of the association among the past five reunions. Usually seventy-five veterans answer the roll call but today indications before noon pointed to an attendance of more than one hundred. They came from all over the East; the majority, of course, from the Empire State but other states are represented on the register. The long-distance honor today went to Charles H. Wilson of Wasson, Ohio, who made he trip expressly for the reunion. Veterans from Utica, Syracuse, Troy, Albany, Oswego, Fulton, Mexico, Phoenix, Baldwinsville and many [illegible] and towns in the state were present.

The morning was devoted to informal gatherings. The men congregated in small groups and talked of the days gone by and of the battles wherein many of their comrades lay down their lives that this nation might be a union, one and inseparable. The names of the comrades who were present last year but who answered the great Roll Call during the past twelvemonth were mentioned reverently. Major Ferguson, the president of the Association for many years, and Colonel W. G. Robinson of Osego, the ranking officer of the regiment, are among those who are missing this year.

At noon the veterans sat down to a sumptuous lunch prepared by wives and daughters of the members of the association. After dinner the program of the reunion was carried on.

John W. Distin of this city, president of the association called the roll. After this ceremony President Distin made a short address, in the course of which he thanked the members for their attendance, welcomed them to the reunion and expressed a desire that they might all meet again next year. He spoke of the comrades who had departed during the past year with great feeling.

Rev. Mr. M. G. Buck, pastor of the First Baptist church of this city, offered the invocation prayer.

Secretary Robert Simpson, jr., of Volney Center, who has been secretary of the association since its foundation twenty-four years ago, read the minutes of the last meeting.

President Distin then appointed a committee on nominations for officers of the association and while this committee went into executive session, some of the veterans entertained the audience with reminiscences, short stories and recitations. Some of the recitals picturing incidents of great pathos in the conflict, moved many of the audience almost to tears, especially when the names of men loved and respected by all were mentioned.

The address of the day was given by D. P. Morehouse, Esq., of Oswego. Mr. Morehouse is the son of a veteran and has always been greatly interested in the work and progress of the association. His address was in the nature of an eulogy on Major W. D. Ferguson, who died about a month ago in this city. Mr. Morehouse reviewed Major Ferguson's life and his history in the army, and told many stirring tales of bravery as well as kindliness of the former president of the association.

Dr. J. H. Coe, Syracuse, and President Distin read short poems. President Distin recited the poem "Fifty Years Ago," written by a veteran of the Civil war, and the selection was remarkable for its clear and concise description of scenes familiar to every veteran present. Dr. Coe's selection was original.

Rev. Mr. Cootes, pastor of the Baptist church of Baldwinsville, made a short address. Mrs. G. W. A. Forsythe of Oswego also contributed a recitation.

While the results of the election were not procurable at the time of going to press, it is generally understood that both President Distin and Secretary Simpson will be re-elected. An honorary vice-president to take the place of Major Fergus[illegible] also be elected today. The association will adjourn early in [illegible]ing to meet again next year.

"The Growth of a Town is Largely Reflected in the Growth of Its Local Paper."

—LUCIUS WILSON.

YOUR HOME PAPER

Extract From a Speech by Lucius Wilson at The Clark House, March 12, 1915

(Reprinted from the files of The Evening Times)

"Your home paper is a daily ambassador to the farmer who buys, or who ought to buy, in your city. You cannot do without adequate means for publicity. In one city the merchants suddenly became alive to the fact that their home paper was the logical means of beating the mail order house. A committee was delegated to consult the publishers and they spoke in these terms: We want to double the circulation of our home paper. We want the paper into every home in the [illegible] in order to help you to help us we will give you sufficient advertising to enable you to do this. Then, in addition, down came a three months' subscription as coupons were given each $5 worth of goods purchased at the local shops. The plan worked there. You can work out your own way here."

AEROPLANE BURNED DURING BATTLE IN SKY; HEAT FIRES CARTRIDGES

London, June 29.—Attacked by a German biplane, while making a scouting flight over Poelcappelle, a British aviator reached his own lines safely from a height of 4,000 feet while his machine was ablaze from end to end and the heat was so intense it even exploded his machine gun and revolver cartridges. The German craft, a new military type, with double engines and propellers, was damaged in the battle. The British eyewitness thus decribes the fight:—

"The German machine first circled round ours, at the same time shooting a machine gun, but so far as known not inflicting any damage. Then our observer fired fifty rounds in return at a range of less than two hundred yards. It had some effect, for the hostile biplane was seen to waver and after more shots its engines stopped. The enemy airplane then dived to a level of 2,000 feet, where it again flattened its course, flying slowly and erratically.

"Under heavy anti-aircraft fire from below our pilot turned toward our line to complete his reconnaissance. When his machine was hit he decided to make for home, but the petrol tank had been pierced and, as the aeroplane glided downward on a slant, the patrol was set alight and ran blazing down the front of the body of the aeroplane, which travelled on to the accompaniment of a rattle of musketry as the unused rounds of machine gun ammunition exploded in the heat and the pilot's loaded revolver was discharged.

"The pilot, however, did not lose control and the aeroplane proceeded steadily on a downward course. Before it reached the ground a large part of the framework had been destroyed.

"When the machine finally landed back of our lines both officers had been severely burned, and the pilot, climbing out of the blazing wreck, tripped over a wire stay and sprained his ankle. The few serviceable portions of the aeroplane were then collected and removed under the shrapnel of the German guns."

BRIDGE BIDS TO BE AWARDED ON COMBINATION

Low Bidders May Not Secure Job; Board to Determine Responsibility of Firms Submitting Propositions; Wide Variance in the Schedule of Bids

Seven contractors sent in bids for the construction of the Hunter and Waterhouse creek bridges, at the meeting of the Board of Public Works last night. One bidder, the Carver Construction Company, failed to enclose the certified check for $500 which must accompany all bids, but Mr. Carver happened to be present at the meeting and produced the check, whereupon his bid was accepted.

The contract was to be alloteed to the low bidder on both bridges and not on each bridge seperately as seemed to be the impression in some quarters.

Van Buren and Crahan, both of this city, bid $2181.74 for the Hunter bridge and $2548.73 for the Sixth st. bridge and their total was low. Edward Styring, a barge canal engineer, was second in the bidding with an estimate of $2007.80 on the Hunter bridge and $2775.25 on the Sixth st. bridge.

While the Board of Public Works did not announce its decision, as the amounts of the bids must be checked by the city engineer. The Board resereves the right to give the contract to the lowest responsible bidder. All the members of the Board refused to make any statements last night affecting the disposal of the contract. Mr. Styring's time limit of 40 days, with the Hunter bridge promised in 15 days, also enters into the discussion.

The Board, after allowing $500 engineering costs on each structure, asked the Common Council to appropriate the sum of $5783.05, in accordance with the emergency provision of the Brown bill which empowers the council to borrow a sum necessary to safeguard life and property in cases of emergency. Inasmuch as the sum borrowed equals the amount of the Styring bid, plus the engineering fees, he may be awarded the contract. The totals of the Van Buren and Crahan and Styring bids compare as follows:

Van Buren and Crahan, both bridges....$4730.47
Edward Styring, both bridges..........$4783.05

The difference amounts to $52.58, and it is said that Mr. Styring's long experience as compared with the experience of the Van Buren & Crahan Co. will insure prompt and careful work. The Board will announce its decision tonight, and by a resolution offered by Commissioner Garret, all checks except those of the Styring and VanBuren & Crahan companies were ordered returned to the bidders.

The other bids were as follows: Will Church, Hunter bridge, $2533.12, Sixth st., $3226.40; Frank Massaro, $3371.45, $5023.50; Carver Construction Co., $2488.80, $2766.00; Fred [illegible], $2346.13, $2945.32; J. E. Bishop, $2178.56, $3041.96.

PARK CONCERTS DELAYED, CONSIDERED EXTRAVAGANT

If some public spirited citizen or citizens care to invade the Fourth ward some time today or tomorrow and circulate a petition for summer band-concerts, and succeed in getting the majority of the taxpayers of the ward to sign it, thereby proving to the satisfaction of Alderman Foster that the people really want the summer concerts, the city may have the band concerts. On the other hand, if no one circulates this petition—if the taxpayers do not sign—if Alderman Foster is not convinced, the summer will be band concertless—perhaps. "For there are more ways, etc."

When the concert question came before the Common Council last night, Alderman Foster did not hesitate to say he disapproved of it—for the best reason in the world—the cost to the city.

"I am heartily in favor of band concerts," said the Alderman, "But

The Real Need

Frederick E. Lewis of Pennsylvania, who was a representative-at-large in the last Congress, where he was known as a Progressive, has decided to return to the Republican fold. Last fall he was the Progressive candidate for a state office and he accompanied Mr. Roosevelt on his tour of Pennsylvania, but now he is ready yto come back. He returns late, but his welcome should not be less hearty because of delay in taking a step that most of those who went out with him three years ago have already taken. He has reached the sensible conclusion that Progressives "ought to have a higher mission than simply herding off by themselves with a view of making certain the election of Dem ocratic candidates." His understanding of the effect of the Progressive split in 1912 is absolutely accurate and his frankness is to be commended. Recognition of the facts might well have come earlier, but no one will quarrel with him on thisaccount. The essential thing is that the men who followed Mr. Roosevelt, and thus made certain the election of a Democratic president and congress, now see that the place for men of Republican sympathies is in the Republican party.—Rochester Express.

Arming Merchantmen in Self-Defense

The protests of many German writers of authority against the wickedness of merchantmen who resist the attacks of submarines are commonly backed by a vague appeal to usage and the law of nations. It is always taken for granted that, whatever the rights and wrongs of the present system of warfare against commerce, merchant vessels certainly have no right to protect themselves against attack.

This is a questionable doctrine. In the current "Nineteenth Century" Sir George Baker, disposing of the popular English notion that the German submarine commanders are engaged in piracy, touches incidentally on the practice of arming merchant vessels. There is nog round whatever, according to thisl earned exponent of international law, for the belief that such a course is illegal. The mistake, he thinks, probably arose from a misunderstanding of a prohibition in the Declaration of Paris: "Privateering is and remains abolished."

All the belligerents in the present war are doubtless bound by this declaration. It must be remembered, however, that the privateer was a vessel armed for the express purpose of attacking the enemy, but there is a distinction, Sir George Baker holds, between such a vessel and one armed in self-defense to resist attack. "Many persons," he says, "who should know better labor under this mistake. Similarly some persons think that because the powers who took part in the second conference at The Hague in 1907 declared that merchant ships converted into warships must bear the external marks which distinguish the warships of their nationality therefore merchant ships armed for self-defense must do so also. But this is obviously nonsense."

If this could be established to the satisfaction of all, merchant ships of all classes might secure more or less effective protection by adopting a suggestion put forward some months ago by an old sailor, Admiral Penrose Fitzgerald. He proposed that all merchant vessels, down to the most insignificant tramps, be furnished with some sort of armament. Any small guns, guns quite obsolete for warships, mighth be turned to account and only solid shot would be required. To learn how to load, fire, train, elevate and set the sights of any quick-firing gun discarded by the navy in the last twenty years would be a matter of three or four lessons for an intelligent man, and with a sufficiently powerful stern armament and a smart crew Admiral Penrose FitzGerald believed that the merchantman would be a dangerous opponent of the submarine.—N. Y. Tribune.

OUT WITH THE OLD

City planning as understood by some people has to do principally with attractive streets, monuments, shrubbery, etc. This is a mistaken ideas as city planning has its strongest bearing on economy and utility—the practical things concerning a city. The attractiveness follows naturally.

It is as unwise to build a house having in mind only the interior decorations as it is to build a city without having in mind its future needs. It is as unwise to spend the sum set aside for building to build and rebuild the "front walk" while the house drainage has been given part, or no, attention.

To be practical in building cities as in building homes the directing body must be comprehensive. City government in America, as we know, has been known for its lack of a responsible, unified organization. The executive is usually without sufficient powers to appointment and other powers necessary to controlling the acts of his subordinates. The latter often work out plans without the dictates of public opinion. Public works under such a system stand in danger of being projected piecemeal, and the result a series of wrangles, disorder and discouragment with no one the benefactor but the vicious interests.

The newer forms of city government are built upon principles of continuity of policy, or commonsense ideas. Every citizen is able to handle his own civic job, and simplicity is the watchword of a city's successful business management.

DOUBTERS AND DUBS

A small company of small men gathered in a corner grocery store, out in the country, right where the three roads converge into the main highway to the city; and there they discussed and cussed everything. They said Fulton was a fool—that he couldn't do it; and all the time that they were talking without saying anything, the women folks at home were wonderin' why they didn't come back and fodder the cows.

Then the boat started up the Hudson, and the farmers said in chorus: "Well, by heck, he's gone and done it."

Every day some dreamer lays out a way, and then some doer paves it with success. And along the street curb in the city you can see idle persons findin' fault with the way they lay the brick on the road to Big Things.

Doubters and dubs are born faster than dreamers and doers, but these mistakes in manhood only serve as a guide, as an inspiration to the right mind.—Silent Partner.

CHAUTAUQUA IS RATED AS A BUSINESS FORCE

Business—real, true, fundamental business—consists of more than stores and stocks of goods, manufacturing plants, railway systems and wholesale houses. The very foundation of all our business is the men and women in it, and when these men and women have been aroused and inspired and made to appreciate themselves more fully and to recognize their own individual responsibility that community has been bettered.

It is a better community morally and intellectually. It is also better in a business way. These things work together, and it is impossible to better a community intellectually and morally and at the same time not better that community commercially. The man who is made to think more of himself and to appreciate his own individuality more is bound to take better care of himself, to clothe himself better, to build a better house to live in, to ride in a better carriage or automobile and, what is more important, to think more of his family, his children, his neighbors and his community. When he does these things he becomes worth more to himself, his family, his business, his community and his country. There are no exceptions to this rule.

Go into any community where a force of this kind has been working for a number of years and you will find that the whole appearance of that community is changed. We might cite you to town after town that we have watched personally, and we could tell you of some of the splendid developments of these towns. much of which can be traced back directly to its source in this great Chautauqua movement—this moral, this intellectual movement.

But, after all, the point that we have tried to make in this article should be of direct interest to every retail merchant and to men whose business success depends largely upon the community development. — Merchants' Trade Journal, Des Moines, Ia.

OPINIONS OF STATE EDITORS

After Tammany Hall has been abolished, it will be time enough to talk about an appointive judiciary.—Rochester Democrat & Chronicle.

* * *

The people will elect a new administration next year. After their experience in the Wilson regime, will they be foolish enough to continue the Democrats in power?—Amsterdam Recorder.

* * *

Dr. Wiley declares that "many of our trobubles can be traced to the mouth." Democratic campaign voters who recall their pledges of 1912 are unanimous in support of the Doctor's opinion.—Niagara Falls Gazette.

* * *

Mr. Hugo is a hard worker and a most efficient secretary of state. The press of the state is everywhere loud in his praise for the efficiency he has introduced into his office, while at the same time saving the state a large amount of money. We are proud of our secretary of state in Watertown. —Watertown Times.

* * *

The communication from the office of the state education department and printed on another page, explaining the condition of the state's finances and the cause for thousands of school teachers in the state having their salaries withheld, is the strongest refutation coming under our observation of ex-Governor Glynn's contention as to the condition he and his associates left the state treasury. —Madison County Leader.

* * *

Doubtless the Democrats will lay the blame of this advance in living to the European war. The war is a "good enough Morgan" for most of the mistakes of Democratic economists. The Democratic tariff which was to have ushered in the millennium,has thus far failed to make good. —Newburgh Journal.

* * *

In the wise scheme of the prersent Republican State administration, has been illustrated a principle of economy which has been neglected and cast into desuetude for four years.

Hand in hand with the meeting of the State's necessary expenses has gone the curtailment of the unnecessary expenses directly chargeable to the preceding Democratic administration, the cutting down of payrolls where they represented patronage with no value returned to the taxpayers.—Oswego Times.

* * *

Tammany Hall is working tooth and nail to secure a provision in the new constitution which will give the balance of the state little or nothing to say as to the affairs of New York city. "To have the business of New York run by a lot of up-state people who know nothing about the city's problems, is a crime, "say the city folks. Maybe so. But however undesirable that condition, it is a lot better and a lot safer than permitting the politicians of the metropolis to run theh affairs of the balance of the state, which is what they are really aiming at.—Cuba Patriot.

* * *

It is the Fusionists who make Tammany's power continuous.

No way of properly formulating and expressing the will of the people effectively has yet been discovered than by parties. Civic liberty and independence have been achieved through party government. If straight party nominations are made the people will go to the one which furnishes the best government. — Brooklyn Standard-Union.

STRIFE BETWEEN TWO BRANCHES

Department Claims Congress Enacted a Law That Is Impossible of Performance or That Must be Postponed

Washington, D.C., June 29.—There is war between the executive and legislative branches of the Democratic administration.

The Department of Justice has asked the United States Supreme court to declare null and void a statute upon which the Democratic Congress labored for more than six months to enact into law.

This amazing spectacle has its origin in the clause of the tariff act proposing to give a five per cent discount on all duties imposed on merchandise imported in vessels admitted to American registry. Its history is well known. The Court of Customs Appeals recently upheld the law in a divided opinion. From this decision the government has appealed.

In its brief asking the Supreme Court to review the case, the Department of Justice severely criticises Congress for blundering.

"The Congressional purpose of favoring American bottoms is obstructed by treaty provisions to the contrary," declares the argument for a review, "and Congress was fully advised of the purport and existence of these treaties. If no precise or intelligible meaning can be given to the law in question, consistent with the manifest intention ofCongress, it must be held to be void and of no effect.

"If the initial clause and the proviso of the section are irreconcilable," and the government so contends, "the statute is void. Better that the words used should be declared inadequate for the purpose intended than that interpretation should usurp the functions of legislation."

The Department still further emphasizes its belief that the act of Congress was absurd by quoting with approval the Senate committee report which rejected the offending section.

"Your Committee struck out the provision," says the report as quoted by the government brief. "It was in contravention of some nineteen or twenty treaties of the United States. In our opinion it could have led to no good result, as every other country could have retaliated and all the countries in the end would have been just about where they started. We were not only inviting an endless retaliation, but a retaliation where our opponents would have had in nearly every case the better of it, and in many cases infinitely the better."

Furthermore, the Department of Justice contends that Congress enacted a law either "impossible of performance or that must be postponed until treaty relations can be modified so as to permit of it," and urges the court to declare the statute inoperative.

The development of this division between the executive and legislative branches of the Democratic administration merely repeats history. The party is running true to form, and reminds one of the division in the Democratic party during the administration of Grover Cleveland, when he refused to sign the tariff bill which the Democratic Congress had enacted after months of labor.

GAVE CONTRIBUTION TO WEST SIDE PARK

The meeting of the W. C. T. U. at the home of Mrs. Burt, 113 Walradt st., Friday, June 25, was of profit and interest. A guest of the afternoon was Mrs. Spencer of Phoenix who made the opening prayer.

Little Miss Hopkins, who very gracefully gave a temperance recitation entitled "Margueritte's Prayer."

Mrs. L. Perkins, formerly of Ithaca, who gave an account of the Loyal Temperance Legion work in connection with the W. C. T. U. of that place.

The local union here is doing much good work toward the betterment and beautifying of our city, unknown to the general public.

At this meeting of Friday afternoon, they gave twenty-five dollars toward the fountain to be placed in the new West Side park, a beautiful little spot near the trolley tracks.

Their work in flower missions is another good work year after year.

Its many branches of work furnishes a place for every woman who wills to help and new members are joining at every meeting.

IN THE WORLD OF SPORT

Heinie Wagner, Boston Red Sox's Infielder.

Photo by American Press Association.

Heinie Wagner, second baseman this year on the Boston American league team, is considered by his fellows one of the brainiest men in the game. For the past two years Heinie has been a little off in his play, an injury to his arm having impaired his throwing ability. This season he has been playing in his 1912 form, when as shortstop he was an important factor in his club's success in winning the championship of the American league, and also in its victory over the New York Giants for the world's championship of that year. It is said that Heinie has the managerial bug, and his friends believe that before long Heinie will be guiding one of the big league clubs.

Big Fish In the Tieton.

Never before have fishermen found such large salmon in the upper waters of the Yakima river, Washington, and its tributaries as they have the past spring. By some the condition is attributed to the completion of the Celilo locks. A party of fishermen from North Yakima has, so far at least, the biggest fish story to tell. They brought in, after one hour and forty-two minutes' hard work, a Chinook salmon weighing twenty-four pounds and measuring forty and one-quarter inches, which they took in the Tieton river, and with it nine others, the smallest of which weighed nine pounds.

An Eyeglass For Golfers.

An Englishman has recently invented an optical instrument for golfers that can be worn over the eyes like a spectacle and by which the sight of the player is concentrated on the ball, the opaque "blinkers" having a relatively small aperture through which, and through which alone, the wearer can see and thus the distance in front and behind the ball is so small that he must see it definitely, and he is thus compelled to keep his eye on the ball. The blinkers are adjustable so they can be set to suit the eyes of different persons.—Scientific American.

Adjustable Golf Stick.

There has recently been put on the market a golf club the head of which is formed to permit the convenient interchangeability of heads or striking faces. Each of the head pieces has two faces, either of which may be adjusted into playing position. There are several different forms of head, each being interchangeably applied to the head of the club, so that each loose head is the equivalent of two ordinary clubs and by carrying a number of loose heads the necessity of carrying numerous clubs will be avoided.

White a Knockout Fighter.

Of all the fighters now before the public Charlie White is the only one in any class, from heavyweight to bantam, that wins his battles by the knockout route. He is the greatest fighter in this respect since Terry McGovern used to flatten his men out by a swift poke on the jaw.

White wins all his bouts this way. He has put eight out of the last ten opponents to sleep by way of a short left hook to the point of the jaw, and the blow rarely fails to call for the full count.

Ted Meredith Honored.

Ted Meredith has been unanimously elected to succeed Don Lippincott as captain of the University of Pennsylvania track team for the season of 1915-16. By winning both the quarter and half mile races, the former in record time, in the recent intercollegiate games Meredith stamped himself as one of the greatest short middle distance runners of all time.

Zimmerman on the Umpires.

Heine Zimmerman of the Chicago Cubs has this to say about the National league umpires: "They're as honest as the day is long—always call 'em as they see 'em. The only trouble with them is that they always see them wrong."

When Dr. Anna Shaw and Miss Anthony Lectured Together.

Writing of her lectures for suffrage with Susan B. Anthony, Dr. Anna Howard Shaw says in the Metropolitan Magazine:

We traveled and lectured together so constantly that each of us developed an almost uncanny knowledge of the other's mental processes. At any point of either's lecture the other could pick it up and carry it on—a fortunate condition, as it sometimes became necessary to do this. Miss Anthony was subject to contractions of the throat, which for the moment caused a slight strangulation. On such occasions—of which there were several—she would turn to me and indicate her helplessness. Then I would repeat her last sentence, complete her speech and afterward make my own.

The first time this happened we were in Washington, and Aunt Susan stopped in the middle of a word. She could not speak; she merely motioned to me to continue for her and left the stage. At the end of the evening a prominent Washington man who had been in our audience remarked to me confidentially:

"That was a nice little play you and Miss Anthony made tonight—very effective indeed."

For an instant I did not catch his meaning or the implication in his knowing smile.

"Very clever, that strangling bit, and your going on with the speech," he repeated. "It hit the audience hard."

"Surely," I protested, "you don't think it was a deliberate thing—that we planned or rehearsed it?"

He stared at me incredulously.

"Are you going to pretend," he demanded, "that it wasn't a put up job?"

I told him he had paid us a high compliment and that we must really have done very well if we had conveyed that impression, and I finally convinced him that we not only had not rehearsed the episode, but that neither of us had known what the other meant to say. We never wrote out our speeches, but our subject was always suffrage or some ramification of suffrage, and naturally we had thoroughly digested each other's views.

LIFE ON A SUBMARINE.

There Are No Comforts, and Sleep Is Almost Impossible.

Speaking of life on a submarine, one of Uncle Sam's naval officers stationed on one of these under sea terrors says:

"Every minute the men are in the submarine means the risk of pneumonia and tuberculosis. The entire inside of the boat sweats like a pitcher of ice water on a hot day. Before we are on it three hours our clothes are soaked, and they stay that way. We have absolutely no heat, which means that the boat is the temperature of the outside air. Sometimes we nearly freeze. The doctors say that the men on a submarine never sleep; they merely become unconscious for brief intervals. The air, the odors from the machinery, the constant vibration and the intense strain under which you labor make sleep an impossibility.

"In a storm, when we have to seal up, the air gets worse than anything you can imagine. There are eighteen men and two officers in one of our boats, and at any moment any one of the twenty may cause the death of all the rest. There is no room for mistakes. The space in which the men live is fifty feet long and about ten feet wide. I can stand upright if I pick my place, but most of the time my shoulders are bent. There are no bunks; we all spread our mattresses on an iron deck. The dining room consists of four electric hot plates. Nothing in the nature of a spark is allowed below decks, but we can heat up coffee on the hot plates and occasionally fry things. We can't smoke, and the vibration of the engines makes it impossible to read or even play cards, so when we are not working there's nothing for us to do but sit on the floor and look at each other."—Pittsburgh Dispatch.

The Human Brain.

Our brains are seventy year clocks. The angel of life winds them up once for all, then closes the case and gives the key into the hand of the angel of the resurrection. Tick-tack, tick-tack, go the wheels of thought. Our will cannot stop them. They cannot stop themselves. Sleep cannot still them. Madness only makes them go faster. Death alone can break into the case, and, seizing the ever swinging pendulum which we call the heart, silence at last the clicking of the terrible escapement we have carried so long beneath our wrinkled foreheads.—Holmes.

Matter of Precedence.

A discussion once arose in the University of Cambridge whether doctors at law or doctors in medicine should hold precedence. The chancellor asked whether the thief or the hangman preceded at an execution. Being told that the thief usually took the lead, "Well, then," said the chancellor, "let the doctors in law have the precedence and let doctors in medicine be next in rank."—London Standard.

Insulted.

"Why did you strike this man?" asked the court.

"He told me to use my head," pleaded the prisoner.

"Well, that's no crime, is it?"

"But, your honor, I was crushing stone at the time."—Buffalo Express.

Suspicious.

Mrs. Bilton—I think you're the dearest, sweetest man that ever was! Bilton (suspiciously)—Were you at some millinery opening today?—Judge.

GOING TO CHAUTAUQUA

THIS elderly couple are on their way to Chautauqua. Honest old faces, honest old horse, honest old buggy. He seems to be remarking that they didn't have such opportunities when they were young. Things have changed wonderfully and they are having to go some to keep up with the procession.

But, oh, what a good time they are having! They love the music, the speeches, the entertainments and the chance to meet old friends and neighbors.

Young folks, the coming of the Redpath Chautauqua gives you a chance your father didn't have. Don't allow anything to keep you from embracing this opportunity.

HABIT SAVES MAN'S LIFE.

When He Heard "Right" Would Be Suicide Changed Aim.

Los Angeles, Cal.—Habit saved George Lee, forty-five, recently when he plotted against his life. He placed the muzzle of a revolver in his mouth, put his mind in order for the end and was pulling the trigger when he heard some one call "Right!"

It was a word used more frequently than any other in his work in a downtown grocery. There Lee was accustomed to carry packages across a long room. Several persons were similarly occupied, and when they would meet, going in opposite directions, the one with a load on his shoulder would always cry "Right!" The right hand of the other would go up in signal that he would observe the rules of the meeting, for the contents of the boxes were fragile and any interference might cause a loss that would be deducted from their wages.

While his finger was drawing at the trigger, from outside came the clear call "Right!" voiced by chance in the conversation of passersby.

From habit Lee's right hand started to lift in signal, the finger released the trigger, and the shell exploded, but the nervous twitch that had come when he heard the word of warning switched the aim so that the bullet left a harmless wound in his cheek. Persons who heard the shot rushed to the room and took Lee off to the receiving hospital, where his wound was dressed and his spirits revived by the promise that a job would be given him.

SMILES.

If we cannot strew life's path with flowers, wrote Charles Dickens, we can at least strew it with smiles.

Its Many Remarkable Features That Make It Famous.

Strassburg, the capital of Alsace-Lorraine, is remarkable for the great clock of its cathedral.

This clock, which is twenty feet in height, was made by Jean Baptiste Schwilgue in 1842. Besides various astronomical devices indicating true solar time, it has a great planetarum in which the revolutions of the planets are represented, so that the relative positions of each at any time can be seen at a glance.

Then on a platform above are movable figures representing the four ages of man. At the first quarter of an hour a child strikes the bell with a rattle; a youth in the garb of a hunter strikes it with an arrow at the half hour; at the third quarter a warrior strikes it with his sword, and at the fourth quarter an old man strikes it with his crutch. Then a figure of Death appears and strikes the full hour with a fleshless bone.

On the highest platform is a natural sized figure of Christ, and when Death strikes the hour at noon the twelve apostles pass before the feet of their master, bowing as they do so. As Peter passes a large cock perched off on one side flaps his wings, ruffles his neck and gives three times a loud and perfectly natural crow.—London Standard.

LIGHTNING RODS.

Why They End in a Sharp Point and Not in a Knob.

The reason a lightning rod has a sharp point is because a fine point offers no resistance to the discharge of electricity and in order that a cloud may be emptied of it noiselessly and harmlessly.

The degree of resistance is in proportion to the surface of the object. If the rod were surmounted by a knob, for instance, the discharge would be violent. But many a lightning rod has received an electrical discharge when the people in the building below were calmly unconscious of the fact. Noncorrosive metal is used for the point of the rod, as corrosion makes resistance.

The difference between a point and a ball is shown in discharging a battery. The full charge from a large battery would be received quietly on a metal point, while a moderate charge from a small one would explode violently on a ball.

It is said that a full charge may be passed harmlessly through a person's body if received on the point of a needle, whereas the same charge received on a discharger with a ball or knob on the end would mean instant death.—London Telegraph.

Mistakes In Use of Words.

If use can make authority in the employment of words it is high time that certain etymologically misused phrases of our English tongue should be adopted into the family of orthodoxy. The word "necessity" is habitually used as the equivalent of "necessary," instead of being its direct opposite. A man says: "I do not care for the luxuries of life if I have the necessities," when probably he has the "necessities" in clamorous abundance. Quite as common a blunder is the confusion between the words "expect" and "suspect." A man says: "There is a knock at the door. I 'expect' that is the tax collector." He should say, "I have been expecting the tax collector and suspect that is he."—Boston Transcript.

Indians of Ecuador.

Perhaps nowhere on the globe do human beings so much resemble passive beasts of burden as in Ecuador. In fact, the Indians used to be designated in documents as "smaller beasts of burden" to distinguish them from pack animals. Loaded, they clamber up the steep streets as stolid as little gray burros. One sees many an urchin of seven years bearing on his back a load of bricks as heavy as he is. One woman, bent under a burden, carries a child at her breast. Another laden woman plies distaff and spindle as she creeps along. Here is a file of barefoot women bent under loads of earth or bricks escorted by a man with a whip.—Professor Edward Alsworth Ross' "South of Panama."

Holland's Windmills.

A man's wealth may be measured by the stocks and bonds he owns in New York, by the cattle he has in Argentina, by the chain of gold eagles his wife wears in Tehuantepec, and so on. But in some parts of Holland the number of windmills a man owns gives the clew to his financial rating. They fight the water, shelter the family, afford an occupation and provide an income for their owners.

The Military Attache.

The duties of a military attache are to make himself thoroughly acquainted with every change that takes place in military affairs and to report from time to time on the mobilization, armament and equipment of the power to which he is to be accredited.

More to Come.

Pessimist—You haven't had all that you wanted in life, have you? Optimist—No, but I haven't had all that I didn't want, either.—Brooklyn Life.

Thieves Don't Like Ducks.

Ducks are good watchdogs for the poultry yard. No matter what time of night the thief may come, the ducks will quack.—Farm and Fireside.

Defined.

"Pop, what's a cynic? A man who is tired of everybody?"

"Yes, son, and who tires everybody."—Philadelphia Ledger.

LEGAL NOTICES

SEALED PROPOSALS

Addition to Oswego County Tuberculosis Hospital, Orwell, New York.

Sealed proposals will be received at the office of the Board of Managers, Orwell, New York, until 11 a.m., July 7, 1915, for erecting and equipping the proosed addition to the Oswego County Tuberculosis Hospital Building at Orwell, New York, in accordance with plans and specifications, which may be seen at the office of the Architect, L. L. Cope, Theatre Building, Oswego, New York.

Separate proposals for the following will be received:

1. General construction.
2. Plumbing.
3. Steam heating.
4. Electrical wiring.

The Board of Managers reserve the right to reject any and all proposals.

A certified check for five per cent. (5 per cent.) of the total amount of each proposal payable to the order of the Treasurer of Oswego County, New York, must accompany each proposal, the same to be forfeited upon failure to enter into contract within five days after notice of award from the President of the Board of Managers.

Upon deposit with the Architect of a certified check for twenty-five dollars ($25.00) payable to the order of the President of the board, the whole set of plans and specifications, or of a certified check for fifteen dollars ($15.00) payable to the order of the President of the Board, a set of mechanical equipment plans and specifications or a set of general construction plans and specifications will be furnished to prospective bidders when application is made to said architect.

The proceeds of these checks will be returned to the makers upon the return of the plans and specifications, after deducting the actual cost of the blue prints and specifications furnished.

Dated June 16, 1915.

JAMES L. MOORE,
President of the Boarrd,
Pulaski, N. Y.

SUPREME COURT, COUNTY OF OSWEGO.—Edna I. Sharp, Plaintiff, against Lewlla Newton, J. Clifton Larkin, Bridget Gibbons, Henderson & Thompson Company, Defendants.

Pursuant to a judgment of foreclosure and sale made in the above entitled action, at a Special Term of the Supreme Court, held at the Court House, in the City of Syracuse, New York, on the 22d day of May, 1915, and duly entered in the Oswego County Clerk's Office, on the 24th day of May, 1915, I, the undersigned, the referee, duly appointed in and by said judgment for that purpose, will sell at public auction, to the highest bidder, on Saturday, the 10th day of July, 1915, at 10 o'clock in the forenoon, at the front door of the City Hall, No. 67 East First Street, South, in the City of Fulton, County of Oswego, New York, the real estate directel by said judgment to be sold, and therein described as follows: ALL THAT TRACT OR PARCEL OF LAND, situate in the City of Fulton, New York, known and describel as three rods off from the East end of Lot No. 1 of Block No. 512 of the original Village of Fulton.

Dated May 24, 1915.

BARRYMORE'S SUCCESS TO BE REPEATED TONIGHT

"The Fortune Hunter," with the same cast, accessories and scenery, including Manager Darleigh's rain storm, will be the presentation tonight at the pretty Quirk theater.

The play, it will be remembered by most of the city's population, had a most successful presentation last week at the hands of the Fulton high school students. At that time so very many persons were disappointed at their failure to secure seats in the theater, and having expressed a desire to witness a "repeat order," the decision was made at an early date to gratify the demand and Saturday's Evening Times contained the announcement.

LETTERS FILED

A petition for letters of administration was filed yesterday in Surrogate Miller's Court on the estate of James Doyle of this city, by John and Bernard Doyle, sons. The estate is valued at $200 personal and $5000 real.

A petition for letters of probate on the estate of Charles O. Remington, late of this city, was filed by the widow, Mrs. Hattie Morgan Townsend, to whom the entire estate was bequeathed. The value is not given.

MAYOR AND MRS. FOX LEAVE ON TRIP WEST

Mayor F. E. Fox, accompanied by Mrs. Fox will leave for an extended tour of the middle and far West Wednesday morning, to be gone five weeks. They will go from this city to Chicago and there meet a tourist train which will make a special exposition tour. From Chicago the train will go into Kansas City, thence to the Grand Canyon of Arizona and then through on the Santa Fe to Los Angeles. From Los Angeles the Mayor and Mrs. Fox will go to San Diego and then back to San Francisco where they will visit the expositian and spend some time with friends. The party will leave for Salt Lake city after the 'Frisco trip and spend a week there. A five day tour into Yellowstone Park will follow.

From Yellowstone the route will traverse Colorado, into Denver and Colorado Springs and then to Rochester, Minn., where the Mayor will visit the famous hospital of the Mayo brothers. From Rochester the return trip will be made into Fulton via Chicago.

A. P. BRADT HEADS CENSORSHIP BOARD

Mayor Fox announced today the appointment of A. P. Bradt, publisher of The Observer, as chairman of the Fulton Board of Moving Picture Censors, to succeed Irving Galusha, resigned.

The Mayor further announced that Miss Anna Revels and William La Londe will comprise the rest of the board.

The appointments will take effect at once.

JUDGE IMPOSED FINES

Two gentleemen who still showed the effects of continual gazing into the bottom of a glass, were arraigned before Judge Wilson in City Court this morning charged with public intoxication. They were fined $5 each forthwith, but having no legal tender concealed about their respective persons, were allowed two weeks grace wherein to collect the money to pay the fines. They gave the names of Charles Taster and George Weight.

Feminine Logic.

Mrs. A.—Yes, Belle is married at last, and do you know her husband is the very man who proposed to her ten years ago. Mr. A.—She ought to have married him then. Mrs. A.—Oh, my dear, he was really quite too old for her at that time.—Boston Transcript.

Her First Pie.

Mrs. McBride—Oh, John, don't cut your pie with a knife. McBride—Huh! You ought to be thankful that I don't call for a can opener.—Boston Transcript.

Hope awakens courage. He who can implant courage in the human soul is its best physician.

Black's Cookies tickle the palates of old and young, because they are right. adv.

BELIEVED EXTRAVAGANT

(Continued from Page One)

not this summer. Here we have mills shut down and people out of work. No money. The Chamber of Commerce is willing to put up $300 if we put up the same amount. Well—let's take that $600 and build some sidewalks or hire some teams to cart gravel around the streets. Or we can use it to feed those poor people on the West Side and in all parts of the city who have not enough to eat."

President Stevenson of the Board of Public Works asked for a moment to explain the remark about sidewalks. According to Mr. Stevenson the Board has paid for more sidewalks this year than in many years previous. He touched upon the root of Mr. Foster's objection when he mentioned Buffalo st. and the reason there were no sidewalks there. Mr. Stevenson said two property owners along the street had repeatedly refused to release the city from damage when the curb line was laid and the walks put in.

This was the reason no walks had been laid along the street. Mr. Stevenson said other men along the street had tried more than once to obtain the release from the property owners who refused to fall in line, but without success. Mr. Foster on the other hand, claims that such was not the case, and that lack of funds alone must have been the reason for the delay in the improvement.

"Those of us who have automobiles can put our families in them and motor away to some other town or to some resort when we want to hear music," said Mr. Stevenson. "But there are some poor people here who can't leave this city, and it is for them that we want the summer concerts."

"Meals before music," said Mr. Foster.

"Well, down in Oswego the poor fund has been larger this year than in any three years previous," said Mr. Stevenson, "but they are going to have the summer band concerts just the same. Probably they hope to make the people forget they're hungry when the music starts."

L. F. Cornell, a delegate of the Chamber of Commerce committee, explained to the council the plans for the summer concert. One concert is to be held in every ward except the Fifth ward, and the concerts for that ward will be held in the park. Some concerts will be held at the Elks' home. One will be held in Wets Side park at the end of the lower bridge. One will probably be held at the Erie st. school. The location of the concert in the Second ward has not been decided.

Morin Bros. will donate the lumber for a bandstand which will be made in sections so that it can be moved. The Fulton Light, Heat & Power Company has donated the extra current and wiring for the concerts, as well as all lights.

A committee from the Chamber will hold an ice cream festival at each concert and the money realized will be used to defray incidental expenses.

However, no action was taken. Mr. Foster repeated his former arguments, said if the town were booming he would be only too glad to vote for the concerts, but as things are, he does not think it the proper thing.

Mayor Fox proposed an adjournment to Thursday night on the question and at that time the final action will be taken.

TRIESTE RIVAL OF NAPLES IN BEAUTY

City Long Desired by Italians Nestles in Lovely Bay.

HAS HISTORICAL SETTING.

Almost Every Inch of Coast Now Once Again the Object of War Has Been Marked in Interest in Real Life, Romance and Song For Many Generations.

As seen from the sea Trieste, the recapture of which was one of the reasons why Italy entered the war, is wonderfully reminiscent of Naples. From the semicircular bay the city rises in terraces of much harmony, beauty and picturesque composition.

Conspicuous on the left shore, the waters of the bay lapping its foundations, is the Villa Miramar, which recalls one of the many tragic chapters in the history of the Hapsburgs, for it was built by Maximilian, brother of the aged emperor of Austria, the man who became emperor of Mexico, where he was put to death. His widow, the Empress Carlotta, her mind shattered, still survives in an asylum in Belgium.

From an architectural and linguistic point of view the city of Trieste is entirely Italian, all streets and shop signs being in that language. It is not until one goes into the outlying districts that signs in other tongues are found, and then they are not German, but Croatian.

Shows Vivid Contrast.

After turning the end of the conspicuous cape of the peninsula of Istria, Pola, Austria's chief naval station, comes into view. Here at once is found a vivid contrast between past and present, for, while the harbor is full of warships, there rises in full view in the center of the town a great Roman amphitheater, which Italy has ordered her aviators and gunners to spare.

It is in Pola that your eye begins to be struck with the violent coloring of the native costumes of Dalmatia, one of the few parts of continental Europe in which these are faithfully adhered to. They are brilliant in the extreme, blues, reds, yellows and green predominating, while in their entirety they have a character which is thoroughly distinctive.

Zara, the luxurious Zadera of the ancient Romans, is the real beginning of Dalmatia and here again there are remains of the architectural glories of the days when Christianity was still in its infancy.

There was also a flourishing Byzantine Zara and a medieval one, most of which remains today, save along the sea front, where modern structures have taken the place of the massive walls that frowned down upon the crusaders as they passed along in their ships fashioned in the famous arsenal of Venice, the same upon which some Austrian bombs fell a few days ago. It is this same historic shipyard, by the way, which forms the setting for Caruso's great aria "Cielo e Mare" in "La Gioconda."

Is Link With Past.

Another of Zara's links with the Venice of a long gone day is found in the sculptured lion of St. Mark, which still watches from over the Porta Marina and has been watching, the Italians say, for the coming of the descendants of those who proudly placed him there.

Within the shelter of the hundreds of islands which dot the coast you sail then to Zebenico, on the shores of such a land locked harbor that it is naturally defended from attack. Here, too, the winged lion is to be seen above the city's chief portal. Zebenico is likewise a naval station and has already figured in the news.

Spalato, the next port of call, although of no military or strategic importance, is nevertheless one of the most interesting towns of Europe, for almost its entire population dwells within the walls of a palace built in the fourth century by the Emperor Diocletian to serve him as a place of luxurious retirement when he had grown weary of empire. He dwelt in this superb structure only nine years, faithful to his old gods to the end, although over in the Rome which he had left Constántine had been converted to Christianity and that religion had become the official one of the Roman world.

From here southward to Trau is to be found the most smiling and beautiful stretch of the Dalmatian coast, while further along there is seen Ragusa, a walled promontory which reminds you of details of a Maxfield Parrish picture; it seems so much of the imagination and so little of reality. For centuries this place was a well administered republic until wiped out by a stroke of Napoleon's pen.

Belgium.

Belgium takes its name from the tribe of the Belgae, who inhabited a part of ancient Gaul.

The Matter of Length and How to Tie a Bowknot That Will Hold.

A shoestring is "six-fourths" long when one does not specify the length required. "Six-fourths of what?" is likely to be the question put by the layman.

When a man buys a new pair of shoes the strings in them are just long enough. When he buys the next pair of shoestrings they are too long. The strings that come with the shoes are four-fourths long, the next pair will be six-fourths unless the purchaser asks for and can get four-fourths.

These lengths have to do with men's high shoes. There is not the same trouble in the case of low shoes.

Some shoestrings will wear a long time, but they will become brown. Others will not wear so long, but will retain their original blackness. The strong strings that turn brown are of linen or very strong cotton. The others are of mixed fibers that hold their color.

Many people prefer the less durable shoestring, not only because it holds its color, but because being of a less hard fiber it stays tied better than the other. A few of the millions of shoestring wearers know how to tie a bowknot that won't come untied. The method can be explained without a diagram.

Instead of tucking the bow once over before drawing the knot tight, tuck it twice over. A fiddle string used for a shoestring would not come untied if the knot were made in that way. This knot can be untied in the same way as the other, by pulling at the ends.—Philadelphia Record.

TRAPPED A SEAGULL.

Queer Contest of Strength Between a Bird and a Bivalve.

At first thought it is hard to imagine how a clam could endanger the life of a bird. That such a strange circumstance is not impossible is shown by the following incident:

A settler on one of the small islands near Vancouver was returning to his home by way of a beach of hard sand when he beheld an unusually large flock of seagulls gathered in a compact mass and beating with beaks and wings upon the sand. Evidently they were attacking some enemy. Overhead dozens of gulls wheeled and screamed in evident excitement.

The settler was almost upon the fighting birds before they burst apart and flew, chattering, toward the clouds. One, however, lay flapping upon the ground, and the man saw that a monster clam held the gull's beak in a viselike grip. It was too heavy for the bird to fly away with, and for all the gull's frantic struggles it could not loosen the clam's tenacious grip.

With his hunting knife the man pried open the shells and freed the captive. The gull was exhausted from its desperate efforts and at first could only stagger like a drunken sailor toward the water. Finally, however, it flew away and soon returned in the van of a cloud of gulls come to inspect the enemy that had trapped one of their tribe.—St. Andrews Beacon.

Lip Reading Detectives.

In a Vienna school for the deaf and dumb, where lip reading is taught, a course has been established for the special purpose of teaching the art to detectives. The possibilities of lip reading, says the author of the account in the Volta Review, have been exaggerated. But they are sufficient to cause authorities to think the instruction of detectives worth while. When a detective becomes proficient, he is able to learn something of the conversation between people who are visible, but out of earshot. The article says that at from 50 to 100 feet it is possible for an expert to get the general run of a conversation. Some reading has been done with glasses at a distance of 125 feet. Instruction and practice in the art must be very thorough if the detective is to use it to real advantage in his work.

HOME RULE MEN COMING

Mayor Fox Announces the Proposed Visit of Mayor Cox and Secretary Capes, Former Visitors.

Mayor Cox of Middletown, president ofthe Mayors' Conference of New York State and Secretary Capes of the conference will reach this city Tuesday, July 13, at noon, on their tour of the state in the interests of the Home Rule provision.

Mayor Cox read a letter from Secretary Capes at the meeting of the Common Council last night and, after announcing that he would be out of the city at the time, he appointed Alderman Distin as a committee to represent the city at the conference ro meeting which Mayor Cox and Secretary Capes will address here.

In his letter Secretary Capes suggested that a general invitation to the business men and taxpayers of the town, be issued, and that the Chamber of Commerce be asked to give the conference publicity. The visitors will explain the provisions of the Home Rule amendment which will change the constitution of the State so that the cities may have greater freedom in governing themselves. The tourists expect to visit three to five cities a day, according to the itinerary, and will only remain in this city a few hours. The tour will start from Albany July 6.

A delegation of local ministers waited upon Alderman Distin last week and requested him to ask the permission of the council for Sunday afternoon open-air religious services in the city park. The council referred the request to the Park commissioners.

Alderman Quirk introduced a resolution that George Snow of Emory st. be appointed dog catcher, with an allowance of 25 per cent. of the money received from the sale of license tags. The resolution was passed. Snow will take up his new duties at once.

The council passed a resolution appropriating the sum of $5783.05 to cover the cost of constructing the Hunter tail-race bridge and the bridge over Water-House creek on 6th st. The amount covers the contractor's bid and the engineering cost.

In order that Alderman Foster's ward may be canvassed on the band concert question, the council will hold another meeting Thursday night, at which time the question of the appropriation will be decided.

Considerate.

"When you didn't have the fare did the conductor put you off and make you walk?"

"Oh, no. He merely put me off. I could have sat on the curb so far as he cared."—Philadelphia Ledger.

CHAMBER WANTS TO USE UNEXPENDED BALANCE TO GET CANAL FILLED

A sub-committee of the Division of City Planning has been in correspondence for some time with the State Engineer, Superintendent of Public Works, and State Department of Health. E. R. Redhead, chairman of the committee has been calling attention to the necessity for filling in that portion of the old canal north of Lock No. 10.

The State appropriation for filling in the bed of the old canal from the Oneida st. bridge to the point just north of Lock No. 10, was $59,000. Of this something over $38,000 has been used for present contract. The balance of approximately $20,000 is not expended, and the committee has been endeavoring to get the State Departments to use this $20,000 to fill in this portion of the canal between the present fill and the old bridge near the Fulton, Light, Heat & Power Co.

The committee has felt that the presence of stagnant water in the old canal bed was a menace to the health of persons in the northern section of the city. The State Department of Health has agreed to send an inspector to examine the canal bed and determine what, if anything, can be done by the State. The Chamber's Committe has taken photographs showing the unsanitary condition of the canal, and these photographs have been filed with the State Health Department at Albany. On his return from New York last week the Secretary of the Chamber stopped off at Albany to take this matter up with the State Health Department. It is very likely that within a few days an inspector will be in town.

BRIDGE CONTRACT TO BE AWARDED IN JULY

The plans for the Minetto bridge will be completed by July 1 and bids will be asked for immediately. The advertisment must appear for twenty-one days so that the contract will be awarded the latter part of the month.

County Attorney Gallagher says that the county's share of the cost, about $23,000, will not be appropriated until the regular session in November. The board is not allowed to appropriate lump sums for any improvement but must have the exact figures. The delay in appropriation will not affect the work in any way.—Oswego Times.

SYRACUSE DELEGATION VISITED CITY TODAY

A delegation of Syracuse business men were in town this morning engaged in spreading the trade extension movement among the local merchants. Most of the visitors represent wholesalers and manufacturers.

The delegation enjoyed dinner at the Clark House and will leave for Oswego this afternoon.

M. E. CONFERENCE AND CONVENTION

Ontario District Holds Summer Session; Sermon and Address by Local Minister and Layman.

The Ontario District Conference and Stewards' Convention meets in Vernon today and tomorrow, the first session to be held this evening at 7.30 o'clock. Rev. J. W. Barrett of the First M. E. church, this city will preach tonight.

The program for the remaining sessions follows:

Wednesday morning, 9:00 o'clock—Devotions and Exposition—Rev. Chas. Lloyd, Lee Center, N. Y.; business session; "Conference on the Rural Church, conducted by Rev. Matthew Hamilton Dowd, Westmoreland, N.Y. Address—"The Care and Beautifying of Church Property," E. R. Redhead, Fulton, N. Y. Sermon—Rev. W. K. Brown, Taberg, N. Y.

Wednesday afternoon, 1:30 o'clock: Devotions—Rev. O. M. Kelley, Cleveland N. Y. Address—"The Inside Workings of the General Missionary Committee," Rev. Samuel J. Greenfield, D.D. Open Missionary Conference—Conducted by the District Missionary Secretary, Rev. Frederick Maunder, Camden, N. Y. Address—"A Practical View of the Atonement," Rev. Jabez Stallwood, Oswego, N.Y.

FOOD SALE SATURDAY

The announcemnet is made that the children of Mary Sodality will hold a food sale in the Palmer-Hope hardware store Saturday instead of on Friday as published previously.

You can get Black's baked products at the right hour for meals. They are at your grocer's, fresh every afternoon. adv.

CARRYING OF LIGHTS TO BE ENFORCED

Chief of Police Dyer announced last night that steps would be taken by the Police Department immediately toenforce the law requiring lights on vehicles after nightfall. The automobilists are the worst offenders, according to the Chief, and it has been remarked several times by pedestrians that one out every ten cars along 1st st. at night is inadequately lighted. Some cars carry no lights at all, as late as midnight.

The law requires two lights on automobiles, distinguishable 300 feet distant. If a car is left standing by the side of the street, the lights must be left lighted. One hour after sundown this law takes effect, which about this season of the year, means 8 o'clock in the evening.

Many auto owners, who have electrically-lighted cars with storage batteries, are inclined to shut off the current when the car is left standing on the street at night, and the owners of these cars will be ordered to comply with the law.

Representatives of Foreign Govt's Were Here Today

Following a conference between Edward Quirk, who acted as agent for the Hunter Company, Thomas Hunter and Count DeClemonde, T. Bulerb Oirris, and M. Peopignas, representatives of a foreign government, in thisc ity today at the Citizens' club and at the office of Mr. Quirk, it is authentically reported that the Hunter company has signed a contract for the production of a supply of rifles for a foreign government.

The three strangers registered at the Clark House today and were joined immediately by Mr. Hunter and Mr. Quirk. The party lunched at the Citizens' club and then inspected the local plant, following which they went to Mr. Quirk's office where a Times reporter interview Mr. Quirk this afternoon at 3.20 o'clock.

"Has the contract been signed?" was asked.

"Not yet," said Mr. Quirk, "but it's likely to be."

Mr. Quirk refused to say which government the three men represented but although Count DeClemonde is evidently French and speaks with a French accent, the other gentleman are said to be Greeks. Mr. Quirk refused to make known the amount of the contract. At this point Count DeClemonde appeared and Mr. Quirk cut the itnerview short.

In spite of Mr. Quirks' statement, it is reported that the contract was signed at 3 o'clock. Mr. Hunter would ont talk for publication. It is said the contract is for several good-sized orders for rifles.

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By Frederic T. Cardoze

Albany, June 29.—Since the first day of the present Constitutional convention, proposed amendment to the Constitution have poured in upon practically every section of the document through and by which the State is guided, yet it is safe to say that already the majority of the propositions have been forgotten, save perhaps, by the introducers.

Proposed changes which are radical appear to have but scant chance of being adopted by the delegates since little is heard of the many proposals aimed to bring about reform. The proposed amendment which would require three fourths of a jury to bring in a verdict, seems to have been discarded, likewise the proposition which would permit the governor to introduce bills in the legislature. There does not appear to be many advocates of the proposal to raise the salaries of senators and assembly men, although there are several different propositions covering this subject before the delegates. The fact that the people defeated at the polls the referendum providing for an increase in the salaries of legislators a few years ago has left the impression that even if adopted by the convention this proposal would again be repudiated by the voters.

Nothing definite concerning the attitude of the delegates regarding the proposal which proides for an increase of the salary of the governor from $10,000 to $15,000. This proposal was presented early in the session of the convention. Likewise apparently forgotten, is the proposed amendment which would make it possible for the holding of Constitutional conventions every five years.

Upon the surface at least, comparatively little enthusiasm has been aroused by the proposition which seeks to create a State board of pardons with jurisdiction over all application for clemency. This proposal has been advocated, as is known, by several former governors who have felt that the executive should be relieved from the responsibility of examining into the court records attending the trials and convictions of men condemned to death or to long terms of imprisonment.

Another proposition which indications point out as defunct, is that which would compel churches, religious enterprises and schools to pay taxes. While not denying the fact that an enormous additional revenue could be obtained by annuling the tax exemption provisions surround such institutions, many of the delegates have taken the position that the proposal should not prevail.

The anti-prize fight proposition is also likely to be retained in committee, or if released, defeated. While the majority of the delegates are for reform, they do not appear to regard the abolition of fistic encounters as savoring of uplift to any degree.

The battle is one with reference to the proposed amendmentw hich would raise the censorship upon moving picture films. Some of the delegates have taken the position that the films should be as free from censorship as are newspapers; others, however, are of the opinion that great care should be taken in the exploitation of moving pictures, holding that they are more lasting in their effect than any printed article. It is conceded that the proposition has scarce more than a bare chance of being approved by the convention.

Biennial sessions of the legislature is another proposed amendment to the Constitution which does not appear to receive much support. There are other propositions, too numerous to mention in a single article for which the knell apparently has been rung.

BETHROTHAL CARDS TELL NEWS OF ENGAGEMENT

The following article from the San Francisco Chronicle of June 23, is of interest to almost the entire city of Fulton:

"Cards have been sent out by Miss Edith Brownlee, announcing her engagement to Gilmour Van Wagenen of San Francisco. Miss Brownlee is a daughter of Mr. and Mrs. J. P. Brownlee of Arch street, and, with her parents, formerly resided across the bay, where she has a wide circle of friends. Van Wagenen belongs to a well-known New York family, but for the past few years has been in San Francisco, where he is connected with the executive office of the Southern Pacific.

"No date has been set for the wedding further than that it will be an event of the early fall. Van Wagenen will take his bride to San Francisco to reside."

RICHARDS-KELLOGG

Intimate friends and associates of Charles F. Kellogg of Watertown and Miss Alma K. Richards of Parish, a daughter of W. C. Richards were given a complete surprise yesterday when it became known that the young people has slipped away Sunday morning to become Mr. and Mrs. Kellogg. The Rev. P. O. Wilcox, pastor of the First M. E. church of Watertown performed the ceremony.

Mr. Kellogg is a traveling salesman and Mrs. Kellogg has taught in the Watertown schools for several years. Immediately after the wedding Mr. and Mrs. Kellogg motored to Syracuse and from their started for Cleveland. They will spend their honeymoon in eight different states. Upon returning they will live in Watertown.

CLARK-BOYCE

James L. Boyce and Miss Blanche Clark, both of this city, were married at the parsonage of the State St. M. E. church, by the pastor, Rev. H. D. Holmes, last Saturday evening. Mr. and Mrs. Simpkins of this city attended the couple who left immediately on a honeymoon to last two weeks.

Community Notes

Mrs. Myrtle Horton is seriously ill at the home of her mother, Mrs. Locke, in Oneida st.

NOTABLES IN THE LIMELIGHT

W. G. Sharp, American Ambassador to France.

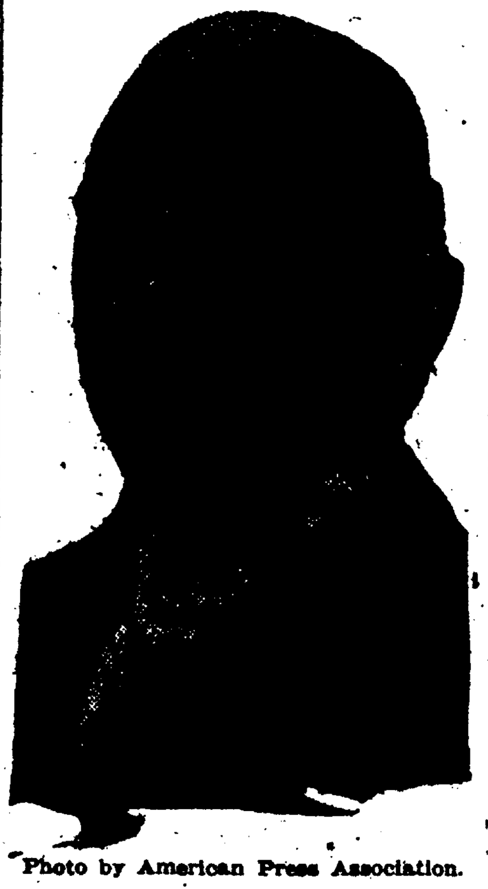

Photo by American Press Association.

Although he has been in Paris since last September, William G. Sharp, American ambassador to France, has only recently secured a house in which to reside. The lease to the residence so long occupied by American ambassadors was given up before Mr. Sharp's arrival in Paris.

As representative of Uncle Sam to one of the belligerent nations Ambassador Sharp is called upon to solve many difficult and important problems. Matters of international import are constantly arising that call for the most careful consideration and adjustment.

When Mr. Sharp was appointed on June 12 to succeed Myron T. Herrick as ambassador to France, he was ranking member of the house committee on foreign affairs and had a general knowledge of international political affairs.

Like his predecessor, Ambassador Sharp is a native of Ohio. He was born in 1859 and has lived in Elyria since boyhood. He was educated in the common schools and was graduated in law from the University of Michigan in 1881. He practiced law for a time and was made prosecuting attorney for his county. Soon the future ambassador gave up the practice of law and engaged in the manufacture of pig iron and chemicals, in which business he acquired a large fortune. He was elected to membership in three congresses and was a delegate to various Democratic national conventions.

A Missouri Statesman.

As chairman of the senate committee on foreign relations Senator William Joel Stone of Missouri holds a position of great power in these troublous times of almost worldwide war. Senator Stone is himself a pacificist and believes with most other citizens of the United States that there is little to be gained for a nation in subjecting international questions to the arbitrament of arms. In a recent statement anent the sinking of the Lusitania Senator Stone said, "We all want to avoid doing anything that would bring the

© by Harris & Ewing.

WILLIAM J. STONE.

country even to the verge of war." Last October on the floor of the senate Senator Stone said:

"When we are performing our duty to maintain neutrality nations involved in war should be careful to recognize our rights and keep faith with us. If they fail to do so then the responsibility of violating a neutral power should rest upon their heads. The government of the United States will maintain its position, but it is well for other nations to know that we will not look with indifference upon the violation of the rights and privileges of our own government or our own citizens."

Senator Stone was born in Kentucky in 1848, was educated in Missouri university and admitted to the bar in 1869. He served three terms in the lower house of congress and for four years was governor of Missouri. He was elected to the United States senate in 1903 and has since been regularly returned.

Chant of Loyalty

Firm as the furnace heat
Rivets the bars of steel,
Thus to thy destiny,
  Flag, are we plighted;
One are the hearts that beat,
One is the throb we feel,
One in our loyalty,
  Stand we united.

Many a folk have brought
Sinew and brawn to thee;
Many an ancient wrong
  Well hast thou righted;
Here in the land we sought,
Stanchly, from sea to sea,
Here, where our hearts belong,
  Stand we united.

Ask us to pay the price,
All that we have to give,
Nothing shall be denied,
  All be requited;
Ready for sacrifice,
Ready for thee to live,
Over the country wide,
  Stand we united.

One under palm and pine,
One in the prairie sun,
One on the rock bound shore,
  Liberty sighted;
All that we have is thine,
Thine, who hast made us one,
True to thee evermore,
  Stand we united.

—Elias Lieberman.

ALL CHINA SWELLS ITS PATRIOTIC FUND.

From Banker to Blind Beggar, All Respond to Republic's Appeal.

By JEREMIAH W. JENKS.

Banker, beggar, bandit, captain of commerce, compradore and coolie in China all seem to be vying with one another to swell the Chinese patriotic fund.

A blind beggar wrote to the directors of the Bank of China, trustees of the fund: "I am very poor, I am ashamed how little I can give, yet my heart is grieved for China, and all I have I give." He sent $4.62. The contribution probably represented the savings of many weary years. The bankers took his money because to refuse it would have wounded his pride.

A widow lady wrote a characteristic Chinese lady's letter. It explained how she had talked over the situation with her maids, and how they agreed with her that their lives were spent largely in pursuit of petty things, and it was better to discard ornaments of beauty if it would help them to decorate their hearts and minds. So all their trinkets and best dresses they turned into cash to add to China's patriotic fund.

A bandit wrote to a merchant whom he had robbed in other years: "I am a robber; that I know. My character is deplorable, but I am none the less a patriot, and my heart is touched by our country's situation. Into your care I entrust the proceeds of late raids, charging you to place these at the disposal of the patriotic fund." The merchant forwarded this curious donation without deducting compensation for his previous personal loss.

In Kwangtung province, sacred in the records of Chinese freedom, lives an aged man of noble family.

"I have called before me my sons and their sons and their wives and their concubines and their little ones," he wrote, "and we have counted the property which we have inherited from forty-two generations of good fortune as children of China. Now we have decided that, as this property has come to us because China, our country, has been good to us, it is our duty to return it to China to help her maintain her dignity and her strength." Accompanying this letter were several title deeds and mortgages, six bags of money and much jewelry.

CHURCHES TO AID BABIES.

New York State Makes June 20 "Child Welfare Sunday."

As one feature of the 1915 educational campaign for the saving of babies' lives the New York state department of health has designated Sunday, June 20, as "child welfare day." Pastors of all denominations have been asked to co-operate and are receiving from the department data upon which to base sermons.

The educational campaign of the division of child hygiene of the department of health last year brought about a decrease in the infant death rate from 137 to 112 for every thousand births.

BOY IS WORTH TWO GIRLS.

So Jury Decides In Assessing Damages For Deaths of Twins.

In awarding $3,000 to Edward G. Benson of North Arlington, N. J., in his suit against a milk company a jury in Hudson county court, Jersey City, decided that the value of a boy is just twice as great as the value of a girl.

Benson sued the milk company for $100,000 damages for the deaths of his three-month-old twins, a boy and a girl. He said there were ptomaines in milk he bought.

After deliberating two hours the jury agreed the boy's life was worth $2,000 and the girl's $1,000.

QUEEN TO MAKE GAS MASKS.

Margherita of Italy Sets 2,000 Noblewomen to Work.

The Dowager Queen Margherita of Italy has become chairman of a committee of more than 2,000 women of the nobility who have undertaken the task of supplying the army with masks to ward off asphyxiation gases.

The mask has been invented by Senator Ciamician, professor of chemistry at Bologna university.

BIT OF REALISM ON THE STAGE

Actress Scores a Hit In a Moment of Forgetfulness.

Estelle Pettepas was her name, and the stage was her profession. Her salient points were: Petite, brunette, a whirlpool of raven hair, a snapping black eye, an oval face, the lines of her figure, though diminutive, perfect curves. Her great part was as Jaqueline in "A Child of Nature," wherein she personated one of nature's most impulsive children by acting naturally. In other words, she portrayed herself.

Her first success was in private theatricals, and when it was suggested that she would make a success on the stage her mother declared that she could never be brought to play the necessary love parts, and as to being kissed she would spurn the actor who should undertake any such "business." When, therefore, she appeared in a play that required a kiss and submitted gracefully, indeed with a response required by the play, her mother acknowledged herself to have been mistaken and the manager was relieved.

When "A Child of Nature" was written, especially for Estelle, it became manifest from the first that the play would have a great run and that a new star had appeared on the dramatic horizon. But it was found difficult to find an actor who could fill the part of Edgar Ahrens, who loved Jaqueline, a wayward country girl. Several were tried and all failed. In the climax of the play Edgar pleads his cause with Jaqueline and at a moment of the girl's indecision carries his point with a kiss.

Finally a young actor, Eugene Hovey, was chosen to undertake the part. He had seen something of Estelle, and it was suspected that an attachment was springing up between them. The manager hoped that this might influence both the girl and the man to a more successful rendition of their parts. He was right. At the very opening it was evident that even more than had been hoped for would come to pass.

The first and second acts resulted in curtain calls. The audience's interest seemed to be increasing and the manager was delighted. Then came the third act, which bade fair to be a perfect triumph. While Edgar and Jaqueline were waiting in the wings to go on together the manager, who was keeping an eye on them, overheard this bit of dialogue not in their parts:

Edgar—How happy I would be if this were all real!

Jaqueline (pouting)—Isn't it?

Edgar—Why, no; it's nothing more than playing for our salaries, but—

The call came at that moment and both went on the stage. Edgar was pleading against the aspersions of the villain of the play, and Jaqueline was replying to his protestations of innocence with short, sharp, cutting remarks. Jaqueline threw herself upon a rustic bench, and Edgar, standing dejectedly before her, went on with his pleading, an impassioned though covert declaration that he had got into trouble through standing between her and harm and this standing between her and harm came from his love for her. Proceeding with his plea, he knelt before her and took her hand. Then, becoming more bold, he took her face between his hands and slowly drew it down toward his own. There were a few passionate words spoken in a stage whisper, and quickly drawing her face closer he imprinted the kiss.

There was a smack, but not that of meeting lips. It was the sound of the little lady's palm coming sharply against her lover's ears.

The audience, astonished, sat mute for a moment, then burst into a guffaw. The actor-lover arose, his face crimson with mortification, and stood wondering what to do. The actress looked as if she had awakened from a dream and was as much abashed as her lover. The manager as soon as he could collect his faculties gave an order to lower the curtains.

Then came a terrific burst of applause, with calls for Estelle.

The manager was striding across the stage angrily to vent his spleen on the author of the occurrence, but before reaching her whispered soothingly:

"You've made a hit, though in a way unexpected. Come with me."

But Estelle demurred. She was in no mood to face an audience before whom she considered that she had made herself ridiculous. The audience kept on stamping and calling, the manager continued to plead. Occasionally the storm would lull, but only to be revived.

Then the manager desisted for awhile. Indeed, he was quite willing that the audience should be kept waiting, well knowing that when gratified the enthusiasm would be all the greater. Then he went to her again and failed again. Turning away, he sought Hovey and begged him to make an immediate real declaration of love to the real Estelle. Hovey sought her and while the storm beyond the curtain was raging told her that he was dying for her and begged her to take pity on him. The manager, who was watching, interrupted their transports by another attempt to induce Estelle to satisfy the audience. Hovey joined in the request. Estelle yielded and was led before the curtain by the man she had slapped.

Of course the dramatic critics present wrote the matter up, and it added greatly to the actress' popularity. The play had a great run, but the manager introduced into Hovey's contract a large forfeit in case he brought about or permitted any more love spats during the performance.

SOLDIERS TELL OF WAR HORRORS SEEN IN FIERCE TRENCH BATTLES

British "Tommies" Describe Terrific Struggle to Force Advance In Gallipoli.

German Officer Details His Exciting Experiences In Blowing Up Mines Under French.

PRIVATE letters from British soldiers disclose far more than do the dispatches the secrets of the tough job the allies are meeting in their land attack at the Dardanelles. Some of the men seem to think they have been asked to do an impossible task, as they are outnumbered twenty to one. Their experiences have been terrible, according to all accounts from the scene of fighting.

Lance Corporal T. Coupland of the Scottish borderers, whose left ankle was shattered, writes of the landing on the Gallipoli peninsula at the mouth of the Dardanelles.

"Chaps who were at Mons and other places in France say this was the hottest job. When the Turks got the range of our boats we jumped out and waded ashore up to our necks. Chaps who got wounded were drowned like rats. There was no chance to save them. But we have paved the way for others to get the glory.

Awful During Night.

"We fought from church time Sunday morning till dark Monday night without a stop. It was rapid fire all the time. The enemy was dressed in the same clothes as ourselves. Plenty of our chaps were shot by our own men, and, of course, it was the same on the other side. We refused to give an inch till we were nearly surrounded. Then we retired a little way back, just about 4:30 on Monday. The odds were too much against us. They were only twenty yards from us, still we hung on.

"It was awful during the night listening to the moaning. Some poor chaps kept shouting, "Goodby, mother!" "Goodby, sister and brother!" while others were saying goodby to their sweethearts. It made you feel queer. It was quite the opposite with others in the firing line. You would hear them asking for matches and fags, and some kept shouting, 'When does the first house go in?' and 'There will be somebody hurt in a minute!'

"The Germans and Turks got to within ten yards of us. You could hear the German officers calling out, 'Will you English surrender?' Back would go our answer and a shot as well (that officer lives to shout no more), 'No surrender-' and 'No retire!'

"The captain of our company was shot through the knees. The poor fellow could not get back under cover and we could not help him. Rather than be left to the mercy of the Turks he took his revolver and blew his own brains out. A lot of them did the same. But we had to grin and bear it. We were all thankful that we got out of that hell. It was hell with heaps of coal piled on. We went in 1,000 strong on the Sunday. On the Tuesday we were 492."

Australians In Charge.

Lance Sergeant Harold Paton of the Australians writes thus of his experiences at the Dardanelles:

"In landing the water was so deep I went right under, rifle, too, and it took me all my time to reach the shore. The Turks were waiting for us on the beach, and how we managed to land beats me to know. We lost heavily, but the Australians were not to be beaten.

"When our gunboats opened fire you ought to have heard the cheers our fellows gave. I will never forget it. I was so thankful to hear them it brought tears to my eyes.

"When we got to the top of the ridge we got orders to fix bayonets, and then the order came along that we had to take a trench a hundred yards ahead. We made the assault in fine style, and the Turks absolutely lost their morale and only a few of them remained in the trenches to be slaughtered. We occupied the trench for some time, but were forced to retire, as we were fighting against heavy odds."

Sergeant Paton's right hand was shattered.

Private William McKenzie of the Seaforth highlanders sends to his mother in Maxwelltown, the little Scottish burgh made famous by the song "Annie Laurie," some extracts from his diary. In telling of the fighting at Gallipoli he says, "We got it hot." One page of the diary reads:

"On the road met wounded coming in thick as ever. Some are fearful sights. One chap injured by a hand grenade had half his side blown away and his arm hanging by a thread. Just behind came two men carrying another on a rifle between them. The whole foot had gone.

His Opinion of War.

"Farther down still another fellow was lying with both legs blown off. He was still alive and conscious. At a crossroad five men (two already wounded) got a big shell almost among them. Arms and legs were all over the road when we got to the place. People call this war. Those who are experiencing it name it hell."

Another page runs:

"Awakened by shouts of 'Gas!' and a great running about. Got up hurriedly. Looking over parapet saw a great yellow-green cloud rolling toward us. Was seized with violent coughing and found difficulty in breathing. Got worse every minute. Grabbed my rifle and simply waited for I know not what.

"My breath was coming in short, quick gasps; cough racked the whole body. By this time was in a 'blue funk,' and when I saw our fellows on the right and the Lancashire fusiliers on the left retiring I waited for no order, but went too. Too far gone to run, I walked to the reserve trench and got there three parts unconscious.

"An officer of the Fourth hussars put me in his dugout and attended to me himself. I thought the whole line was retiring, but it turned out our chaps waited in the reserve trench till the fumes had almost passed, then got back to the firing trench and were just in time to repulse the attack.

"When daylight came we all got a stiff tot of rum, but that did us little good. We lay all day more dead than alive, and had the Germans attacked we could not have done much to stop them."

Private Hugh Crossan of the Eleventh Hussars had a narrow escape in Flanders. The heat of a shell that killed eight of his comrades scalded his face. He was only about two yards away when it burst. It knocked him out for five hours, but left him with only a badly blistered face.

A soldier writes from the trenches in Flanders:

It Is Not Glorious.

"This is the most distressing thing about the kind of warfare we are up against here. Never a sight of the enemy, and then some fine day when a man is almost tempted to forget that he is on the front—when he is reading or playing cards or writing home that he is in the best of health—bang! and he is carried off or mangled by a cannon fired many kilometers away. It is not glorious."

A little later the call to action came to this same soldier, and he wrote of it:

"I should like to give you some impressions of the state of mind before going into action, but unfortunately there is no time. Let me only say that I am heartily glad.

"It is good to get away from the constant danger here of dying thus ingloriously. If it must be, let it come in the heat of action. Why flinch? It is by far the noblest form in which death can come. It is in a sense almost a privilege to be allowed to meet it in this way. If one goes it is in company with the elite of the world. Ave atque vale! If I write again it will no doubt be to tell you of wonderful things."

An extraordinarily human story is told of Private Pointer of the London Rifles. The concussion of a shell exploding near him deprived him of the power of speech, smell and taste. Long afterward in hospital he woke and found the power of speech had returned. He spent the whole night talking to himself lest the ability to do so should go. He feared to lose it if he did not keep it up, yet he did not want to call out to the night sister for fear she might faint. So he waited until the male attendant came around with his morning cup of tea, then remarked, "Shove it down there, old chap." For this he was showered with the tea by the agitated attendant.

Likes Narrow Beds.

A correspondent came upon a number of soldiers sleeping in a London autobus at the front in France.

"Pretty narrow beds, aren't they?" he asked.

"I've slept on 'em for seven months now," replied the sergeant, "and I wouldn't feel comfortable in a real bed that was wide enough to roll round in."

The driver of one of the busses told of shifting a company which had been in the trenches fourteen days and lost only two men. On the way to the rear for their rest they slept in a barn. A shell hit the barn, killed twenty and wounded twenty others.

Warsaw is under martial law, sentries are posted every few yards, and one of the regulations is that pedestrians shall not walk with their hands in their pockets. Pockets might contain bombs for blowing up bridges. But the joke loving youth of Warsaw does not take the regulation seriously. One of their daily sports is to annoy the faithful guards by slipping forbidden hands into forbidden pockets and then scampering away when the word of reproval is shouted out.

An officer of German pioneers wrote this description of an attack on the trenches:

"Spirits and tension rise. Company leader lights sixth cigarette. Sergeant drops hundredth foolish remark.

"Bayonets fixed. Another test of the rifle trigger; another tightening of the helmet. Feverish tension. All wait for the green light.

"The green light rises, and then the most terrible minute I have ever lived. All batteries, from the heaviest down to the lightest field gun, fire at one crack a volley into the French positions. Heavy mine mortars are fired, and then twenty mines, deep down in the earth, deep under the French trenches, are blown up.

"Our own trenches rock. You feel as though you were on ship deck in a storm. Lieutenant X., who sat in the farthest mine shaft as the fuse lighter, was hurled like a rubber ball by the air pressure. The infantry stationed in the connecting trench tipped over backward like a row of tin soldiers. It was terribly comical, yet no one could have laughed.

Infantry Make Dash.

"The infantry in the main trench, which was ready for assault, dashed over the trench walls in an instant and hurled itself against the crater where the enemy's trench had been.

"I am shouting an order into the open mine shaft when a blue bundle flies over my head. I look around in terror, and it is a Frenchman, who has jumped over to us, crying, 'Pardon!' He wants to surrender. "Oh, malheur! Oh, malheur!" is all he can say. I could not help but make fun of him. All laughed.

"The air is full of powder fumes. One man who is working drops his spade and runs out of the shaft as fast as he can. At the entrance he falls unconscious. There is no water. I pour some cold coffee over his head.

"Artillery fire gets heavier. The French batteries shoot like wild men.

"Three more men faint. But we must work at any cost.

"Artillery lets up a bit. We can move about the trenches. Everything has been shot to pieces. Some places it looks terrible.

"Hell breaks loose. Fire multiplied by ten. A terrible crash. A shell lands in the shaft just where I lie. Splinters all about. Wonder I am unhurt. The men seem to have lost their reason. I must jerk myself together or I shall lose mine.

"The men at the entrance of the shaft don't want to move. Those where the shell struck beg, curse, plead to be let out or they will suffocate. Luckily the fire slackens a bit. Finally I succeed in getting the men out.

"Command to the pioneers to fall back. Thank God we are unhurt!"

SMUGGLING WINS DUTCH SYMPATHY

Government of Holland to Take More Drastic Measures.

GETS NO PUBLIC SUPPORT.

Traffic With Germany Grows—Custom Men Find Tobacco That Won't Smoke Because It's Rubber and Suspect Cargo of Oranges Contained Far More Copper Than Juice.

Smuggling from Holland to Germany has assumed such proportions that the Dutch government is considering drastic efforts to stop it, says a dispatch from The Hague. The administration finds little support from the people.

Germany pays gold for everything she can buy in Holland. The Dutch business man does not see why he should not exchange his wares for gold. He always has sold to Germany and he continues to do so as much as he can despite his government.

The British government keeps close tabs on the border situation. Every shipment of forbidden goods that goes into Germany is usually brought to the attention of the Dutch government by England. This annoys Holland considerably. The Dutch government regards its land trade with Germany as wholly an internal question and one which must be left to its solution without outside suggestion.

Holland will continue to export to Germany all home produced articles which she can spare. Nearly 1,000 tons of meat go into Germany every day. Great quantities of cheese go directly to the commissary of the German army. Nearly two-thirds of Holland's vegetable crop continues to be exported to Germany.

Traders Are Warned.

The Dutch government has sounded a warning to Dutch users of the Netherlands oversea trust, which on behalf of the government promises that any goods consigned to it will not be reexported. The administration has appealed to the patriotism of the Dutch shippers to help maintain this institution which enables the government to maintain a low standard of prices for all commodities. Several violations have placed the government in an exceedingly embarrassing position.

Three plots to smuggle rubber into Germany were discovered. It is suspected that several consignments slipped through.

In one case a great consignment of tobacco reached Amsterdam for transshipment to Germany. A custom inspector found that the "tobacco" was 90 per cent refined rubber. The rubber was seized and the consignee fined $10,000.

To prevent border smuggling Holland has established a cordon of soldiers on the German and Belgian frontiers. There are armed guards at every road. Every train that goes into Germany is searched. But it has been quite impossible for the Dutch to patrol the peat bog districts along the eastern frontier, and wagonload after wagonload of contraband enters Germany through there.

The sinking of the Dutch steamer Medea by a German submarine has caused Dutch sentiment nearly to reach the fighting point. The captain said that his papers, which had been taken by the submarine commander, showed the cargo to include nothing but oranges. But now it is believed that the oranges covered a cargo of copper intended for Germany.

Traffic Is Heavy.

The Amsterdam Telegraf gives weekly reports of Dutch trade with Germany. A recent report states that the traffic was exceptionally heavy. The imports from Germany consist largely of goods bound for the United States; also coal, briquettes, coke, cement, pig iron and toys. The exports to Germany include large consignments of potatoes, meat, butter, cheese, eggs, tropical fruits, tapioca, arrowroot, bananas, tobacco, raw cotton, old iron and an eastern root, the flour of which can be utilized in the preparation of bread.

Many railroad cars ostensibly conveying freight from Holland to Denmark and from Denmark to Holland, it is said, are mysteriously uncoupled and disappear while passing over the intervening German territory. Dutch fishing boats, too, are often seized by German patrol boats and taken into German ports, whence they are released after their cargoes have been unloaded, to the evident satisfaction of the shippers.

The gains to be secured are so tempting that the efforts of the authorities have been rendered futile. A reward of 10 per cent of the value of goods seized in illegal transit is now offered to the soldiers, and this has had such effect on their watchfulness that captures of smugglers are becoming more frequent.

BUTCHERS TO MAKE SHELLS.

Men at Smithfield Market, London, to Give Four Hours a Day.

Between 3,000 and 4,000 men who are employed at the Smithfield meat market in London have volunteered to work four hours a day in turning out munitions of war.

The market is to be closed two hours earlier than at present on four days of the week so as to help the men bear the increase in their working hours.

The Dreamers

Lo, man has harnessed heaven's highway,
Rising on titanic wings;
He'll force the skies to float his navies,
Men of science now are kings!

O'er stormy waves he rose triumphant,
Science sees beyond what seems,
Thousands reading radio flashes
All because a dreamer dreams.

Man's a born investigator,
Probing into things sublime,
Bursting nature's bonded secrets,
Peering into unborn time.

Man, through man, has found dominion,
Genius weaves the magic spell,
And rising up to test the vision,
Finds the unseen is the real.

The art called "Peace" will be discovered,
Courage on the masthead gleams,
Some explorer'll plow this ocean,
Yet the unknown dreamer dreams.

—Jos. S. Barnwell.

WAR SCRAP HEAP AIDS GERMANS IN STRUGGLE.

Every Battlefield Combed For Anything That Can Be Used Again.

One of the most interesting spots at any "hauptpunkte," or headquarters of the German army, is the "war booty scrap yard." Describing one on the eastern front, a correspondent says:

"There I saw captured Russian rifles stacked like cordwood. Twenty thousand of them were delivered in a day. Wagons were bringing in the pickings of the battlefields. Every scrap of metal and leather was carefully picked up.

"The picking up, unloading and some of the sorting was done by prisoners, who get 10 cents a day for it. There were two huge stacks of wicker baskets which had contained shells, a goodly sized pile of German helmets, not a few with bullet holes and blood-soaked.

"There was an immense pile of leather belts, cartridge cases and boots. It is often a case of dying with your boots on in the war, but it does not always follow that you are buried with your boots on.

"In one corner of the yard was a pyramid of empty steel shrapnel cases and nearby hundreds of brass shells out of which they were shot, ranging from the small mountain batteries to the big twenty-ones, which look like umbrella holders.

"A space of ground thirty feet long and fifteen wide was covered a foot deep with unassorted cartridges, single and in clips, gathered from the fields. In taking Jaroslaw the Germans bagged 8,000,000 Russian cartridges.

"These scraps are regarded jealously and so carefully guarded by sentries that it is impossible even to slip one in the pocket for a souvenir. Even the pieces of exploded shells are gathered. All of which is part of the system of the German army."

CHOSE JAIL TO SAVE WIFE.

To Shield Her Name He Took Life Term—Is Now Pardoned.

After keeping silent for the sake of his wife's reputation during twenty-three years of a life sentence in Connecticut state prison Charles I. Rathborn has told his story and received a pardon.

Rathborn, who shot and killed Daniel Chesebro, told Governor Holcomb and the pardon board that he found Chesebro in his home with Mrs. Rathborn and backed the man into a corner, pointing a gun at him to frighten him. His wife suddenly called to him, he looked around, the gun went off, and Chesebro fell dead.

At the trial Rathborn kept silent. He now said that he did so on the advice of his mother, an ardent Methodist, who told him to "trust in the Lord" and not ruin the reputation of his wife. Mrs. Rathborn got a divorce and remarried. She is now dead.

GERMANS HAVE NEW SHELL.

It Can Be Used Either as Shrapnel or High Explosive.

A remarkably ingenious and deadly new shell is being used by the German artillery. It can be made to have any one of the five different actions. It can be used as ordinary shrapnel or made to explode in larger fragments, and also with the effect of a high explosive shell. It can be exploded either by time fuse or contact.

The German artillerists are particularly proud of their feat in originating the shell, for it will penetrate a barricade of clay or sand bags and burst inside the trench. It also can be made to burst at any height above the ground. The favorite height is eight yards.

25,000 KILLED AT WORK EVERY YEAR.

Estimates by the bureau of labor say that the total industrial accidents among American wage earners aggregate 25,000 a year.

The number of accidents causing four weeks' disability is put at 700,000.

According to the figures the annual fatalities in the various occupations are:

Agricultural pursuits	4,200
Coal mining	2,000
Building construction	1,500
General manufacturing	1,500

The most dangerous employments are:

Metal mining, fatalities	4 in 1,000
Coal mining, fatalities	3.5 in 1,000
Fisheries and navigation, fatalities	3 in 1,000

FEW ARE EXEMPT WHEN WAR COMES

Duty Falls on All In Face of Invasion Peril.

AGE ONE CONSIDERATION.

Usual Military Exceptions Would No Longer Govern, but Citizens Under Eighteen and Not More Than Forty-five Years Old Are Subject to Call Only In the Last Resort.

Who would be liable for military service if the United States were to become involved in war? Nowadays one hears this question frequently asked, often with more than casual curiosity back of the query. Many are the national and state laws covering military service, and herewith are given the salient features of these enactments:

In New York state all male residents between the ages of eighteen and forty-five are liable to be called to service except:

Persons exempted by laws of the United States.

Persons exempted by laws of New York state.

All persons in the army, navy or volunteer forces of the United States or who have been honorably discharged therefrom.

The members of any regularly organized fire or police department in any city, village or town and exempt firemen who have served their full term in any fire company, but no member of the active militia shall be relieved from duty therein because of his joining any such fire company or department.

All persons who have served five years in the active militia of the state and have received a full and honorable discharge.

Justices and clerks of courts of record, ministers of the gospel, practicing physicians, superintendents, officers and assistants of hospitals, prisons and jails; lighthouse keepers, conductors and engineers of railways and seamen actively employed as such.

Idiots, lunatics, paupers, vagabonds, habitual drunkards and persons convicted of infamous crimes.

Practically All Subject.

But all except those indicated in the paragraph immediately preceding this are liable to military duty in case of wars, insurrection, invasion or imminent danger thereof.

In short, were a case of dire necessity to develop, the extent to which a conscription might be carried would practically be bounded only by the age limits established.

Under the federal law (known as the Dick bill because introduced by Senator Charles Dick of Ohio) the federal militia consists of every ablebodied male citizen in the states, territories and District of Columbia, and every ablebodied male of foreign birth who has declared his intention to become a citizen, who is more than eighteen and less than forty-five years old.

This militia is divided into two classes—the organized militia, usually known as the national guard of the respective states, and the remainder known as the reserve militia.

There Are General Exemptions.

In general, exemptions from this service include the judiciary, executive, customs and postal officials, those engaged in arsenal and pilotage services, also members of any well known religious sect or organization whose creed forbids its members to participate in war in any form and whose religious convictions are against war or any participation therein.

This last clause applies particularly to Quakers and Shakers, since it does not appear that the religious convictions of most members of Christian churches forbid them to participate in war in any form.

By order of the president, this militia may be called out whenever the United States is invaded or is in danger of invasion from any foreign nation, or of rebellion against the authority of the federal government, or if the president is unable to execute the laws of the country with the regular forces at his command.

This includes the reserve militia as well as the organized militia. The president, however, is not allowed to send the militia outside the boundaries of the United States unless its members volunteer, in which case they re-enlist and become troops of the regular army of the United States.

A study of the laws makes it apparent that once war is declared the liability to military service in the United States could, under pressure of urgency, amount virtually to conscription. Little play for the exercise of individual conscience is given after a war has started. Whether all males between the age limits should fight or not would depend almost entirely on how badly they were needed.

Munich to Drink Lemonade.

Munich, the greatest beer drinking center in Germany, has been compelled sharply to curtail its consumption of beer, owing to the expropriation by the military authorities of a large part of the product of the breweries. The amount of beer now available for public use is only one-third of the ordinary supply, and lemonade is urged as a substitute.

TEXT OF KAISER'S APPEALS TO CZAR

International News Service Makes Public Official Translation of German Blue Book Which Embraces Proposals of Each Belligerant Nation

(Continued from Yesterday)

Emperor William to Czar Nicholas:

"July 29, 6:30 p.m.

"I received thy telegram and share thy wish for maintenance of the peace. However, as stated in my first telegram, I cannot view the act of Austria-Hungary as 'outrageous war.'

"Austria-Hungary knows from experience that Serbian promises, if only made on paper, are altogether untrustworthy. In my opinion, the act of Austria-Hungary is to be viewed as endeavoring to obtain full guarantee of Serbia that her promises be actually fulfilled.

"This view om mine is confirmed by the declaration of the Austrian Cabinet to the effect that Austria-Hungary does not intend to make any territorial conquests at the expense of Serbia. Hence, I believe it quite possible for Russia to remain as spectator at the Austro-Serbian war, without drawing Europe into the most terrible war in history.

"I believe a direct agreement between thy Government and Vienna to be possible and desirable, an agreement, which my Government is bent to promote with all its powers—as I have already wired thee. Of course, military measures on the part of Russia, which may be regarded by Austria-Hungary as threatening, would hasten a disaster that we both desire to avoid. They also would undermine my position as mediator, which I gladly have accepted upon thy appeal for my friendship and aid.

"WILHELM."

Prince Henry of Prussia to King George:

"July 30, 1914.

"Am here since yesterday. Have communicated to Wilhelm everything you told me so kindly at Buckingham Palace last Sunday, and he gratefully received your message.

"Wilhelm, greatly worried, is doing his utmost in working for the maintenance of peace, in response to Nicholas's request. He is in permanent telegraphic communication with Nicholas, who, today, confirms the report of having ordered military measures, tantamount to mobilization, which measures have been taken already five days ago.

Moreover, we are informed of France making military preparations, whereas we have not directed any measures, but may be forced to do so at any moment, if our neighbors should keep on. The upshot would be a European war.

"If you wish really and sincerely to prevent this terrible disaster, may I suggest to you to prevail upon France and also upon Russia to remain neutral. This would prove to he greatest benefit, I think, I consider this a sure, perhaps the only, possibility of preserving Europe's peace.

"I may add, Germany and England should mutally support one another now more than ever, to prevent a terrible calamity, which otherwise would seem unavoidable.

"Believe me, Wilhelm is most sincere in his efforts at preserving peace. However, he may ultimately be forced by the military preparations of his two neighbors to follow their example in order to assure the safety of his own country, which otherwise would remain defenseless.

"I have informed Wilhelm of my telegram to you, and I hope you will receive my communications in the same friendly spirit which has prompted them.

"HEINRICH."

King George's Offer To Help Keep Peace.

King George to Prince Henry of Prussia:

"July 30, 1914.

"Thanks for your telegram. Very glad to hear of William's efforts to reach an agreement with Nicholas for preserving the peace. It is my earnest desire that there may be averted an calamity that never could be undone, such as would be a European war.

"My Government does its level best to suggest to Russia and to France to defer any more military preparations, if Austria would content herself with occupying Belgrade and surrounding Serbian territory as a pledge for the satisfactory settlement of her demands, while at the same time the other Powers would discontinue their preparing for war.

"I trust William will use his great influence to induce Austria to assent to this proposition; thereby he would prove that Germany and England are co-operating in preventing what would be an international calamity.

"Pray, assure William that I am doing, and also shall continue to do, everything in my power to preserve the European peace.

"GEORGE."

Kaiser Tells of Russian Mobilization.

Emperor William to King George:

"July 31, 1914.

"Many thanks for your friendly communication. Your suggestions are coinciding with my ideas and with the information which I received tonight from Vienna and which I have passed on to London.

"This moment I have received the news from my Chancellor that he has just been informed of Nicholas having ordered tonight the mobilization of his entire army and navy. He not even has waited for the results of the mediation I work upon, and has left me altogether without news.

"I am departing for Berlin to guard the safety of my eastern frontiers, where already strong Russian forces have been stationed.

"WILHELM."

King George Makes Appeal to Czar.

King George to Emperor William:

"August 1, 1914.

"Many thanks for your telegram of last night. I have sent to Nicholas an urgent telegram, wherein I expressed my readiness to do everything in my power to promote the resumption of negotiations between the Powers involved. GEORGE.

Report of German Ambassador in London.

The German Ambassador in London to the German Chancellor:

"August 1, 1914.

"This moment Sir Edward Grey has called me up on the telephone, asking, if France should remain neutral in the event of a German-Russian war, whether in this case I thought I could declare that we would not attack the French, I declared, I think I could assume the responsibility for it.

"LICHNOWITZ."

Kaiser's Message on French Neutrality.

Emperor William to King George:

"August 1, 1914.

"I just received the communication by your government, offering the French neutrality under the guarantee of Great Britain. To this offer was appended the question whether Germany under these conditions would forego attacking France.

"For technical reasons my mobilization, ordered already this afternoon on two fronts, east and west, must proceed according to the dispositions. Countermand cannot be issued because your telegram came too late. I regret to say. However, if France should offer her neutrality, which would have to be guaranteed by the English army and navy, then I shall refrain, of course, from attacking France, using my troops somewhere else.

"I hope France will not get nervous. The troops on my border at this very moment are instructed by wire and telephone not to cross the French frontier.

"WILHELM."

German Acceptance of Grey's Suggestion.

The German Chancellor to the German Ambassador in London:

"August 1, 1914.

"Germany is ready to accept the English proposal, provided England vouches with her military power for the unconditional neutrality on the part of France. The German mobilization has taken place today on account of the Russian challenge, before the English proposals have come to hand, and consequently our deploy on the French border cannot be altered. But we pledge ourselves that our troops will not cross the French border before Monday, August 3, 7 p.m., pending the arrival of England's promise.

"BETHMANN HOLLWEG."

"A Misunderstanding," Says King George to Kaiser.

King George to Emperor William:

"August 1, 1914.

"In reply to your telegram, just received, I believe there must be some misunderstanding in regard to a suggestion which had been made during a friendly conversation between Prince Lichnowsky and Sir Edward Grey, when they discussed how an actual encounter might be averted between the German and French armies, as long ts there is still a chance for an understanding between Austria and Russia.

"Sir Edward Grey will see Prince Lichnowsky tomorrow morning to ascertain whether the misunderstanding was on his part.

"GEORGE."

German Ambassador's Final Message.

The German Ambassador at London to the Chancellor:

"August 2, 1914.

"Sir Edward Grey's suggestions, based upon the desire to make England's lasting neutralitypossible, were made without him previously sounding the French Government, also without his knowledge of the mobilization, and have been dropped since, as having not the ghost of a chance.

"LICHNOWSKY."

The Break Between Germany and Russia.

Dispatch from the German Chancellor to the German Ambassador at St. Petersburg:

"July 31, 1914. Urgent.

"Although negotiations of mediation are still pending, and although we have not taken any measures for mobilizing up to this hour, Russia has mobilized her whole army and navy; hence, mobilized also against us.

"By these Russian measures we have been forced to declare martial law for safeguarding the empire, a step that does not mean mobilization. But this mobilization must ensue if Russia does not stop any war measures against us and Austria-Hungary within twelve hours. Pray tell this instantly to M. Sasonow and wire at what hour you saw him."

France Asked to Remain Neutral.

Dispatch from the German Chancellor to the German Ambassador in Paris:

"July 31, 1914. Urgent.

"Although negotiations of mediation are still pending, and although we have not taken any measures for mobilizing up to this hour, Russia has mobilized her whole army and navy; hence mobilized also against us. Thereupon we have declared martial law, which will be followed by mobilization, if Russia does not stop her measures of war against us and Austria-Hungary within twelve hours. Mobilization would mean, in a word, a war.

"Pray ask the French Government if she wants to remain neutral in a Russian-German war. Answer must be given within eighteen hours. Wire instantly the hours when you propose the question. Greatest haste is necessary.

Declaration of War on Russia.

Dispatch from the German Chancellor to the German Ambassador at St. Petersburg:

August 1, 1914.

"12:52 p.m. Urgent.

"Should the Russian government fail to give satisfactory reply to our demand, please submit subjoined statement this afternoon at 5 o'clock, mid-European time:

"'The imperial government has endeavored from the beginning of the crisis to find a pacific solution. Pursuant to the expressed wish of H. M. Emperor of Russia, H. M. Emperor of Germany has applied himself in accord with England to the task of meditating between the cabinets of Vienna and St. Petersburg, when Russia, without waiting the result, proceeded to mobilze her entire forces, ashore and afloat.

"'In consequence of this threatening measure, unjustified by any military preparation on the part of Germany, the German Empire found itself confronted by a grave and imminent danger. By failure to parry this peril the Imperial Government would have conpromised the security and even the existence of Germany.

"'Consequently, the German Government found itself forced to address the Government of H. M. Emperor of All the Russians, insisting that the military acts referred above must cease. Russia, having refused to heed this demand, and having manifested by its refusal that its actions were directed against Germany, I have the honor byorder of my Government to inform your Excellency of the following:

"'His Majesty the Emperor, my august sovereign, in the name of the Empire, lifts the defi and considers himself in a state of war with Russia.'

"Please wire when these instructions reached you and when you executed them, according to Russian time.

"Please ask for your passports and turn over protection and business to American Embassy."

SAYVILLE WIRELESS DIRECTS SUBMARINE WARFARE ON SHIPS

German Radio Plant Violates Censorship, Apparently Innocent Messages Intended for Undersea Craft

New York, June 29.—The truth of the violations of censorship at the Sayville wireless station which recently have caused officials so much concern, has been learned by the Herald.

Despite the fact that the Navy Department now has at Sayville a censorship force of four officers and three enlisted men, messages in a secret code have been sent through Sayville, presumably as commercial messages, which United States officials have good reason to believe contain military information such as is forbidden by the censorship regulations.

It is believed that these messages are sent to the German submarine operating against merchant ships in the European war zone. Despite the long distance, radio experts believe the submarines can receive these messages from the powerful Sayville station. It would be impossible for submarines to report the receipt of these messages or for them to reply. But the weakness of their own wireless is no deterrent against their receiving the messages sent out from Sayville. These, it is believed, are being sent out broadcast, merely on the chance that the submarines will pick them up and thus learn of the movements of merchant ships carrying munitions of war to the Allies.

The messages which have aroused the suspicions of the American officials are sent plain, but they carry their secret military information through a pre-arranged code. Thus will be sent to Germany a private message of a presumably innocent character, which, however, will convey important information to some submarine commander off the British coast who picks it up.

It is reported that United States officials have obtained information regarding the character of certain of these messages which convince them they are not the innocent private communications they appear to be, but really are notifications to submarine commanders of the movements of merchant ships. It is impossible, however, to learn just what information regarding these messages the government has obtained. In some instances the American naval censors have suspected that messages were flashed without their approval.

It was only four weeks ago that the attention of the Navy Department was called to the inadequacy of the censorship at Sayville and to the suspicions of the censors that messages were being sent out without their knowledge. Then the department ordered three additional officers to the station in order that a perpetual watch by officers could be kept. Since then the mysterious plain messages have been coming in for transmission to Germany.

German radio experts constantly have been carrying on experimental work at Sayville, and it is thought that afforded an opportunity perhaps for the sending of uncensored messages without arousing the suspicions of the American censors.

"SOLID" SOUTH IS DIVIDED

Prominent Virginian Says Administration Has Broken Ties, Resulting in Reactionary Movement.

Washington, D.C., June 28, (Special Correspondence).—That the once solid South is recognizing the soundness of the Republican policy of protection is asserted by Hon. Alvah H. Martin, a prominent business man of Norfolk, Va., and a life-long resident of the southern states. When in Washinton yesterday, Mr. Martin said:

I made the remark when President Wilson was elected that he would do more than any President since the war to disrupt the Democracy of the solid South, and events that have transpired have convinced me that the prediction was correct.

Having been born and reared in the South, surrounded by all the sentiment of that section, and sympathizing with itsp olicies, I felt sure that when the failure of his administration was, generally recognized, as fail it must, there would be a more general reaction in this section against Democratic policies than had ever previously been shown, because it necessarily meant that all must acknowledge that a fair trial has been accorded these doctrines from a distinctly Southern standpoint, and there is no future to look forward to along these lines with any hope of success.

The new tariff law has proved a complete failure. Not only has it failed to produce sufficient revenue for the needs of the Government, but it has distinctly injured business conditions, and today the general cry of "hard times" is heard in every direction, whereas the country was more prosperous than ever before during the last year of the preceding Republican Administration.

The only thing which sustains business at present is war orders for grain, food, ammunition and other supplies required for the European countries engaged in the world struggle, and this great contest causes a practical suspension of imports from the countries so affected, and gives a big balance of trade in our favor, while imports from the neutral countries are steadily increasing. Acting under the special recommendation of Mr. Wilson, Congress imposed "war taxes" upon us, when the foreign war was actually helping business instead of injuring it. In addition to that the iniquitous and burdensome income tax has also been imposed for the first time, except as a war measure; and still the revenues of the Government are steadily dropping behind, with the largest appropriation that have ever been made, notwithstanding the suspension of appropriations for rivers and harbors, public buildings and other expenditures which had been previously made with regularity.

The capital and savings of the people should be preserved by just and economic systems and laws, but the real wealth of a Nation depends upon constructive action for the proper employment of its labor, and keeping the arteries of trade sufficiently open to promote general activity and a "full dinner pail."

The issue upon which Mr. Wilson seemed to lay most stress during his campaign for election was reduction of the cost of living, but results have proved the absurdity and impracticability of his ideas generally. "Psychology" and "watchful waiting" having failed as excuses, the attempt is now being made to satisfy the people with rhetoric; so that it is dawning upon the voters of the South, as never before, that what they need is a good, strong, practical business administration at Washington. More Democrats than ever before say they have voted for their last Democratic Presidential candidate, and it can be relied on with certainty that at the next election there will be increased Republican representation in Congress from this section, and probably some electoral votes.

At the last session of Congress, Virginia was the only former Confederate State that had a Republican representative in the person of Mr. Slemp. In the present Congress he has been again returned, while North Carolina gives us another, and the solid delegation heretofore coming from Louisiana has been broken. The recent utterances of the Governors of Texas, South Carolina and other Southern States, in regard to Mr. Wilson show decidedly that the trend of public sentiment is against him. The time is rapidly approaching when the South, probably more than any other section, will profit by Republican policies, and it will hail as a blessing, promptly and sincerely, a return to its former prosperity.

ORPHANS IN HOLLAND.

In Some Cities They Are Dressed in Most Grotesque Fashion.

The Dutch differ from the Chinese in announcing to the world the birth of children only in the article displayed. The Chinamen hang a piece of ginger over the main entrance to the house, while the Hollanders indicate the event by a piece of lace, combining with the lace a pink background for a boy and tinsel for a girl.

The orphans of some of the cities of Holland are quite conspicuous, and especially so when seen on the streets of Amsterdam, dressed in what might be termed half and half clothing. The east half of a boy's coat, including the sleeve, is red, while the west half is black. The dresses of girls are divided in a similar manner, but are topped off by becoming white caps, which make the young misses look very neat and attractive.

This singular style of dress is said to have been adopted to enable the railroad officials, as well as the authorities, to keep track of them, says the National Geographical Magazine. As the orphan asylums of Holland have the control of children committed to them until they are of age, the more mature of the unfortunates (wearing these odd garments in public) present a very striking appearance.

INFLATING A TIRE.

A Way to Test It When There Is No Pressure Gauge Handy.

Time was when every tire manufacturer warned all and sundry to inflate their tires to a high degree of pressure, and more probably than not this was due to the fact that in those days all pumping was done by hand and with very inefficient implements.

The correct thing to do nowadays, of course, is to consult a standard table of requisite pressures, according to the size of tire and the load to be carried, and to use this in conjunction with a reliable gauge.

But there is also a rough and ready method which is by no means indeterminate if no pressure gauge is handy, and that is to take the car out on to a dry road which is in a bad state of repair and full of holes. Preferably there should be no passengers on the rear seats. If the driving wheels are pumped up too hard the driver will experience a constant sensation of incipient skidding, and though he may not actually side slip, he will not find the car by any means easy to steer.

This is evidence that the tires are so hard that they are bumping over obstacles instead of absorbing them without leaving the ground.—New York World.

Dust and the Lungs.

Where there is less dust there is less tuberculosis. This disease is responsible for almost exactly one-quarter of all the deaths among wage earners in this country between the ages of fifteen and thirty-five. It is also responsible for almost exactly one out of every three deaths that come between the ages of twenty and forty years to both male and female wage earners. The death rate from tuberculosis among agriculturists may be put at 106 per hundred thousand. In comparison with this the death rate from tuberculosis among those engaged in cotton manufacture is 202; brass work, 279; copper work, 294; glass making, 295; earthenware, 333; cutlery, 382; file making, 402. Other statistics might be given showing the same thing—namely, that tuberculosis is intimately associated with certain occupations, especially those giving rise to dust, metallic, mineral or organic.

Sunshine and Dust.

There is more dust in the places illuminated by the sun's rays than in those which we call shady. If you look along a beam of light as it streams through a window or a chink in the door you will see innumerable dust particles dancing about in the light. You will be told by most persons that there is just as much dust in the non-illuminated parts of the room as in the more favored spaces, but you cannot see the particles because the rays do not fall directly upon them. You will think that this is eminently plausible, but it is not the case. The sun falling upon the air creates irregular currents, and these currents stir up the dust and collect it in layers along the line of light; hence there is more dust where the sun shines than elsewhere.—Exchange.

Luck Against Him.

"I can't get by with anything."

"What's the matter?"

"I invited a girl to go to the theater. When it came time to buy the seats I was broke, so I told her the house was sold out for that night and promised to take her next week."

"Well."

"Her aunt took her down on the very night we were to go and they and two other couples were the only people in the parquet."—Detroit Free Press.

London.—The ... reaching London from Germany are particularly interesting just now. For the first time since the war began the ... and while in many quarters there are significant allusions to peace prospects—significant because they are made with official sanction—there is a general realization that the naval and military outlook is not so promising for the Fatherland as it appeared a few months ago.

In the course of a lecture on the power of Germany's enemies, which was delivered by Herr ... at Berlin a few days ago, the following statement was made:

"Today the strength of the English ... in ships of the line and cruisers ... hardly less as compared with ours than at the begining of the war, for they possess ninety-five of the first class and sixty-nine of the second class, in spite of the losses which they have incurred, which amount to sixteen and thirteen per cent respectively. The reason for this is that England retained all the ships which she was building for foreign States. Our submarines still have a great deal to do."

This, of course, is only half the truth. Since the war ships have been completed in English yards, and the strength of the British navy is greater today than it was a year ago. It is becoming clear to the German critics that their submarines are not likely to ... for their country.

TOWN TALK

Extract From a Speech of ... Wilson at The Clerk ... 1915

(Reprinted from the ... The Evening Times)

"Trade goes out of town because the woman ... I can't get anything of our merchants.' There is in such cases a complete divorcement of real relationship between the merchants of the town and the shopping public. Every good store is handicapped by every poor store; every clean grocer is handicapped by every dirty grocer; a community that has failure in real estate is hampered, and every bank in the town that fails harms every other bank in that town. In short, the unprosperous business places of the community are a detriment to each and every prosperous one."

TEUTON ALLIES LOSE NEARLY 400,000 IN GALICIAN DRIVE

By Stanley Washburn.

Galicia, Army Headquarters.—From cloudy distorted reports regarding the situation on the front, which are circulated in Petrograd, it has been utterly impossible to estimate the significance of the Russian withdrawal in Galicia.

Arriving here one discovers instantly that these armies, though they retired from territory and towns conquered last Autumn, are neither beaten nor even down-hearted. One experiences growing hopefulness, as one approaches the front, which becomes a conviction that there is no cause for despondency.

When one meets and talks with General Ivanoff, the Russian commander, a quiet, serene soldier, with a well-balanced mind, his grasp of the situation and confidence in the future tend to dissipate all pessimism.

The point of view of the situation one finds here is that the Germans by selecting a place of attack on the Russian front, which ... of a thousand miles, were enabled by the expenditure of ... which is impossible for Russia to equal, by ... are estimated at 380,000 ... the Germans, and probably ... of Austrians, and by ... back over a ... which was done in a ...

BOARD AWARDS BIDS TO STYRING, SHUTTING OUT COMPETITORS

Commissioners Not Satisfied With ... Financial Responsibility of Local ... Nearest to the Successful Bidder, Who Is Considered a Shield for W. J. Hartnett

As predicted in last night's Evening Times, Edward Styring of Syracuse, formerly a resident barge canal engineer here, was awarded the contract for the construction of the bridges over the Hunter tailrace and Waterhouse creek in Sixth st. at a meeting of the Board of Public Works last night. Commissioners Stevenson and Garret were present and Commissioner Wiltsie did not appear. When asked this morning if he attended the meeting he said "I did not know there was to be a meeting." When informed as to the action of the Board he said he was not surprised.

When the bids were submitted to the Board at the regular meeting Monday night, the bid of VanBuren and Crahan of this city was low, totaling $4730.47. The bid submitted by Styring was $4783.05, or $52.58 higher than the bid of VanBuren and Crahan.

Members of the Board present expressed some doubts regarding the responsibility of the VanBuren and Crahan Company, and the men were questioned by President Stevenson as to their financial status. They replied that they had enough money to carry on the work. This did not seem to satisfy the Board, and Styring's long experience and the fact that he guarantees to complete the 40 days with the Hunter bridge in 15 days, carried weight. After some discussion the Board decided to withhold its decision.

Soon after, however, the Board submitted the cost of the improvement plus the engineering fees to the Common Council and asked for an appropriation. The sum asked for equalled the Styring bid plus the engineering fees.

The Board announced that it would meet again last night and every contractor who had submitted a bid was on hand a little before 8 o'clock as it was generally expected that Styring would be awarded the contract.

After a short wait the contractors and other spectators were informed that the Board had gone into session at 7.30 o'clock and had awarded the contract to Styring. The resolution awarding the contract was introduced by Commissioner Garret and quoted Styring as the "lowest responsible bidder."

Messrs. VanBuren and Crahan were not slow in expressing their opinion of the machinations of the Board and they found many partisans. The fact that both VanBuren and Crahan are local young men while Styring is an out of town man has also caused many to condemn the action of the Board. VanBuren has had long experience in construction work, and feels that he and his partner have been greatly wronged. He did not say last night whether or not he would institute proceedings to compel the Board to reverse the award, although a local attorney this morning expressed doubts regarding the legality of the proceedings of the Board.

It is said that the Styring bid is backed by William J. ... and is really a Hartnett bid. Mr. Styring has not been ... at any of the meetings of the Board.

The work on the bridges will start at once, it was ... the Board of Public Works last night.

CRAHAN DECLARES AWARD ... TO BE A RAW DEAL

"This was one raw deal if there ever was one," ... by Fred Crahan of the VanBuren and Crahan ... classifying the action of the Board of Public Works ... contract for two new bridges last night ... bid was higher than that of the local firm.

"After the Board called us in and insulted us by ... our responsibility and finances, they awarded the ... of town man in preference to a local firm ... Oh, yes—'Boost Fulton—Buy in Fulton'— ... don't you think?"

Mr. Crahan said further, "You ... of the Board that we are ... check and our bond was ... 40 days and there was no ... to Mr. Styring ..."

Opinions

Industrial Efficiency.

It seems pretty well accepted in England now that the war is going to be a long one. Germany is so well entrenched in its lines that its going to take millions of men and tons on tons of ammunition to dislodge them.

England seems to be much in the position that the north was at the outbreak of our civil war. It didn't appreciate what it was up against and was totally unprepared. It had neither the arms or ammunition to fight with. It had depended entirely upon its navy in a defensive warfare. England seems only recently to have aroused itself to the necessity of supplies and it w iltlake a long time yet for it to get ready for that crushing blow of the allies which had been promised for the month of May.

The self-complacency of England, and its arrogance, has been much disturbed by the ill success of its campaign. True the English lines, after forcing the Germans back, have held their own, but made no progress. The French have done better, although their progress is slow and is dependent on the progress of the British lines. British efficiency in an industrial way has been sadly at a discount. Notwithstanding the old time arrogance it would now appear, by the progress of events, that the industrial situation in France was much better than that in England and that had the war been between France and England the latter would have been found the weaker. Neither of them, however, have anywhere near begun to attain that marvelous efficiency of the Germans which had already conquered the world in peaceful commerce and makes it able to fight the world in war. The German workshops have been no less efficient than the German armies. They have been able to supply the German armies constantly without foreign importations and they show no lack of ability to continue to do so. Germany had a great reserve of munitions of war piled up against this event which it meant to bring about, and the efficiency of German workshops is keeping up that reserve. It is not only a battle between Germany and the allies on the battlefield, but a contest between industrial Germany and industrial France and England, in which Germany shows a tremendous advantage and England has third place, being outclassed by France in industrial efficiency. Russia has only men for cannon fodder and must depend upon the world at large for its war supplies. The greatest disclosure of the war is British inefficiency to wage it. It is a shock to British pride. It will never be the old arrogant England again; it will be a new England in a new Europe. It is doubtful if France ever resumes its old time gayety however the war may be decided.—Watertown Times.

FOR FLETCHER'S
CASTORIA

POPULARIZING THEMSELVES

The advent of seasonable weather brings the news that an effort is being made by at least two of the city's prominent men to popularize themselves in the eyes of the people—voters and non-voters alike, by various acts calculated to enhance their value to the community at large.

In the one instance, the people of the city are given to understand that Mayor Fox desires to succeed himself as the chief executive of the city, all of which reminds one of the experiment made by an eminent physician with light rays. This physician was of course provided with an X-ray machine. He found about five octaves above violet a form of waves similar to X-rays. Under these rays a living object threw a shadow which existed only as long as there was life in the object. In other words, so long as the animal was alive it threw a shadow. When it was killed it became suddenly transparent.

Within easy remembrance of the shortest memory the Mayor had the opportunity of a lifetime to cast a shadow. He was asked for a straightforward reply to a straight question, but he choose to become quite transparent. The rays were too strong and the public does not yet know how true were the charges made against him.

In the case of Mr. Stevenson, upon at least two recent occasions he has been known to declare himself in most emphatic terms. Mr. Stevenson opposed the purchase of the Falley Seminary site, and in this matter he too has done something toward becoming transparent. His latest attempt at popularizing himself is in enlightening a poor benighted public of the fact as it exists in his mind, that East First st. is too narrow by at least four feet, and trees to the number of thirty-three, to say nothing of at least forty-two out of fifty-seven varieties of persons (taxpayers) do not amount to as much as the crack of a whip.

Those who know anything about what representative government means are, of course, smiling at the idea of mentioning those immortal words: "A government by the people,, for the people," etc., in its application to the rights of those persons most affected by the widening of East First st.

There is always left some room for doubt, hence it is barely possible that the replies received by Commissioner Wiltsie to his inquiries made for the purpose of getting expressions from the people relative to their desires in the matter of widening East First st. came from a class of people who are incapable of administering the blessings of free government. At any rate, the forty-two persons who manifested their disapproval of the proposition to widen East First st. have become by virtue of the paternalism of Commissioner Stevenson like unto the object placed before the X-ray machine—they too are transparent.

Summing up, is it wise to judge a mayoralty possibility by the shadow he casts?

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By Frederic T. Cardoze

Albany, June 30.—If the people of the State, collectively or individually, have assisted the delegates to the Constitutional convention by proposing amendments to the Constitution, little is being said concerning such activity. More than one invitation has been extended to the voters to come forward and present their suggestions as to hoy the Constitution could be strengthened, yet few have presented themselves or their ideas, save perhaps those who have appeared before committees as advocates or foes to propositions offered by delegates.

On May 20, Richard H. Curran, a delegate to the convention, offered a resolution which in a word invited the public to submit proposed Constitutional amendments. The resolution, however, was laid upon the table. Not only was the public invited to air its views, but the heads of various departments of State were also asked to drop around with ideas.

Labor and industrial organizations were included within the invitation as were the heads of educational and financial institutions. How many responded has not been disclosed. It is the general impression that the number was not large.

Again is the fact being made obvious that the public is not afire with enthusiasm relative to the efforts of the delegates to add new sections to the Contitution. Lax from the first, the attitude of passive interest has not yet been swept away, although the debates have actually begun upon the floor of the convention.

Few legislative sessions have been as sparely attended as have been the majority of the sessions of the Constitutional delegates. With a few notible exceptions, even the committee hearings have somewhat been ignored by auditors.

This condition of affairs is read by women to mean that the people are generally satisfied with the State Constitution as it stands and are prepared to vote down the majority of the propositions which are submitted by the delegates for their ratification or repudiation.

Delegates have frequently declared that there was no public demand for this or that proposed amendment and there was no actual reason for its adoption by the convention. It has been hinted that individual opinions have been responsible for a number of the propositions now under consideration.

There have been two or three exceptions with regard to the lack of interest of the people in what should be added to the Constitution. Organized labor, associations of attorneys and civil, mechanical and electrical engineers have set forth in writing the changes they would like to see made to the document through and by which the State government is administered. Nothing has yet come of the ideas expressed although they have been weighed in committee.

It is certain that for the purpose of getting into the record, at least, the delegates will debate long and ardently upon all propositions which are favorably reported and obtain a place upon the general orders calendar, which safeguards any possibility of inanimate tactics upon the part of the members of the convention.

There is no talk of night sessions, yet this course is looked for as the convention continues to drag on with leaden, as it were.

Finish the evening meal by eating Cookies made amidst sanitary surroundings. The Black bakings are as "good as mother's."—adv.

ANIMAL EXHIBITS AT THE FAIRS

Department Guarding Against Infection of Healthy Cattle, Etc. at State and County Meets.

Albany, June 29.—The exhibition of cattle, sheep and other ruminants and swine from without the State at State, county and town agricultural fairs to be held this year is discouraged by the State Department of Agriculture in a statement issued tonight by Commissioner Charles S. Wilson. The exhibition of such animals owned within the State, the department further recommends, should be permitted only after examination for disease and under proper sanitary conditions.

Commissioner Wilson points out that the State is just recovering from a serious outbreak of foot and mouth disease and that everything possible should be done to prevent a recurrence of the outbreak. It is believed that hog cholera and other animal diseases have been disseminated in the past through contact of diseased with healthy animals at fairs or through the carrying of disease germs and Commissioner Wilson urges that this liability be minimized as much as possible.

"Owing to the recent serious outbreak of foot and mouth disease in this country," says Commissioner Wilson, "the Department of Agriculture recommends that no animals from outside the State, susceptible to this disease, be permitted to compete for prizes at fairs or live-stock exhibitions this coming fall. This includes cattle, sheep, other ruminants and swine.

"This department also recommends that animals from within the State, brought together for exhibition, be carefully examined and held under proper sanitary conditions while at such exhibition, and will furnish to the proper authorities of each fair or exhibition regulations as to the requirements with reference to examination, method of disinfecting places where animals are harbored or kept and general sanitation. The officers of the organization, in each case, will be held responsible for such examination and care.

"The Department of Agriculture does not wish to handicap the officers of any fair exhibition to be held in this State, but the precaution recommended are deemed necessary to guard the live-stock industry of our Empire State."

MOCK MARRIAGE

Yesterday morning at 11 o'clock at the home of the bride took place the marriage (mock) of Miss Margaret Eilliot and Richard Ellis of this city. The Rev. Augustus Snodgrass of Kalamazoo, Mich., formerly pastor of the Universalist church here, performed the ceremony.

The bride wore a gown of white satin with tulle veil and carried white roses. A wedding luncheon was served, after which the couple left on a wedding trip which will include the Panama Exposition.

Mr. and Mrs. Ellis, upon their return, will make their home at 221 Seneca st.

An Easy, Pleasant Laxative
One or two Dr. King's New Life Pills with a tumbler of water at night. No bad, nauseating taste; no belching gas. Go right to bed. Wake up in the morning, enjoy a free, easy bowel movement, and feel fine all day. Dr. King's New Life Pills are sold by all Druggists, 36 in an original package, for 25c. Get a bottle today—enjoy this easy, pleasant laxative.

ITS PRODUCTION

Reading Course Lesson Tells Facts About Stables and Feeding of Cows; Care Means Proper Grading.

Methods are more important than equipment in producing high-grade milk, according to a reading-course lesson entitled "The Production of Clean Milk," recently issued by the New York State College of Agriculture. A man may have an inexpensive cow stable, but if he keeps it clean, grooms and feeds his cows long enough before milking to allow the dust to settle, wipes the cows' udders with a damp cloth before milking, and handles the milk in a sanitary way in sterilized utensils, he can produce clean milk.

These facts, so the college says, are of particular importance to milk producers in the State because of the requirements of the milk ordinance that went into effect January 1, 1915. This ordinance requires all milk intended for retail delivery in any city or village to be graded according to: the health of the cows; sanitary condition in the dairy barn and in the milk house, as determined by the dairy score; the bacteria content of the milk or cream; and whether the milk or cream has been pasteurized. A copy of the score card used in enforcing this ordinance is included in the publication on a perforated sheet so that it may be torn out and used in scoring a dairy.

The college lays particular emphasis on the construction and the care of dairy utensils and gives figures to show that at least two-thirds of the bacteria sometimes present in milk may be excluded by using a small top milk pail. All crevices and seams in dairy utensils should be well flushed with solder, it is stated, otherwise bacteria will collect in these places and contaminate each fresh lot of milk put into the utensils. All utensils used should be rinsed in lukewarm water, then washed with a brush, not a cloth, in a strong solution of washing powder and hot water, and then either thoroughly scalded with boiling water or better still, sterilized in steam.

Any resident of New York State may obtain this reading-course lesson by applying to the state college of agriculture, Cornell university, Ithaca, New York.

SOMETHING ABOUT THE "SHA-TAW-KWA"

What is a "Sha-taw-kwa?"

Doubtless this question has been asked many times during the past few months. And very soon the question will be answered by a platform demonstration.

In a short time the Redpath forces will arrive here, pitch their big tent and settle down for a six days' program of delightful entertainment. The Chautauqua is in the hands of a local committee who have season tickets ready for those who desire to avail themselves of such choice entertainments at an unequaled bargain.

The original Chautauqua was held in New York State more than forty years ago at Lake Chautauqua, but not until recent years has the movement become general. Today practically every community of consequence supports such a program.

SCHENK PARK IS LOWER FALLS TRIANGLE

An item of news reached The Evening Times yesterday, in effect that the pretty spot in West 1st st., Lower Falls, had been christened Schenk Park. This was in error as the committee whose work has transformed an eyesore into a beauty spot, makes it known that Lower Falls Triangle has been selected as the name for the place.

Paint Put-on

Think of paint put-on and not by the gallon.

A gallon of paint in the can is of no account to anybody. Put it on. Now reckon its cost and value.

The secret is: one paint goes twice as far as another. A good one goes twice as far as a bad one.

You have a job, say an average job: It'll take 10 gallons Devoe and 12 or 15 or 18 or 20 of middling poor very-poor and trash. You know painter's wages in your town. Put the price of a gallon of paint and the painter's day-wage together. You can, we can't.

Devoe costs less than any inferior paint; there are hundreds of them.

One paint is as good as another, so long as it lasts good; one lasts months and another years; and the one that goes further lasts longest.

DEVOE

L. P. Smith Co. sells it.

Mrs. Levi Cook is the guest of Mr. and Mrs. Leon Porter.

Mrs. Henry Carter of Oswego spent last week with her mother, Mrs. Emma Stinge.

Dale Lester of Long Island is the guest of his grandmother, Mrs. Augusta Clute.

Miss Mabel Echard is clerk in the Hammond store for the summer.

Mrs. O. J. Adamy entertained the Larkin club Tuesday.

Reeves Leonard has a new Ford car.

Will Cowles has a fine new rubber-tired omnibus for use on the depot line.

Mr. and Mrs. Howard Cole will soon remove to Hannibal where he has a position in the Tucker cheese factory.

Miss Nina Padden, daughter of Mr. and Mrs. Fred Padden, who has been suffering from blood poisoning in the left hand had the index finger removed at the Oswego hospital last week.

Miss Marian Willsie was the guest of Miss Lula Adamy last Thursday.

Roy Hammond was injured recently by being thrown from a motorcycle. The ligaments of his right ankle were badly injured.

Mrs. Barbara Rafel, Miss Maggie Kelly, Miss Lena Krugg and Mr. Brightenburg of Canton were recent guests of Mr. and Mrs. Leon Porter.

Miss Mary Adamy and niece, Louise Adamys of Syracuse will spend the week at O. J. Adamy's.

Miss Rosa Ford was the Sunday guest of Miss Mabel Cooper.

Rev. Jacob Hann had the misfortune to lose a valuable Jersey cow Monday.

The wedding of Miss Hazel Wilson, daughter of Mr. and Mrs. James Wilsonñ to Mr. Howard Farnham, will take place at the home of the bride on Tuesday, June 29. They have the best wishes of many friends.

Miss Estelle Hyatt entertained the following high school teachers Tuesday, June 22, at dinner at her home in Auburn st.: Mrs. Patchen, Mr. A. F. Corbin, the Misses Klett, Windsor, Becker and Crandall. Miss Hyatt gave several selections on her new piano, and Mr. Corbin on his mandolin.

The Gleaners and Junior Baraca classes of the Baptist Sunday school will hold a lawn festival at the home of James Rowe on the Oswego road Friday evening, July 9.

Mrs. Paul Brown and mother left Wednesday for Milheim, Pa., where they will spend some time with her husband, Rev. Paul Brown, who is engaged in evangelical work at that place.

Mr. and Mrs. R. A. Bradt entertained Rev. and Mrs. J. B. Stallwood of Oswego and Prof. and Mrs. Lockwood of North Hannibal at dinner Tuesday of last week.

Miss Sadie Adamy will go to Syracuse Saturday to spend a week with her brothers, V. J. and E. W. Adamy.

Mrs. Charles Eldredge and children of Chicago are guests of her father, Delos Perkins.

Leon Reed and family are guests of their parents, Mr. and Mrs. Frank Reed.

Mrs. E. C. Clawson is quite ill; her sister, Mrs. Hannum, of Fulton, is caring for her.

C. A. Cox and family and Harry Hewitt and family will spend next Saturday and Sunday with friends in Fairport.

C. B. Brower, jr., spent the first of the week with his parents here.

Mrs. Ralph Walker has bought the J. A. Haven place on Rochester st.; consideration $1600.

Mr. and Mrs. L. M. Mead of Wolcott attended the commencement exercises Tuesday evening.

The ladies of Huldah Capter, Order of the Eastern Star, will hold their fifth anniversary at the home of Mrs. Frang Byrne Wednesday afternoon, June 30. A picnic dinner will be served at six o'clock to members and their families.

Mrs. E. H. Atwater of Oswego is the guest of her daughter, Mrs. Chas. Rogers.

Miss Rena Farnham sang at the commenment exercises of the Oswego City hospital Tuesday evening.

Mrs. George Minar was a guest of Prof. and Mrs. Roy Loockwood the past week.

The district conference of the Ontario district of the M. E. church was held at Vernon, Tuesday and Wednesday, June 29-30.

Mrs. Oscar Clark has returned from Fulton where she has been for treatment at the hospital.

Commencement week is over and everything combined to make it a very pleasant event and one to be long remembered. Grade promotion was the occasion of a very interesting little drama, "The Old Time Deestrick Schule," in three acts. Leona Sayre acted well the part of Miss Ritter Shausen, the teacher; Howard Wilson as Obadiah Buzzard, the bad boy; Duane Fullerton, the stammerer; Eleanor Lockwood, the girls who lisps; Leon Sayre, as Samuel Snooks and Willis Kenyon, as Sam Dipsey, were each almost if not quite perfect in their special part. The costumes were overalls and pinafores. The pantomime by senior girls, "Abide With Me," was beautifully rendered, also a song, "Sunlight Land,", by Mabel Eckard. After the program the diplomas were conferred by Prof. Lockwood.

Tuesday night the Presbyterian church was beautifully decorated with ferns and daisy chains, while above the pulpit was a large floral shield with '15 in purple on a background of white daisies. After two selections by Webbs orchestra, of Fulton, the class conducted the speaker, Rev. Jabez Stallwood, to the platform the orchestra playing the Kaiser Fredrich March. After the invocation by Rev. T. W. Dunning, came the address on the topic, "Design in Nature," and "Plan in History," which was a forceful and inspiring theme and well calculated to impress the members of thee class with the importance of a definite plan in their life work, and also persistence and perseverance in carrying out their plan, and that there is no easy way to success. Mr. Stallwood was a former pastor of the M. E. church and had many friends in that, as well as the others churches to give him a cordial welcome, and held the interested attention of the large audience to the end. Professor Lockwood conferred the diplomas to the large class of sixteen as follows: Lula Frances Adamy, training class, Hannibal; Elinor Babcock, secretary, Hannibal; Rena Burt, Hannibal; John Forecutt, Fair Haven; Rose Ford, treasurer, Hannibal; Martha Gay, training class, Hannibal; Harold Howland, Martville; Everett Rampel, Hannibal; Florence Lockwood, Hannibal; Robert Metcalf, president, Sterling; Amy Stone, training class, Sterling; Martha Shults, training class, Hannibal; Brink Van Hoesen, high school and training class, Martville; Marion Wiltsie, high school and training class, Hannibal; Arthur Eno, training class, Martville; Ethel Youngs, training class, Hannibal. The alumni banquet was held Wednesday evening in the Presbyterian church parlors and was the crowning event. Much credit is due Mrs. Blaine Welling, formerly domestic science teacher in the high school, for the beautifully laid table and the delicious menu planned and arranged by her. Miss Blanche Hall,'03, was an ideal toastmistress and the toasts were of a high order, as follows: Troubles, Mr. N. H. Van Auken; Perspective, Mrs. Harry Powers,'02; Just Out, Mr. Robert eMtcalf,'15. Duet, violin and piano, Miss Nellie Acker and Mrs. Bessie Bannum; Emergency, Mr. Arthur Eno,'14; Influence, Miss Mabel Crandall,'05; Women, Mr. Fred Kent,'10; Solo, Mr. Harry Powers; Slow Down, Miss Ada Engle,'10; Graft, Mr. Karl Wormuth,'07; Reading, Mrs. Fred Kent; On the Firing Line, Mr. Allen Lockwood,'12.

The menu follows:

Strawberries with Sugar
Creamed Salmon Saratoga Chips
Olives Radishes
Rolls
Nut Bread Sandwiches
Cucumber Baskets
Cheese Crackers
Ice Cream Sandwiches
Fruit Punch
Nuts

For thrush use Hanford's Balsam.

DRAFT HORSE PRIZE LIST

Oswego County Fair to Have Increase in Draft Horse Prizes This Year.

The Oswego County Agricultural Society announces that the list of premiums for young draft horses has been arranged by the Breeding Bureau of the Jockey Club for the 1915 fair which will be held in this city August 17-20.

The secretary of the Bureau, Algernon Dangerfield, sends the following communication:

"The Breeding Bureau of the Jockey Club desires to offer a special premium of $50 at your fair for the best foal of 1915, as sired by the stallions placed by the Breeding Bureau of the Jockel Club doing stud duty in your county, this prize to be divided, $25 to first, $15 to second and $10 to third.

"The Breeding Bureau also will offer a special futurity prize of $400, $250 to first, $100 to second and $50 to third, for the best yearlings as shown at the New York State Fair, Syracuse, in 1916, this special premium to be open to any of the get of the Breeding Bureau stallions which competed in 1915 for any of the special prizes as offered by the Breeding Bureau of the Jockey Club in 1915, and which were awarded first, second or third prizes.

"You will see that foals which were placed first, second or third at your fair this year will be eligible for this special yearling prze in 1916, and we would appreciate your adding this notice of the futury prize in advertising the premium offered by your association.

"May I ask that a careful report of the awards as made at your fair be sent this office when the fair is over so we may know just what yearlings will be eligible for the Breeding Bureau Futurity prizes in 1916."

AUBURN LAWNS EXCEL THOSE OF OTHER TOWNS

Auburn.—For many years the city of Auburn has been noted for its beautiful residences and the lawns which surround these residences, and this year is no exception. The casual stranger, who is invited here and is taken up South street, remarks that this is really one of the prettiest streets in New York State. The whole street is a picture with its beautiful avenue of overspreading elms, the tops of which meet overhead to make a canopy for the entire thoroughfare.

It is impossible to describe in detail all of the lawns on the foremost residential street of the "loveliest city of the plain," but it would be worth the ten minutes for anyone not blessed with an automobile to walk up to a short distance beyond Union avenue and take in the beauties of the places.

Beginning with the far-famed and time-honored mansion of the William H. Seward family at the lower part of the street, and then considering the park which joins this residence, one would not have to look any farther for one of the most beautiful and best taken care of estates in the state.

To the casual observer the lawns at the front of the homes are those which attract and sometimes the whole place is judged by these external features, but often the most beautiful and spacious lawns are at the rear of the estate and not seen unless looked for. In fact, it is a delight to glance down the driveways and see what has been accomplished in that department of the gronds.

A large percentage of the homes in the street have for their outdoor ... the mere broad greensward of grass, but there are two gardens ...ving especial mention. One is ... Italian garden connected with ...sidence of Rev. and Mrs. Clem... Brown, which is resplendent this ... with its rows and rows of pink ...ias. It is not so easily observed ... the street as the MacDougall ...ns. Just at present the most at...ive and those which make the ... showy appearance at this time ... the year, are the blue Canterbury ..., which are shown in large num..., and the lovely wild rose, which ... a border along the the front.

One of the important features of the ...y of the old D. M. Osborne place ... the magnitude and distribution of ...trees.

THE ONE SURVIVOR

Great Disasters In Which a Solitary Life Was Spared.

TALES OF NARROW ESCAPES.

Curious Case of a St. Pierre Prisoner During the Mont Pelee Eruption. The British Retreat From Cabul—A Tragedy of the Terrible Manacles.

There are many curious cases on record where death in one of its many dread forms of disaster grips an entire party in its clammy embrace and then, while its icy fingers close upon the last, lets one solitary member of the band slip away to be the sole survivor of the tragic calamity.

One hundred and fifty-eight dead, one saved. That was in brief the tale of the wreck of the mail steamer General Chanzy, which struck in the terrible storm of Feb. 10, 1910, on the rocks of northwest Minorca.

Marcel Bader, the solitary survivor from the wreck of the Chanzy, owed his preservation entirely to the fact that he was a strong and fearless swimmer.

A few years ago the timber vessel Anna Rebekka, one day out of Memel, was caught in a squall and capsized. Most of her crew were swept away and drowned, but three—the skipper, a sailor and the ship's boy—clambered on to the keel, where they drifted without food or drink. On the third day the sailor was washed off, but the skipper saved him. Then the boy went mad and died. On the fifth day the sailor was washed off again, and this time the captain had no strength to help him. On the seventh day the capsized vessel drifted in sight of land. A lifeboat put out and found the captain still alive.

The Manacles have seen many sights of horror, but none to excel that January night many years ago when two British troopships—the Dispatch and the Primrose—both went ashore on these terrible rocks within a few hours of one another. Seven soldiers struggled ashore from the Dispatch through the crashing breakers and roused the village of St. Neverne. When the fishermen gained the beach the Dispatch had vanished. But there was the second ship—the Primrose—on the rocks. They pushed out, but the doomed vessel was shattered to fragments before they could reach her, and all that the boat brought back was a fifteen-year-old ship's boy, whom they picked up swimming desperately in the trough of the icy waves.

Perhaps the most terrible disaster in modern British history was the retreat from Cabul in the winter of 1842. An army of 3,480 soldiers, with over 12,000 camp followers, started southward from the Afghan capital under promise of safe conduct. On the following Jan. 18 a solitary figure, filthy, unshaven, unkempt, his mind almost destroyed with the horrors through which he had passed, rode out of the mouth of the Khyber pass. He was Dr. Brydone, the only survivor from all that mighty host. The bodies of the rest, slain by the treacherous Ghilzais, lay scattered for miles along the snowclad floor of the defile.

It was stupidity, not treachery, which caused the disaster to a battalion of a [illegible] regiment in January, 1901. On the 23d of that month a detachment of 210 men and officers, under command of a major, left the town of [illegible]mbri for a long route march. It came on to snow very heavily, and soon a regular blizzard was raging, with the temperature many degrees below freezing point.

They lost their way and wandered on, burning their rifle stocks for fuel. By the 25th only seventy-one were left alive. On the afternoon of the 27th a corporal alone was picked up by a relief party, alive but badly frozen.

At the end of April, 1902, Mount Pelee, the blunt headed volcano behind St. Pierre, began to show signs of activity. These increased until on May 8 a little before 8 in the morning there was a terrific roar, and a huge column of whitehot sand, burning cinders and poisonous gases came rolling down the mountain side.

Whatever that cloud consisted of, it destroyed St. Pierre completely. The very stones were cracked with the awful heat, and within a few seconds 40,000 human beings perished. Yet days afterward, when the ruins were cool enough to explore, a man was found alive. He was a negro prisoner who had been confined in an underground cell and who, though scorched, scarred and almost suffocated, still survived—the only living thing in fifty square miles.—London Answers.

Soothed Her.

Among the many stories about the bishop of London is one told of him and a dying girl who trembled at the thought of death. "Would you be afraid if I were to carry you into the next room?" he asked. And the girl shook her head. "Then why should you be afraid of being carried away by one who is ten thousand times kinder and more loving?"—London Express.

The Change of Mind.

"What's the baby's name, Bill?"

"Algernon."

"What? I thought you were going to name him John!"

"Oh, that was when I still thought I had something to say in the matter."—Philadelphia Ledger.

Idleness begets vices as standing water produces serpents. Vices are whetstones which sharpen Time's scythe.

Transforming Clothesline Posts.

A suburban resident grew tired of the wooden clothesline posts in his back yard. He incased them in chicken wire netting and planted sprouts of honeysuckle around the posts. He then nailed a little bird house to the top of each. In a short time the honeysuckle had completely covered the unsightly posts and a pair of bluebirds built a nest in one of the houses. Many of this man's neighbors took up the idea, and honeysuckle vines and bird houses now make the clothesline posts of his locality a pride to their owners.—House and Garden.

Her Other Half.

Society Dame—Oh, doctor, I'm so sorely troubled with ennui. Doctor—H'm! Why don't you interest yourself in finding out how the other half lives? Society Dame—Gracious! Why, I'm not looking for a divorce.—Chicago News.

Time Something Started.

"Have you noticed the clock?" he asked at the hour of midnight.

"Yes, I have," she replied, with a

61 First Street

OLUF NEILSON MAY COME HERE

Young Jersey Wrestler a Probable Fair Attraction; to Meet Young Ajax at Asbury, July 4th.

Henry Neilsen, of this city, formerly of Asbury Park, N. J., a brother of Oluf Neilsen, undefeated light heavyweight wrestler, is making plans to have his brother come to this city during Fair week for the purpose of meeting all comers in bouts. Hank Mott, the West Side Iron Man, who is now with a carnival company touring the East, is one of the probable opponents of Neilsen.

Young Neilsen, who weighs only 180 pounds, has been the talk of the metropolitan section since his entrance into the wrestling game some months ago. He has appeared in several bouts in New York city and Asbury Park, a summer resort town, which has gone crazy over the wrestling game. During his short career he has never been defeated and has victories over the following to his credit: Joe Rezek, the Bavarian champion; Peo Padello, Italianchampion; Sandele, the Greek; Pat Connolly the Dublin Giant; who beat Americus, considered one of the best wrestlers in the game; Ivan Orloff the Russian; Paul Samson; Frank Hockman, the German champion; Jack Windrow, American catch-as-catchcan title holder, and others. All of these men outweigh young Neilsen anywhere from twenty to fifty pounds and in his bout with Orloff he gave away 77 pounds.

Henry Neilsen will leave this city Saturday night for Asbury Park where he will see his brother meet Young Ajax in a bout on July Fourth.

Young Neilsen's work has been a revelation to followers of the wrestling game, and he is noted for his great versatitlity and ability to get himself out of apparently secure holds. He is slated for a match with Zbysko, the famous Pole, in the near future, and in the opinion of many sporting writers who have watched him work, he is the coming lightheavweight champion.

G. F. Seeger of Jonesboro, Ill., says: "Hanford's Balsam of Myrrh has taken the place of all gall cures in this vicinity. We have only to sell our customers the first bottle, after which we have no trouble in selling him again or his neighbor."

NEAHTAWANTA LODGE INSTALLATION JULY 7

The newly elected officers of Neahtowanta Lodge, I.O.O.F., will be installed next Wednesday evening, according to a circular letter received from District Deputy Grand Master W. D. Thompson of Phoenix. The letter follows:

"I will make an official visit to the various Odd Fellow lodges of this district for the purpose of installation of officers on the following dates: Golden Rule No. 77, Tuesday evening, July 6; Neahtawanta No. 245, Wednesday evening, July 7; Oswegatchie No. 156, Thursday evening, July 8; Ahwaga No. 206, Wedensday evening, July 21; Lycoming No. 446. Friday evening, July 9; Beacon Light No. 464, Saturday evening, July 10; Ontario No. 610, Wednesday evening, July 14; Hannibal No. 662, Monday evening, July 12.

W. D. Thompson, D.D.G.M."

Beware of Ointments for Catarrh that Contain Mercury

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists. Price 75c per bottle.

Take Hall's Family Pills for constipation.

Always keep Hanford's Balsam in your stable for accidents.

LEGAL NOTICES

SEALED PROPOSALS

Addition to Oswego County Tuberculosis Hospital, Orwell, New York

Sealed proposals will be received at the office of the Board of Managers, Orwell, New York, until 11 a.m., July 7, 1915, for erecting and equipping the proosed addition to the Oswego County Tuberculosis Hospital Building at Orwell, New York, in accordance with plans and specifications, which may be seen at the office of the Architect, L. L. Cope, Theatre Building, Oswego, New York.

Separate proposals for the following will be received:

1. General construction.
2. Plumbing.
3. Steam heating.
4. Electrical wiring.

The Board of Managers reserve the right to reject any and all proposals.

A certified check for five per cent. (5 per cent.) of the total amount of each proposal payable to the order of the Treasurer of Oswego County, New York, must accompany each proposal, the same to be forfeited upon failure to enter into contract within five days after notice of award from the President of the Board of Managers.

Upon deposit with the Architect of a certified check for twenty-five dollars ($25.00) payable to the order of the President of the board, the whole set of plans and specifications, or of a certified check for fifteen dollars ($15.00) payable to the order of the President of the Board, a set of mechanical equipment plans and specifications or a set of general construction plans and specifications will be furnished to prospective bidders when application is made to said architect.

The proceeds of these checks will be returned to the makers upon the return of the plans and specifications, after deducting the actual cost of the blue prints and speeifications furnished.

Dated June 16, 1915.

A Good Household Salve

Ordinary ailments anl injuries are not of themselves serious, but infection or low vitality may make them dangerous. Don't neglect a cut, sore bruise or hurt because it's small. Blood Poison has resulted from a pinprick or scratch. For all such ailments Bucklen's Arnica Salve is excellent. It protects and heals the hurt; is antiseptic, kills infection and prevents dangerous complications. Good for all Skin Blemishes, Pimples, Salt Rheum, Eczema. Get an original 2-ounce 25c. box from your Druggist.

THE TROUSSEAU.

Where You Are Going Will More or Less Influence Your Choice.

Some very smart weddings of recent years have been followed by a retreat to the country, to a bungalow or camp loaned for the occasion, where an idyllic week or so might be passed in solitude a deux. The girl who hopes to avoid trousseau problems by such a ruse only postpones her difficulties, or rather privileges, in this respect, for upon her return to civilization she will be expected to display as many pretty frocks as her neighbor.

Many girls from the small towns find in their wedding journey a delightful opportunity for a trip to a great city, and this idea has a good deal to recommend it. Both will find an inspiration and a refreshment in the thorough change of environment. In this case the trousseau need not occupy an unreasonable portion of the bride's time. Indeed, it is a mistake to be burdened by too much impedimenta. A smart silk suit for a "going away" gown, a chiffon or net afternoon frock or two, a one piece gown for the street and a couple of taffeta theater and restaurant gowns, with hats and blouses, dainty shoes and stockings, a pile of ethereal lingerie and some charming negligees for resting hours will be sufficient.

If the young couple are spending their first summer at a smart resort, the bride will need a greater variety. It is well to remember that nothing is more appropriate for morning wear than the simple white skirts and blouses in which a girl often looks her best. Pique is the newest material for the skirts, and they should be cut to flare somewhat, though not unduly.

The wardrobe for morning, afternoon and evening being settled, there remains that crux of the whole affair—the wedding gown. Stately tradition

A BRIDAL COSTUME.

is somewhat relaxed here also. Satin that "stands alone" and a three yard train, the whole ensemble as dignified and matronly as possible, were once the rule. We have changed all that too. White satin with a court train is still permissible, even desirable, if the wedding is to be a formal one in a great city church.

For a country or small church ceremony, or for a more intimate house affair, however, the gown of lace net or chiffon seems more appropriate and wearable. The skirt is neither short nor long, but just sweeps the ground all round and is apt to be made up of ruffles. The tulle veil and orange blossoms still reign supreme—but have a care in the arrangement, for they can be most horribly unbecoming. It is a fairly safe rule to keep the head as small as possible and to avoid bunching. A garland around the head of orange buds or seed pearls is charming if a line across the forehead is becoming to you. If not, a tulle veil that is pulled on at the back and a short plain veil of lace over the face and head often make a better arrangement.

The gown in the illustration is pretty and not too elaborate. It is short, the train being supplied by the long tulle veil which is fastened to a pretty little Dutch cap. The gown is of white chiffon made with a rose point bodice and peplum.

The Time to Call.

The well bred woman is more than particular in the matter of calls—calls of common courtesy, dinner calls, calls of condolence or of congratulation. For the woman of few social obligations there is absolutely no excuse for ignoring the few rules to be observed in calling. Only the woman whose social life is one mad round of entertainments is justified in making her cards serve calling duty without her.

In a large city women call between the hours of 3 and half past 6 o'clock in the afternoon.

If the woman on whom you intend to call has an afternoon at home always select that day for your call.

In the small towns, the suburbs and country colonies calling is permissible both afternoon and evening, but even a suburbanite does not like to be caught unawares in the morning.

DAINTY DANCE DRESS.

Maize Colored, Flowered With Pastel Figure and Lace Trimmed.

FOR THE SUMMER GIRL.

A dainty dance dress of pussy willow taffeta in maize color with pastel flowered figure is shown in the illustration. A lace trimmed drop peeps from under the circular skirt while a suggestion of a bodice with draped satin girdle and streamer ends afford a charming combination. Silk net in soft folds and plaited sleeve caps with dainty flowers supply all that is necessary to the bodice.

THE SUNNY SIDE.

Do Not Envy Your Neighbor; He Has Troubles of His Own.

Don't allow yourself to fall into the way of thinking that you have all the troubles there are in the world. Don't for a moment think that life is unfair, that the scales are unevenly balanced by an unjust fate; that you have all the sorrows and cares while some one else has all the joys. You will be in a bad way when you begin to follow such a train of thought.

Life is, after all, very square, very even. If we have sorrows we also have joys. If we have shadows we also have sunshine. But neither you nor any one of us can have a monopoly of either the shadows or the sunbeams; we each have an equal share of both. And if any one of us seems to have more than his share of shadows, if he seems to have been given the lion's share of care and trouble, it is only because he does not make the most of the sunshine while it is with him. He is too busy worrying about the sorrow he has had and the care he may have in the future to enjoy the happiness of the present.

Don't envy your neighbor who rolls about in a high priced automobile, while you have to walk. He has his share of troubles, even though poverty may not be among them. Don't wish you were in his place just because he seems to have every luxury. If you were in his place you might give anything to be back home again in your own home.

Our happiness is such as we make it. It is lying ready within hand's reach. We have only to stretch out our arms and take it. The difficulty is that most of us are too busy looking for trouble to see the happiness at our door. Most of us are no sooner through with the problems of today than we begin anticipating the difficulties of tomorrow. Is it any wonder that we find so much trouble in life when we are looking for it so unceasingly?

Let us reverse our usual mental processes and begin looking for happiness. If we keep thinking of the pleasures of life we will surely find them. "Search and ye will find." This being so, why not search for the beautiful, the happy and the bright instead of the dark and gloomy? Let us forget about trouble for awhile and look only for joy. You will be surprised to see how much of it you will find.

Don't let the shadows which fall on every path spoil your enjoyment of the sunshine. Far better to fill your mind so full of the subeams that when the shadows fall you will not notice them for the brightness in your heart.

Timely Tips.

Here is a description of an outside coat that one can wear through an entire day, say, if one comes to town from the country home, goes shopping in the morning, to tea in the afternoon and stays in town to dine and the theater. For this suede cloth or a first class duvetyn is just right. Taube, dull green or one of the dull orange or golden brown shades can be had in these materials. A king's blue, futurist or Roman striped lining gives life to such a garment and lends it individuality when it is thrown back over the chair.

BERNHARD'S BAY

Allen Ferris was a guest of his sister, Mrs. Will Crossman, Thursday evening, returning Friday morning.

Mr. and Mrs. Doyles returned to their home in Syracuse after spending a week in the cottage here.

Mrs. Addison Winn from Utica is here at her summer cottage for some time.

Mrs. Sarah Brocket returned from Oneida where she spent the winter.

Mrs. Norman Tice and son Earl of Syracuse are at their cottage for some time.

Norman Tice returned to Syracuse after spending a week at his cottage.

Mrs. J. E. Peachin, son Silas and daughters Blanche and Jean spent Friday with Mrs. James Peachin of West Vienna.

Miss Flossie Coady is spending sometime at Syracuse.

Cecil Pierce of Syracuse spent several days with his family here recently.

Dick Webb is home from Syracuse for a few days.

Mrs. B. Russell and daughters of Chittenango is spending some time with her aunt, Mrs. William Wood.

Mrs. L. P. Mardsan returned home from Minoa where she has spent the winter.

Mrs. J. E. Peachin entertained George Haight and Mr. and Mrs. Perry Haight over Sunday.

Mrs. Norman Tice and son returned to Syracuse after spending a week at her cottage.

PALERMO VILLAGE

Mrs. Mary Vincent and Miss Rose Vincent are visiting friends in Oswego.

Mrs. Frank Dolbear of Syracuse was the guest of her father, Willis Jennings, on Monday. Mr. Jennings, who has been ill for several months, still continues about the same.

George Hills and daughter, Miss Clara Hills, are spending the week visiting friends in Syracuse. They will be accompanied home by Mr. Hills' granddaughter, little Miss Betty Attwater of New York, who will remain with them during the summer.

Mr. and Mrs. Glenn D. Trimble, Mr. and Mrs. Matthew Frawley and Mrs. M. F. Tooley motored to Oswego on Thursday evening to attend the commencement exercises at Normal hall. They were the guests of the Misses Minnie and Ivah Tooley, who are members of the graduating class.

Granite Grange held a mystery social and entertainment at Trimble's hall on Friday evening. The receipts of the evening were about ten dollars.

Mr. and Mrs. Oakes Ames of Mexico were Sunday guests of Mr. and Mrs. Glenn D. Trimble.

The Picnic Dinner club held their outing at Onondaga Park on Saturday. Those to enjoy the motor trip and picnic dinner were: Mr. and Mrs. Ray Vrooman, of Central Square; Mr. and Mrs. Glenn D. Trimble, Mr. and Mrs. Matthew Frawley, Mr. and Mrs. Fred Trimble and Mr. and Mrs. Lee C. Loomis.

To Rent—Offices and apartments in the Waldhorn block, 1st st. tf

To Rent—Rooms in Waldhorn block. Offices and living rooms. tf

NEW PLAYGROUND GETS APPARATUS

The new West Side playground arranged under the direction of John W. Stevenson, of the American Woolen Mills, will be the setting for the apparatus purchased for the public playground on the East Side last year.

The playground opened last year in 4th st. through the efforts of the Woman's Civic League was Fulton's first public playground and at the close of the season was counted a great success. More than three hundred dollars had been expended on the equipment and Mrs. Kesler assisted by Bruce Steele supervised the grounds during play hours. The hundreds of children who flocked daily to the grounds taxed the space to its capacity and at times the congested condition of the grounds made order an impossibility.

Mrs. Earle Brown, as chairman of th playground committee of the league gave her undivided attention to the project last summer. F. E. Goodjon, Jesse Morrill and Rev. M. G. Buck also worked like Trojans in the cause. Many other persons gave financial and moral support to the cause, and it is with a general feeling of satisfaction in the city at large that the equipment, swings, slides, toboggan, and teeters will be transplanted to a larger field in the city.

The equipment will be placed on the new grounds within a few days.

SALVATION ARMY TO HOLD ANNUAL TAG DAY

The Salvation Army on the Fourth will observe its annualTag day for the benefit of the poor children's picnic. Buttons will be used in place of tags this year and which bear the ensigma of the Stars and Stripes, and the words—"I feel better now, I've helped a good cause."

Do You Favor Spending $300 for Good Music?

The Fulton Common Council will meet tomorrow night to decide once for all the question of band-concert appropriations this summer. The Chamber of Commerce has signified its willingness to donate $300 for summer concerts if the city will appropriate an equal amount. With the $600 thus raised the band can give a series of ten concerts at the average cost of $60 per concert.

The appropriation requires the unanimous vote of the council and at Monday night's session Alderman Myron Foster of the Fourth ward opposed the measure for economical reasons. In Mr. Foster's opinion conditions in the city at present do not warrant the expenditure of $300 on amusement of any kind when there are other city funds which could well use that amount to greater and more permanent advantage. The other aldermen are unanimously in favor of the concerts although Alderman Gardner thinks the price too high.

L. F. Cornell, John W. Stevenson and others appeared at the council meeting Monday to speak in favor of the concert idea and there is no question but that there are many who think the concerts should be held.

Alderman Foster said he had no objections personally but did not believe the great majority of the taxpayers are in favor of it, inasmuch as there are other needs more pressing at present. In order that he might learn the sentiment of the people of his ward by petition, the council adjourned until tomorrow evening. A petition is being circulated in the 4th ward today.

SHORT MEASURE BARRELS IN WATERTOWN

Watertown. — Approximately 150 short measure barrels containing potatoes have been unearthed among the retail grocers of this city by Frank E. Martell, city sealer of weights and measures. Mr. Martell has reported his discovery to both the attorney general and to the state department of weights and measures. He is now awaiting a reply from Albany. In many instances the barrels have been short several cubic inches and with new potatoes bringing the prices that they now are, the loss becomes considerable to the purchaser.

BICKET-LOBEY

Last evening at 8:30 o'clock at the Congregational church in Phoenix Miss Rachel Lobey became the bride of Walter Bicket of this city. Rev. E. C. Allen performed the ceremony. Miss Nina Brown and Lawrence Ranger, both of this city, attended the couple.

The bride wore a handsome gown of white embroidered voile, a white picture hat, and carried white roses. The bridesmaid wore yellow messaline with lace overdess and carried yellow roses.

After the ceremony the couple returned to this city where a luncheon was served and a reception held at the home of Mrs. John Barclay in Park st.

Mr. and Mrs. Bicket left the city later in the evening in an appropriately decorated auto. Tin cans, old shoes and rice were very much in evidence. The couple will motor to points of interest in Maine before returning to the city.

MRS. CORNELIA POOLER

Mrs. Cornelia Pooler, 69, died this morning at the home of her son, Frederick Pooler, 318 South 3d st.

Surviving are three daughters, Mrs. Ada Spencer, of Phoenix; Mrs. Eva Ware, of Granby, and Mrs. Flora Barnes, of this city. One son, Frederock Pooler, and a brother, Charles Baker, of Lansing, Mich., also survive.

Funeral arrangements have not yet been made.

THE QUIRK TODAY

Max Figman, the celebrated metropolitan actor, and Lolita Robertson of equal prominence, are joint stars in the production of "The Truth Wagon" from the play by that name by Hayden Talbot. An exceptionally strong cast of players are used in the protion, guaranteeing a finished masterpicture. Others will be shown. Tomorrow will be Big Feature day when the Vitagraph blue ribbon feature, "The Juggernaut" will be the offering.

TEUTON ALLIES LOSE NEARLY 400,000 MEN

(Continued from Page One)

continue pouring fresh troops, which will be increasingly difficult to obtain, in order to hold their positions, while if they go away, which all consider eventually will be necessary in order to defend their own frontiers, the whole edifice of the Austrian defensive will collapse.

To understand Russia's campaign in Galicia, one must realize the Russian point of view, which is that they can retreat and advance indefinitely, caring little for moral effects and loss of towns, so long as they are weakening the enemy. There is an increasing tendency here to manoeuvre to prevent the war from getting to a trench deadlock on the western and Warsaw fronts.

Probably the Germans will make further frantic attacks here and there on this front which the Russians now are complacently awaiting, confident that in each of these, as they believe is the case with the whole Galician campaign, the losses of the Teutons will be entirely incommensurate with their gains.

The net result of each movement will indicate to the Teutons that these costly advances destroy neither the morale nor strength of the Russians who two days after their retreat are recuperated and ready for further fighting.

BRITAIN'S NAVY BIGGER THAN WHEN WAR BEGAN

(Continued from Page One)

Dardanelles describes the terrible effet of the fire of the British war ships. He visited the town of Tschanak Kaleh, which he found a heap of ruins. The forts are still standing just as complete and as strong as they ever were. But the whole town inside is a smoking mass of ruins.

"Where his shells could not reach, the enemy sent airmen to destroy any life that was still left in the town, or any supplies that could be concealed in the dserted buildings. These unwelcome guests no longer throw the old fashioned dynamite bombs, but cleverly devised machines which are the last word of technical science.

"And now, on the other side of the straits, in the town of Maidos a great flame shoots up from a cloud of smoke, for a great building is on fire. The place is burning at many other spots, and the reflection of the fire dances on the foam crested waves with ghostly movements. Above the hills on the European side the searchlights of the English war ships play. Suddenly there is a flash of light as clear as day over the entire horizon and a terrible broadside is delivered at Maidos, to be followed by two sharp detonations.

"A fresh fire starts, new and meaningless destruction is inflicted on the peaceful inhabitantsfi with the idea of making all existence as difficult as possible in the Dardanelles." And now, as the inhabitants, with the help of the soldiers, put out the fire, the rattle of the machine guns sounds on the ear, broken by the thunder of the ships' guns, which send a hail of shrapnel on the attacking ranks of the Turkish infantry, or attempts to destroy their camps. The roll of the machine guns sounds for an hour at a time without any break.

"And if for an instant the guns are silent, then one knows that on the other side of the waters the night battle with the bayonet and the bomb, the revolver and the side arm, that bloodiest conflict of man with man, is going on, and one recalls the fact that the Turkish troops have proved themselves the most terrible combatants with the bayonet in these night affrays. * * * In spite of all his efforts the enemy still stands where he landed, under the fire of his ships.

What plans the Allies have, what resources they may be abel to develop no one can say, Perhaps they do not know at Tenedos. No one can say what significance the illness of the French general, d'Amade, mny have for the operations on the Dardanelles. But the Turks and their allies know that the Dardanelles, even with this land force, never can be stormed.

Thespians Drew Large Crowd at The Quirk

The play, "The Fortune Hunter," produced for the second time by the class of 1915 of Fulton High school at The Quirk last night, drew a large crowd to the playhouse. While the theatre was not as crowded as at the first performance, the attendance was large, and the youthful thespians were made to feel that their efforts were appreciated.

The results of two more rehearsals and careful training coupled with the experience gained in the first performance were evident last night. There were no breaks, and all the members ofthe cast improved upon their work of last week.

Leland Carner, as "Nat Duncan," again showed his worth and had the audience with him from the start. Harold Caffrey, as "Henry Kellogg," and Marshal Penfield, as "Sam Graham," the old druggist, handled their parts in a manner that would have done credit to finished artists of long experience.

The Misses Eryma Paige, Florence Moody and Rose Walsh in the feminnine roles displayed marked ability and entered into the spirit of the characters portrayed with true artistic interpretation.

AUXILIARY MEETING

The monthly meeting of the Women's auxiliary of the Lee Memorial hospital will be held Thursday afternoon, July 1st, at 4 o'clock in the Citizens' Club rooms.

Clark Wants $30 for Use of His Auto

Chief of Police Dyer last night arrested Fred Lavigne, formerly of this city but now of Watertown, on a charge of petit larceny preferred by Edward Clark who operates taxicabs in this city. Clark alleged that Lavigne, while in his employ two weeks ago, took one of his touring cars to Syracuse on a joy-ride and stayed away with it all day and all night. When he returned with the car, he decamped without taking the trouble to explain his absence to the owner.

Clark figures that the car might have earned $30 had it been in service here during the time Lavigne had it in Syracuse. He swore out a warrant for the arrest of Lavigne last week.

When arraigned before Judge Wilson last night, Lavigne admitted taking the car. Clark was inclined to be lenient and Lavigne was released upon his promise that he would make good the amount to Clark.

PRISONERS COMPLAIN OF FAVORS TO SIEGEL

Rochester.—The several hundred prisoners at the Monroe County Penitentiary are complaining of alleged favors shown to Henry Siegel, former "merchant prince."

The inmates allege Siegel isn ot employed, that he smokes the best cigars and wears only striped trousers. From his waist up, they say, he is dressed like any swell.

Mrs. Lora White Kesler of the high school faculty left the city today and will spend the summer in Syracuse.

* * *

D. P. Morehouse of Oswego was in the city yesterday attending the 184th regiment reunion.

* * *

A. E. Roberts, of the firm of Robers & Wood, has returned from a three-days trip to Rochester and vicinity. Mr. Roberts made the trip in his car.

* * *

George Compo has left the city for a vacation to be spent in the Adirondacks with his parents. He will also make a two months' tour of the West.

MARSHALL SEES MORAL IN SUBMARINE USE

Indianapolis.—In addressing the Indiana Spanish War veterans here today, Vice-President Marshall asked if the great European conflict was demonstrating that a $700,000 submarine could destroy a $7,500,000 superdreadnought, should the people's money b further expended for superdreadnoughts?

The Vice-President made an appeal for the coming of the time "when we will submit all international problems to courts of justice vested with powers to enforce their decrees."

The war veterans sent a telegram to President Wilson pledging their support of hisp olicies.

MISS WYCHERLY TO BE SUFFRAGE "LIBERTY"

New York.—Dr. Anna Shaw, arriving here to aid the woman suffrage cause, was given an automobile, painted suffrage yellow, by the Assembly district workers at the open air meeting in Fifth avenue at 42d st. lesterday. Mrs. James Laidlaw made the presetnation speech.

After great deliberation the Empire State Committee of the Equal Suffrage party has selected Margaret Wycherly, an actress, to act as the Goddess of Liberty and read the women's appeal for liberty at the demonstration to be held July 5.

STATE LIQUOR MEN HEAR BRYAN ATTACKED

Utica.—A combination of interests to crush prohibition was advocated in speeches at the first session today of the New York State Liquor Dealers' Convention here.

David Neuberger, of New York, attacked Bryan and called on his hearers to disavow all allegiance to Bryan. He fermed the prohibition crusade the "result of ignorant prejudice or hypocritical intelligence," declaring John L. Sullivan represented the first class and Bryan the other.

BIG CONCERT HELD IN CHURCH TONIGHT

A musical treat will this evening be offered those who attend the concert to be given at the First M. E. church.

A varied program including vocal, harp, organ, piano, flute and 'cello selections will be given by high grade Fulton and Syracuse talent.

SOUTH GRANBY

Charles Sherman, an old veteran, who died Saturday was buried today at Jacksonville. He died suddenly and leaves a wife and one daughter, Mrs. Floyd Coats.

There is to be a strawberry and ice cream social at the school house Friday night, July 2d, under the auspices of the South Granby Circle, for the Little Utica church.

E. E. Fisher has purchased a new auto.

Miss Flora Fisher returned from Olean Tuesday after a visit of four weeks.

Mrs. Hannah Stewart was the guest of her son, Dan Stewart, last week. She visited one day at Wilson Stewart and returned to Baldwinsville Sunday.

Alonzo Luke had a family gathering Sunday when Ernest and family came home, Kenneth and wife from Sweet Grass, Mont., arrived Wednesday night; Miss Ruth came home from her school, and Arthur also. Miss Frances has not yet arranged.

George Sickles is moving into his new home.

The Bible study and prayer meeting will be held at Harlow Sperbeck's Tuesday evening; Mrs. Reichal as leader.

Mrs. Lottie Cook, who has been caring for Mrs. Ernest Grant, has returned home.

Miss Mary Moore, who held meetings at Little Utica church last winter is now holding revival meetings at Morgan church near Euclid. Mr. Fisher's and Mr. Pingree's people all motored there Friday evening and Mr. Fisher's people went again Sunday evening. Good meetings are reported.

Herman Austin was an over-night guest of his mother Saturday.

Miss Lottie Andrews spent last week at her uncle's, Roy Austin.

Miss Ruth Butler is home again after spending some time at Lysander.

Mr. and Mrs. Amos Ott were Sunday guests of her sister, Mrs. Morgan Butler.

Mr. and Mrs. Delos Distin, Mt. Pleasant, visited their sister, Mrs. Hannah Austin Saturday.

George Crockford and wife visited his siter, Mrs. Carrie Campman Sunday and his mother accompanied them home.

Mrs. Cynthia Lampman is visiting her sisters in Fulton.

A Speaker Who Had the Punch

Sinking of Armenian Regarded as Reply to American Protests

Officials Believe Ship Had No Military Status and That She Should Have Been Treated as Ordinary Merchantman Regardless of Her Cargo.

Washington, July 1.—The attack on the Armenian is considered proof of the determination of the Germans to continue their warfare against British merchant shipping and as affording proof, moreover, to the American public of how such attacks may be expected to involve the lives of American citizens. As soon as the news of the torpedoing of the Armenian was received here today the report was started in sources friendly to the German cause that the attack was without significance, insomuch as the Armenian was in the service of the British government. Just what the status of the Amerian was is not definitely known here, and much depends on this question. But the opinion expressed by men associated with the government today was that there is little possibility that the Armenian had anything like the status of a public vessel of the British government, which would have warranted the Germans in attacking her without providing for the safety of those aboard her.

Had the Armenian been a transport or a public vessel of the British government it would have been the business of the United States government to force her to leave Newport News or to intern within twenty-four hours before she started on her present voyage. It would have been the privilege, moreover, of the German government to protest against the United tSates permitting the clearance of the Armenian and of all of those other ships carrying horses to England. There is no doubt whatever, of course, that if the German government thought for a single moment it could prove the public chacacter of these vessels, including the Armenian, it would have brought the matter to the attention of the United States government and have caused them to be forbidden the right to take cargo and supplies out of this country.

"Either the Armenian was a private vessel, and the Germans were wrong in torpedoing her, or else she was a public vessel, and the United States was wrong in allowing her to leave Newport News.'

This was the comment of one high official today. He ended with the statement that the Germans long ago would have put a stop to this trade with the Allies if they were in a position to prove that htese vessels were transports or public vessels of the British government. He expressed the opinion that the German government would never raise this question in response to representations of the United States government on this case.

GERMAN RESERVISTS FLOCK AROUND POWDER WORKS

Dover, N. J. July 1.—German naval reservists, gathering in several of the little towns in the vicinity of the United States government powder factory here, one of the largest of its kind in the world, not only have aroused so much suspicion that the federal secret service men have them under espionage. it was learned yesterday, but also there is a strong military guard constantly patrolling the mountains surrounding the extensive works.

Within the last few months, when the scrutiny of the men of the crews of the great German steamships tied up at the piers in Hoboken became so strict as to make it uncomfortable, scores of the men scattered to other places. Something like a hundred, it is reported, found their way to Dover and there obtained employment in the large mills. The town has a population of 13,000, and of these probably one-helf or even a greater proportion of the men work in the factories. Most of them are Americans, but recently there has been an influx of foreigners, among whom the Germans are showing very strong.

Whether this movement in the direction of Dover is with the view toward any organized move upon the powder works, is only a matter of conjecture, but the suspicion has grown so strong that the federal government is taking no chances with any of them. Not only is there a large guard around the powder works at night and during gthe day. but the federal secret service men are threading their way all through Dover and the surrounding country, that nothing may escape their attention.

A military guard is maintained at all times. of course. instant telephonic communications and every precaution has been taken that if things ever come to a crisis between the United States and Germany, a regiment could be poured in in two hours' time. The men on duty now could stand off mobs of thousands indefinitely.

PEOPLE'S WORTH

Extract From a Speech by Lucius Wilson at The Clark House, March 15, 1915

(Reprinted from the files of The Evening Times)

Mr. Wilson was asked for the most fitting way of overcoming the doubt, and his reply was straightforward and to the point.

"The Chamber of Commerce is a channel through which the individual is given an opportunity to do something for his town," said Mr. Wilson, "and to that person who has vision, enthusiasm, initiative and creative ability there is no limitation to the returns he may have.

"When you approach a person in this work you should not do so with an apology. You are leaving your work to go out and represent to others their opportunity. You are creating public spirit which is the brotherhood of man, and if you were to subtract the chrystalized results of public spirit from this community it would indeed be but an empty shell.

"To you, to me and to the children, this is the work that is worth while. We need enthusiasm, enterprise and conviction in the works that lead to better things.

"Making public spirit in a town is a business and it must be gone at with one's sleeves rolled up. It is not what we owe our city, but what we can do for it, that will come back to us through the 12,000 people who live here. Generally speaking, the person who doesn't believe he owes the city anything is a dangerous person; the measure of what a person owes his city may be found in the reply to the question, "If all of the people in Fulton moved away, how much would you give to have them back again."

ALDERMAN FOSTER FINDS SENTIMENT IS AGAINST THE PARK CONCERTS

Unless someone produces a petition at the meeting of the Common Council tonight signed by a majority of the representative taxpayers of the Fourth ward favoring the expenditure of $300 by the city for band concerts this summer, Alderman Foster will vote against the measure, thereby defeating it and putting a damper on the plans of those who believe the concerts should be held this year.

At Monday night's meeting Mr. Foster opposed the measure, giving as reasons the fact that the city needed sidewalks and other permanent improvements a great deal more than it needed music; and also mentioning the fact that the town was not industrially active and many people were out of work and many without the bare necessities of life. At the Monday meeting it was decided to circulate a petition in the Fourth ward on the question, Mr. Foster agreeing to abide by the decision of the majority of taxpayers of the ward.

Over the telephone at noon today, Mr. Foster said that nothing had yet been brought to his notice which would lead him to change his attitude on the concert question. He said he had circulated no petition but understood that one was in circulation.

He made several statements, however, which do not auger well for the concert enthusiasts. He said he had personally interview some thirty or forty people in his ward who paid taxes and out of that number he had found only one who favored the expenditure. While most of the people had no objection to the concerts, they felt the city was in noc ondition at present to make the appropriation necessary when there wer so many other matters more vital which needed attention at this time.

"They say the concerts will mean an increase of perhaps ten cents in the taxes," said Mr. Foster. "All right. But the next time something comes up, it's ten cents more and so on. When the new Broadway bridge was built they claimed it would not raise the taxes preceptibly. Personally, I approve of the bridge and would not have it otherwise but something has raised the taxes in this city, and it is just such items as the one in question; insignificant if taken alone but added to others, a large amount.

"However, I promised to vote for the concerts if they could show me that a majority of the people in my ward wanted it. And if they can show me that, I will vote for it. But I don't think they can."

British Advance One Mile on the Turkish Trenches at Straits

New Battle Develops and Five Lines of Trenches Are Captured---French Attack by Land and Warships' Fire Drive Ottomen From Strong Positions.

London, July 1.—Fighting at the Dardanelles has developed in a fierce, new battle, and the British lines on the Gallipoli peninsula, near Krithia, have advanced nearly a mile. Five trenches were taken; in them were found the bodies of 5000 Turks. French troops, under the leadership of General Gouraud, took an important part in the action.

The military problem of forcing the Dardanelles is the most fascinating of the war. Not only does it loom large, with possible political consequences, but it combines all the operations of naval and military tactics developed in modern times and tested to the last resource.

The capture of the Gallipoli peninsula may hasten the climax of the war; in any case the battling on sea and land in the Dardanelles brings out every thrilling incident of the combat between fort and ship, and land force, the whole set down in an environment pulsating with historic interest.

I traversed the coast from Fort Nagara to within a half mile of Kumkale, and instead of dividing it into named defenses, such as Forts Medejieh, Chimilik, Kilid Bahr, Dardanos and so forth, I am tempted to classify the whole coast as one great fortress.

Since March 18 every position that offered a field of fire in the least suitable has been turned into a battery. The banks of the Straits bristle with guns. Artillery of large calibre, excepting howitzer, is absent in these new defenses, but they are armed with an uncounted number of small guns.

This factor of preparation is one that must be kept constantly in mind when studying the situation at the Dardanelles. Since the first attack on the Straits the Turks have been training with a conscientiousness only exceeded by the soldiers of Kitchener's army.

The forts that guard the narrows from Nagara and Kilia to Kilid Bahr and Chnak are not in a strict sense modern, yet, tested under the severest attacks of high power guns, the damage they suffered is almost nil.

In a recent dispatch I described the enormous disproportion between the effort made by the English ships and the results obtained, and it must be remembered that the shooting of British gunners is excellent. The fact that so little damage was done was due to the peculiar conditions of the attack.

It was not alone on the guns of the fort that the Turks placed reliance in the impregnability of the Dardanelles defenses. The waters before the guns are sown with mines. These are dangers against which it is almost impossible to guard. Mine sweepers cannot operate as far up the Hellespont, as they come under the fire of machine guns mounted at numerous points alon gthe shores.

There are also hidden batteries especially placed to guard the mine fields. These are so carefully concealed that they defy detection by aerial observers.

TEUTONS FORCE RUSSIANS TO LEAVE STRATEGIC POINTS

London, July 1.—German and Austrian reports indicate that the Russians are again in retreat, and even more precipitately than in the retirement from before Lemberg.

Berlin says the Russians are fleeing from the Vistula river and the district of Zamosz, southeast of Lublin, in Russian Poland.

Vienna gives more details. An official report, received last night in Vienna, says:

"In East Galicia, on the Gnila Lipa river and on the Bug river below Kamonka, fighting is proceeding which is successfully progressing for us. Between the Bug and the Vistula rivers the Russians are further retreating. Rear guards covering that retreat were everywhere attacked and driven back.

"Our troops crossed the Tanew Plain and occupied a border height near Frampol and Zaklikow (northwest of Tarnogrod).

"The Teutonic allies' successes east of the Vistula forced the Russians to evacuate position after position on the west bank of the Vistula, and they have been retreating since last night toward the Vistula from strong positions on the front at Zawichost, Ozarow and iCenno (southern Russian Poland). Zawichost has been occupied b your troops.'

The present position of the Russian forces covers a great semicircle around Lemberg, the two tips of which, to the north and to the south of the capital, the Austro-Germans are attempting to roll back. In the meantime they are hurling great forces at the center, in the vicinity of Tomaszow.

A PAIR OF GLOVES.

The Impudent Store People Wouldn't Take Them Back.

Mrs. Pinkerton's first question was about the gloves.

"Did you exchange them?" she asked.

"No," said Pinkerton, "I didn't."

"There," she complained, "I might have known you would forget it. How careless! I told you the very last thing before you left the house to be sure to attend to it. Really, I don't see how men can be so thoughtless."

"I didn't forget," said Pinkerton. "I tried to change them, but they wouldn't take the things back."

"Wouldn't—take—them—back?" she said. "Why not?"

"They said they were soiled."

"Soiled? Well, of all things! If they are they got soiled in their own store. I didn't soil them. I have never had them on my hands. I couldn't get them on. They were half a size too small. They gave me the wrong number. Why didn't you tell them so?"

"I did."

"Who did you tell?"

"The clerk and the floorwalker and everybody who would listen to me."

"And what did they say?"

"They laughed."

"The impudent creatures! I'll never buy a cent's worth in that store again, you see if I do."

"That's just what I said," Pinkerton put in. "I said you never would."

"And what did they say to that?"

"They laughed again."

"Well, that settles it. I never will buy anything there now. Where are the gloves?"

"In my pocket."

"Let me have them, please. Soiled, indeed! I'll see if they are."

Mrs. Pinkerton unwrapped the package. As she took out the gloves she blushed slightly.

"Well," she said.

"Well?" echoed Pinkerton. "What's wrong?"

"N-nothing much," she said, "only this is an old pair of gloves. I cleaned them last week with gasoline. I made a mistake and sent them back instead of the pair I bought yesterday."—New York Herald.

Look to Your Own Self.

Be not angry that you cannot make others what you wish them to be, since you cannot make yourself what you wish to be.—Thomas a-Kempis.

Mended His Manners.

A certain English officer is noted for his ready wit and quickness in repartee. In the very early days of his career he was ordered to Bombay and

"[illegible]"

was attached to the staff of the then commander in chief as aid-de-camp.

Shortly after his arrival at a function at the government house a new military secretary who, in the [illegible] pride of his new position, had a hearty contempt for subalterns of all degrees, with a glassy stare through his eyeglasses offered him two fingers to shake.

The A. D. C., quite unabashed, looked at him for a moment or two and then said genially:

"Hang it all, major, the governor gives me three!"

The whole room was convulsed, and the military secretary, now a colonel, profited by the hint and mended his manners, but he never forgave the A. D. C.—London Tit-Bits.

Tommy—Who? Pa? Why, he ain't any good at excuses. Ma finds him out every time.—St. Louis Post-Dispatch.

ARE THE WOMEN INTERESTED?

One of the real problems confronting the city of Fulton is the disposal of garbage. An expensive system such as Syracuse is using would, at the present time, be out of the question, but what system and at what cost and how managed is the big question-mark that looms up in the minds of those who are thinking along the line.

That unwholesome conditions abound within the city's limits, which arise directly through uncollected garbage, is a plain fact—if one possesses a nose. That the city's treasury is as empty as Mother Hubbard's cupboard is not to be denied. How then can the orderly collection of garbage become a realty?

If many persons in this city were put this question the reply would be "Guess it's impossible." However, away back in the ages was handed down a bit of backbone tonic which speaks "Where there's a will there's a way."

If in the city there is anyone who is interested in the disposal of garbage it should be the orderly, intelligent housekeeper. No amount of ignoring the problem, no amount of side stepping the issue, and no amount of discussing the uncleanly methods of the neighbor over the back fence will change the situation. On the other hand if every housekeeper who cares a rap about rectifying this ugly condition (and this whether she wants to vote or not) will spend more time on the comfortable porch this summer in studying through the various magazines available the methods employed in other places in preference to putting embroidery up and down the fronts of dresses, a real solution of the problem could be reached.

Every woman who says she wants to vote has no business to want to vote if she is not interested in the problems of her own city—particularly the housekeeping department. Every woman who does not want to vote because she believes "it isnt' proper" (or is unnecessary) should certainly study to be able to give her husband pointers on housekeeping that he may be able to use his vote or his voice intelligently in helping the city's housekeeping department—partcularly in emptying the city's garbage can effectively and economically.

The empty garbage pail would make a good plank in the mayoralty platform.

COURAGE

Occasionally you hear a man say that he fears nothing in the world except to do wrong. The statement is important if true. Most of us fear to do wrong; let us say we fear it more than anything else; but there are a number of other things that we fear a good deal.

We now hear of men being taken from their farms and desks and shops and put into the firing line, in face of death; and being naturally curious, we wonder how we would meet such an experience. Would we enjoy it, or at least endure it with a soldier's fortitude? Or would our untried nerves give us trouble?

We are an imaginative people; and imagination is close cousin to fear. Moreover, we read, and we look at pictures, and a too vivid conception of the horrors of war is not a good preparation for facing them.

On the other hand, we are intelligent people, accustomed to reason about our actions, our needs, and our duties; and a clear, educated intelligence that conquers fear is a far better source of course than the stolid ignorance that does not know what fear is.

All experience seems to show that men are brave collectively who are not especially intrepid as individuals. The pride of following or of setting an example is the greatest stimulus known to man. There is a world of comfort, too, in the touch of a known shoulder and the sound of a known voice. Men will laugh at danger together who would run from it alone. Again, actual conflict is too quick for the imagination. The danger comes and it is over before you can think what it means or where it leads; and a succession of such experiences breeds the courage of habit, the surest of all.

It is true there is the lonely night watch of the sentinel, whom no comrade cheers, and the perilous adventure of the scout, who seems to take off his life and leave it behind him as he would any other little knickknack that might prove troublesome. But even those adventures may become easy through use.

The great comfort for the ordinary man is that there are other ordinary men, many of them, and that they are all likely to bear themselves with equal fortitude. In our Civil War the American soldier, going from the farm, the desk, and the shop, proved himself one of the best fighters in the world, and we may be sure he will prove himself so again, if the occasion comes.—Youth's Companion.

KEEPING MEAT IN HOT WEATHER

A Few Simple Precautions for the Housewife Who Does Not Want Her Supplies to Spoil.

A few simple cautions will aid the housewife in keeping meat untainted in hot weather. It is, of course, common knowledge that the higher the temperature, the quicker meat will spoil, but the family's supplies are not absolutely at the mercy of the thermometer. Ice and cleanliness are two great weapons of defense.

For many families a refrigerator is obviously out of the question, but it is perhaps better to have no refrigerator at all than a neglected one. Merely to wash it out occasionally does little good; it should be thoroughly scalded at frequent intervals, in particular the drain. This, if overlooked, is apt to harbor fungous growths, which may spread to the food. On one occasion a man applied to the department because he had found that a joint of beef placed in his refrigerator had turned a peculiar bright red. Upon examination it was ascertained that the meat was covered with a peculiar fungous growth due entirely to the condition of the refrigerator. Growths of this kind do not always advertise themselves so prominently and there may be much evil in an ice box that the eye can not detect.

Dampness Is Fatal

If the refrigerator drain is not thoroughly cleaned; moreover, it is likely to become choked, the water is not carried off quickly enough and little pools are left standing in the interior. Dampness is one of the conditions most favorable to bacterial growth. An ice box in this state will not protect food long. It is, in fact, a wise precaution to wipe the interior of a refrigerator every day with a dry cloth.

The temperature of the average refrigerator is higher than most persons suppose, and in those households where a regular supply of ice is not obtainable a cool cellar, a spring house, or the depth of a well may serve somewhat the same purpose. On farms where there is an ice house the meat may be placed in some form of closed retainer and buried in the ice. In any event, the meat must be carefully screened from flies. The danger from infection from these pests has been pointed out many times, but fimiliarity breeds contempt and they still persist. The fly not only does the meat itself no good, but it may readily deposit upon it some infection, which is carried in turn by the meat into the human system. Some flies will deposit their eggs on the meat and these in a short time will become maggots, and the meat is "flyblown."

A Rapid Growth

Much sickness that is popularly ascribed to ptomaine poisoning, or to bad food in general, is really caused in some such way as this, the food, in itself perfectly wholesome, acting merely as a mechanical carrier for the "germs" which cause the trouble. Some of these sorts come from the human intestine, and their presence is a sure indication that filth is present, even if the amount is too small to be seen. Filth of this kind may be carried by dust, but it more often comes from soiled hands. One might wish that every kitchen could have the sign found in some well-managed food factories—"When you leave the room for any purpose, wash your hands befor you return to work."

"Germs" which grow in foods and cause illness grow very rapidly, particularly if the food is a little warm, and are not destroyed unless the food is well cooked before serving. Simply "warming up" is not enough, as was found in a case of illness recently reported after eating some warmed-up creamed vegetable. Certain kinds of food—creamed chicken, or custard, or warm vegetables, for example—are excellent culture mediums for bacteria which may have been introduced into them by accident. For this reason it is a safe rule to have as short a time as possible intervene between the preparation of food and its consumption. Broth is another excellent medium and in consequence should be drained off if it is intended to keep the meat for any length of time before serving. If the broth is used also it should be boiled thoroughly first. All food, cooked or uncooked, should be kept in a clean, cool place in order to reduce the danger of infection to a minimum.

When meat must for any reason be kept for unusually long periods of time or when the conditions are unusually unfavorable scalding may be resorted to advantageously. Dropping the meat into boiling water for a few minutes will not seriously affect its flavor when it ultimately appears upon the table, and it will put it in a much better condition for keeping. It is important, however, that it be dipped in a large body of boiling water. If only a small amount of water is used, the introduction of the meat will lower the temperature to such an extent that the whole process becomes worthless. With such meats as veal or pork, which are always—or ought to be—thoroughly done, the precaution can be carried further and the joints partially cooked before being stored away. Care should be taken, however, to see that the recooking is thoroughly done.

Hot weather also calls for additional precautions on the part of the housewife in regard to canned products. Once these have been opened and exposed to the air they spoil as quickly, if not more quickly, than fresh food. The contents of a can should be disposed of without delay. In no event should they be left in the can after it has been opened, but should be used at once unless the housekeeper wishes to "air" the canned material, which some believe is desirable. If this is done, the can contents should be transferred to a clean earthern or glass dish and put away for an hour or two in a cool place where dust will not reach it.

Opinions

Helping National Guardsmen

An encouraging indication of the public sense of the need of making more secure the military defense of this country is the disposition of many large firms and corporations not only to employ National Guardsmen but to induce the young men in their employ to serve in the organized militia. The president of one of the large banks in New York has informed Major Gen. O'Ryan that all that bank's clerks who are National Guardsmen will have leave of absence whenever they have military duties to perform without loss of pay and with no curtailment of their regular vacations. A financial company in Boston has gone a step further and promised all its employes in the organized militia not only two weeks' leave of absence for the State encampment, but double pay for that time. That seems to establish a precedent whichf ew employers could be expected to observe, but it will certainly serve to encourage enlistment in the State regiments. The President of that particular institution, which is said to have sixty militiamen in its employ, has issued a statement in which he says he has just realized how much an employer can do to build up the citizen soldiery. Six of the largest corporations in the country have made public announcement that hereafter they will assist any of their employes who join the militia. Their example will be followed by many others. A committee of the Chamber of Commerce of this city has long been working to bring employers to a sense of their duty to the National Guard and to increase the knowledge among business men of the importance of that military body as a part of the first line of the nation's land defenses. Undoubtedly the large corporations can do more in the way of encouraging their young men to be citizen soldiers than individual employers of labor on a smaller scale, but every man who employs other men will come to learn in time that he is only helping himself and his business when he submits to such small sacrifice as an occasional leave of absence for the National Guardsmen in his employ entails. Under expert Federal supervision the citizen soldiers of the various States have greatly improved in efficiency. They are becoming real soldiers, since they have had the advantage of instruction and practice in modern methods of soldiering.—N. Y. Times.

EX-SENATOR CANNON FIRED A WARNING

As an evidence of the interest taken in Ex-Senator Cannon's Chautauqua talks the Batavia News says of his address last night:

'About 1000 people attended the entertainment at the Chautauqua tent on the high school grounds last evening, when Frank J. Cannon, former United States senator from Utah, gave his interesting address on "The Mormon Kingdom of Today." Preceding the lecture was a concert of popular airs by the Aida Quartette.

"Former Senator Cannon's address was a forciful arraignment of the religion of the Mormons, who, he said, were the teachers of polygamy. He said that although two former Presidents of the United States, Mr. Taft and Mr. Roosevelt, had spoken in Mormon temples, the general public and the heads of the government themselves did not seem to appreciate the baleful influence at work within the church.

"It is evident to all who can see that the Mormons are setting up a well-organized government of their own, separate and apart from the government of this country," said Mr. Cannon. "It is time for the citizens of the United States to take warning and not to permit a new nation to be setup within our country."

THE CITY ZONE DISTRICT SYSTEM

Proper Arrangement Is Absolutely Essential.

KERNEL OF TOWN PLANNING

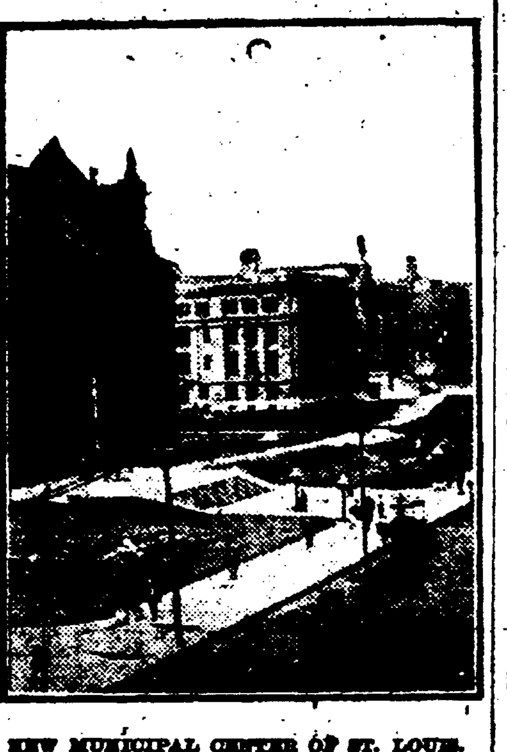
Every Municipality Has Its Own Problem, and Its Classification of Districts Must Proceed In Accordance With Results to Be Achieved.

The whole purpose of city planning is to increase the health, comfort and convenience of the public, and in order to accomplish this it is absolutely essential to have the districts properly arranged, writes Frank Koester in his treatise, "Modern City Planning and Maintenance." In their planning the object is to give each man for his dollar the greatest value possible in housing and business convenience, proportionate to his income. That is to say, the man of small income must be given the same quantity of accommodations for the proportion of his income that he can devote to such purpose as the man of large income, the only difference being in quality. Thus a mechanic in renting a six room house for his family should not have to pay for it a greater proportion of his income than the higher salaried manager pays of his income in renting a six room apartment for his family, the difference in actual amount being represented by quality.

The more numerous classes should always be able to obtain adequate quantities of whatever may be requisite to satisfy their needs, with only the expenditure of a fair proportion of their income.

This can only be accomplished by the establishment of classified districts and a rigid enforcement of proper regulations. This is the real kernel of city planning, compared with which its architectural embellishment is merely a polishing of the shell.

Each city has its own problem. Its classification must proceed in accordance with the results to be achieved



NEW MUNICIPAL CENTER OF ST. LOUIS.

and with the nature of its activities and business. For example, New York, with its varied industries and activities, needs a greater number of classifications and a greater flexibility in their application than Washington, which is more devoted to administrative and social purposes.

In the laying out of districts the objects to be accomplished are the providing of healthful living and working conditions, prevention of congestion, convenience of distribution, suitable relation of the homes of the workers to their places of employment and the grouping together of those whose incomes and tastes are generally similar.

In European districts the classes of districts are often a dozen or more in number. The city of Karlsruhe, with a population of 135,000, has as many as sixteen classifications, ranging from high class residential to detached suburban houses and civic center to factory districts.

Owing to the hitherto unregulated conditions it would not now be practicable in most American cities to establish as many districts or as close a classification.

A workable classification for the average American city might be as follows:

Residential district No. 1, light traffic, no stores.

Business district No. 1, medium traffic.

Business district No. 2, heavy traffic.

Industrial district No. 1, 25 to 100 employees per establishment.

Industrial district No. 2, over 100 employees per establishment.

Tenement district, stores and heavy traffic.

Warehousing district, heavy traffic.

In making such classifications, however, the city should not be divided in such a manner as to confine the poorer classes in the parts of the city remote from those in which the better classes are housed, as such residential restrictions would prove unpopular.

In order to have individuality of its own a city must be composed of portions, each of which has its own individuality. This individuality is dependent upon its street plan, its buildings and the way in which they are arranged to strike the eye. In order that a portion of a city may have its own individuality it must in some way be demarked from the remainder.

Bjornson's Advice.

There is a story told of Bjornstjerne Bjornson that, arriving at a late hour at the town of Bergen, which was en fete to receive him, he vouchsafed to the expectant people no finer words of wisdom than a general recommendation to go to bed.

In vain they appealed to him for "song or sentiment." The great Bismarck, said he, gave the same advice under conditions all similar, and what was good enough for Berlin must suffice for Bergen.

Three years later, on visiting the town for the second time, the master novelist found a deserted city. Not a light burned in the dismal railway station, no banners waved, no addresses were read by portly burgomasters. In vain Bjornson asked for a cab.

"They have all gone to bed," was the reply. And so Bergen remembered.

First European Railway.

The first carriages that ran on rails in Europe were those of a horse railway between Linz and Budweis, in Austria. This was in working order in 1827. Locomotive railways were much longer coming. The first line in a modern sense was opened from Paris to St. Germain in 1835, but railway development was greatly hindered by a terrible accident on the Paris-Versailles line in 1842. The next was the Brussels-Malines line in Belgium. Belgium was also the first country to begin, in 1830, systematic plans for a national network of railways. Prussia followed in 1835 and Austria-Hungary in 1838. The first great trunk line in Europe was from Paris to Rouen, opened in May, 1843.

Family Pride.

Mrs. Blunt—Well, Louisa, I don't suppose you will attempt to deny that your original ancestors were stone age ruffians who lived in a damp cave.

Mrs. Tree—If my earliest ancestors were a part of the geologic period of which you speak they must have had a red sandstone chateau of their own on Flinthead avenue, with stalactite decorations and running water on the first floor.—Cleveland Plain Dealer.

How to Sweep a New Rug So It Will Not Be Harmed.

A new rug or carpet should not be swept with a broom. Use a carpet sweeper for several weeks until the pile becomes "set." Old fashioned housekeepers may tell you to sweep the new rug briskly to "remove the fuzz." What you will really be doing will be to sweep out some of the nap and probably injure the surface of the rug. If you must sweep, however, be careful to move the broom with the pile of the fabric and not against it.

Rugs should never be tacked down. If in certain places in the room they are apt to be rolled back or pushed about attach bits of black tape with snap fasteners at the ends of the rug under the fringe and twin snap fasteners to bits of black tape may be tacked to the floor. The rugs may be taken up easily on sweeping day, and the small tacks which hold the bits of tape to the floor will not cause much injury even to hardwood surface.

Russian or Greek.

Bismarck was in favor of boys learning Russian rather than Greek. "I have quite forgotten my Greek," he told Busch. "I cannot understand why people take so much trouble with the dead languages. It must be merely because learned men do not wish to lessen the value of what they have themselves so laboriously acquired. The Russian language is far better than Greek as a disciplina mentis. It might well be introduced instead of Greek, for it has a practical value."

SEES WAR MAKE FOR SIMPLER LIFE

Ferrero Sure Conflict Has Wrought Miracle.

ALL EUROPE NOW CONTENT

Great Italian Historian Finds Struggle For Extragance and Pleasures Is Gone, and He Confidently Believes It Will Not Return In at Least Two Generations.

The European war has demonstrated that the giving up of many pleasures, necessities and comforts that modern civilization has created and established is a much easier thing than any of us thought one year ago, writes Professor Guglielmo Ferrero in an article on the war's effects on future modes of living.

Many needs that seemed as imperious and tyrannical as a second nature we have discovered are hardly even necessary to our being, and a little shakeup liberates us from them as from dead skin that peels and falls off. Man's nature is much less dependent on those things that modern civilization would have us believe.

When the danger of a great war was spoken of many said it was not possible or would be of exceedingly short duration, not more than a month or two at most, because otherwise there would be a revolution. Every one reasoned in that fashion, and facts have shown that they were all wrong.

Europe is all in arms, but in each country there has never been more calm tranquillity. Almost all Europe is eating coarse bread that one year ago country laborers complained of so bitterly when forced to use it.

Everybody Now Resigned.

Up to one year ago the city streets were never sufficiently lighted, nor were trains ever numerous enough or fast enough. Now the people are still and resigned.

So if the European war has filled Europe with horrors, ruin and hate it has also made men more easily contented. In each nation, far away from the firing lines, men and women are working with a tranquillity that has not been known for some time, and they no longer complain of destiny, although that destiny is harder.

That furious desire to possess and enjoy that made men impossible to satisfy has all of a sudden disappeared. The French have learned the virtue of patience, and the Germans have learned the virtue of sobriety. And who would ever have dared predict it? The world has changed.

How can this most singular of phenomena be explained? Is it a sort of miracle? Perhaps human nature is changed. No; it has rather found itself. Many people are today glad to be freed of many responsibilities and obligations that were forced on them by an opulent peace—glad to be able to live simply, as they like, earning less, spending less, so working less.

The people have taken all the more readily to this more simple and reposeful life because the change has been universal. Until a year ago few, indeed, were the wise ones with enough strength of will not to annoy and torment themselves with the thought that perhaps they were not enjoying themselves as much as their neighbors.

The war has forced everybody, or almost everybody, to live simply, so nobody now wants many things that a year ago seemed indispensable to his happiness.

Pace, a Mental Disease.

Until two centuries ago all religions and all philosophies taught that man had to know how to hold his desires within the bounds of moderation; that he should not presume too much on his own power; he should limit his aspirations; he should live simply, consume less riches, treasure the gifts that God and nature had placed at his disposal. Since science, America, steam and the idea of liberty have increased man's confidence in his own power he has overthrown all these principles.

So was born the strangest, the most singular mental disease with which the world was ever visited. There never was a time in history richer, more knowing or more powerful than that in which we were born and which lasted until Aug. 1, 1914. All the most glorious ages of the past were poor, ignorant and little compared to the twenty years that preceded the European war. We had everything—wealth, knowledge, liberty, peace, safety, order. We should have been happy.

The European war was needed to cure man of this malady.

It is not too much to suppose that the effects of this moral and mental revolution will last in Europe after the war, that one or two generations at least will now be disposed to live more simply and be contented more easily with that which destiny allows. The generations that have seen and gone through the terrible trial in Europe cannot help understanding that in the modern idea of earning and spending, of enjoying without limit, there is something forced that doesn't respond to the deep needs of human nature.

$400 Apiece For Alpinists.

Archduke Eugene, commander in chief of the Austrian army opposing the Italian advance toward Trieste, is said to have offered 2,000 kronen ($400) reward for each Italian Alpine soldier captured alive.

JUDGE URGES CHILD COURTS AT ALBANY

Albany.—United States Judge Julian M. Wack, of Chicago, appeared before the judiciary committee of the Constitutional convention today to urge the adoption of an amendment by former. Cupreme Court Justice A. T. Clearwater looking toward the creation of Children's and Domestic Relations courts.

Judge Mack criticised a similar amendment which had been introduced by Henry L. Stimson but which would restrict the Children's Court bench to members of the inferior judiciary.

"No judge is too able or too learned to sit in a juvenile court," said Judge Mack. "He is called upon to decide the fate of so many of our future citizens that is is impossible to exaggerate the importance of his post."

A Bank for the Wage Earner

The Morris plan of banking is spreading throughout the country and has approached Utica as near as the Albany district, for such a bank will be opened there within a month, with branches in Troy and Schenectady. The bank is of the sort that reaches persons with limited means and is considered as something better than the loan associations which have to charge 24 per cent to cover expenses. The method of making a loan is based more upon the character of the applicant than upon the amount of his assets over liabilities.

The plan in Albany is being promoted by prominent citizens, chiefly bankers. Their purpose is not to make money, but to supply the community with an institution "where the industrial workers can secure loans upon fair conditions and at reasonable rates of interest."

In order to obtain a loan for, say $50, the borrower takes two of his fellow workers with him to the bank who will endorse his note for the amount. The $50 is then advanced, and is paid back at the rate of $1 a week. The rate of interest charged is 6 per cent. together with a fee of about two per cent. to pay the expenses of investigation. However, this fee is never over $5. This, in substance, is the method by which a borrower secures a loan.

The bank also provides a method of investment. Certificates are issued in multiples of $50. The investor may purchase a certificate for $50 and receive interest at the rate of 5 per cent. The certificates may be cashed at any time upon 30 days' notice.

The Albany bank is starting with a capitalization of $100,000 and the men who have subscribed are leaders in the banking and mercantile circles of the community. Each share costs $120, so that the return on the money is five per cent. The plan is not a charity, but, on the other hand, business profits are not earned. Those who support the bank get a small return on their subscriptions, while the opportunities and conveniences of a bank are brought to a large number of people who have no real estate or collateral to put up for a loan.—Utica Observer.

BORROWED TIME

BIRTHDAY PARTY

Borrowed Timers Surprise Their Secretary, H. N. Gilbert, on His Birthday.

Yesterday a birthday party of importance was held by the members of the Borrowed Time club at their rooms at the First Presbyterian church. The occasion was the 86th birthday of Horace N. Gilbert, secretary of the Borrowed Time club.

The local pastors were guests at the party and each made a speech of congratulation for the secretary who enjoyed and appreciated the occasion fully. The Rev. Charles Robertson made the opening speech and Rev. M. G. Buck, the Rev. Charles Olmstead, Rev. Bassett and Ensign Fitzgerald each let humor be the keynote of his remarks.

A program of vocal and instrumental music was enjoyed, following which the company was ushered into the dining room where the most interesting part of the birthday party was found. A birthday cake, four storeis high, graced the center of the well laden table. Mrs. H. N. Gilbert, Mrs. Russel Rogers, Mrs. George Webb and Miss Lucy Gilbert were in charge and the "boys" from start to finshi displayed a keen interest in passing events.

Mr. Gilbert, as secretary of the Borrowed Time Club, is a tireless worker in the upbuilding of the organization, and at 86 displays a keenness of interest that would easily out rival one of fewer years.

The following poem was composed by F. A. Arnold of the Seattle Borrowed Time club for his friend, Mr. Gilbert:

Many milestones you have seen,
But none like this has ever been
To you so great; it shows you near
The place where milestones n'er appear.
Now it reads four-score years and six,
Old Time will play his curious tricks,
Transposing figures on the stone
To make you think life nearly gone—
The years do pass with wondrous speed,
And to this fact we must give heed,
And grasp them for our present use.
Failing on this we've no excuse—
We know that life is but a test,
So we should do our very best
With time and all the blessings given.
Thus get a foretaste here of heaven—
Happy returns to you, my friend,
May richest blessing you attend,
Life brighter grow, while here you stay,
"Shine more and more to perfect day."

F. A. A.

COMING TOMORROW

The first feature on the program of the Y. P. B. convention to be held here July 2-7 will be the supper served at the State Street church tomorrow evening from 5 to 8 o'clock. The public is invited to attend the supper.

At 8 o'clock the delegates will gather at the First Methodist church. Mrs. Maude B. Perkins will preside and Daniel Poling of the National Christian Endeavor Union will make the principal address. The public is invited to be present.

A reception will be given to delegates and visitors following the address. Mrs. Edna Moore is in charge of arrangements.

PREPARING FOR THE FOURTH

The Whitehouse Sales Co. of Baltimore is in charge of the Harris Rosenbloom store, and ready to open the big sale tomorrow morning at 9 o'clock. This sale is timely as it enables persons who want to dress in style and comfort on the Fourth to do so at money-saving prices. Mr. Whitehouse says that never before have such low prices prevailed as have been marked on the Rosenbloom stock, and he is confident of reaping a rich harvest as long as the sale lasts—10 days.

COLUMBIA CIRCLE MEETS

Reports of delegates to the recent convention will be read to the membership of Columbia Circle at tomorrow night's meeting. A special request is made that every member of the circle shall be on hand.

YACHT WINIFRED HERE

The yacht Winifred of Syracuse, passed through the locks in this city today, the deck bepeopled with about fifty young women engaged in various accupations, and all apparently contented with their surroundings.

RED MEN'S INSTALLATION

Installation of the new officers of Utoka Tribe, I.O.R.M., will take place at the next meeting, Tuesday evening. Last Tuesday evening an entirely new complement of officers were elected.

Miss Mary Farley had as a guest, Sunday, Master William Whitney, of Oswego.

* * *

During the balance of the summer the Knights of Columbus will hold one meeting each month instead of two as heretofore.

* * *

Many were the congratulations awaiting the return of Mr. and Mrs. A. L. Rice from their honeymoon trip.

* * *

The building committee of Zion Episcopal church will hold an ice cream festival on the Elks' lawn Saturday night.

* * *

The last meeting of the Elks for the month will be held tonight. Initiation will be held, followed by an informal entertainment.

* * *

Mr. and Mrs. Fred Cole will turn over their lawn in E. 1st st. to the Courier class of the State Street church on Monday evening for the purpose of holding an ice cream social.

* * *

A deed was filed yesterday at the county clerk's office for property sold by Mary J. Fones to Fred Williams of this city, the transfer sum being $737.50.

* * *

Mr. and Mrs. Charles H. Brooks are entertaining Charles Hegadorn of Rochester.

* * *

Mr. and Mrs. R. Bruce MacRae of Highland st. are entertaining John H. Bone of Sault Ste Marie.

* * *

Mrs. Charles Atwood of Gansevoort st. left today for the Adirondacks.

* * *

Mrs. Francis Waugh, Mrs. Hill, Mrs. May L. Hammond and Mrs. Ed. T. Parker have returned from Albany where they attended the G. A. R. convention.

* * *

Mrs. W. A. Williams, Mrs. E. S. Parker and Mrs. F. Cramer motored to Martville today. They are the guests of Mr. and Mrs. F. Williams.

* * *

Mrs. T. Williams of Martville, who has been the recent guest of Mr. and [illegible] home today. She was accompanied by her niece, Miss Thelma Parker.

* * *

Mrs. E. S. Parker was a recent guest of A. J. Osborn and Mrs. Florence Marden, in Albany. While there she attended the graduating exercises of Arthur Marden at the Albany high school.

* * *

Miss Zelma Allen of Farmingham school of Domestic Science, is spending her vacation at the home of her parents, Mr. and Mrs. Charles Allen, South 3d st.

* * *

Miss Hazel Blount entertained the Mystery Embroidery club at her home in Academy st. last evening.

* * *

Miss Emma Leland, who has been visiting friends in Carthage has returned, and will spend a few days with relatives in Oswego.

* * *

Frederick Palmer of Auburn is visiting his grandfather, A. Bristol, of S. 1st st.

[illegible],000 INCOME TAXES PAID IN 2 DAYS

New York.—A record for income tax collections was made in the last two days for the second district of New York. Yesterday $4,020,000 was paid into the cashiers' office at the Custom House. On Tuesday $4,039,000 was paid in.

Total taxes for this district, which lies south of 14th st. this year will approximate $25,000,000. Four-fifths of this represents tax on personal incomes of more than $3000 a year.

BOLT HITS UMBRELLA, FELLS PROF. JEWITT

New York.—Professor Edwin Gale Jewitt, a member of the faculty of Adelphi College, rBooklyn, was rendered unconscious when an umbrella he held while standing on the deck of a yacht off South Norwalk, Conn., was hit by a lightning bolt yesterday. eH was revived.

Mrs. McGregor, wife of Dr. Ernest S. McGregor, owner of the yacht, and her two children, who were in the cabin, received a severre shock.

Chief Says Clean City Reduces the Number of Fires

The police department made 34 arrests during the past month according to a report tendered the board of fire and police last night by Chief Dyer. The list follows: 27 intoxication; 1 assault; 3 petit larceny; 1 statute offense; 1 disorderly person; 1 seduction case.

All but two of the arrests resulted in convictions. $134 in fines was imposed, and of this amount $85 was collected and $49 is yet to be paid. There was one call for the patrol during the past month. Officer Bray and Officer Smith were each off duty one day.

Chief Waugh of the fire department offered a report which showed the Chamber of Commerce clean-up has succeeded in cutting down the number of fires to a great extent. Only one alrm was sounded in the month of June and that was for a small fire in Shipman's store, the loss covered by insurance. On May 31 a fire in a house owned by the O. & W. R.R. company, was extinguished. The loss by both fires did not exceed $25.

Daniel Darleigh, Edward Catney and Williard Dubuque were appointed special policemen for a term of thirty days.

The board last night passed a set of rules and regulations which will govern the duties of the night captain of police.

NO "AMERICANIZATION DAY TO BE OBSERVED HERE

With Syracuse and other nearby cities celebrating "Americanization Day", next Monday, no exercises incidental to the nation-wide program will be held here.

The program at the Arena, Syracuse, is an elaborate one, and to advertise the event hundreds of posters containing the following are being displayed by the Citizens Committee of Arrangements:

"Make the Fourth of July Americanization Day.

"Many Peoples—but One Nation.

"Make it a day of welcome to all foreign-born citizens and an invitation to all residents to become citizens. Make our 13,000,000 immigrants feel that they are a part of and have a share in American institutions.

"Do your part by attending the citizens' celebration on July 4.

"Pledge allegiance to your flag anew by help others to become 'Americans first.'

"And keep it up.

"National Americanization Day Committee."

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By Frederic T. Cardoze

Albany, July 1.—Organized labor has trained its guns upon the proposed amendments to the Constitution which seek to provide for a short ballot and to increase the terms of certain of the elected State officers. Practically all of the members of the convention, particularly Fred Tanner, chairman of the Republican StateCommittee, have been asked to oppose the propositions.

While there is considerable opposition to the proposition to increase the terms of State officers, those who are against a short ballot are far more numerous than those who do not look kindly upon the former proposition.

Some of the delegates are of the opinion that to provide for a short ballot would mean that a step would have been taken backward in the direction of monarchy; that to give to a governor the power to name practically all of the State officers would be to place in his hands the opportunity to build up a personal organization. These same delegates take issue with former President William H. Taft who in an informal address before the Judiciary and Governor and State officers committees advocated a short ballot for this State.

The substance of the argument in favor of a short ballot raised by the former chief executive of the Nation was that the people should have faith in their officers and instead of surrounding them with barriers aimed to prevent them from straying from the desired path, that they should be given all possible freedom to proceed in a manner which, in their manner of thinking, would aid their administration and the people of the State as well.

As declared by one delegate, the government of the State is a precious thing and should be safeguarded against any possible attack and strengthened against personal domination. This delegate pointed out that if by chance an executive of tyrannical views should be elected, unless prevented by statute from the exploitation of his ideals, the result would be serious to the State. If such a governor were holding office for four years, the situation would be still more serious.

Organized labor has come boldly out with a printed statement to Delegate Tanner, to the effect that it is opposed to both the short ballot and the proposed increasing of the terms of certain State officers.

"The New York State Federation of Labor desires to bring to the attention of your committee on Governor and other state officers, the fact that at a special convention of our body, held in Albany on May 24, and 25 of the present year, it was resolved as the unanimous opinion of the wage-earners of this State that there should be no extension made of the terms of elective officers of the State of New York, and further, that we are opposed to the propositions to invest the governor with greater powers than he now has by authorizing him to select and appoint any of the State officers now elected by the voters as violative of the fundamental principles of justice, democracy and freedom. We are likewise opposed to the extension of the powers of local executives as another encroachment on the reserve rights of the people."

On June 15, organized labor presented President Root with a memorial reflecting its attitude upon other matters before the convention.

GRADUATING CLASS ANNUAL BANQUET

The first annual banquet of the 1915 graduate class of the high school was held at the Pontiac in Oswego last night. Miss Waugh and Miss Johnson acted as chaperons. A five course dinner was served and toasts were given, Leland Carner, acting as toastmaster. Responses were given by Fred Martin, Harold Thompson, Margaret Clark, Markey Pullen, Harold Scholz, Marshall Penfield, Rose Walsh and Lillian Simons.

Plans were laid for the class reunion and a committee was appointed to confer with members of the 1914 class for the establishing of a permanent alumni association.

That the stars and stripes, unfurled,
Stainless float above a land;
Pure in heart and strong of hand;
Patient, firm in self control,
Seeking not a selfish goal,
But with power to strike a blow
In defense against a foe!

Right is right and law is law,
Sacred both in peace and war;
And, though nations join in strife,
Yet the sanctity of life
'Neath the banners not unrolled
In the conflict men must hold
As protected by the seal
Of the universal weal!

O, my country, strongly wait
Ere the mighty guns of hate
You unlimber; dare to pause,
In the greatness of your cause!
But with no uncertain word
Make your holy purpose heard,
To defend by drastic deed
Human rights and thy own seed!

—Boston Herald.

KAISER HAS ROCKET TO TAKE PHOTOGRAPHS.

New German Device Proves Useful in Getting Pictures of Battlefields.

A skyrocket that steals glory from the aeroplane by making photographs of a battlefield from great heights is a recent German invention. The rocket carries a camera, a device to expose the plate, and apparatus that brings the whole device safely back to earth.

Like the skyrocket used for peaceful celebration, the war flyer has a long tail with vanes at the end to keep it from whirling. Within the head is the camera, which takes a photograph seven inches square, a small gyroscope, an electric battery, and a parachute to provide for slow descent. The shaft is twenty feet long, and the whole device weighs fifty pounds. A firing stand, with sights, completes the apparatus.

The rocket is first aimed in the proper direction. An electric current is then sent to the gyroscope, which assists the vanes in keeping the rocket from whirling. Another current ignites the charge of powder, and the rocket ascends almost vertically.

At the moment of the greatest elevation, which occurs about eight seconds after firing, the exposure is made by an electro pneumatic device. The parachute, which is packed between the camera and the head, then opens and the apparatus descends within a very short distance of the place from which it was discharged.

The rocket can be used in places to which it would be impossible for an aeroplane to fly.

EDEN MUSEE TO VANISH.

Noted Old Waxworks Show Known to Every Visitor to New York.

Another landmark of old New York is about to pass away.

The Eden Musee, in Twenty-third street, where every visitor on his first trip to New York used to be taken to see the wax figures of famous people like generals and admirals, and the "Chamber of Horrors" (oo-oo-oo!), where they shivered as they gazed upon the torture apparatus of the Inquisition, and the gigantic gorilla carrying off into the jungle the frail young girl and the hanged man with the genu-wine rope around his neck, has passed into the hands of bankruptcy receivers after an existence of thirty-two years.

The first moving pictures were shown there in 1898, when the "Passion Play" was presented by the film. The first Hungarian band the town ever heard played there as far back as 1885, being brought direct from Budapest. Now, it is said, the movies and the cabarets have killed it.

WILL HONOR "OLD MAMMY."

Southerners Plan Monument to Memory of Nurse of Slavery Days.

Southerners are going to erect a monument to the old southern "Mammy," the tender old negress who in the childhood days of natives of the south stood next to mothers in their estimation. It will be the first of its kind in the world.

Members of the Old Guard of Atlanta, the organization which visited the north upon the famous peace mission directly after the civil war, have decided that such a monument should be erected in Piedmont park, Atlanta.

Movements are on foot for the erection of other such monuments in Dixie.

GARDEN SYRINGES FOR WAR.

Will Squirt Sodium Into Air to Break Up Effect of Gas Bombs.

Scientists aiding the war bureaus of the allies have discovered, it is believed, a means whereby the poisonous gas filled bombs of the Germans can be rendered ineffective.

Representatives of the British war office are now purchasing hundreds of ordinary garden syringes, such as are used for watering flowers. With these it is planned to squirt hyposulphide of sodium into the air as the poisonous gases reach the lines.

FILES DIVORCE SUIT NO. 8.

Ottawa Woman Asks Once More to Be Freed From Husband.

Mrs. Mary Knecht of Ottawa, Canada, has just started her eighth suit for divorce against her husband. The first suit was filed in 1895.

The couple have been divorced twice. Several suits were dismissed and their troubles patched up.

POPULAR MECHANICS

A Black Finish For Iron.

It is frequently found desirable to give a black finish to the metal parts of harness and equipment. This is especially the case where armies wish to be as invisible as possible. A recipe which produces a solid black patina upon iron is given in a late number of La Nature, giving a handsome appearance and also preventing oxidation. The pieces of metal are plunged into a bath, almost boiling, made by mixing ten liters of water with sixty-five grams of a liquid composed of the following constituents: Strong phosphoric acid, fifty-seven cubic centimeters; water, fifty-seven cubic centimeters; pulverized zinc, eighteen grams. The objects to be blackened must remain in the bath for at least half an hour or more and sometimes for as much as three hours to produce a durable coat.

The Southern Ocean.

According to a note in the Geographical Journal, this name has been recommended by the British admiralty and formally adopted by the commonwealth of Australia and the union of South Africa to designate the whole oceanic zone encircling the globe south of Australia, Africa and South America. This name is, of course, not new, but it is not to be found in Lippincott's Gazetteer and has been used in a merely tentative way by many geographers. As the admiralty mentions the antarctic continent as the southern boundary of this body of water no room is left on the map for an Antarctic ocean.

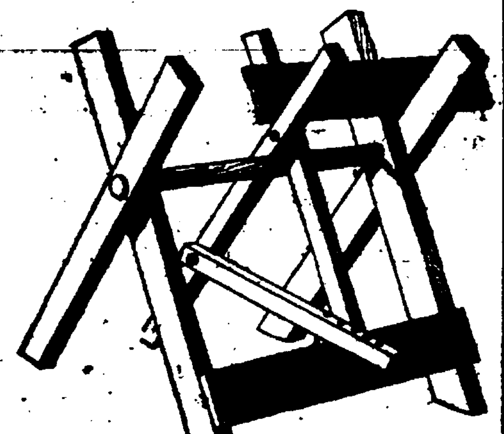
Mucilage Stops Gasoline Leak.

A leak started in the ground joint connection between the gasoline supply pipe and the carburetor on my automobile, writes a correspondent of Popular Mechanics. It was in a place where it could not be reground easily, although I tried to stop it in this manner. Soap and other lubricants were used to no avail. The thought came to me that some liquid which gasoline would not cut might do, and I used a small portion of old mucilage which had become thick, applying it to the connection and letting it stand to harden, then screwing the joint together. This stopped the leak.

Handy Saw Horse Attachment.

When it is necessary to saw a few short pieces the ordinary saw horse is an unhandy place to hold the wood. The attachment shown in the illustration will hold a stick regardless of its length, says Popular Mechanics.

The attachment consists of four pieces of board, two of which are joined together in the same manner as the



HORSE HOLDS ANY LENGTH OF WOOD.

crossed pieces for the saw horse ends, but in such a position that they will hang over the center crossbar and make the depth of the yoke the same as that of the saw horse. The end of one piece bears against a board that is fastened to the front pieces of the saw horse.

Another piece, hinged to the lower end of the opposite center yoke piece, is provided with notches or a rack made of nails to engage the upper edge of the board, as shown. The manner of using the device is obvious.

Casehardening Process.

Yellow prussiate of potash, by weight, seven parts; bichromate of potash, one part; common salt, eight parts; pulverize the crystals and mix thoroughly. Heat the piece to be hardened to a dark red and dip into the preparation or sprinkle it on the piece. Return to the fire and let it soak, then repeat several times according to the depth of hardened surface wanted. Finally plunge into water or oil. This may be used on tool steel, soft steel or iron.

New Process Cheapens Radium.

Radium bromide valued at $11,000 recently turned over to the National Radium institute for the treatment of cancer cases is the first radium extracted by the new process developed by the experts of the bureau of mines. The work of extracting the metal was done in the laboratory of the bureau at Denver from Colorado ores. The cost was only $40,000 a gram (15.43 grains), while the commercial price of radium is about $120,000 a gram.

For Drilling Hard Steel.

A mixture which will permit hard steel or iron to be drilled with ordinary drills is made by using one part spirits of camphor and four parts turpentine. Mix well and apply cold, letting it remain a few minutes before applying the drill. Run the drill slowly with fine feed.

Tool Making Hint.

The end of a bar of steel that has been broken off should never be used for the working or cutting end of a die or punch. The fibers in the end of such a bar have been so severely strained in breaking that the steel is unsuitable for performing the work done by a punch or die.

The Girl He Left Behind Him

By F. A. MITCHEL

John Hobbs was a Yorkshireman, born on his father's farm, worked on his father's farm and was contented on his father's farm. He had received only a few years' schooling, but he was a bit of a philosopher in his own way. He was engaged to be married to Ellen Brierly and expected to inherit her father's farm and live and die there. Ellen was a high strung, emotional girl and when the war with Germany broke out insisted that John should enlist.

"What for?" asked John.

"Why, all the men are enlisting."

"It seems to me, if that's so, some one 'ad better stay 'ome and do the farmin'."

"But think of the excitement of going off to the war with the flags flying, the drums beating and the band playing 'The Girl I Left Behind Me!'"

"And hobblin' back singin' 'the leg I left be'ind me.'"

"John, I'm afraid you're a coward."

John looked at her, leaning on the spade with which he had been digging, then threw it down and said:

"I can't stand that from the girl I love. I'm goin' to enlist."

"Forgive me," said Ellen, throwing her arms about him. "I knew you weren't afraid to go to the war. I thought you needed a little prodding."

"I'm goin' to war to please you. I don't believe in wars. The fellers that go either don't come back or, if they do, they find the excitement all over and people talkin' about somethin' else. They don't cut no figure at all. The fellers that stayed at 'ome has got the jobs, and the soldier 'as to git a livin' the best way 'e can."

"Don't fear for that, Johnny, dear. I'll be 'ere to welcome you back, and if you are maimed I'll take care of you for the rest of your life."

She kissed him and patted him to make him feel better about the sacrifice he was making, but Johnny refused to be comforted. However, he went to the nearest recruiting station and enlisted. When he marched away with the regimental band playing "The Girl I Left Behind Me" Ellen stood by the roadside waving her handkerchief at him, her eyes bedimmed with tears.

One day, the better part of a year later, a discharged soldier, walking along a road in Yorkshire on one flesh leg and a wooden one, met a man with a hoe on his shoulder.

"Mister," said the ex-soldier, "Hi been to the war. Hi was taken prisoner by the Germans on the battlefield, all hexcept my leg, that was shot off and wasn't worth anything. Hi been a prisoner for months, but was hexchanged not long ago and sent 'ome. I went from this place and want to arsk you about some people I left 'ere. Wot's become o' Ellen Brierly?"

"Wot's Ellen Brierly to you?" snarled the man.

"Wot's she to me? A good deal, seein' that Hi went to the war for 'er sake and left my leg in Belgium for 'er sake too."

"Are you John 'Obbs?"

"Fauncy I are, wot's left o' me. Besides my leg, my right 'and 'as gone and my left heye."

"And you've come back to marry your sweet'eart?"

"Hi fauncy. She promised to take care o' me for the rest o' my life if I came back maimed."

The man looked thoughtful, stroked his beard, changed the leg he was standing on several times, then said:

"This 'ere promisin' to take care o' any one for life is a bad business."

"'Ow so?"

"I promised to take care of a woman for 'er life, and I'm a-doin' of it, but it's a 'ard job. I wouldn't mind givin' 'er to you to take care of you."

"I don't want 'er. I want Ellen Brierly, the girl I left behind me when I went to the war and the girl I went to the war to please."

"I'm sorry you did that."

"Why?"

"Well, your goin' to the war got me into a lot o' trouble. I was mighty independent in them days. I 'ad no worryment wotsoever. A girl took a shine to me and married me. I ain't 'ad no peace since."

"Is that wot comes o' matrimony?"

"That's wot come to me. See 'ere, young fellow. I fancy it was very 'ard stayin' in German 'ospitals and leavin' your leg and your fingers behind you and losin' your eye, but you missed a lot o' troubles worse than that by goin'."

"Wot troubles?"

"The troubles o' matrimony. You missed 'em; I got 'em."

"'Ow so?"

"I married the girl you left behind you."

"Wot! You married Ellen Brierly?"

"I did. I knew that a feller named John 'Obbs that 'ad gone to the war was expectin' to marry 'er when 'e got back—if he ever did git back—and I thought I was wrongin' 'im. I don't mind doin' the best I can to make amends. If you want 'er I'll light out and say nothin' about it, leavin' 'er to you."

John Hobbs thought awhile before accepting or declining this very self sacrificing offer. Finally he said:

"That's very kind 'earted o' you, my friend, but seein' 'ow you and Ellen is married it wouldn't be 'onorable o' me to crowd you out. I'm goin' to my father and mother, and I fancy they'll be glad to take care o' me. So[illegible]"

And he stumped on.

Mr. Bowser Laughs

And So Do Mrs. Bowser and the Cat.

By M. QUAD.

Copyright, 1915, by the McClure Newspaper Syndicate.

The other night as Mr. Bowser settled down to his newspaper and cigar the cat leaped up on his lap, and Mrs. Bowser noticed that he didn't knock her head off at once. He is not exactly down on cats, and the Bowser cat had been an inmate of the family for many years. But Mr. Bowser is rather erratic. Sometimes he seems to love cats, and again his glare of malevolence sends them hustling for life.

Mrs. Bowser sat reading a book, and all was quiet and content within the house. Even the cook had broken her last dish in doing up the dinner dishes. The cricket on the hearth was getting ready to chirp when there came a sound like a human chuckle.

Which was it and who was it?

The sounds were repeated, and Mrs. Bowser looked up. Mr. Bowser was the guilty party. He chuckled again as he finally stroked the cat. Indeed, his chuckle became a cackle, and the cackle finally reached the ha! ha! stage.

"What on earth is the matter with you?" exclaimed Mrs. Bowser in tones of astonishment.

"N-othing—nothing 'tall."

"But there must be. You are looking red in the face and trying your hardest to laugh."

"I was thinking of—of the cat—ha!"

"What about the cat? She seems to be all right."

"Yes, she seems to be a-l-right—ha! ha!"

Mrs. Bowser stood up in her astonishment and looked at him. Mr. Bowser returned her look and continued to stroke the cat. After half a minute he asked:

"KITTIE, KITTIE! COME HERE, OLD CAT!"

"You seem to think it funny that I love our cat. Haven't you always noticed that I just doted on her?"

"Not by a jugful, Mr. Bowser. You have almost kept her in terror of her life ever since she came to us."

"She knows better than that, doesn't she?" said Bowser as he lifted the cat up against his cheek. "I have always thought her the best cat in the world and sometimes I have hurried home to dinner more on her account than on any other. Nice cat. Good old cat. I wouldn't have anything happen to this cat for a hundred dollar bill—ha, ha, ha!"

Mrs. Bowser moved toward the telephone with the object of communicating with the family doctor about Mr. Bowser's mental condition, but he stopped her with the question:

"Mrs. Bowser, how old do you call our blessed old cat?"

"Why—why—I was thinking about it a day or two ago and I made out that she was about twelve years old," she replied.

"That old? How good and kind of her to live that long. I hope she will live another twelve years to comfort this home. She will always find in me a friend and protector. Mrs. Bowser, should I ever learn that during my absence at the office you had perpetrated any act of cruelty toward this dear old cat I should certainly make you answer for it—ha, ha, ha!"

At this point the cat leaped to the floor and took up her quarters under the lounge. If the cricket on the hearth intended to chirp he gave it up, and only the voice of a street peddler came faintly to break the silence. Mrs. Bowser was more than astonished, but there was something more to come. All of a sudden Mr. Bowser half shrieked out with laughter and bent double in his chair and pounded his leg with his fist as he uttered his ha, ha, ha's!

"Excuse me, dear," he replied as he straightened up and wiped the tears from his eyes. "Of course it was foolish of me, but I got to thinking. Once in awhile one does think, you know."

"Even about cats," she sneered.

"Yes, about cats. I think I will take a little walk and drop in and see the druggist for a bit of a chat."

As Mrs. Bowser sat alone for the next half hour she wondered and wondered if anything serious was to follow Mr. Bowser's strange exhibition, but finally gave it up as one of those weak spots which now and again appear in men's characters.

Mr. Bowser returned with a faint smile around his mouth and a twinkle in his eyes, but he was subdued, and the rest of the evening passed off without alarm.

Next day Mrs. Bowser had shopping to do in the afternoon, but before starting out she said to the cook:

"Maggie, I want you to keep your eye on the cat while I am gone."

"Is she going to run away, mum?"

"I don't think so, but she may be carried away."

"By the cat and dog wagon, mum?"

"I can't say, but somehow I feel that something will happen to her unless she is watched. If Mr. Bowser comes home unexpectedly make an excuse to keep your eye on him."

"Why, mum, Mr. Bowser wouldn't take the cat away, would he?"

"Well, he was most too affectionate to her last evening. At any rate, keep your eye on the cat and Mr. Bowser."

At 3 o'clock that afternoon two or three things happened at the Bowser mansion. The cook had kitchen utensils to scour and found that she was out of sand soap and obliged to go to the grocery for a supply. The Bowser cat awoke from a nap on the sitting room rug and passed out into the back yard and the sunshine to try a little promenade on the fence to get the kinks out of her legs.

The cook was at the grocery and inquiring for her soap and accepting the clerk's invitation to attend a picnic with him at the same time when Mr. Bowser drove up to the deserted house with a farmer in his wagon. It took him but a minute to rush through the house and find Mrs. Bowser and the cook absent. From a rear window he saw the "dear old cat" on the alley fence, and hustling back to the wagon he had the horses gallop around to the alley gate.

With an empty potato sack on his arm and a smile of hypocrisy on his lips he approached the innocent victim of his wiles with:

"Kitty, Kitty. Come here, old cat. I am going to give you a little vacation. That's right. Show your trust and confidence in one who has never betrayed you!"

With that he dropped the feline into the sack and made for the wagon, and two minutes later Mr. Bowser, the Bowser cat and the farmer and his wagon were out of the neighborhood.

The cook had intended to make a two minute job of buying the soap, but, of course, it was twenty minutes before she got back to the house. Her mind being on that picnic, it was half an hour more before she looked around for the cat. Grimalkin was gone. Nor could an hour's hunt reveal hide nor head of her.

When Mrs. Bowser reached home no scouring had been done. No preparations for dinner, but nothing but tears and sighs and reproaches had taken place.

"The cat—the cat is gone, mum!" was the doleful news communicated.

"But I told you to keep your eye on her."

"I had to go to the grocery for soap."

"Are you sure Mr. Bowser didn't come home?" asked Mrs. Bowser.

"He might have come while I was at the store, mum."

Mrs. Bowser looked for the cat for the next half hour, and not finding or hearing of her she gave it up. Her mind was made up as to the fate of the cat, however, and the policy that she was to pursue was adopted.

Mr. Bowser came home at the usual hour, and he found Mrs. Bowser's attitude the same as usual. No excitement, no perturbation. He looked at her closely and made up his mind that she had not yet discovered his heinous offense.

Dinner passed off as usual. If there was suspicion abroad he did not feel that it rested on him. Once or twice during the meal he started to give a chuckle or a cackle, but at once suppressed it. It was only when he was seated again with a newspaper and cigar that he said in a careless way:

"It seems kinder lonesome without the cat around. I wonder where she is?"

"Oh, I guess she is around somewhere," replied Mrs. Bowser in equally careless tones.

"I should hate to have her lost at her age after having lived with us so long as she has."

"I am not worrying any."

Five minutes passed, and Bowser chuckled. Five more, and he laughed. Two or three more, and he said:

"Somehow I am afraid that we shall never see our dear old cat again."

"I think we shall," said Mrs. Bowser as she rose up and called to the cook through the tube:

"Maggie, is the cat down there?"

"Yes, mum."

"Then bring her up. Mr. Bowser wants to see her."

And in another minute the cook came up lugging that "dear old cat," looking a little weary, but not much worse for wear. As she dropped the feline to the floor there was a purr of "home again," and Mr. Bowser raised his hands and exclaimed:

"It can't be! It can't be!"

"But it is," laughed Mrs. Bowser. "She returned while we were eating dinner. It is a cat habit, you know."

Mr. Bowser looked from the cat to Mrs. Bowser and then back.

Mrs. Bowser looked from Mr. Bowser to the cat.

Then they both chuckled and smiled and grinned and burst out laughing, which was continued for five long minutes. Mr. Bowser put his arm around her and asked to be forgiven.

And the cat chuckled and smiled and laughed with them. It was the first time in years that Bowser had not threatened divorce, but he was seeing the funny side of things.

Pompadour Silk Evening Gown

Designed by Joseph, New York.

THIS pompadour silk evening gown is made over a wide accordion plaited petticoat of yellow chiffon and lace, which permits the necessary freedom required in the dancing frock. It is edged with two bands of gold braid. The festoons of flowers on the silk overskirt are of delicate shades of pink and blue. The chic bodice, which is cut very low, is handsomely embroidered in rhinestones, pearls and sapphires. The tiny sleeve is just a cap of dainty lace.

ANNA MAY.

The Scrap Book

As the Guide Told It.

I tell you, mister, it was a day to make a man feel tickled to death with himself and everything else in creation—that is, it started out by being that sort of a day.

J. Esterbrook, he felt it too. He was up forward, sitting straddle of the bow and waggling his head around at the mountains and things. Bimeby he came working his way aft, hanging into the gunwale, and set down on the starboard locker that run along the cockpit.

"Don't you feel the subtile urge of nature?" says he to me.

I see he wanted to chin with me, and I felt like mebbe that was part of what I was paid for, so I says to him:

"No, I can't say I feel no urge. I feel just like a cat with a sasser of cream in front of me. They ain't nothing I want what I ain't got."

"Strange," he mutters to himself. "The intellectual processes of the proletariat seems to be the reverse of those of the higher social strata."

I kind of suspicioned his remarks wa'n't exactly favorable to me, but I didn't say nothing. Five dollars a day is $5 a day. Anybody can call me a proletariat for that if they don't say it in a mean tone of voice.—William Merriam Rouse in Countryside Magazine.

Nature.

As a fond mother, when the day is o'er,
Leads by the hand her little child to bed,
Half willing, half reluctant to be led
And leave his broken playthings on the floor,
Still gazing at them through the open door,
Nor wholly reassured and comforted
By promises of others in their stead,
Which, though more splendid, may not please him more;
So nature deals with us and takes away
Our playthings one by one and by the hand
Leads us to rest so gently that we go
Scarce knowing if we wish to go or stay,
Being too full of sleep to understand
How far the unknown transcends the what we know.

—Henry Wadsworth Longfellow.

Meeting All Expectations.

One evening the young minister, who had seemed rather attracted by "Big Sister" Grace, was dining with the family. "Little Sister" was talking rapidly when the visitor was about to ask the blessing. Turning to the child he said in a tone of mild reproof:

"Laura, I am going to ask grace."

"Well, it's about time," answered "Little Sister" in an equally reproving tone. "We've been expecting you to do it for a year, and she has too."—Ladies' Home Journal.

Had an Easy Job

Cy Warman, author of the song "Sweet Marie," was an official of the Grand Trunk railroad, but he was always modest about his past. Once he stopped overnight at a little hotel in northern Michigan, conducted by a man who had previously run a shooting gallery and later a night lunch car in New York. The host related his own life story at length. Then he became interested in the biography of the visitor. "What do you do in Montreal, Mr. Warman?" "I work for the Grand Trunk," said Warman. "What kind of a job have you got? Do you sell tickets or handle baggage?" "Oh, I've got a better job than either of those," said Cy. "You know the man who goes alongside the train and taps the wheels with a hammer to see that everything's all right? Well, I help him listen."

The Loan.

"Theatrical people," said Butler Glaenzer, poet and raconteur, "are loose and careless about money matters. A leading man told me how he was invited down to Atlantic City over Sunday by a manager.

"'Aha!' the leading man said, 'just my chance to borrow $500—the chance I've been looking for so long!'

"So he went down to Atlantic City and he and the manager had a fine time. But he postponed asking for the loan. They golfed Sunday morning—and he hated to spoil the game. They motored Sunday afternoon—and it seemed a shame to stain that exhilarating run with sordid money talk. In the evening the leading man, all rosy from his fine day, decided to postpone his request till the next morning on the train back to town.

"But in the morning at breakfast, as he now ate superb ham and eggs and now gazed at the breaking blue waves and now composed the speech wherewith he would ask for his loan, the head waiter came to him and said:

"'Your friend, sir, has gone back to Boston, sir. He left this note.'

"The leading man, very pale, opened the note and read:

"'Dear George—Wired for and had to take first train. Kindly pay the bill and let me know what I owe you when we next meet in town. Jake.'"—Philadelphia Bulletin.

Getting It Exact.

A New Yorker who recently returned from a visit in Boston vouches for the truth of the following: One afternoon he found the six-year-old son of his host settled in the drawing room with a sheet of paper before him and a pencil clasped in his chubby first. Stealing a look over the boy's shoulder, he saw that the little fellow was making pictures.

"Well, Bobby," he asked genially, "are you drawing an engine?"

Slowly the child looked up, and slowly he spoke:

"It would take a very strong boy to draw an engine, but I am making a picture of a locomotive."—Youth's Companion.

Belgium.

Belgium takes its name from the tribe of the Belgae, who inhabited a part of ancient Gaul.

MAKING MUSIC BOXES.

Great Skill and Meager Pay For the Experts of Geneva.

One big industry of Geneva, Switzerland, is the manufacture of music boxes. Thousands of men, women and children are employed in the factories, one of which was visited by a young American, who thus writes about the visit:

An attendant invited him to take a seat. He did so, and strains of delightful music came from the chair. He hung his hat on a rack and put his traveling staff in the stand. Music came from both rack and stand. He wrote his name in the visitors' register, and on dipping his pen in the ink the music burst forth from the inkstand.

The manager of the factory explained the process of making music boxes, a business which requires patience and nicety.

The different parts are made by men who are experts in those parts, and they do nothing else year in and year out.

The music is marked on the cylinder by a man who has served several years of apprenticeship. Another man inserts in the marked places pegs which have been filed to a uniform length. The comb or set of teeth which strikes the pegs and makes the sound is arranged by a man who does nothing else. The cylinder is then revolved to see that every peg produces a proper tone.

The most delicate work of all is the revising of each peg. It is done by a workman who has a good ear for music. He sees that each peg is in its proper place and bent at the correct angle.

When the instrument is in its case an expert examines it to see that the time is perfect and good.

The best workmen—those who mark the cylinder and adjust the pegs—earn $1.80 a day, after serving an apprenticeship of ten or twelve years. An ordinary workman earns $1 a day.—St. Louis Globe-Democrat.

POISONOUS SNAKES.

They Are Absolutely Proof Against Their Own or Other Venom.

Snake venom is a transparent fluid, yellowish in color and of about the consistency of human saliva. When dried it takes the form of flaky yellow crystals. In this shape or dissolved in alcohol or glycerin it will remain unaltered and will preserve its poisonous properties for an indefinite period. No satisfactory chemical analysis has ever been made of it, but it seems to be a very complex albuminous compound. A curious discovery recently made is that the blood of venomous serpents is itself poisonous, containing as it does the principles that are concentrated in the secretion of the venom glands.

Venomous snakes are themselves absolutely venom proof. Rattlesnakes dosed by injection with large quantities of their own or other venom have shown not the slightest ill effects. Another remarkable fact is that serpent venom is harmless to human beings or other animals if taken internally. The late Dr. S. Weir Mitchell found that one-fourth of a drop of rattlesnake poison would kill a pigeon if given by hypodermic injection, but a pigeon fed with six drops a day for three successive days suffered not at all in consequence.

Professor Mangili, a pioneer investigator in this line, had an assistant who boldly swallowed all the venom that could be extracted from four large vipers. No bad effects followed. The same negative result was noted by Professor Baird, at that time secretary of the Smithsonian institution, who ate the venom glands of a rattlesnake. As recently ascertained, serpent venom in such circumstances is harmless, because it cannot pass through the mucous membrane that lines the stomach, and it undergoes changes during digestion that allow it to enter the blood as an innocuous substance.—Every Week.

Trap For Quotation Experts.

If any one wants a catch question to spring on a gathering of self confessed literary sharps let him ask whence comes the quotation, "One touch of nature makes the whole world kin." This is one of the six best sellers in the world of quotations, yet not one person in a hundred knows where it comes from. It is comparatively easy to guess the author, but almost impossible to find a person who can name the work.

One could build any number of parlor games around "One touch of nature makes the whole world kin." Try it.—Spokane Spokesman-Review.

Never If Not Better.

"Can't you use a less hackneyed expression than 'He hiked for the tall and uncut timber'?" asked the editor.

"Well," said the young reporter, "I might say 'He beat it to the forest reserves, where the weeping willows have never had their eyelashes trimmed.'"—Boston Truth.

Rained Pitchforks.

"Did you ever see it rain pitchforks here?" asked the city man in the country.

"Sure," replied the farmer. "My neighbors gave me a pitchfork 'shower' when I was married."—Yonkers Statesman.

Johnnie's Joke.

"Pa, does the sun ever rise in the west?"

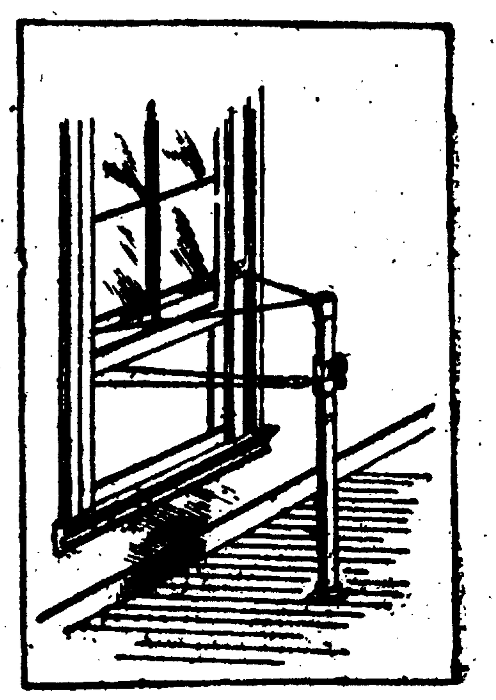
"Certainly not, my son."

"How dark it must always be out there."—Boston Transcript.

One example is worth a thousand arguments.—Gladstone.

HELPFUL HINTS FOR HOUSEWIVES

Midair Clothesline Operated From Inside of Window.



The midair clothesline is one of the institutions of the tenement district, but as they are now generally rigged there is some danger of falling out the window by loss of balance while leaning out to load the line. A New Yorker has made an improvement for the purpose of securing the safety of the persons making use of it. Instead of the line being attached to a pulley outside the window, the rope enters the opening and is passed through a pulley mounted on a short pole secured to the floor and window sash. This is a temporary construction and is put up when it is desired to make use of the line. It will be readily seen how this line may be loaded and the wet clothes drawn out into the open air for drying without the necessity of exposing one's self to the possibility of falling out. All this work may be done from the inside.

Beans Baked With Cream.

Wash and soak overnight a quart of any kind of beans. Parboil in salted water, drain, put in a bean pot or large enamel pan with a teaspoonful of salt, one-half teaspoonful of pepper and same of mustard and a tablespoonful of sugar. Keep well covered with boiling water and bake steadily nearly all day or until the beans take on a yellowish tint; then let the water dry away and add a quart of sweet cream or very rich milk, and continue baking until it is absorbed and the beans are of a creamy consistency and nicely browned on top. They will be found delicious either hot or cold with a delicate, distinctive flavor which nothing else can impart.

Banana Pudding.

Peel six not overripe bananas; cut them into slices with a silver knife. Butter the inside of a deep dish and sprinkle it over with breadcrumbs and granulated sugar; then place the bananas in layers alternately with breadcrumbs, squeeze lemon juice and sprinkle a little sugar over each layer and here and there tiny bits of butter. When the dish is full cover the top with breadcrumbs and sugar, bake in a moderate oven for half an hour and serve with cranberry or crabapple jelly.

Corn Bread.

Mix together one cupful each of yellow cornmeal and white flour, one-half teaspoonful of salt, two teaspoonfuls of sugar and one heaping teaspoonful of baking powder. Add one cupful of sour cream, sweetened with a pinch of soda, beat thoroughly and bake in a sheet iron pan for one hour in a slow, steady oven. To insure light, flaky corn bread the batter should be almost stiff enough to require spreading.

Brazilian Stew.

Cut up a few onions, tomatoes and carrots; have ready two pounds of the shin of beef, cut into pieces about two inches long, and dip each piece into vinegar. Put the vegetables and meat, with some pepper and salt, into a saucepan without any water (or in a casserole in the oven), and let all simmer for four hours. There will be plenty of gravy and the meat will be very tender.

A Biscuit Hint.

When making baking powder biscuits you will find them much better if you will roll the dough thinner than usual and use two cuts for one biscuit, laying one on top of the other. Made in this way, the biscuits will break open easier and look much daintier.

Spice Pie.

One cupful thick sour milk or cream, one cupful sugar, one cupful raisins (seeded), yolks of two eggs, cinnamon and cloves to taste, pinch of salt. Bake as you would pumpkin pie. When set add meringue of the two whites of eggs and brown.

French Salad Dressing.

The ordinary French dressing [illegible] tablespoonfuls oil, one [illegible] tablespoonfuls vinegar, [illegible] el teaspoonful salt, [illegible] level teaspoonful pepper [illegible] one pint of salad.

[illegible] Silk.

[illegible] with but little soap [illegible] used for washing colored silk. If the color runs, vinegar should be stirred into the water until the color sets.

CORPORATION, SAYS MARSHALL

Oswego's Chamber of Commerce Secretary Points to Important Necessary Business Element.

Oswego, July 1.—Wyckliffe Marshall, the new secretary of the Oswego Chamber of Commerce, was formally introduced at an enthusiastic meeting of the organization held at Fitzhugh hall last night. Frederick B. Shepherd, president of the chamber, presided.

The pricipal speaker was Mr. Marshall, and he impressed upon his hearers what the Chamber of Commerce is and what it stands for. Going back to the early days of the commercial industrial and civic organization he told of the wonderful growth and expansion up to the present time. He said in part:

First of all we must have co-operation. We must prepare a program for the work which we propose to follow. The chamber must take action to bring more business to the community, and we should be prepared to defend the business interests of our city. We should endeavor to make ia better home city.

There are civic and commercial activities; and without one the other cannot flourish. Without industry the Chamber of Commerce cannot support retail trade. Industrial education is also an important factor. This was once a fad, but now people are becoming to realize the effectiveness of it, and the system is being introduced in our schools.

The chamber has wisely encouraged agriculture and great benefit is being reaped. In order to get traffic we must develop our waterways. The development of our harbor and canal will be ag reat inducement to manufacturing. We cannot develop our city without regard to the community surrounding. The members of the chamber must be willing to work, and with the support of all we will get results.

Mr. Shepherd told of the work which the chamber accomplished in recent census enumeration. The figures, he said, showed that during the past five years Oswego's increase in population was 10 per cent, and in only one city of the state was the percentage of increase greater.

Thomas P. Kingsford, chairman of the Development Bureau, submitted a report on the activities of that branch of the organization since the annual meeting early in the year.

Frank Jewel Raymond, manager of the industrial department of the National Retail Dry Goods Association, made an address. Arrangements were made at the meeting for a series of lectures to be given by Mr. Raymond in October under the auspices of the chamber.

F. O. Clarke gave a report of a waterways meeting which he attended in New York recently. He announced that a committee composed of P. W. Cullinan, Mr. Shepherd and himself had been selected from the local chamber to attend another meeting in the interest of the proposed canal referendum in New York on July 12.

OFFICERS GET PERMISSION TO RECEIVE CASH REWARD

At its regular meeting last night the fire and police board voted unanimously to allow Chief Edward Dyer of the police department and Officer Hartigan to receive any part of the $3000 reward offered by the Delaware & Lackawanna R. R. Co. for the arrest of the person or persons responsible for the wreck at South Granby last fall when the fireman of the train was instantly killed, and the engineer died several days later. Several passengers were also injured.

The board took this action since any member of the police department is forbidden to accept any reward of any kind for the performance of duty unless by vote of the board.

Shortly after the wreck last year, Chief Dyer and Officer Hartigan started on the case, and worked untiringly for some weeks, finally making two arrests. Charlie Campbell and Frank Becker, two inmates of the home for the feeble minded at Syracuse, who had escaped and were working on a farm at Granby at the time of the accident, were arrested. Chief Dyer learned through information given by a farmer named Cary of Granby that the two boys had been at Granby and near the scene of the accident. The train ran into an open switch after the signal had been displaced by the accused boys.

Becker was afterward sentenced to Matteawan, the state home for the criminal insane, and Campbell was sent to an institution in Rome. If they ever become sane, they will be forced to stand trial for the crime.

Cary claimed the reward from the railroad companw whereas all he did was to tell Chief Dyer that two men had been working for him, according to the Chief. A man named King was instrumental in causing the arrest of the men and although the reward has not been formally given to anyone by the railroad company, Cary has started a suit for the money and King, Hartigan and Chief Dyer have been named as defendants. If Cary does not win his suit, the reward will be divided among the three others. The trial will be held in Syracuse in the near future.

Edward Quirk Deplores the Superfluous Publicity

When interviewed this morning at his office, Edward Quirk, who was instrumental in arranging a conference between the officials of the Hunter Arms Company and representatives of a foreign government who were in this city Tuesday, would not say that anything definite had been done in the matter of the contract for munitions said to have been given the local company at Tuesday's conference. Mr. Quirk wished it announced, however, that he was not a broker in any sense of the word in the matter of the contract, either for the Hunters, the government agents in New York city or anyone else.

"It has been stated that I have acted as broker in this deal," said Mr. Quirk, "and I wish to deny that. I have spent my time and money in attempting to get a contract for the local company, and I have done this without hope of direct gain. As a large taxpayer in this city, it is to my interest and to the interests of every merchant and all the people of this city to have the plant working on full time. There may be some people in the city who have personal grievances against some of the parties concerned, but I want to say that this is no time for that. At such ac ritical time, every merchant should help along as best he can, and no one should do anything which would injure the chances of the local firm.

"The affair is getting too much publicity. There is nothing definite to announce yet because a five or six million dollar deal isn't put through in a few minutes.

Mr. Quirk was asked about rumors which have been circulated in the city during the past few days, among others a rumor that the plant was about to change hands.

"There is aboslutely nothing in that," said Mr. Quirk, "when the time comes, an announcement will be made which will explain the whole matter."

WEATHER FORECAST

Partly cloudy tonight and Friday with moderate variable winds.

LECTURER WITH A PUNCH TO SPEAK THIS MONTH

J. S. Knox is one of the half dozen great business lecturers in the country. He is head of the Knox school of salesmanship and business efficiency and is the author of several authoritative textbooks on salesmanship and personal and business efficiency. As a speaker he has the reputation of saying more in the same length of time than any other man in America.

His success is due largely to his knowledge of business conditions and business needs, and his message is both practical and inspirational. His rapid fire epigrams never fail to entertain an audience, and commercial clubs and other business men's organizations over the country are warm in their praise of his work. His ability to bring to the local citizens and community a vital and live discussion is amply attested to by the fact that he is being repeated over this Chautauqua circuit from last summer by reason of the many requests which have come to the Redpath management for an opportunity to hear him speak again.

President Knoxs'l ecture, combined with his unusually pleasing personality, will be one of the biggest and best features of the Chautauqua here this summer.

CROCKETT-MARVIN

Representatives of two of this city's prominent families were married Tuesday evening at the home of Mr. and Mrs. C. E. Crockett in Sterling, when Miss Lena I. Crockett became the bride of Warren E. Marvin, son of Mr. and Mrs. Thomas H. Marvin of E. Broadway.

The Rev. M. L. Sawtelle of Troy officiated. He was assisted by the Rev. Charles S. Robertson, pastor of the First Presbyterian church. Harold [illegible]ter of Fulton acted as best man. Mrs. C. E. Wadsworth of Syracuse was matron of honor. Bridesmaids were Miss Helen Marvin of Fulton, a sister of the bridegroom, and Miss [illegible] Crockett of Sterling, sister of the bride. The ushers were C. E. [illegible] of Syracuse and Milton Allen of Fulton. The ribbon bearers were Miss Madeline Crockett of Sterling and Louis Bouton of Detroit. Miss Barbara Crockett was the flower girl.

Following the wedding a reception was held at which refreshments were served.

Mr. and Mrs. Marvin left after the ceremony for a brief wedding trip. Mr. Marvin holds a responsible position at the Nestle Food plant in this city.

Community Notes

The order of Pocohontas will hold a bake food sale at Druse hardware store Saturday morning.

* * *

W. D. Hamilton leaves tonight for Boston where he will spend a week.

* * *

Oscar and Fayette Parish, who have spending the past week with Mrs. Mary Jones and family, returned home today.

* * *

Mrs. A. J. Powell has returned to her home in this city after attending the graduating exercises at Augustinian academy, Carthage, from which her daughter, Miss Margaret Powell, recently graduated.

* * *

The K. K. Klub which had arranged to picnic at Minetto yesterday changed plans on account of the rain and met instead at the home of Mrs. Alvah Bateman, S. 7th st.

* * *

Mr. and Mrs. R. H. McKay and daughters, Mary and Helen, left last week for Canton where they will spend the summer months.

* * *

Mrs. Leland Sickler gave a shower Tuesday evening in honor of Miss Beatrice Elliott whose marriage to Ellwood Beals takes place in the near future.

* * *

Mr. and Mrs. Laveck of Emery st. entertained last evening in honor of Mr. and Mrs. W. H. Sharpe, of St. Johns, N. B. G. W. Wilson and his orchestra furnished a delightful program which was highly appreciated by the guests.

STRAUS GIVES YACHT TO AID PALESTINE

Boston, July 1.—Nathan Straus, New York philanthropist, has given his yacht, the Sisiline, to the Zionist cause to help relieve Jewish distress in Palestine. In a letter to Louis D. Brandels, chairman of the provisional executive committee for Zionist affair, he said:

"Dear Mr. Brandeis—In these dark days for all humanity, and for our brethren in particular, the importance of taking steps to relieve the general distress prevailing, especially in the Holy Land, has become a matter of paramount importance.

"'The world is my country, to do good is my religion.' I have therefore resolved to make a gift to the provisional executive committee for general Zionist affairs of my steam yacht, the Sisiline, a description of which is herewith enclosed.

"This yacht I have now placed in the hands of brokers to be sold at a sacrifice, so that the cash may be realized as quickly as possible to relieve the needs that are pressing. The proceeds are to be expended under yom personal direction in the way that you will find most ffective. Faithfully yours,

"Nathan Straus."

The yacht is valued at more than $35,000.

Children Cry FOR FLETCHER'S CASTORIA

MANHOLES BEING RAISED HIGHER BY THE CITY

Although the Lake Shore & Northern R. R. company has made no move toward erecting a trestle for its tracks across the old canal bed at Oneida st. it was learned this morning that the company will not wait until the First st. section of the grade is complete so that the tracks laid on this side of the canal will be permanent. The new corner will ieliminate the sharp turn in the tracks at that point and the tracks will turn into First st. on a wide curve.

Frank Rumsey, superintendent of public works, was on hand this morning with two masons ready to build the city's manholes up to the grave level. The manholes will be raised ten feet.

Mr. Rumsey explained the proposed improvement this morning and said instead of a hill at the corner the grade would gently slope from the First st. level until it reached the level of the lower bridge. Some of the hill at the Gage mill will probably be taken off also.

MUSICAL PROVED A DECIDED SUCCESS

A large and appreciative audience attended the concert at the First Methodist Episcopal church last evening in spite of the inclement weather. The program was a very interesting and entertaining one and all of the numbers were well received.

Among the numbers which were particularly pleasing was the "Ave Maria," adapted from "Cavaliera Rusticana," by Mrs. L. P. Smith, accompanied at the organ by Miss Blanche Hall, and with Miss Osia Rumsey at the harp; "At Dawning," by Charles Wakefield Cadman, by Mrs. L. Fowler Joy; "Laddie," by Mrs. Georgietta Foster Shaver; two solos by Miss Ruth Allen, and a duet by F. Jess and Byron J. Newton. Mrs. J. H. Howe accompanied in a very artistic manner. Miss Winifred Strong, a pupil of Mrs. Shaver, in a duet with Mrs. Shaver, sang in a voice that promises wonders in the future. Miss Strong, who is but eighteen years of age now possesses rare qualities of voice.

NEW YORK'S 5-CENT 'PHONE RATE BEGAN TODAY

New York, July 1.—Lower rates for telephone service which wen into effect today extend the five-cent public call area from Manhattan Island below Harlem so that iti ncludes all the city except Staten Island, the Rockaways, Jamaica and Queens, east of Long Island city. The new maximum rate for a public telephone call between points anywhere in the five boroughs is now ten cents. Privtae telephone calls from Manhattan, below Harlem, are ten cents only to the southern portion of Staten Island.

There are approximately 585,000 telephone subscribers in New York, and the saving to them in cost of service annually is estimated by the legislative committee's expert at $2,943,000. New telephone installations are being made at the rate of about 100 a day. The reductions in effect today are those agreed upon three months ago between the Public Service Commission and the New York Telephone Company. They especially affect the abolition of a double toll, ten cents, for telephone conversations between Manhattan and Brooklyn and the upper portion of the Bronx.

SYRACUSE MEN INVITED TO JOIN SUMMER CAMP

Many Syracuse business and professional men have been invited to spend four weeks, from August 10 to September 6, at the military training camp to be established near the United States army post, Plattsburg barracks.

It is expected that many Syracuse men will attend, although none has yet sent in acceptance as far as could be learned last night. In New York more than 200 professional men, many of them Wall street brokers, have signified their intention of spending the four weeks in the camp.

The purpose of the camp is to qualify business and professional men of military age for efficient service to the country in case of need. This information is contained in a circular which accompanied each application blank.

The determination to establish such a camp was the result of an informal gathering at the Harvard Club in New York a few weeks ago. General Leonard Wood is a Harvard man. In an impromptu speech he suggested the idea of the camp to better the military situation in the United States.

Graduates of Harvard, Cornell and other unversities were among those in Syracuse who received invitations. The men in the camp will be drilled by United States army officers in all branches of the service, including target practice, military hygiene, tactics, strategy and battalion drill.

President Wilson and military experts in the United States have given their sanction to the experiment. Each man will be expected to defray his own expenses, amounting to less than $40 for the four weeks. This amount will include the cost of uniforms.

INCOME TAX LEAVES A TREASURY DEFICIT

Washington, July 1.—Though heavy receipts from stamp, corporation and income taxes have added to funds in the Federal Treasury, the balance on hand at the close of business Saturday, June 19, was only $25,519,973 as compared with a balance of $137,312,682.86 on the same date two years ago, when Republican [illegible] were in control of revenues and expenditures. The deficit, as represented by the excess of all disbursements over all revenues for the [illegible] year up to June 19 was $120,671[illegible]

Alderman Foster Gets Public Commendation for His Opposition to Legislation and Attempted Legislation

Turks Lose Krithia; Invaders Lose 20,000 on Gallipoli Strip

French Torpedo Boat Effectively Bombards Turkish Encampment and Shells Village Near Krithia; Capital's Outer Works Reduced by Storming.

By Compton Mackenzie

The Dandanelles, via London—We are now storming an immensely strong fortress defending Constantinople and British and Australian troops by an amazing feat of arms have already taken the outer works of the Kilid Bahr plateau. They are drawing against them a large part of the garrison, which is composed of the flower of the Turkish army.

Notwithstanding their casualities of 70,00, the allied troops are fighting with gallantry and desperation.

On the night of June 11 and 12 there was a brilliant little action by a regiment of South Wales borderers which resulted in a gain of two trenches. On June 15 the Turks, led by a Turkish-German officer, made an assault on the trenches of the Eighty-eighth Brigade, but were driven off with loss.

On June 21 it was determined to straighten the line on the extreme right. All through the morning the cannonade proceeded, and by noon the second division of the French, on the left, had stormed and captured all the Turikishh trenchhes of the first two lines. On the hihght the first division, after reaching their objective, had fallen back. Again they advance and again took the ternches and again they were driven out.

At this moment a message was sent to say the trenches must be recaptured and held. British guns and howitzers were asked for and lent at once. The bombardment was resumed and continued throughout the afternoon. At 5:30 it seemed as though every gun on earth were pouring shells into the Turkish lines.

At 6 o'clock the third assault was delivered. In one trench there was a temporary shortage of ammunition. The Turks fought even with stones and sticks. The First Battalion came hurrying up from the Turkish right to reimforce; they were caught on open ground by the drumming 75's and melted away.

Six hundred yards of Turkish trenches were taken, and still the bombardment continued in order to ward off the counter attack anticipated. The Turkish casualties were at least 1000. One trench 200 yards long and ten feet deep was brimming over the dead.

They were valiant, those dead men, With his back to the wall the Turk is magnificent!

A French officer who took part in the last attack on the Gallipoli peninsula, relates that the attack commenced by sustained bombardment from the French batteries. At 6 o'clock the next morning it developed that the general assault was on the Haricot position whichh was carried.

At noon the assault was renewed, with the result that several lines of the Turks' trenches near Kereves Dere, beyond the Haricot position were captured.

The Turks tried, in two assaults durin gthe night, to retake the lost positions, but were repulsed with heavy losses.

The French in this attack expended an enormount of fhells. It isc alculated that ten shells were exploded in each square yard of ground in the attacked position.

Captain Trickey, Captain of Armenia, Gives Story

London.—When the submarine first sighted us, four miles off, she put a couple of shots over our deck as a signal to stop. We turned and ran.

Then began a desperate race. The submarine began to shell us in earnest, and I soon found he was gaining; but I had no intention of giving up the struggle. Shrapnel was bursting all around us. Several of the crew were killed, while others were knocked overboard.

[illegible] I discovred my steering gear was hit, which put us out of c[illegible]on. Then a shell fell into the engine-room; another carried aw[illegible] Marconi house, and a third cut down the funnel, disabling the [illegible] and preventing them from keeping up steam.

[illegible] I decided to surrender, for the ship was on fire in three places. The running fight had been in progress for about fiteen miles and an [illegible]'s time. Twelve or thirteen men lay dead on the deck.

The submarine drew up alongside, and I was told to clear ship. At seven [illegible]s past eight the Armenian went down, shattered by two torp[illegible].

I must [illegible] the submarine commander showed us every fairness after we h[illegible] up, picking up many of the crew, who, because of a damaged [illegible] fallen into the water.

SUBSCRIBER BELIEVES IN MATERIAL GAINS IN CITY CONDITIONS

The Evening Times is in receipt of a communication which commends the course pursued by Alderman Foster in his councilmanic career—a course that is endorsed by many taxpayers throughout the city. The writer of the letter withholds his name from print. He is prominent in the business world of Fulton.

The letter follows:

Editor Fulton Times:

I have been much interested in the Times' efforts toward a greater and better Fulton.

Articles have appeared in your columns expressing the various opinions of the several authors upon matters concerning our city, its officials and official action upon diverse questions and propositions.

Briefly, two conflicting, yet honest opinions may be found in any community in regard to the basic elements of civic prosperity.

To the one, brass bands, banquets, ball games, picnics, early closing, hilarity a continuous hurrah, seem to offer a complete and infallible prescription guaranteeing perfect happiness, ideal conditions—development unlimited.

The other more or less old fashioned opinion of many citizens and taxpayers would prescribe to the same end:

The expenditure of public funds for the material improvement of conditions affecting the taxpayers and the community at large.

Its industries, commerce, highways, sanitation and general betterment of physical conditions.

Alderman Foster has been in your columns, brought quite prominently to public notice in connection with the appropriation for band concerts.

There are streets in the ward [illegible] Mr. Foster represents which [illegible] nearly or quite the entire season.

It is not unfair to Mr. Foster to assume that he inclines to the material improvement idea, also that he was elected to represent and abide by the will of his constituents, inquiring, "Be it better streets or music?" before registering his decision in the matter.

Mr. Foster cannot reasonably complain, if accused, of the possession of that unfashionable and inconvenient attribut, a conscience, since he failed in his official capacity to the approve the "Brown Bill" with its salary grab and emergency tax, for which it is safe to say and emergency will be seldom lacking.

It may comfort Mr. Foster to know that there are, if personal expression of opinion is to be relied upon, many citizens independent of party affiliation in his own and other wards, who commend his course and hope for his continuance in official position.

GOVERNMENT OFFICERS THROW VEIL OF MYSTERY AROUND ARMS SEIZURE

NeW York, July 2.—Not since the war began have government officers thrown such a veil of mystery around their actions as they did yesterday concerning the reported seizure of a 250 ton consignment of arms and ammuition destined ostensibly to China, via Java, which Hans Touscher, agent in the United States for the Krupp Gun Works, Essen, Germany, is said to have been most desirous of getting to the Orient.

Even more interesting than the reported seizure was the statement of T. Ashley Sparks a member of the firm of Funch, Edye & Co., steamship agents, to whom the shipment was offered. His story gave rise to reports current in shipping circles that for some time the Germans were most anxious to cause an uprising among the natives in British possessions in the Orient. Nothing was learned, however, to indicate the consignment was to be used for that purpose.

Mr. Sparks denied the seizure was made on pier 3, Bush Terminals, which is leased to his company, nor could any information be obtained at the pier. There was a report that the 1000rifles and 1,000,000 rounds of ammunition recently discovered in a West Houston street warehouse might have been part of the consignment.

Mr. Sparks said that while he was out of the city a clerk accepted the consignment for shipment to Java on board the Jemba, a large tramp steam ship which recently left this port. The shipment was offered by Schenker & Co., shpping agents, of No. 17 Battery place. That concern said that the ultimate desination of the ship-

WEATHER FORECAST

Probably local showers tonight and Saturday; not much change in temperature, with moderate variable winds.

All Sections of State Send Delegates to Y. P. B. Convention

Tonight's Session to Be Held in First M. E. Church, With Mrs. Maude Perkins of East Syracuse Presiding---Real Work Begins Tomorrow Afternoon.

Members of the Young People's branch of the Women's Christian Temperance Union will meet in this city tonight for the sixth annual convention of the organization. The first session of the convention will begin at 8 o'clock tonight and the convention will continue until Tuesday noon. The sessions will be held in the First Methodist Episcopal church, and six hundred delegates from all sections of the state are expected to attend. The local branch and the officers of the association have been busy for the past two weeks arranging accommodations for the large number of visitors.

Mrs. Maude Perkins will preside at the opening session tonight which will consist of a prayer service, an address by Daniel B. Poling, of the National Christian Endeavor Union and an informal reception to the delegates.

The convention will meet in executive session tomorrow morning at 9 o'clock and the president, Mason A. Stratton, of Cortland, N.Y., will occupy the chair. The reports of the various committees will be read as well as the report of [illegible], of Ithaca, N.Y.

Tomorrow afternoon at 2 o'clock the convention will go into session again after an adjournment for lunch, and the address of the afternoon will be given by President Stratton. After the address Welcome Hour will be held, in which a representative of Mayor Fox will act for the city; Rev. Charles Olmstead for the churches; Miss Mildred Hart for the Y. P. B.; and Mrs. William Sylvester for the W. C. T. U.

At the Saturday night session a musical contest for a diamond and gold medal will be the feature of the evening. Miss Lucile Petrie, superintendent of Medal Contest work will preside.

On Sunday all the pastors of the local churches will preach specitl sermons on temperance and the delegates will confine themselves to no particular church but will attend the one of which they are members. There will be a mass meeting Sunday afternoon, and Mrs. Ella Boole, president of the New York W. C. T. U. and vice-president of the National W. C. T. U. will make the principal address.

At 3 o'clock Monday afternoon there will be a parade of all delegates and the members of the local temperance organizations. The committee in charge expects more than 1000 people in line. Mrs. L. M. Barstow of Ithaca will be the grand marshal of the parade.

The delegates will be lodged at the homes of members of the local branch and local women who have volunteered their services to the convention. All the meals except breakfast will be served at the convention hall. The women of the First Baptist church will serve the meals on Monday. The Boy Scouts of the State Sstreet church will act as messengers and pages during the convention. Many features are planned which have not been made public as yet.

BLASTING BEGINS NEXT WEEK FOR POWER PLANT

Contractor Walter Bradley, in charge of the work of erecting the large new plant for the Oswego Falls Pulp and Paper company, announced today that, after two months, the work was progressing well and at such speed that the completion of the new plant before January is assured.

Up to date, the foundations for the new mill and the storehouse have been completed. The foundations are of concrete. The old power house is now nearly demolished and next week work with dynamiate will be started on the lower part of the foundations and in the work of excavating in bed rock for the new power plant.

In two weeks' work on the masonry and brickwork on the new pulp mill will probaly begin, according to Mr. Bradley. A large force of masons and skilled mechanics will be employed then. A force of 200 men, largely laborers are now employed on the work, and this force will not be in increased at present.

PITH AND POINT.

European nations are finding war is easier to start than to stop.

The first thing a young man learns at college is how little his parents know.

Many a girl, when she marries, loses a good friend and gets a boarder—who grumbles.

An ounce of prevention is worth a pound of cure, and then it costs so much less.

Europe's great war in some of its aspects strangely resembles an American political deadlock.

By the time Europe gets through the manufacturers of antiques will find their occupation gone.

The trouble seems to be that lots of times when a man makes up his mind he doesn't use good material.

The dove of peace and the olive branch have been replaced by the airship and the long range gun.

The small boy who sits on the bank after his first summer swim learns too late the disadvantages of a place in the sun.

If San Marino and Monaco should ever lock horns a half dozen portholes would give them an ample supply of trenches.

The country has been warned of the approach of the seventeen year locusts. Fortunately it doesn't take them that long to transact business.

The American Bible society has issued 6,370,405 copies of the Bible during the last year, but then Europe's been too busy of late to read them.

Town Topics.

Cleveland now understands the meaning of an empty honor. John D. Rockefeller lives there, but pays taxes elsewhere.—Detroit Free Press.

Chicago would hate to see its city council as impotent and overshadowed as New York's aldermanic body has been these many years.—Chicago News.

Visitors to Philadelphia who complain that it is too noisy are not the same persons who are everlastingly talking about Philadelphia being sleepy. The latter never come here.—Philadelphia Press.

Train and Track.

There are 39,000 miles of railway in Germany.

Chilean railway receipts and expenses for 1915 are expected to balance at about $10,000,000.

The first electric railway in the world was built in Ireland, from Bushmills to the Giants' causeway.

The new electrically operated double track swing railroad bridge at the Lachine canal at Montreal is said by Canadian papers to be the most up to date in America.

THE SARANAC LAKE PLAN

In Fulton there is always something doing, that is why so many people come here for amusement; and, by the same token it may be that the mayor of Middletown upon the occasion of his first and last visit found enough doing to his liking as to cause him to come again and to cause us to look forward to his 1915 coming. At any rate, the intrepid mayor is due to arrive here this month, the announcement of the visit coming at about the same time as the newspapers informed us of the novel proposal made by the village of Saranac Lake. The Middletown man comes to preach the doctrine of Home Rule and Home Rule always provides for the collection and disposal of garbage, hence the expectancy pervading the hearts of many of the city's people, as the regular and proper method of collecting garbage is not a leading amusement here.

Many are the ways adopted by towns for the collection of garbage, but it is doubtful whether Mayor Cox with his Home Rule propoganda has anything to beat Saranac Lake, a village that wants to go into the hog business. The village wants to raise hogs and most people agree that it should get permission to do so, yet there is grave doubt whether or not the present laws of the State will allow that extent of Home Rule—not yet.

Saranac Lake does not care especially to go into the hog raising business for the sake of raising hogs. It is believed that by investing in that form of farming the town would be able to get rid of its garbage, and by disinfecting the food for the swine the animals would eventually be large enough to sell, and the income would be large enough to pay for the collection, and even leave a profit of upwards of $3000.

The right method of garbage disposal remains one of Fulton's problems, yet who knows but that the nut is about to be cracked. It may be that the traveling mayor has tucked away in a big pocket a plan that will give this city the legal right to co-operate through its government in an enterprise somewhat new to this section of the country. The city has an ordinance which prohibits the retention of hogs within the corporate limits. Why not liberalize that law sufficiently to permit the adoption of the Saranac Lake garbage disposal plan, and then surely the city could afford to make regular and frequent collections of garbage, thereby saving to the many housekeepers the burden they now bear for the taking away of kitchen refuse.

In the meantime we await the arrival of the bearer of Home Rule news and the benefits that may accure by its adoption, if the raising of hogs on the Saranac Lake plan is one of its probabilities.

LETTRGRAM TALKS ON RESULTS

One 10-cent store has a weekly bargain day for men. This gets the men acquainted with the store.

A certain shoe dealer publishes a complete statement of his business each three months. The statement shows sales, profits, losses, and other details. Submitting this statement to the public inspires confidence in the store and its management.

A western restaurant keeper recalled that many of his regular customers were formerly country boys. Immediately he prepared a country meal for a certain day each week. He served crackers and cheese, sardines, bologna sausage, canned peaches, mixed pickles, baked beans, and as a result, he is turning them away.

It took H. Gordon Selfridge of Chicago to go to London and organize a store that has all of the better English ideas plus all of the American advantages. Contrary to prediction, it is the biggest success in London.—Silent Partner.

CHAUTAUQUA TO HAVE CHILDREN'S WORKER

From a special training school in New York the Redpath Chautauqua management has secured professional children's workers who will be at the various Chautauquas in this territory to entertain the little folks. One of these workers, or "story tellers," as they are frequently called, will be here for the entire week.

After enjoying the music of the afternoon sessions the children will assemble in a suitable place near the Chautauqua tent, and there they will be entertained by this professional worker. It is probable, too, that mothers will be invited to attend several of these meetings.

This plan assures the youngsters a great big enjoyable part in the Chautauqua week, and after taking part in the "Junior Chautauqua" they have something to look forward to from year to year, just as they do to Christmas and the Fourth of July.

FOUR BABIES BORN ONE DAY IN SCRIBA

Four infants saw the light of day in Scriba yesterday for the first time, three boys and a girl being born between 12 and 4 a.m. At 12:15 a son was born to Mr. and Mrs. Albert Pelow; at 2:30 a.m. a son was born to Mr. and Mrs. Thomas Askew; at 3 o'clock a son to Mr. and Mrs. Paul O'Connor and at 4 o'clock a daughter to Mr. and Mrs. Amos Hubbard. Then the stork called it a day and retired.—Oswego Times.

Nothing quite so near the real home article as products of Black's sanitary bakery. adv

APPOINTMENTS OF OFFICIALS

City Committee Files Indorsements of Names of Those Who Will Preside at the Election Polls.

The Republican City Committee through its chairman, H. Putnam Allen, has filed the following endorsement of election officials:

First Ward, First District—Inspectors, Glenn J. Streeter, Eugene Drury; poll clerk, Fred Parks; ballot Clerk, F. Ward Eastman. Second District—Inspectors, William Dingle, F. A. Lamson; poll clerk, Frank E. Howe; ballot clerk, Andrew H. Parke.

Second Ward, First District—Inspectors, F. E. Cook, L. C. Denesha; poll clerk, Ray Pollard; ballot clerk, John Dingle. Second District—Inspectors, William Thompson, John Clark, jr.; poll clerk, Albert Scott; ballot clerk, Herbert Bland.

Third Ward, First District—Inspectors, Ernest H. Taft, Glenn A. Ryther; poll clerk, Edison Hart; ballot clerk, Thomas Humphrey, sr. Second District—Inspector, Wilford C. Calkins, Charles R. Bennett, poll clerk, B. G. Boigeol; ballot clerk, Joe De Caire.

Fourth Ward, First District—Inspectors, Floyd L. Marvin, A. B. Mason; poll clerk, Harry Stout; ballot clerk, William Freeman.

Fifth Ward, First District—Inspectors, Wirt R. Barker, George Eckert; poll clerk, James Hunter, jr.; ballot clerk, William E. Marshall. Second District—Inspectors, William G. Hackett, Frank Dyer; poll clerk, Herbert Rogers; ballot clerk, Edwin True.

Sixth Ward, First District—Inspectors, George Nichols, Clayton Brewer; poll clerk, J. D. Worden; ballot clerk, Ben Ingersoll. Second District—Inspectors, Guy A. Waugh, William A. Church; poll clerk, William H. White; ballot clerk, E. M. Bonner.

The Democratic recommendations as furnished by P. J. O'Brien, chairman of the Democratic City Committee, ase as follows:

1st Ward, 1st District.—Inspectors, John Gillard, John T. Painter; poll clerk, Harold Andrews; ballot clerk, Frank Crahan. Second District—Inspectors, LewisLongley, Robert Blake poll clerk, Theodore Bouton; ballot clerk, James Campbell.

2d Ward, 2d District—Inspectors, Claude Althouse, David Culkin; poll clerk, John Donohue; ballot clerk, John Hartnett. 2d District—Inspectors, John Brosnahen, Edgar Nelson; poll clerk, John Frawley, jr.; ballot clerk, John Goss.

3d Ward, 1st District—Inspectors, Edward Waterhouse, William Kinney; poll clerk, Ralph Briggs; ballot clerk, Frank Bidwell, jr. 2d District—Inspectors, John Reavey, JohnJohnson; poll clerk, Harry D. Allen; ballot clerk, William Everts.

4th Ward, 1st District—Inspectors, Robert McKay, Fred Easton; poll clerk, John Boorman; ballot clerk, William Ottman.

5th Ward, 1st District—Inspectors, Reuben Parks, John McCallister; poll clerk, Frank Hare; ballot clerk, Martin Barry. 2d District—Inspectors, Harry Hutchins, Earl Wilson; poll clerk, R. J. Draper; ballot clerk, Walter Guppy.

6th Ward, 1st District—Inspectors, John Doyle, O. C. Jennings; poll clerk, Willilam Brannan; ballot clerk, Chas. Thompson. 2d District—Inspectors, John Pearl, Vincent Martin; poll clerk Philip Stevenson; ballot clerk, James Tyrrell.

When Prizefights Are Bad

Superintendent Riley of the State Prison Department has ordered Warden Osborne of Sing Sing to prevent the Slugging Ching—Battling Ryan prize fight, scheduled for July 4, from being held. The Slugger is a negro, now champion of the prison; Battling Ryan is the "white hope." Superintendent Riley thinks the battle, which has been the main topic of interest among the prisoners for days, will not be conducive to good conduct or to the good morals of the inmates.

All this seems strange, in view of the fact that the Stateo f New York licenses prizefights and shares in their gains to the extent of 5 per cent of the gross receipts of each fight. If prizefights are good, healthful, moral entertainments for the general populace, why not for the men in Sing Sing, who can enjoy a baseball game just as much as men outside the walls. If prirzefights are too bad for convicts are they not too bad for the young men who do the useful and honorable work of the land? There appears to be a puzzle here. Maybe the Constitutional Convention, which has before it Mr. Quigg's proposal to ban all prizefights, can setle the question.—NY. Tribune.

Opinions

Bankers and Farmers

Reference was recently made to some of the steps being taken by the banks of Louisiana in aiding the agricultural interests of that State. It seems that there is a general stirring up along that line all over the country, and to that end a conference is to be held in Chicago July 7-8, in which the one object will be to further those things that will bring agriculture and banking closer together. Individual banks all over the country are to be represented, and one, a Massachusetts bank, will send five delegates. This bank employs an agricultural field agent, and its work is said to be telling in a marked way upon the agriculture within its territory. The agricultural colleges will send a number of teachers, and the farming interests are to be represented very largely. Evidently it is to be an occasion upon which forces that have too long been apart, which have utterly misunderstood each other, are coming together and will devote themselves to seeing wherein they can be mutually helpful.

Agriculture has had some reason for feeling that it was not being adequately encouraged by banking interests. In the past it has been no trick at all to get from banks about all the help that was wanted in the establishment of some new manufacturing enterprise, but it has been immensely difficult for the farmer to fianace his enterprises. Of course there is considerable difference in the class of securities, and in the products, and the returns from the farms have been slower than those generally arising from other industry. But the farmer is coming more and more into his own. Farming itself is becoming more of a business and is not such a haphazard industry as it has been in the past. Also, the banks, and the railroads, and a great many other organizations, are beginning to realize that in neglecting agriculture they have been injuring the general business of communities, States and the country generally; and now they are waking up to the fact and are extending willing and ready hands in the aid of this great fundamental industry of the country.

The Chicago conference is but another step in the coming-together process. It is full of promise, not only to the farmer, but to every channel of business throughout the country, for upon agriculture and dairying, more than upon any other branch of industry, rests the prosperity and welfare of the country. The vigor and activity of almost every branch of human endeavor may be traced back to the farm.—Utica Observer.

Enter Huerta!

If there were not back of the incidents at El Paso a country torn with internecine strife, with the innocents suffering starvation and worse, most of us would view the arrest and indictment of Huerta very much as one watches the entrance of the hero in an operetta. Just why this able leader with his small following has suddenly aroused the suspicions of the United States officials, in view of the previous border activity of the various Villista, Carranzista, Zapatista and all the other ista factions, is not clear. Huerta is not as guilty as the others, and yet he is under bail, though in such circumstances as suggest again the footlights and the early topical song.

"Watchful waiting" has indeed been a foolish, foot-loose, futile policy, but never were its absurdities so manifest as now, when, by the irony of fate and the grim humor of events beyond any one human being's control, the one man the President and his associates felt had been safely eliminated is right at the front. Moreover, the audacity of Huerta, his coolness, his all too evident ability, coupled with the absolute failure of either of the other two leading bandits to prove themselves able or fit to rule Mexico, have brought it about that a large part of the thoughtful, rational people of the United States rather admire and favor him. Events, too, have proved that if Huerta had been let alone Mexico today would be far on its way to an orderly settled administration of its affairs, even if the President's doctrinaire systems of "immediate land and labor reforms" and a revolutionizing of Mexican life and habits might have to be left to time to effect, as they will anyhow.

So there you are. And there Huerta is. Urbane, enjoying the hospitality of his captors, giving El Paso the best show outside of the movies it has had for many a day, the ex-president looms a little larger each day as the potential savior of his country. Will he save it? As they say on his own shifting Rio Grande, Quien sabe! Who knows?—Public Ledger.

SMART WEEK-END OUTING TOGS

Compact Traveling Kits for Motor Cars, Longer Journeys; En Route for Panama Exposition.

A busy woman whose main interest in life centers in the magazine she edits, is the recipent of many bids for week-ends, and as she finds these changes delightful, and means to charm as well as to be entertained, she is careful to have just the right things ready to wear packed in her bamboo suit case. Ever since she made a three months' trip in the Old World with two of these handy carryalls, her expensive and weighty leather grips have rested almost undisturbed in favor of the feather light leather trimmed bamboo cases. Nowadays, one of these is always in readiness for a hasty trip, and the second one which is packed with fluffy evening clothes for some occasional, more formal function, can be taken along as expeditiously if it is likely to be needed.

The Trim Tailored Dress

The trim tailored dress of silk, serge or linen that is worn at her office, is suitable for traveling, with the addition of a good-looking slip-on coat of checked black and white Worumby cloth, and her smartly designed silk cover-all does duty as a dust protector if required, or covers a

McCall Designs

flimsy dress appropriately. This wrap—an ample cape-shaped affair of changeable brown and black taffeta—edger all round with a full double pleating of the same, is unlined and packs into very small space without crushing badly.

On one side of the suit case, there are dainty low shoes, champagne colored kid, that do duty for day or evening wear, with matching silk hose. A change of lingerie, a silk kimono, bath slippers, toilet articles, and a smart golf skirt, generally of golfine, also a pair of sturdy leather strapped low shoes, fancy hose and a silk sweater. The other side of the case holds shirt waists of silk and cotton crepe, and two dresses, one of printed cotton voile, one of taffeta silk, both made to be worn with or without gamp and sleeves of lace and washable lawn. These extra pieces are carried in a long flat box to prevent crushing while various little accessories—girdles, gloves, veils and a few ornaments

dresses. Sometimes a third dress of white or black net is added, where the party demands more in the way of rainment ,but at such times the second bamboo grip with the real evening outfit is usually taken and the day is ready for the most formal demands. One side of the dress-case is devoted to hats, and other crushable beongings that can not be put with other garments. But for ordinary informal visits, the smart hat worn on the train does duty everywhere where a hat can not be dispensed with. A pretty folding parasol fits in the service case, and an umbrella is carried with the slip-on coat.

For the Fair

The plan is varied a bit for the present trip to the Pacific Coast. The formal evening clothes are replaced by a couple of lace and net dresses, while extra lingerie and a few more sport clothes are added for stops on the way, where warm sturdy skirts and a woolen sweater will be needed. The two cases, however, fill the requirements admirably and with an extra traveling rug provide everything necessary. The lingerie is for the most part, of washable crepe that needs no ironing, and can be laundered over night at any stopping place.

The hats selected are a rather broad brimmed Panama, that is not readily injured, and a small satin turban with a flexible crown that emerges fresh and smart, even if packed full of handkerchiefs and other small belongings.

A silk serge suit is relied upon to do duty upon most occasions. This is made with a short bolero coat, that covers either a very dressy waist which is nearly all ecru lace, or a heavier waist of the serge and handsomely braided and having matching chiffon sleeves. On the train sport skirts and shirt waists with a light or heavy sweater and top coat, answer every requirement and because no trunk is carried and one's whole outfit is instantly available at any point.

HARMLESS FIREWORKS FOR SMALL CHILDREN

The hardwick torpedo and the back-check automatic gun are the latest things in fireworks, and, in reality, they are not fireworks. They are designed for small boys and girls with a patriotic desire to celebrate the nation's birth, and are guaranteed to be harmless.

The torpedo makes a noise like a cannon cracker. It is a toy pistol, with a trigger which, when pressed, reminds one of the explosion of a giant cracker. However, the explosion is not caused by powder, but by air concussion.

The back-check gun is like the ordinary toy gun, which fires a cork from the muzzle. This is an improvement, however, as the cork strikes a steel check attached to the barrel, thus preventing the missile from causing injuries to the patriotic child or his companions.

Leading wholesale dealers of fireworks have said these novelties are selling well. At the same time they said the sale of fireworks was entirely normal, and the "Sane and Sane Fourth" movement in no wise has injured their trade. Cannon crackers are selling as usual, although they have been reduced in size for purposes of safety. There has been no decided increase in the price of fireworks. Dealers denied that a shortage in powder had boosted prices.

"Business in fireworks does not exceed $1,000,000 per year in this country," a prominent dealer said recently, "and the amount of powder used in the ordinary cracker is so small war demands could not affect the trade. The usual supplies of Chinese crackers are on hand, and in all respects the trade is normal."

There's a homey taste to Black Baking Co.'s products. It's seldom found in bakers' goods. .. adv.

WOMEN DEMAND PROSECUTIONS

Fighting Aggressiveness of Mormonism, and Ex-Speaker Cannon Is Giving Them Invaluable Aid.

Great and growing National interest attends the Anti-Mormon demonstration to be held in Fulton on July 28.

The spread of polygamy and "the treasonable aggressions of the Mormon Church", as Senator Cannon designates the recent political activities of the Mormons have forced the women identified with the National Reform Association to demand criminal prosecutions.

The National Order of Anti-Polygamy Crusaders are aggressively co-operating with the National Reform Association and have planted a case before the Post Office Department aiming to close the United States mails to all Mormon literature teaching polygamy on the ground that, in the last analysis it is against a religion.

The fact that Prophet Joseph F. Smith lives in open relations with five wives and that he frankly challenges the Federal authorities to proceed against him has compelled the National Reform Association to take cognizance of his conduct.

In fifty cities demonstrations similar to the one to be held here will be held in the next few weeks.

Men and women in all walks of life and representing all denominations in New York are requested to communicate with the Senator Cannon and to furnish him with any and all information they may have concerning Mormon activities and to indicate the department of the warfare in which they can best serve. It is proposed to have a definitely organized working force in every city in the United States to make war on the whole Mormon enterprise and this enlistment will be organized under the National Reform Association and the Order of Anti-Polygamy Crusaders.

Senator Cannon is the son of First Council of the Mormon Church, the late Hon. George Q. Cannon and he is today recognized everywhere as the greatest living authority on the Mormon church.

WITH THE SUFFRAGISTS

A gauze mask to neutralize the effect of asphyxiating gases has been invented by Signora Mardoli of Italy. In spite of those thousands of women drafted for the making of munition in England, the part that women are taking in the war is directed toward life saving rather than life destroying.

* * *

"In 1776 taxation without representation started a revolution," said Chrystal Herne now acting in The Trojan Women," and in 1913 it started another in me. I never became a real suffragist until I had to pay an income tax. Then I felt the injustice of being expected to act like a citizen without being treated as one."

* * *

The Chicago strike was settled in two days in a city known for its persistent and violent labor disturbances, and it was entirely peaceful in its demonstrations.

The suffragists claim that if woman suffrage is to be held responsible for labor violence in Colorado, it is entitled to the credit for its absence in Chicago. They claim, in short, that woman suffrage has feminized the Chicago government and embued it with a greater zeal for protecting human rights. They cite, as further proof, the conduct of strikes in Seattle, before and after the advent of woman suffrage.

* * *

Mrs. Medill McCormack has been notified by the president of the District Delegate Association of the District of Columbia, R. C. Claflin, that the movement to enfranchise the men of the District will be enlarged to include the women also.

Mrs. McCormack announces that the real stumbling block is the attitude of some of the members of the Chamber of Commerce of the city of Washington who lookw ith disfavor on the enfranchisement of women in the district or anywhere else.

* * *

Kate Gordon, president of the Southern Conference of Suffragists, has telegraphed the Woman's Journal that Louisiana has been slated to lead the Southern Suffrage Landslide.

The state holds a constitutional convention next September. A men's league has been formed and is collecting money for the campaign. Hope and enthusiasm are running high.

Booker T. Washington and a band of fellow workers have just toured the state and addresed vast audiences. Among other things he brought home to the people that Louisiana only spends an average of $1.60 annually for the schooling of the negro child and that last year 78 per cent. of these children never saw the inside of a school house. The suffragists regard this as a potent woman suffrage argument.

H. K. O. GAME

James Feeney, of 187 N. 7th st., Oswego, informs The Evening Times that a game of baseball between the H. K. O. team of Oswego and any team of the age of 15 or 15 years is desired for Monday, July 5. Communications bearing upon the subject should be addressed to Manager Feeney.

LEGAL NOTICES

SUPREME COURT, COUNTY OF OSWEGO.—Edna I. Sharp, Plaintiff, against Lewlla Newton, J. Clifton Larkin, Bridget Gibbons, Henderson & Thompson Company, Defendants.

Pursuant to a judgment of foreclosure and sale made in the above entitled action, at a Special Term of the Supreme Court, held at the Court House, in the City of Syracuse, New York, on the 22d day of May, 1915, and duly entered in the Oswego County Clerk's Office, on the 24th day of May, 1915, I, the undersigned, the referee, duly appointed in and by said judgment for that purpose, will sell at public auction, to the highest bidder, on Saturday, the 10th day of July, 1915, at 10 o'clock in the forenoon, at the front door of the City Hall, No. 67 East First Street, South, in the City of Fulton, County of Oswego, New York, the real estate directel by said judgment to be sold, and therein described as follows: ALL THAT TRACT OR PARCEL OF LAND, situate in the City of Fulton, New York, known and describel as three rods off from the East end of Lot No. 1 of Block No. 512 of the original Village of Fulton.

Dated May 24, 1915.

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

Albany, July 2.—That the Constitutional Convention should go on record as favoring home rule, is the contention of the Citizens Union of the city of New York, which organization has taken a firm stand for this reform which is regarded by its as essential for future progress in municipalities.

It is pointed out by the Citizens Union that in twelve States of the Union today, constitutional local self-government is given to cities. "Even if the proposal were novel," says a brief of the organization, "this convention sshould meet the demand for home rule. Bluntly put, if this convention should not give heed to the reasonable demands of reasonable peopel for a reasonable measure of self-government, the Constitution which it draws is likely to fail and the way will be opened for those who advocate really revolutionary principles, to claim that there must be a radical convention to carry through these extreme measures because a conservative convention will have shown itself unwilling to further in any substantial degree the cause of municiapl freedom."

Home rule is something that the seven milions of people living in the cities are determined to have, the advocates of the proposition believe. They point out that there are five heads unedr which the principles and proposals should be considered: the character and extent of power granted to cities; the protection of cities against legislative interference with local affairs; the protection of the interest of the tSat against curtailment of the powers of the legislature; the protection of both the cities and the State by proper restrictions to guard against abuses in city government.

Arguing along the lines that Greater New York is entitled to home rule possibly above any other city in the State, the Citizens Union through its officers, maintains that a city of five million people is certainly an organization sufficiently developed to run itself.

"Why its officials should be enabled to evade responsibility by blaming their shortcomings or failures on interference by a legisllature made up largely of members who have no knowlledge of or interest in city affairs has never been made apparetn," say the members of the Citizens Union, who continue:

"That the State has a real interest in muncipal affairs cannot be denied and that interest should be protected by provisions which will be hereafter considered, but, assuming that that protection is accorded, there is not and never was any valid answer to the proposition that a huge business organization like a modern city should be permitted to run itself in a businesslike way free of outside interference. The form of the grant should be broad and general. Any attempt at restrictive enumeration necessarily fro the very nature of the case breaks down. The subject to be covered is too broad and too complex for enumeration, and there is no reason for restricted enumeration.

"What the city is entitled to is to manage its own affairrs, always assuming, that the State's interest is being safeguarded."

Proposed amendments advocating been presented by Delegate John Lord O'Brien, Buffalo; Edward E. Franchot, Niagara Falls; Mark Eisner, New York; D. Raymond Cobb, Syracuse; Frank Mann, Brooklyn; John W. Weed, Flushing; Alan C. Forbes, Syracuse; Robert F. Wagner, New York, and E. N. Smith, Watertown. The proposals of the first four delegates are regarded as the most desirable by the members of the Citizens Union.

GRANGE ELECTION

Happy Thought Grange of East Palermo will work the third and fourth degrees on six candidates, July 10, and District Deputy Benedict is expected to attend.

For Tired Feet—Feather-weight Arch Supports, at Roy's Quick Shoe Repair Shop, 110 Cayuga St.—adv.

"RIPENED AT THIRTY-SIX; SLOPPED OVER LATER"

Auburn, July 2.—Business prosperity, perpetuation of peace and preparedness for a national emergency of any sort were the keynotes of addresses when nearly 1255 business and professional men gathered last evening at Island Park Hotel for a patriotic dinner under the auspices of the Auburn Chamber of Commerce. Frank Jewell Raymond, industrial manager of the National Retail Dry Goods Association, urged business men to "turn the searchlight on yourselves and your firm and not your surroundings." Mr. Raymond referred to William Jennings Bryan as "our near statesman who ripened at 36 and slopped over a few years later."

At the close of his address, Mr. Raymond outlined, at the request of the president of the Chamber of Commerce, D. Edwin French, a plan for coming to Auburn in October and giving a series of brief talks to business people on three evenings. The proposition was taken under consideration by the chamber.

DANIEL POLING TO SPEAK HERE TONIGHT

This evening at 8 o'clock at the First M. E. church Daniel A. Poling of the National Christian Temperance Union will speak at the opening session of the Y. P. B. convention in this city.

Mr. Poling is an enthusiast in temperance work and is a fluent, able speaker. Those who heard Mr. Poling on his previous visit to Fulton will be glad to hear him again; those who have not yet heard him will enjoy hearing a good speaker.

The meeting is free and open to the public.

LICENSE PLATES TO BE CREAM AND BLUE

Secretary of State Francis M. Hugo has anounced that automobile license plates for next year have been contracted for at a saving of $19,000 to the State. The colors will be cream for a background, with blue letters and numerals. Secretary Hugo estimates there will be 230,000 motor vehicles in use in New York State next year.

TAGGERS WILL WEAR RED SASHES MONDAY

Monday every one will be "tagged." The Salevtion Army will observe the 5th as its annual "tag day" for the benefit of the poor kiddies' annual outing. The girls of the Army, known as the Willing Workers will do the tagging and Ensign Fitzgerald states they will be known by the red sash each will wear.

COUNTY CLERK'S RECEIPTS

Oswego.—The receipts of the county clerk's office for the month of June total $628.56. This is slightly under the total of last June, but is considered a good showing, considering general business conditions throughout the county.

ALDERMEN DIDN'T DECIDE

Band Concerts Still an Open Question, to Be Again Taken Up Tuesday Evening

Inasmuch as Alderman Foster had not changed his mind in regard to the band-concert question up until 9 o'clock last night, Alderman Sullivan saved himself a trip over the river by calling the City Hall on the telephone, asking Mr. Foster what he thought about it, and receiving an unfavorable reply, decided that his presence at the meeting was unnecessary. Aldermen Foster, Gardner, Quirk, Distin and Baker were on hand, but as no business other than the band-concert question was to come before the meeting, and Mr. Foster was ready to vote against the proposition, no meeting was held.

The council will meet again next Tuesday night, however, in its regular monthly session and at that time, the concert matter will be finally decided. Alderman Foster has announced himself still open to conviction but it goes without saying that the proposition will be either carried or shelved indefinitely at Tuesday's meeting, as the concerts, if they are to be held at all, should start at once.

In the absence of Mayor Fox, Alderman Distin, president of the council, will act as chairman at the Tuesday session.

MRS. ANNA PALMER ELECTED A DELEGATE

Rex. W. Edick was elected a delegate to the annual State Convention of the Letter Carriers' Association at a recent meeting held in Williamstown of the Oswego Rural Letter Carriers' Association. Othere delegates include Captain Boyd of Mexico and Mrs. Anna Palmer of Fulton. The State Convention will be held at Malone, Thursday and Friday of next week. It was voted to hold the next quarterly session at Mexico, September 25. The meeting at Williamstown was largely attended and the carriers of that village entertained the visitors at a fine banquet, served at Grange Hall, where the sessions were held.

SCOUTS TO CAMP ON SHORES OF LAKE

Troop No. 4, Boy Scouts, who are attached to the Baptist church, will go into camp at North Bay, shores of Lake Neahtawanta, on Wednesday, July 14. The Rev. M. G. Buck, pastor of the church and an athlete who knows the punch as an incentive to giving boys a good time, will be in full charge of the camp.

The scouts are looking forward to the time of their lives at the coming outing, as they know that pastor Buck knows what is good for them in the out-of-doors life.

WILSON-FARNHAM

A very pretty wedding took place Tuesday afternoon, June 29, at the home of Mr. and Mrs. James Wilson, North Hannibal, when their daughter, Mary Hazel, became the bride of Howard Newman Farnham of Oswego Town.

The ceremony was performed by the Rev. E. O. Webster of Oswego Center M. E. church, and was witnessed by relatives of the contracting couple. Miss Elizabeth Petrie of Fulton, a cousin of the bride, was maid of honor, and the groom was attended by his cousin, Allen F. Lockwood.

The bride was charmingly attired in white voile, with net veil, and carried white roses, while the maid of honor was gowned in pale yellow voile and carried pale pink roses.

Just previous to the entrance of the bridal party, Miss Rena Farnham, a cousin of the groom, sang, "Oh, Promise Me," which was followed by Mendelssohn's wedding march, also played by Miss Farnham. Thebridal party was led by Miss Petrie and Mr. Lockwood, who were followed by Master Harold Metcalf, a nephew of theh bride, who acted as ring bearer. Then came little Virvinia Davey and Wilson Rauch, niece and nephew of the bride, carrying large baskets of roses. As the party advanced to a beautiful arch of green and white, the bride and groom were met by the clergyman, who spoke the impressive words which made them man and wife.

After the ceremony a reception was held, and a delicious wedding supper was served by the Misses Rena Farnham, Ada Engle, Mildred German and Mildred Stevens, friends of the bride.

Community Notes

Mrs. Ernest Taft has returned from a trip to Binghamton and Corning. She was accompanied by her two sons, Robert and Howard. At Corning Mr. Taft was the guest of her brother, Rev. C. J. Taft, who is well know in this city.

* * *

Miss Hazel Bonner has returned from a two weeks' vacation spent at Beckerks Camp, Fourth Lake.

* * *

Mrs. William Halloran of Division st. is spending a few days with relatives in Mexico.

* * *

Miss Tressa Hires of S. 1st st. is spending the week at Altmar.

* * *

Miss Kathryn Moore of Syracuse is spending the summer with her parents, Mr. and Mrs. James Moore.

* * *

Miss Mary Joy of Ilion is the guest of Dr. and Mrs. T. Fowler Joy.

* * *

Miss Elizabeth Petrie attended the Wilson-Farnham wedding at North Hannibal Tuesdey.

* * *

Mr. and Mrs. William VanSanford entertained the N. N. K. club at their home in Buffalo st. last evening. Games were played and light refreshments served.

* * *

Miss Ester Ingamell of Emery st. leaves tonight to spend a week at Owasca Lake, Auburn.

* * *

Leonard B. Hotchkiss, of Buffalo, who stopped in this city for a short visit with his uncle, James W. Bogue, en route to his home from Williams College, left for Buffalo this morning. Mr. Hotchkiss made the trip from Williamstown to this city in ten hours by motorcycle.

* * *

Miss Muriel White of Oneida is visiting friends in thisc ity for a few weeks.

* * *

Many Fultonians will go to Slyvan Beach for the holiday while others have planned trips to Thousand Islands and the North Woods.

* * *

The Fort Stanwix Canning factory, under the management of Lester O. Todd, opened yesterday for the season.

* * *

Miss Anna Frawley is spending her vacation with relatives in this city. Miss Frawley has been teaching in the public schools of Martinsville.

* * *

Mrs. M. G. Buck and children are in Batavia where they will spend a vacation of about three weeks.

* * *

Miss Bertha Cole of Baldwinsville is spending a few days in the city with friends.

SEALED PROPOSALS

Addition to Oswego County Tuberculosis Hospital, Orwell, New York

Sealed proposals will be received at the office of the Board of Managers, Orwell, New York, until 11 a.m., July 7, 1915, for erecting and equipping the proosed addition to the Oswego County Tuberculosis Hospital Building at Orwell, New York, in accordance with plans and specifications, which may be seen at the office of the Architect, L. M. Cope, Theatre Building, Oswego, New York.

Separate proposals for the following will be received:

1. General construction.
2. Plumbing.
3. Steam heating.
4. Electrical wiring.

The Board of Managers reserve the right to reject any and all proposals.

A certified check for five per cent. (5 per cent.) of the total amount of each proposal payable to the order of the Treasurer of Oswego County, New York, must accompany each proposal, the same to be forfeited upon failure to enter into contract within five days after notice of award from the President of the Board of Managers.

Upon deposit with the Architect of a certified check for twenty-five dollars ($25.00) payable to the order of the President of the board, the whole set of plans and specifications, or of a certified check for fifteen dollars ($15.00) payable to the order of the President of the Board, a set of mechanical equipment plans and specifications or a set of general construction plans and specifications will be furnished to prospective bidders when application is made to said architect.

The proceeds of these checks will be returned to the makers upon the return of the plans and specifications, after deducting the actual cost of the blue prints and specifications furnished.

Dated June 16, 1915.

REV. CLINTON J. TAFT LEAVES CORNING CHURCH

The Evening Leader, of Corning, under date of June 28, contains the announcement of the resignation of the Rev. Clinton J. Taft as pastor of the First Congregational church of that city, and the gentleman's acceptance of a call to the pastorate of the Central Congregational church of Dorchester, Mass.

Rev. Mr. Taft will enter upon his new duties about September 1.

In tomorrow's Evening Times will be printed the letter of resignation as read by Mr. Taft to the Corning congregation Wednesday evening.

SHERIFF ORDERS LIGHTS ON ALL VEHICLES

Sheriff Buck has instructed all of his deputies throughout the county to see that the new State law requiring every vehicle to carry lights, both front and rear, is enforced. The amended highway law which makes this compulsory and provides a punoshment of a fine not exceeding $10 became effective today. Every vehicle, whether in motion, or standing still, whether on a bridge, street or highway, should have the lights attached to front and back, from one hour after sunset to one hour before sunrise.

HOSPITAL REPORT

The monthly report issued by Lee Memorial hospital officers shows that twenty-three patients were admitted during the month and twenty-six discharged. There were two deaths. A total of thirty-eight persons were cared for during the month. There were nine operations performed.

THE QUIRK

TO-DAY

The Weatherwax Quartet

THIS is a picture of the famous Weatherwax Quartet, booked to furnish the music the afternoon and evening of one day at Chautauqua. They are all full brothers, and it is regarded as peculiar that in one family voices should develop ranging from high tenor to deep bass. They are a versatile bunch, too, and not only put up a strong vocal program, but double in brass with trumpets, and two of them are splendid readers.

COLD STORAGE MAN UNABLE TO SPEAK HERE

William H. Freer, of Williamson, N. Y., the cold storage expert, who was asked by the local Chamber of Commerce to come to this city and address the Division of Agriculture on the cold storage plant question, has replied, saying it will be impossible for him to come here on the date mentioned owing to a previous engagement.

Mr. Freer expressed his willingness, however, to answer any questions by mail which the Chamber desires to ask, and it is very probable that a list of questions on cold storage matters may be compiled and forwarded to Mr. Freer, as the Chamber is desirous of learning his opinion on certainmatters on which he is considered one of the best authorities.

The division will now ask another speaker to come to the session here, and his name will be announced later.

SECRETS WILL NOT KEEP IN THIS CITY

The Oswego Palladium of yesterday treats a newspaper story that appeared in an out of town paper in this way:

"Business secrets of Fulton.

"What the Outsiders saw by perring into a business office.

"If anyone has a dark secret and wants to keep it, they had better not go to Fulton; for there are evidently busy investigators on the job there. Listen to this from a Fulton correspondent on the recent visit there of representatives of the Grecian and Serbian Governments about buying guns for the Hunter Arms Company."

The above was followed by the story as it appeared quite recently in the Syracuse Journal.

LITTLE BOY CAUSES PAPA TROUBLE

F. L. Darling, carrier on mail route No. 2 out of Fulton, was backing his automobile out of the yard at his residence, 411 Utica st., about 9.30 this morning, when his young son jumped upon the running board. Upon being told to get off, the child disapeared from Mr. Darling's view. Thinking he had fallen beneath, Mr. Darling became excited, and before the auto had been stopped, he had run entirely across the lawn and demolished the steps of Mrs. Blodgett's house next door. No damage was done to the automobile; the child was uninjured.

VISITING NURSE UNABLE TO TAKE UP HER DUTIES

Word has been received by friends in this city that Mrs. Florence Welch, visiting nurse who was recently engaged to take charge of the Child Welfare station here, is seriously ill in Oneida, where she has been staying for some time with friends.

The Child Welfare station at the City Hall was to have been opened July 1 but on account of Mrs. Welch's absence nothing has been done in the matter.

NEARLY FULL TIME IN TWO DEPARTMENTS

That better times prevail at the American Woolen Co.'s plant is evidenced by the fact that the weaving department ran five full days this week whereas but three days' work were afforded preceding weeks.

In the drawing room ten days of work were afforded the workers during this and last week. The yarn department is said to be running nearly full time.

Government Officers Throw Veil of Mystery Around Arms Seizure

(Continued from Page One)

ment was Swatow, Cina, near Hong Kong, and that the consignee was Roesen & Co. Mr. Sparks said his clerk told Schenker & Co. that there was a line of steamships running direct to Hong Kong, and that the rate was the same to Hong Kong as it was to Java. Consequently, both time and money could be saved by reshipping from Hong Kong.

When Schenker & Co. said they wanted the shipmen to go by Java, even though the rate was higher, my suspicions were aroused," Mr. Sparks said. "My company also makes it a rule not to accept shipments of arms and ammunition unless they are consigned to a recognized government. Consequently I communicated with Schenker & Co. and told them we could not handle the shipment. Meantime it had been laid down on our pier for shipment."

Mr. Sparks said a representative of Schenker & Co. called on him and asked him to accept the shipment, say ing that it was all right and legal in every particular.

"Then I was surprised when Mr. Touscher called on me," Mr. Sparks continued. "He urged me to accept the shipment, saying that it was intended for Roesen & Co., and that hehe was no reason why I should refuse it. The Germans, however, were very vague about just what it was intended for, and I couldn't understand why it schould be shipped via Java."

RETAIL JEWELERS TO CLOSE ALL DAY, MONDAY

The announcement is made by W. C. Morgan, that the city's three jewelry stores will remain closed from Saturday night at 10 o'clock until Tuesday morning in observance of the Nation's birthday.

A GROTESQUE BIRD

The Tufted Puffin Is the Joke of the Arctic Seas.

TO LOOK AT HIM IS TO LAUGH.

This Curious Creature Is Silent, Tranquil and Droll, With an Air of Profound Gravity and Spends His Winters Roaming Over the Ocean.

It is a curious fact that the far north and the far south each has a sea bird peculiar to itself, and in both cases these birds, although unlike one another in general appearance, are among the oddest looking members of the bird family that the world contains.

The characteristic bird of the antarctic regions is the penguin, whose strutting companies, gathered on an icy shore, look like assemblages of little men, in long tailed black coats and spotless white waistcoats, waiting to sit down at ceremonious dinner.

The characteristic bird of the arctic regions is the auk, a thick set, awkward creature, fond of fishing, like the penguin. The largest member of the family, the "great auk," or "gare fowl" has been driven into extinction within historic times. Another member, which the Audubon societies are trying to protect, is the queer looking, laughter exciting, and yet very grave and earnest native citizen of the north Pacific shores and islands, called the tufted puffin.

When the tufted puffin is looking his best (which is, of course, during the courting season) he wears a big red beak and a white mask, through which his green, red rimmed eyes gleam strangely, and shows a pair of bright vermilion legs and feet. From the top of his mask, on one side over the ear, curls a long golden white "feather horn." It seems that no description is able to convey the ludicrous impression which these birds make upon the beholder. Sailors seeing them for the first time break into guffaws of laughter. They call them "sea parrots" and on account of their drolly grave manners they have also been nicknamed "Quakers."

Says William Leon Dawson: "It is difficult to exaggerate the gravity of these tranquil birds, always absolutely silent, save that when caught and harassed, they may emit a low, hoarse groan. They spend much time standing demurely at the entrances of their burrows, their little plumes nodding like tassels on so many caps."

Like all the auks, the puffins are especially remarkable for the great size of their beaks and the changes which their heads undergo at the breeding season. Some of the horny plates of the big beak fall away at the end of the season, the white mask on the face, together with its nodding plumes, disappears, the red eyelids fade and the whole head becomes blackish.

Naturalists are a little puzzled to account for the size and stoutness of the puffin's beak. If the bird were fond of clams its beak might be of use as a shell breaker, but it seems not to be employed in that way. Neither is it used to dig the tunnels or burrows that the bird forms for its nest in the hard soil of sea fronting cliffs. These are excavated to a depth of three or four feet, and apparently the only tools used are the sharp nailed claws.

In some places it is estimated that several thousand burrows exist on a single acre of sloping shore. The rabbits and puffins engage in a lively competition for the possession of burrows on the Farallones islands, but the big, pyramid pointed beak gives easy victory in these contests. Mr. Dawson says a frightened rabbit will sometimes plunge hastily into a burrow without stopping to consider to whom it belongs, and when he comes out again, with more haste than ever, he is a subject for laughter.

The natives of the north Pacific islands depend largely upon puffins for both food and clothing. The Aleutian "parkas," or feather coats, are made of the skins of puffins, with the feather side turned inward. Forty-five or fifty skins sewed firmly together make a garment which is said to be nearly impervious to cold. The birds are often caught in flight by means of nets at the end of poles handled like butterfly nets. Unlike birds that are more skillful and agile on the wing, the puffins fly straight ahead and are unable to dodge quickly.

Strange as the statement may appear the puffins, like the auks generally, spend the winter at sea. At that season they are to be seen on land only when driven ashore by some resistless tempest, which strews the beaches with their battered forms, many dead and many hopelessly lamed. With the advance of spring and summer they approach the shores where they are accustomed to breed, and then the remarkable changes of their colors, form and plumage that have been already described begin to take place.—Garrett P. Serviss in Spokane Spokesman-Review.

Beggars of Costa Rica.

One day a week the beggars of Costa Rica are privileged characters—that is, on Tuesday they are allowed to beg from shop to shop. It is the custom for business houses to prepare for the weekly visit of the mendicants and to hand over to them small coins or articles of little value. In some instances where merchandise is given away the beggars peddle it about the poorer quarters and so earn a few cents apiece.

Hath man no second life? Pitch this one high.—Matthew Arnold.

An Incident of the Boxer Movement In China

By JOHN Y. LARNED

Some years ago Hugh Worthington, a young man of fortune, desiring to enter the field of diplomacy, secured an appointment in the service of the United States government at Peking. Worthington was more interested in seeing the country than in his official duties, which were nominal, and he traveled over such parts of China as were open to foreigners. One day he fell in with a mandarin who had been a good deal in England and spoke the language. The mandarin traveled in style, being carried in a chair, common in Europe until near the beginning of the nineteenth century, by two men and attended by several other servants.

Worthington, who traveled on horseback, on joining the mandarin rode beside the chair, chatting with him. The American knew enough of China to understand that it was infested with robbers and was armed to the teeth. The mandarin was an elderly person, unused to arms, but his servants were prepared to defend him. They were armed with pikes, short swords and other weapons, which Worthington considered next to useless in a fight with an enemy properly accoutered.

Suddenly while passing through a narrow cut in the road the party was attacked by a dozen men bent on robbery. They were not much better armed than the mandarin's servants, but they outnumbered the latter, who immediately took to flight, leaving their master in the hands of the enemy.

Worthington drew a revolver from under his coat at each hip and began a fusilade that put the robbers to flight. Upon this the servants returned and humbly begged the master's forgiveness for having deserted him. He was profuse in his thanks to the American, who had not only saved a considerable amount of money for the Chinaman, but his life as well. He begged Worthington to name some favor that he could do him, but the latter said that he wanted for nothing in the world. Then the mandarin took up a bamboo umbrella and opened it. Calling for a writing stick, he wrote on it something as unintelligible to his preserver as the receipt of a Chinese laundryman in America. Handing it to Worthington, he said in a voice so low as not to be heard by his servants:

"A time is coming when there will be a movement on the part of our ignorant and superstitious people to rid China of all foreigners. Keep this umbrella and if attacked open it in the face of your would be murderer."

Worthington paid no attention to the man's warning. Every one knew that foreigners were hated by the Chinese, and there had always been talk about the latter being massacred. The American was young, and the young take little thought of danger. But he was too polite not to assure the mandarin that he would keep his gift as a remembrance of him and the episode.

An American named Preston lived in Peking, who operated a banking house which was a branch of one in New York. Worthington spent a good deal of time at his house, attracted by the banker's daughter, Emma Preston. When the Boxer trouble broke out a month after the foregoing episode Worthington was at Preston's house. It was without the regions of the embassies and entirely unprotected. Worthington on the first sign of danger returned to the embassy for leave to absent himself for the protection of the family in which he was interested. Having attained it, he was about to start back when he noticed the umbrella given him by the mandarin. The day was very hot and it occurred to him to take it for protection against the sun's rays. As to the words spoken concerning it if attacked by an enemy, he had forgotten them, but he did not forget to take with him a couple of revolvers and a supply of cartridges.

As Worthington approached the Preston home he noticed knots of Chinamen talking together excitedly. Some of them scowled at him, but since they had as much dread as hatred of a "foreign devil," they did not attack him. He reached the Preston home safely, but found the family in great trepidation, expecting that at any time a mob would attack and murder them.

The anticipated trouble occurred the next day. The banker's residence was well known, and a crowd of Chinamen armed with all sorts of implements from a scythe to a razor came down for murder. Worthington knew that, though armed, he could not withstand so large a force; nevertheless he stationed himself at a window over the front door, ready to use up his cartridges.

The howling mass came, stopped before the house and were about to make an onslaught upon it when suddenly all their eyes were cast to a window directly beneath the one Worthington occupied. Then every weapon was lowered, every knife was sheathed and the Chinamen moved on.

Worthington was at a loss to account for this sudden change, but it was soon explained to him. One of the family had caught up his umbrella, as a drowning person will catch at a straw, opened it and held it at a window on the ground floor as a protection against stones that were being thrown in. On it was a message signed by a man to whom the Boxers looked as a commander:

Respect this man and his family and his property.

SCHOOL READERS

The Ones That Swayed the Boys of a Generation Ago.

STIRRING "PIECES TO SPEAK."

Favorite Selections of the Days of Yore Find No Favor In the Newer Books—Lament of an Old Timer and a Bookstore Chat.

Forty school weeks mean forty Friday afternoons. Forty Friday afternoons mean to the pupils in some schools near New York forty hated piece speaking occasions.

"What," asked the boy of Smith Apperson, pater, "shall I speak next time?"

"Why not recite Richard III. to his troops at Bosworth field?' Apperson answered confidently. "There's a piece with lots of slam and go to it. Or there is 'Spartacus to the Gladiators.' "

"Who was he, Spartacus?"

"Don't you know who Spartacus was? Look in your Fifth reader. It tells all about him there."

"Not in my reader," insisted the boy.

"Not in"— Mr. Apperson looked stumped, but he pulled himself together. "How about 'Freedom Shrieked When Kosciusko Fell?' " he asked. "Got that in your reader?"

"No, sir."

"And 'My Name Is Norval on the Grampian Hills?' "

"The Grampians are in Scotland, I believe, but who was Norval and why the limitation to his name?" the boy asked.

"Hum! And that 'Midnight In His Guarded Tent' when 'the Turk Lay Dreaming of the Hour.' Got that in your reader?"

"No, sir."

"What kind of reader have you got?" Smith Apperson demanded. "Once more. Does the 'Deep and Dark Blue Ocean' roll on through any of the pages of that expurgated edition they've palmed off on you for a reader?"

"Well, there is something about the ocean."

"Good; we've saved the ocean. How about 'I Give My Hand With My Heart In It?'"

"Pshaw! Everybody knows that piece."

"Yes, yes; then there is something besides waste paper in that reader. Does it by any chance cry to you from its pages to 'Strike for Your Altars and Your Fires?' "

"No, sir."

"My mistake," Smith Apperson exclaimed. "I asked you about that piece before. It's a great one too. I used to get it off regularly twice a term, and when I didn't do it some other boy did. Never a piece day came round but some one struck out for his altars and his fires. I'll get you a copy of the kind of reader I used to have."

Mr. Apperson went the next day into a downtown book store, known to him as a place where, if they did not have a book, they would get it for you if it was to be had.

"I want a copy of McGuffey's old Fifth reader," said he.

"So do I," replied the owner of the store, who knew Apperson well. "I'll buy a gross of them at a good price. Scarcely a week goes by that I do not have a call for that book or for some other old school book."

"How"— asked Mr. Apperson, "how do you account for it?"

"Well, it's this way," said the proprietor, "A father asks his boy something about what he himself had studied at school, thinking, probably, to test him. The boy fails to give the correct answer or says he never 'took' it in his grade. The father looks into the boy's book or books and finds, as perhaps in your case, that the stories in which he delighted are not included in the reader editions of today. Then he comes here to get a school book that is what he calls a real school book.

"For instance, only a few days ago a man came in for an old geography. He said the book his boy studied was absolutely of no account, historically at least.

" 'What do you mean, history in a geography?' " I asked.

" 'Why,' he replied, 'I asked my boy about the isthmus of Darien, and he had never heard of such a place; didn't know there had ever been anything of the sort. Of course he could and did tell me all about the isthmus of Panama, but Darien wasn't in his geography. Now, I want that boy to know there was an isthmus of Darien, and I don't want him to have to take his father's word for it. Give me an old geography, one of about thirty-five years ago.'

"I couldn't fill the order. Old school books are rare. Everybody wants them, some to renew memories of their youth by reading over the old pieces, others because they want to show to their children what they had to go through when they themselves went to school.

"Webster's Speller, Sander's Reader and McGuffey's Reader are the particular books which seem to stay in the memories of the old boy and the old girl. But I can't sell them because I haven't got them."

"Then I reckon I'll have to give young Harry Smith Apperson my best information and belief, as lawyers say, about how 'Freedom shrieked when Kosciusko fell,' and so forth."

"Precisely, as you say."—New York Post.

Contentment, as it is a short road and pleasant, has great delight and little trouble.—Epictetus.

Woman's World

Suffragist Worker From Denmark Visits America.

HELENE BERG.

The first words Helene Berg said when she was asked about the reasons for her coming to this country were: "I am really here on account of the war, and I hope America will not get into it too. It will only make it harder for all the other neutral nations if she does. You cannot help those who are already dead. You would only add your dead to ours in Europe. We 'little peoples' turn our eyes over here to this big country and are glad that one nation is at peace. No one here knows what war is. Europe is a madhouse. There will be an untold value in having one nation out of war when peace is declared."

Helene Berg is an academician, a graduate of the University of Copenhagen, social worker, lecturer and leader in the effort to better the condition of the abnormal child. For many years she has been eager to see what America is doing for its children—its defectives, delinquents, illegitimates, its helpless and its handicapped—and now that there is a lull in what she can achieve in her own land because of the war she has chosen this time to come here.

Also in another sense she has reached a stopping place in her life work since the long fight of women for the ballot has been successfully terminated in Denmark. In May the Danish diet passed a resolution conferring full suffrage upon women. There remained only a final ratification of the act, but this was felt to be a mere formality.

Helene Berg was also a leader in the woman's congress which undertook to remedy the position of the unmarried mothers of Denmark. The Danish law, when it is finally passed, will give the illegitimate child the right of inheritance from its father and the use of his name.

"Cera" Crochet Lace.

Abbreviations.—Ch., chain; d.c., double crochet; tr., treble.

This pattern, which measures two inches across, is suitable for trimming dainty underwear. Crochet cotton No. 30 is a good thread to use for it, and narrow ribbon may be run through the footing holes as a finish.

Insertion.—6 ch., join to form a ring. * 2 tr., 2 ch. and 2 tr. into ring; turn with 5 ch. and repeat from * (putting a group into 2 ch.) for the length desired.

First Row.—* 5 ch., 1 d.c. into loop of 5 ch. at side, 7 ch., 1 d.c. back in first, 10 ch., 1 d.c. back in first, 7 ch.,

1 d.c. back in first and 1 d.c. into same loop, repeat from * all along.

Second Row.—5 ch., 1 d.c. under each loop of chain except between trefoils, when the chain must be omitted.

Third Row.—* 5 d.c. under first loop, 5 d.c. under second, 3 picots of 4 ch., and a sl. st. into first ch., 5 d.c. under next loop, 5 d.c. under next, 5 ch.; turn—1 d.c. in first picot, 5 ch., 1 d.c. in next picot, 5 ch., 1 d.c. in next, 5 ch., 1 d.c. in first d.c. made (at beginning of row); turn and work 5 d.c. under each loop of ch., and repeat from *.

Footing, First Row.—5 ch. and 1 d.c. into each 5 ch. loop.

Second Row.—5 d.c. under each loop.

Third Row.—2 ch., 1 l.tr. into each second d.c.

Fourth Row.—2 d.c. under each 2 ch.

THREE INQUISITIVE SCOTS.

And How They Happened to Originate the Jute Industry.

James Logie, who is supposed to know more about jute than any one else in America, tells in a very interesting way how jute came to be known to Europe and the west:

"In 1840, on a Saturday afternoon, three Dundee flax spinners were walking to their beautiful residences in Broughty Ferry, about four miles east of Dundee, on the banks of the Tay, and as usual strolled along the docks. At that time there were several Clipper line sailing vessels trading with Dundee in Indian products, principally grain, linseed, etc., and on this particular Saturday one of these vessels was discharging her miscellaneous cargo, and these canny Scots observed a fibre in some quantity on the dock and made inquiry as to what it was.

"They were told it was some Indian product that had been obtained in Bengal, and was suitable for the dunnage of ships. They examined the fibre a little more carefully and all thought it would be possible to spin the fibre on their flax machinery. The result was that Monday morning they made a bee line for the agents of the ship and asked what they were going to do with this waste material.

"They got the reply, 'We propose dumping it into the river,' and when they expressed a wish to experiment with it they were told they could cart it away from the dock and were welcome to it if they paid the cartage. Thus the jute industry started—for the fiber turned out to be nothing less than what we know commercially today as 'jute.'"—Exchange.

SUBMARINE TACTICS.

Locating the Enemy, Getting the Range and Making an Attack.

How does a submarine attack? How does it locate the vessel it wishes to torpedo and how does it proceed about the business of sending such vessel to the bottom? Here is the way the commander of Uncle Sam's submarine flotilla tells it:

"A submarine will come to the surface at 5,000 or 6,000 yards from the vessel it is attacking—far enough so the enemy is not supposed to see the periscope. It stays up long enough to get the enemy's course, then goes down and sets its course to intercept the enemy's ship.

"The vessel must be coming more or less toward the submarine, otherwise the submarine, with its low submerged speed, cannot catch it.

"The officers of the submarine will know the revolutions of the approaching ship and will use the gyrocompass with which to work out its exact position. They will know just when to come up to be within range.

"When the submarine comes up it will show the periscope as little as possible, take quick aim and fire its first torpedo. If it wants to remain there out of curiosity to see the effect it can. But if it does not it goes right down again.

"It stays a short time under water, turns the cap bringing new torpedoes up into the tubes and then comes up for a second shot if necessary."—Pittsburgh Press.

Proverbial Philosophy.

I don't know, writes a correspondent, whether the absurdity of some of our proverbs when used as a means of comparison occurs to people when they quote them. For instance, "As drunk as a lord." Any one who looks into a metropolitan police court when the night charges are being dealt with will see that intemperance is not the exclusive privilege of peers of the realm. "As dead as Queen Anne." Why Queen Anne? Why not Queen Elizabeth or Queen Boadicea? "As deaf as a post." A post is devoid of all the five senses, not hearing only. "As cheap as dirt." What is the exact market value of dirt? It is not mentioned in any tradesman's catalogue. "As poor as a church mouse." Who knows that ecclesiastical mice are less well off than their secular brethren?—London Standard.

Bee Line.

A soldier on guard was questioned as to his knowledge of his duties.

"You know your duty here, do you, sentinel?"

"Yes, sir."

"Well, now, suppose they should open on you with shells and musketry, what would you do?"

"Form a line, sir."

"What! One man form a line?"

"Yes, sir; form a bee line for camp, sir."—New York American.

In Doubt.

"Will you love me forever and a day?" sighed the newly betrothed heiress.

"It all depends," replied the scion of an ancient but impoverished family. "Do you think your money will last that long?"—St. Louis Post Dispatch.

Germany's Crown.

The most militant in form of European crowns is that of Germany, which shows eight shields bearing alternate black eagles and jeweled crosses, while poised on four swords blazing with diamonds is a globe crowned with a cross of gold.

Economy.

Economy is what makes a man wear his dress shirt down to work the next morning. It isn't comfortable, but he hates to send it to the laundry only half soiled.—Detroit Free Press.

In the life of a man there is but one real love. The trouble is that he usually can't tell which one it is.—Smart Set.

Self Tone Plaid Silk Frock

Designed by Joseph, New York.

A CHARMING gown may be developed in blue self tone plaid silk. The short bolero is slashed to show an attractive gold color silk lining and is worn with a white georgette crepe blouse. The blouse has one of the latest novelty collars, which is especially becoming to one with a long, slender neck. The collar is a double frilling of white net, and a narrower ruffling of net continues down the front of the blouse. Small jet buttons could also be used to trim the blouse. This gown has a full overskirt of the plaid silk with an under petticoat of plaited silk.

ANNA MAY.

DAINTY AFTERNOON FROCK.

Embroidered White Net With Pretty Rosebuds of Silk.

PRETTY SUMMER CREATION.

Charming afternoon frock of embroidered white net, the edge forming pointed scallops. Heavier embroidery forms the hip yoke and trims the bodice, which is built with a square neck and long sleeves. Dainty rosebuds of pink silk add a bit of color.

Kitchen League.

Our cook has dodged the onus;
Our faith in her has slumped.
We handed her a bonus
And yet she went and jumped.
—Kansas City Journal.

Its Originator.

"Who was it invented the hot air engine?"

"I think it was a theatrical press agent saw it first."—Baltimore American.

IN BLACK AND WHITE.

Indestructible Voile In Stripes Builds Fashionable and Chic Gown.

FOR AFTERNOON.

Charming afternoon frock of wide black and white striped indestructible voile. On the skirt the stripes run crosswise, and on the plaited apron tunic the stripes run up and down. Vest and collar of soft, creamy lace, with girdle of black moire ribbon, a plaited heading finishing the lower edge.

BLIND WINDOW CLEANER.

"Earns His Living," Says Owner of Hotel.

Beloit, Wis.—Totally blind as a result of a railroad accident near Milwaukee seven years ago, John Gibson, forty-eight years old, is earning his living by scrubbing floors and washing windows at the Transient hotel in Beloit. The proprietor of the place says Gibson is earning his living as well as any full sighted porter he ever had.

The man does this cleaning work entirely by the sense of touch and a system of mental measurements and calculations. There is nothing in his work to denote disability.

"Seven years ago," Mr. Gibson said, "I was working on a railroad near Milwaukee when an explosion occurred in some blasting powder. When I left the hospital I was totally blind."

YOUNG FOLKS' CORNER

Tag the Wall Relay Race.

This is a good school game. The players are divided into four, five or six equal teams, or captains are appointed to choose teams.

A line is marked parallel to a wall or fence thirty to fifty feet from the wall. Mark on the wall, opposite each team the number of the team. This number will be the spot the runners have to tag.

If there is no wall or fence at one end of the field of play, place some objects, like chairs or boxes, to represent the wall.

The teams, in file formation and with six or eight feet distance between each team, line up behind the thirty-foot line. At the word "go," the first runner of each team crosses the line, runs as fast as possible to the wall, touches the wall, returns, tags the next member of the team and takes his position close behind the last runner of his team.

The second runner, as soon as tagged, runs in the same manner as the first, and so on, every member of each team running as soon as tagged. The race is finished as soon as the last runner has tagged the first runner. The team first finishing wins the race.

The English Robin.

English books of natural history are full of interesting narratives of the beautiful confidence in man shown by the redbreast in selecting a place for its nest.

One pair chose for their nest a shelf in a schoolroom in which there were seventy children and directly over the heads of a little class of girls, who never once disturbed them. One of the little birds died, and the parents carried out its dead body during school hours. The other four little robins were fed and reared day by day in the presence of the seventy children. Do you wonder that the boys and girls of England as so fond of their robin redbreast?

The robin of North America belongs to a very different family—that of the thrushes. It is nearly twice the length of the English bird and more than twice its size. Audubon calls it the migratory thrush because it leaves us when winter comes on and does not return until the frost is out of the ground.

Transformations.

Double the last letter to make the transformation.

1. Transform a powerful weapon to the surname of a famous colonist.
2. Transform a deep receptacle into the surname of an English statesman, born in 1759.
3. Transform a domestic animal into the surname of a Scotch poet.
4. Transform stern into the surname of a famous writer of fairy tales.
5. Transform to boast into the surname of an American general.
6. Transform the thorny envelope of a seed into the surname of an American politician who was indicted for treason in 1807.

Answers.—1, Pen, Penn; 2, pit, Pitt; 3, hog, Hogg; 4, grim, Grimm; 5, brag, Bragg; 6, bur, Burr.

Word Puzzle.

The following sentences contain words which are pronounced alike, but spelled differently and with different meanings:

First.—The news was such a surprise that the —— felt he needed a little ——.

Second.—The —— looked over the —— fields and sighed.

Third.—We could not find the —— of the —— we heard in the evening.

Fourth.—A beautiful —— was to be given to the one who would —— it.

Answers—First, Heir and air; second, Baron and barren; third, cause and caws; fourth, urn and earn.

Intelligence of a Wasp.

I have noted that the digger wasp when it has captured and killed a spider hangs it in a fork of a weed evidently to keep it from marauding ants. Sportsmen do the same thing with game to prevent wolves, raccoons, bear and other animals from reaching it. I have done it many times in the south and southwest. This illustrates as much as anything I have ever seen an insect trait that is very nearly if not quite within the scope of what we may call insect intelligence.—S. Frank Aaron in St. Nicholas.

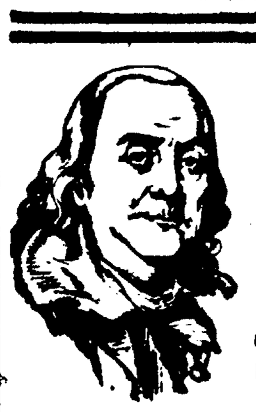
Boy Scouts Read to the Blind.

Members of Boy Scout troop No. 26, St. Louis, are engaged in several scout activities, chief among which is reading for several blind persons. The boys have been organized since last October and have worked up a list of blind persons for whom they read on Sundays.

A Cat Spat.

Said Cat-o'-nine tails to old Tabby Gray,
"I've eight tails more than you have, anyway,
And I'm made of tough leather to whack naughty boys
Who get into mischief or make too much noise;
And when I'm not busy I hang on the door
As a warning to culprits of what is in store."

Quoth old Tabby Gray to Cat-o'-nine tails:
"My jaws have keen teeth and my toes have sharp nails,
But I use them for ridding my mistress' house
Of every destructive and prying wee mouse.
She has boys and girls, too, but they're every one good,
Though I'd never harm any child—that's understood.
If you do have nine tails, I have nine lives [illegible],
So you see, altogether, that I am ahead."
—Philadelphia Record.



Economy Hints

A penny saved is a penny earned.—Benjamin Franklin.

DON'T eliminate beefsteak from your menu just because you have neither a gas, electric nor coal range. You can fry a steak on that little gas stove you bought for 10 cents if you only know how, and it would take a well qualified expert to tell the difference.

First have your pan red hot and drop in a piece of suet about the size of a hickory nut. Take your steak, a sirloin or porterhouse, at least one and one-half inches thick—two inches thick is better; let it remain three minutes first on one side, then on the other, for searing. This is to keep the juices in. Keep turning the steak constantly at intervals of three to five minutes until done—rare, medium or well—as desired, and the result will be twin brother to a broiled steak.

Another way to fry steak is to sear it three minutes on each side, then place a cover on the pan and let it cook slowly seven minutes more on each side, when it is medium.

Of course there is nothing like broiling for the best flavor, and there is nothing to equal the coal or wood fire for this purpose. The secret is a glowing red heat. The housewife with a wood fire, if she will take the trouble to burn the wood nearly to the center, check the draft until the fire forms charcoal, will be repaid with a dainty morsel.

The average housewife, however, finds the gas oven an ideal instrument for broiling. The oven should be hot when the steak is placed within, so it is well to light the gas in the oven about five minutes before the steak is ready and when the broiler is hot put the steak on it as near the gas flame as possible without letting it touch. Sear on each side from one to two minutes, turning it with a fork inserted as near the edge as possible. When the searing is completed turn the steak again, lower the pan about six inches and turn the burners halfway down so that the steak may broil slowly on each side about five minutes. This will give you a rare steak. It is sometimes well to give the steak a little more time and turn it oftener, never allowing it to broil on one side longer than four or five minutes. When frying a steak in an ordinary pan remember to stick the fork always near the bone in turning. The fried steak requires about twenty minutes.

BRIDE'S SHOWER.

How to Plan an Entertainment In Which Pins Are Used.

The invitations for this unusual shower were written on a correspondence card, on which a little gilt paper heart was pinned. Pins of every description were brought by the guests; there were papers and cubes of pins, pin balls, cushions filled with pins, bar, veil, collar and cuff pins. Safety pins in black and white were there, and papers of gilt and pearl pins for fastening the wedding veil. The following old rime, changed to suit the occasion, was written on the bride's place card:

No needles, but pins,
No needles, but pins,
For when a girl marries
Her happiness begins.

At each plate there was a bouquet of dainty spring flowers, with a fancy pin thrust through the gauze bow that tied them. It is astonishing how many novel and useful pins and receptacles there may be devised for such a shower.

The hostess gave a leather velvet lined scarfpin case which the little bride to be said she knew "he" would appropriate.

There was a shirt waist set consisting of four little velvet bows, each one attached to a safety pin and all easy to attach to a lace jabot or the front of a shirt waist.

How to Make a Pretty Cover For Hot Biscuits.

Any hostess who prides herself on her delicious biscuits should not fail to keep them tasty by having them covered during the meal, so that they will retain the heat. An attractive cover can be made of white linen having a square center and four pointed ends. On one of the pointed pieces two biscuits might be embroidered. To make the design more realistic you can tint the biscuits brown and then outline the edges of them, or, in place of using the design, embroider the words "Hot Biscuits" on the linen. Have such a cover ready for the next plate of hot biscuits you serve to your friends and enjoy the praise you will receive for your needlework and your culinary ability.

How to Orientalize a White Silk Faille Suit.

One of the prettiest ideas in linings seen for months is that which gives to a suit of white silk faille a Chinese atmosphere. The coat is so made that it may be worn open without having a slovenly appearance, and so the pretty lining peeps out and captivates all who spy it. The lining is a soft, heavy wash silk of white ground, with the famous "willow" plate pattern upon it in Chinese blue. One has to see it to realize the charming effect obtained. No note of blue appears otherwise upon the suit.

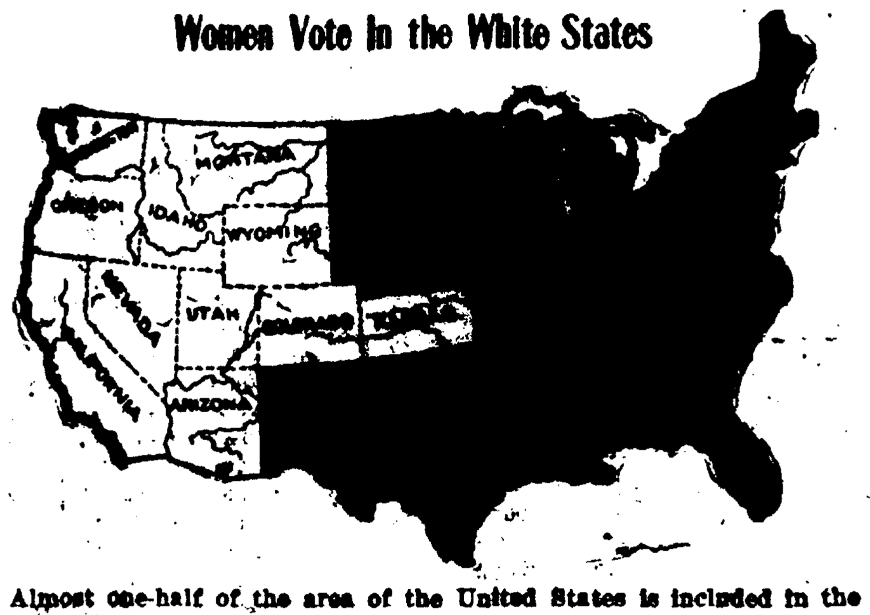
The Dominant West

Women Vote in the White States



Almost one-half of the area of the United States is included in the woman suffrage states. Area doesn't vote. But people vote. And, as it happens, the vast western stretch of territory where women vote is that part of the United States which is most rapidly filling up with people. Given one or two more decades and there will be a great corps of women voters in the west, women trained as men are trained to civic and political responsibility, trained to active political co-operation with men, trained to the western point of view. As long as the east persists in the unenfranchisement of women, for every couple, man and woman, in the east there will be one vote. For every couple, man and woman, in the west there will be two votes.

PURE ICE CREAM

"The Only Kind We Make"

OUR FOUNTAIN DRINKS ARE NOT EXCELLED

FRESH FRUITS AND CONFECTIONERY

Phone 80 THE ONYX Quirk Theatre Bldg.

A RAILROAD WRECK IN BROADWAY, NEW YORK

Tonight "The Juggernaut" will be produced at The Quirk, the story in outline of which follows:

Two young men—one the brilliant son of poor parents—the other the dissolute heir of a great railway king, become friends at College.

One thinks he has accidentally killed a drunken rowdy in saving the other's life—they two only know this secret.

Both fall in love with the same girl—who marries the rich boy only after his chum has withdrawn from the race because of his poverty.

Years later one becomes president of his father's old railroad—the other a righteous, fearless district attorney. Both again worship the same girl—daughter of the old sweetheart of both—one with a father's deep affection; the other because she is her mother's counterpart.

The district attorney bitterly attacks the railroad in the Courts. His former chum threatens to expose him as a murderer.

And now—imagine the girl on a train approaching a bridge which cannot possibly stand its weight. Both men know this. Both are rushing madly by automobile and motor boat to intercept it.

You see all this. See the girl's sweet face at the window of the flying train—feel the swaying of the automobile as it skids desperately around sharp turns—and the bounding of the motor boat slashing through rough waters.

Both men and the train come crashing into the picture at the same instant—too late!

For a moment that seems an eternity, you feel yourself sitting almost under the tottering trestle as the enormous engine—a mass of whirling steel—leaps thundering and quivering into the empty air and falls shrieking to the swirling river.

The big coaches crumple like cardboard before your eyes and pile themselves up on the wreck—their passengers floundering and struggling in the debris.

The spectacle itself shows the victims of "The Juggernaut."

ON THE FIRING LINE WITH THE SUFFRAGISTS

Two Thousand Women Working Day and Night For the Cause. One Hundred Thousand Volunteers.

Convincing the Big Empire State of the Justice of Votes For Women.

By CARRIE CHAPMAN CATT.

No class of unenfranchised citizens ever worked so hard for the vote as the women of New York are working. In no other state in the Union, and in no other country on the other side of the sea, where women have already received the vote, has there been so thorough going, so energetic and so compelling a campaign as the one now in progress in every county and hamlet of this state. No fewer than 2,000 women are at work all the time on the task of convincing the big Empire State of the justice of "votes for women," while a poll of the women who are giving "part time" to volunteer suffrage work—making speeches, engineering publicity, getting out suffrage editions of newspapers—would run the number over 100,000. Meantime the liquor interests, big and small, threaten to fight the coming of woman suffrage as part of their campaign against prohibition. Leaders of political machines here and there are rumored to be preparing to pass the word along the line that votes must be cast against the woman suffrage amendment in order to keep the political machines in successful operation. Anti-suffrage organisations composed of women, and still others composed of men, are waging their battle against us as best they can. But the best spirit of the twentieth century, the faith and democracy, the confidence in progress, the belief in equality of rights of all human beings—these are the forces that have been enlisted in our campaign as in no other. As the days go on the forces are lined up more clearly. Progress upon our side and conservatism, fear and selfishness in opposition. It is a glorious thing to be part of the making of glorious history, and that is the lot of suffragists in the great woman suffrage campaign of 1915.

It takes a trip over the state to make one realize how widespread is suffrage interest and how varied are the suffrage activities in the great campaign now on in New York state. Canvassing is going on everywhere, street meetings are being held under the arc lights on every city corner and under the light of tallow candles in Japanese lanterns, in every hamlet. Teachers off on their vacations are campaigning while they rest. Women with big country estates at their command are campaigning while they entertain.

There is nothing too hard for the women to undertake. Every device of propaganda and publicity is availed of. The whole state is aglow with the suffrage color. The suffrage girl is trumpeting on billboards all the way from New York city to Buffalo. Every worthy influence that can be lined up for suffrage is being lined up. Every voter that can be reached is being talked to. During a recent trip up state I spoke at twenty-two county suffrage conventions, and at every one of these the reports showed how steadily the sentiment of the voters is swinging toward suffrage. Prominent men are coming out city by city and town by town with rousing testimony in favor of our amendment. Mayors, bankers, clergymen, farmers, enroll with us, speak at our meetings and give out pro-suffrage statements for the papers.

What is responsible for this mounting sentiment? What is back of it?

First, the spread of the democratic ideal and the conviction that woman suffrage cannot be dissociated from that ideal. The suffrage movement has been inspired from the beginning by precisely the same motives as have forwarded similar movements among men. A desire for personal liberty in governmental matters; a feeling that an outrageous injustice is done the mothers of the race who are denied a voice in the welfare of their country; a conviction that our claim of a "government of the people" is a mere travesty when half are denied expression of their political desires; that the disfranchisement of a sex is discrimination and tradition instead of reason and common sense—these are the motives that impel women to seek the ballot, and they are but adaptations to women's case of the motives that have impelled men to seek the ballot throughout the history of the struggle toward democracy. Men of vision see this more and more clearly. They are learning to admit frankly that women are people, individuals. That admitted, the struggle for woman suffrage becomes only the old human struggle for the right to express an opinion at the ballot box. With that struggle all men of democratic persuasion are readily sympathetic.

The second weighty consideration that answers for the great growth of pro-suffrage sentiment is the object lesson given by suffrage itself. People who are afraid of the democratic ideal are not afraid of suffrage when they see how it works, and testimony as to how it works pours in from suffrage states. Anti-suffragists now and then catch a disgruntled citizen of a suffrage state, a defeated candidate or a constitutional pessimist, and secure some private opinion hostile to woman suffrage. But such opinion is ridiculously futile as an offset to the pro-suffrage resolutions passed by the legislatures of suffrage states and the pro-suffrage testimonials freely offered by the governors, the judiciary and other prominent citizens of those states.

Bargain Prices.

Having heard that the suffragists of New York secured pledges of $50,000 at a luncheon they gave, the antis immediately fell into verbal fits and, frothing at the mouth, called on heaven to witness that the "suffs" had raised this tidy sum to buy votes from the superior sex in the great metropolis. The unabashed leader of a suffrage organization thereupon did some hasty computing and has announced that if the filthy lucre is thus used the gentlemen of the greater city will be forced to barter their ballots for the proud sum of 24 cents each. Such being the costly inducements held out the public is not yet getting gray over the fear that the lords of creation in their immediate vicinity will be hired to vote for the suffrage amendment in November in the hope of thereby providing permanently for all the future needs of their families.—Judge.

What the Antis Think of Women.

Since the days of Adam and Eve woman has been handing man an apple—and occasionally a lemon. Woman has always been the first to kneel at the feet of false gods and the last to arise from the worship of idols. She is the slave of custom, the victim of sentiment and the prey of her own folly.

It is she that is at fault for most of the sin and suffering in this world.

When woman shares equally the responsibilities of life with man she can no longer say, "I told you so." When she surrenders the right to demur and the right to accuse has she not lost half of her kingdom? When women take life seriously what is there left?—W. D. Lewis, President Farmers' Educational and Co-operative Union of Texas.

Where Women Take Life Seriously.

The extension of equal suffrage to the women of Kansas has had immediate effect for good. It has impelled all political parties to include in their program and platform humanitarian projects and moral issues, which previously they had ignored. It has made a more careful selection of nominees. It is already having wholesome effect in cleansing the state of spoilsman politics and is making for high ideals in both public and private life. Kansas is proud of her new citizens and appreciates the great part they are having in every movement which has for its purpose the betterment of the state. Very respectfully,

ARTHUR CAPPER,
Governor.

PENSION LAW FOR MOTHERS EFFECTIVE

Theh widowed mothers' pension law, put through the Legislature after an exposition of its merits by the New York American, became operative yesterday.

While in the city of New York the Mayor names the Child Welfare Board, county judges select them in districts outside the metropolis. They appoint seven members, of which two must be women.

Under the new law every dependent widow with children is entitled to an allowance equal to that she would be compelled to pay for their support in a state or county institution. The mother must have lived in the State at least one year. The Child Welfare Boards are made judges of the character of the mothers and their suitability for caring for children in their own homes.

The bill became a law April 7, when Governor Whitman approved it in these words:

"Believing in the preservation and protection of the home, I most cordially apprpve this measure."

LAUGHS TEETH OUT AT FULL HOUSE

New York.—A fine set of upper teeth a genuine work of dental art—is being preserved at the Longacre theater box office awaiting a call from the playgoer who presumably suffered the loss.

The molars were dropped by some one occupying a seat in the front row of the balcony last Wednesday night, during a fit of laughter in the second act of the farce, "A Full House." They fell into the lap of a gentleman in the ninth row of the orchestra, just below the balcony circle, barely missing his nose.

"SEA SLEDS" FOR SCOUT DUTY

Washington, Jluy 2.—The Navy department is considering the adoption of a type of speedy motor bat known as the seas led, a modified form of the hydroplane, for use in scouting and defense against submarines. Boats of this type can be built with a guaranteed speed of 55 statue miles an hour, and a possible speed of 61 miles. They are said to be thoroughly serviceable in rough weather, and can be built to carry thirty men.

The sea sled is shallow, with a hull of peculiar construction, an dskips over the watsr instead of cutting thru it. A 24-foot boat of this type tested by the navy has made 37 miles an hour.

SUBMARINE SINKS FIVE BRITISH VESSELS; BOAT WAS FULLY DISGUISED

London, July 3.—Three British steamships, a bark and a schooner have been sunk near the Scilly Isles and off the South of Ireland by German submarines, one of them the U-39 which destroyed the Lusitania. This craft in pursuit of her prey disguised herself by rigging two dummy canvas funnels, two masts and false bow and stern. These contrivances gave her the appearance of being a deeply laden steamship with smoke issuing from her funnels.

The practice of disguising ships of war is a familiar one to naval services, and in all manoeuvres to within a few years ago British ships of war indulged in thisp ractice. In general it requires an executive officer with the imagination of a stage scenry setter. At the best only mock contrivances can be rigged up which will serye at a distance to produce the neeessary illusion. It is hard work for the carpenters' force aboard ship when recourse is had to disguising, and in naval circles there are vivid stories of first class battle ships disguised to resemble ocean steamships.

The Teutonic was imitated to perfection one manoeuvre season by a large British cruiser, and with such success that the opposing side chased with a light cruiser to within gun range, when she was promptly ruled out of action. The disguise had served perfectly.

In creating disguise rigs seamen have recourse to boards and canvas and plenty of paint. Additional spars can be rigged and bows and stern shaped into any desired form by the simple use of overhangs. All this is possible with cruisers and simple masted battle ships, but is regarded as a physical impossibility to disguise a super-dreadnought. The masting cannot be obliterated.

Under normal conditions ships are visible on a clear day for a distance of fifteen miles on all sides, taking one's observation at a height of, say twenty feet above the water. Masts of vessels can be seen for an even greater distance, and the advantage of a disguise is apparent when it is recognized that in the long range fighting of the present day war ship observers depend upon the silhouette presented by a distant craft upon which to base a recognition.

The vessels destroyed were the steamships Caucasion, Inglemoor and Welbury, the bark Sardozne and the schooner L. C. Tower.

The Caucasian met her fate southwestt of the Lizard, on the coast of Cornwall, on Thursday morning. While engaged in picking up her crew the Inglemoor fell a victim to the same submarine.

The Caucasian, when the submarine opened fire, ran under full steam in an endeavor to escape, and not until she was struck by several shots, one of which demolished the wheel, did her captain surrender. The crew took to the bats. The submarine hauled alongside and fired eight shells into the vessel.

A few hours later the Inglemoor appeared on the scene and started puicking up the Caucasian's boat. The Inglemore had taken the occupants of the small boats on board when the submarine emerged and opened fire on her. Escape being hopeless, the crew took to the boats, and the submarine then torpedoed and sank the Inglemoor, subsequently returning to the Caucasian, which was still floating, and sending her to the bottom.

America's Hall of Fame, as it looked in 1776 and again in 1915

Lucius Wilson Coming Back Next Wednesday

The Chamber of Commerce has just received information to the effect that Mr. Lucius E. Wilson, who was here during the membership campaign will return to the city on Wednesday evening, July 7th.

Mr. Wilson's return is in accordance with the agreement made at the time the Chamber was re-organized. The Division of Membership and Entertainment is already at work on plans for a public meeting which Mr. Wilson will address during his stay here.

The Chamber expects to announce the plans for the meeting and other events during his stay in Tuesday's papers.

Knife Works to Remain Open, Says Foster

Rumors current in the city to the effect that the Foster Bros. and Chattlion knife works would close down today for a period of six weeks, were denied this morning by C. Earl Foster of the company. It was rumored that the employes of the plant had been notified that the plant would close for six weeks pending necessary repairs on the machinery. This Mr. Foster denied, and further stated the company had no intention of shutting down the plant at present for any length of time.

CHIEF DYER'S WARNINGS TO ALL PATRIOTS

Fourth of July advice was given out yesterday by Chief Dyer. Some of the DON'TS follow:

1. Don't handle fire crackers after lighting them. Injuries received in this way cause jockjaw.
2. Don't use revolvers or cannon crackers in violation of the law. Patrolmen have been ordered to arrest every one found infringing upon the city ordinances.
3. Don't explode fireworks under a roof. Smouldering sparks may cause fire.
4. Don't allow children, especially girls with light clothing, to handle fireworks of any kind.
5. Be careful how you use matches.
6. See that no sparks set fire to curtains or combustible material near your homes.
7. Strive to prevent accidents.
8. Seek to prevent fires.

POLING PREDICTS WHITE FLAG FOR ALL STATES IN LESS THAN SIX YEARS

"The liquor traffic is an unmitigated evil and as such must be destroyed," said Daniel Poling, speaker, at the opening session of the Y. P. B. convention in this city last night. In speaking further Mr. Poling quoted Emerson as saying "Anything that is against Nature will be destroyed," and followed up the quotation with the thought that alcohol is against nature; it is a physical and moral despoiler of the race and as such must be destroyed.

There are eighteen states of the union now under the white flag, Mr. Poling stated, and within five years the remainder of the States will, too, be saloonless. The idle fallacy that financial ruin follows in the wake of dry territory has been proven. When less is spent in any territory on the product of the saloon more will be spent on carpets, pictures, furniture, meat, bread and shoes.

The liquor traffic is an economic impoverisher of society. However true it is that there are people who say the revenue derived from the liquor traffic is a business asset, natonally or otherwise, one has but to analyze the facts. Think of the hundreds and thousands of dollars paid to liquor dealers in a deadly destroyer and the small per cent of which returns to the public for the use of good things. What kind of a business man would listen to a proposition from another who would say "If each year you will give me $35,000 I will give you in return $1000?" The facts may be illustrated by taking a sponge, putting water into it and by pressing the sponge we get a portion of the water back; the sponge absorbed the rest. Uncle Sam has yet on this score to learn to be a good business man, and until this same good old uncle of ours refuses to allow liquor to be sold to minors, and will stamp out the greatest ally of the white slave traffic, the Starry Stripes cannot speel true freedom—the freedom of real manhood and real womanhood.

Mr. Poling finished his talk with a strong appeal to the fathers and mothers to become active in this world-wide movement, and Mrs. Ella Boole, the state W. C. T. U. president spoke for a few moments in her usual motherly interesting manner.

Mrs. Maude Perkins presided and Mrs. Charles Kelley of Oswego offered the prayer of the evening.

A reception was given the delegates and visitors as a close to the evening's program.

Airman Sinks Submarine; Second Time During War

Rome, July 3.—For the second time in history, an aviator has just sunk a submarine, according to official announcement here today.

The latest floating victim of the airman was the Austrian submarine U-11, which was bombarded in the Adriatic by a French aeroplane.

The Minister of Marine states the action took place on Thursday. The U-11 was lying lazily on the surface and apparently failed to notice the aviator, as he circled overhead. With a sudden swoop the aeroplane shot downward to within forty-five feet of the submarine's deck. By this time it too late for the undersea cratf to submerge. Tow bombs were dropped, both of which struck the submarine near the turret and exploded.

The submarine sank almost instantly and did not reappear, although wreckage was afterward found about the scene. The U-11 was one of the newest of the Austrian submersibles and displaced about 800 tons. She is supposed to have had aboard a crew of twenty-five men.

The German War Office announced several days ago that a German aeroplane had sunk a Russian submarine, the first time on record of such an engagment.

45—PHONE NEWS ITEMS—45

Canadian enterprise is building a new railroad from the rich western wheatfields to the shores of Hudson bay. This new railroad and new route of traffic is another proof that "transportation follows the lines of least resistance." Transportation by water is vastly cheaper than by rail. The water route by Hudson bay will save a thousand miles of rail haul and enable the farmers of western Canada to lay down their wheat in the European markets at a lower freight rate and consequently a greater profit to them than the wheat growers of western United States.

Former President Taft thinks that the United States should have a "council of defense." But cabinets are only councils, and some of them are prone to fatal disagreements. The idea amounts to an agreement of the old adage that "two heads are better than one." On the other hand, there is the military adage that "one bad general is better than two good ones." Military decisions cannot be recalled and tried over like most human problems, therefore the greatest wars have been directed by real Caesars.

On an average land devoted to golf is worth $600 an acre, and as there are 130,000 acres in the United States devoted to the game there is a matter of about $78,000,000 tied up in golf real estate. Add $20,000,000 or so for clubhouses and the snug sum of $100,000,000 is invested permanently in the game.

The outer fringe of first Bull Run battlefield was packed with civilians as rampant as a crowd of baseball fans. But never again. One touch of battle makes the war zone the least sought place in the world for any one not forced to go there.

And a blow of the strong arm could well be applied to the elimination of sordidness, coarseness, evil incitement and cruelty from the average cheap motion picture shows.

Capital of an automobile factory jumped from $2,000,000 to $100,000,000. The auto plays a great part in peace and in war, too, nowadays.

James J. Hill predicts a population of 400,000,000 by the year 2000. That means four men, four women and four kids for every one in evidence now.

As Mexico's revolution spree has cost that country nearly $400,000,000 it should be glad to have Uncle Sam step in with a cleanup squad.

It's Permysl here and Przemysl there, and you take your choice, but just can't pronounce it either way correctly.

Now we'll be likely to hear more about macaroni "made in America."

AMERICA

By F. D. Van Amburgh

America—the central figure of all the world. With the Orient on one side, and the Occident on the other, it should be the patriotic prayer of ever American that his country may be true to its manifest destiny.

No man's mind can grasp the marvelous opportunities open to us as a nation, provided we put away all of the schoolboy talk of the long ago, all petty prejudice of today.

The urns of the Old World hold no ashes so sacred to us as the dust in the graves of our American soldier dead.

The catacombs of Continental Europe cannot compare in glory with the pearl-paved, unknown deep, where our American sailors sleep.

Medals are often the empty emblems of enthusiasm. Courage is more often the inheritance of the American empire builder.

To be an American today signifies so much more than it did yesterday.

True to our American ideas and ideals, we have rejected the mistakes of an older world as valuable lessons, and accepted their achievements as inspiration and as opportunities for improvement.

This statement is not made without deliberation, without careful thought. It can be supported, and will be supported right here.

A blind adherence to one country, one people, is not an evidence of the highest patriotism. It is intellectual slavery to the one. The uniform experience of centuries proves that no one country is all right or all wrong.

The Almighty did not make any country, or any people, so superior to any other country, or any other people, in morals, or in wisdom, that defeat in arms means the end of everything worth while.

Fortunately for us, we are a combination of minds; but through our form of government we are one people, with one flag, with one destiny. We have one undivided, resolute purpose to meet the responsibilities of the hour calmly, deliberately, firmly, that the glory of this country may be as lasting as the sun that shines on the Stars and Stripes.

America, the birthplace of true democracy! America, acknowledged to be, in the sight of the fearful spectacle of the Old World, the ideal of right, the enduring home of justice! America, the only country on earth where the government loans exact, equal rights to all men; the only country where the general government enjoys its full constitutional vigor, and still leaves to each state its respective rights; a country whose people gracefully acquiesce in the decision of the majority; a government where civil authorities control military power, where free speech and an uncensored press are heard! All beliefs are tolerated, all religions respected and maintained.

For what we are and for where we are, the whole world is heaping upon us, at the moment, a grave responsibility.

And you ask me, Are we one people? And I say with renewed energy, Emphatically, yes!

To New York came the Dutch; to Massachusetts, the English; to Pennsylvania, the Scotchman, the Welshman, the Quaker, the German; to Virginia, the Cavalier; to Delaware, the Swede; to Georgia, the Huguenot; to Florida, the Spaniard; to Louisiana, the French. Then came the Italian, and later, to all this country, the Jew.

And this country will always be one people, with one destiny, so long as we rock our children in the cradle of true democracy, so long as we hold to the teachings of tolerance, and cling close to the principles of peace if possible, war if must be.

BATAVIA'S TAX RATE UNDER $20 THIS YEAR

Batavia—Notwithstanding this city has incurred a number of extraordinary expenses this year, made necessary on account of the organization of the new city government, which will not be incurred again, the tax rate this year will be as high as or higher than for a number of years to come. The tax rate for all purposes this year will be under $20, in comparison with an average previous rate of $30 or more.

Out of the Earth

A little nitrogen for fertilizing purposes is extracted from the air and the sea yields a great store, but the great bulk of the world's wealth comes out of the earth.

While the agricultural harvests promise to add more than ten billions of dollars to the country's wealth this year, the recent rise in the price of metals is giving a great stimulus to the mineral industries, the output of which probably will break all records for quantities and values.

In the midyear review of conditions prepared by the Geological Survey it is noted that shipments of iron ore from the Lake Superior mines shoy an increase of thirty per cent as compared with last year, the output of pig iron is growing from month to month and demand for all metals is stimulating larger production.

More wealth will be taken out of the earth in the United States this year than in any other twelvemonth in its history.—N. Y. Herald.

Children Cry
FOR FLETCHER'S
CASTORIA

AN EMPTY VESSEL, *OR* A CYNICAL CRITIC

By I. E. Hyde

Ah, me; the world is dark and drear,
There's nothing going right;
It's coming to an end, I fear;
I feel it now in sight."
Sometimes I think the thoughts of men
who criticise are void, what then?
Why—this proverb's true the world around
An empty vessel makes the loudest *SOUND.*

"The bread is sour, the coffee cold,
The meat is but half done;
The pudding I am sure is old,
And tough—this sally lum."
That poor old man has lost his taste,
His well served food is going to waste.
So shout it loud the world around,
An empty vessel makes the loudest *SOUND.*

"I pluck the roses, but the thorns
Are sharp and prick my flesh;
I screen my doors but bugs with horns
Are creeping through the mesh."
Sweet roses are my thology,
And horned bugs deep viology,
But make it known the world around,
An empty vessel makes the loudest *SOUND.*

"My wife now stands for woman's rights,
She says some day she'll vote;
And when she does I'll surely fight;
She'll not make me a goat."
Poor man is tired of life and love,
He needs a grave and next a shove;
He needs these words above his mound—
This empty vessel made the loudest *SOUND.*

Opinions

"Red Eye" Disposal

The path of the prohibtion officer is strewn with thorns. Whiskey is forever being smuggled in to wet the whistles of the dissentients and incorrigibles in a dry state. Its packages assume every disguise known to the ingenuity of man, and he must be a very alert officer indeed, mentally and physically, to do any approximation of his full duty to the laws which he has sworn to uphold.

But once he has nabbed the contraband one would suppose that he might proceed to destroy it much as he pleased. Just here, however, comes the rub—in West Virginia. Prohibition officers in that state have been pouring the whiskey seized into the streams, notably the Kanawah river, a safe enough method of disposal if the sole object is to put it beyond the reach of West Virginians. But on its way to the Gulf of Mexico it has been poisoning the fish and it now looks as if the practice might involve the prohibition officers with the game laws.

Evidently this West Virginia "booze" in both quantity and quality lives up to the best traditions of prohibition. To give it a proper outlet, therefore, presents a problem not unlike that of sewage disposal. The West Virginians might try septic tanks in lieu of the stomachs ot a selected number of criminal citizens. In the meantime let us refrain from saying of our erring brother that he "drinks like a fish." The fish is exonerated.—N. Y. Tribune.

Theory vs. Practice in Government

As not infrequently happens, Buffalo is in straits, following the adoption of a reform policy, to carry out the theory in practice. According to The News of that city, those who worked for a commission charter manifest such indifference as to its operation that so far nobody has come forward to assume the burdens of government. That is to say, nobody worth while; for according to The News "the class of men we had reason to believe would be interested in good government is quite as minus as in the old days and under the old rule."

A commission form of government is all right—if you can induce the right sort of citizens to become commissioners; if the wrong kind of men become commissioners, it is all wrong, the same as any other system.

The same rule applies to direct primaries—in theory the acme of popular government, in practice to this date by no means commensurate with fulsome and often thoughtless promise. If you can induce a preponderance of the voters—and it should be a very marked preponderance in order to fill the bill—to turn out for the primaries, you are achieving the theoretical object, ostensibly. If onlya minority of the voters turn out, you are simply perpetuating in practice the alleged prime fault of the convention or represetative system; you still have nominations by a minority, and as has been shown in practice a minority subject in some cases to manipulation.

Probably there is a happy mean between these several extremes. Commission government, under certain limitations, has its advantages; direct primaries certainly are desirable wherever an expression of popular choice may be obtained and wherever such expression is sufficiently deliberate and discerning to be clearly for the public interest. But it is equally obvious that either of these systems breaks down if too much is expected of it.

In fact it is axiomatic from ages of human experience that no system of government can possibly be infallible. There have been good monarchies and bad republics, and vice versa. Many of us have been too prone to pin our faith to systems. Buffalo, in its quest for men, once more verifies the homely maxim that you can lead a horse to water, but you cannot make him drink.—Auburn Advertiser.

CANNING CO. BUSY

The canning of Oswego county peas forms the principal occupation of the Fort Stanwix canning factory at the present time. Certain of the departments are working long hours, or until as late as 10:30 p.m. This Fulton industry will be kept busy for the next six weeks at canning vegetables, etc., as each variety reaches the desired state of maturity.

Belts and Sashes.

Belts and sashes may be fashioned from the same material as the gown or suit with which they are worn, or sometimes leather or silk is used for contrast. Leather belts are particularly good on cloth or linen costumes, while the soft ribbon sashes are especially lovely on frilly summer frocks.

One of the greatest needs for summer wear is a ribbon sash or girdle. A girdle and sash of shell pink satin is trimmed with French blue shirred ribbon in a lover's knot design and delicate pink roses. The design is used on the two sash ends and repeated on the front of the girdle.

WHICH IS TO SAY

A Moral In Per Cents Based on Anti-suffrage Figures.

There Are Eleven Full Suffrage States; There Are Thirty-seven Male Suffrage States.

A statement sent out by the organization interested in not getting votes for women recites among instances of beneficent legislation secured by ballot that twenty-three states have enacted workmen's compensation laws since 1911, "Only seven of them being suffrage states"—which is to say 63 per cent, nearly two-thirds of the full suffrage states. Sixteen man suffrage states passed such a law, according to the same authority—which is to say just 43 per cent of the manhood suffrage states. The same statement makes the point that the first mothers' pensions law was passed in 1911, and that since then six woman suffrage states have adopted such a law, whereas twelve male suffrage states have done so. Which is to say that 54 per cent of the woman suffrage states are to be credited with this law as against 32½ per cent of the male suffrage states. (As a matter of fact, 100 per cent of the woman suffrage states have passed widowed mothers' pensions bills. But one is concerned here with anti-figures, not facts.)

"Eleven male suffrage states have equal guardianship laws, which is of particular advantage to women. Only seven suffrage states have been sufficiently interested to adopt such a law," continues the statement. Which is to say that 29 per cent of the male suffrage states have passed equal guardianship laws, while "only" 63 per cent of the woman suffrage states have adopted this law, "of particular advantage to women."

"Eight suffrage states," continues this same effort to show how much more quickly and surely women get what they want when they haven't the ballot to get it with, "make the age of consent eighteen, but ten male suffrage states have established this law." Which is to say that 73 per cent of the woman suffrage states have the law as against 27 per cent of the male suffrage states.

"MELTING POT" FOR SUFFRAGE MONEY.

Suffragists Bring Gold, Silver and Jewels to Help Raise Campaign Fund.

The "melting pot" has been a novel and popular means of raising money for the suffrage campaign fund. As some one said: "The whole melting pot plan fires the imagination. In Germany the women and children are bestowing upon the government all the copper and iron heirlooms of the land to be transferred into ammunition. But the suffragists here, like the matrons of the storied past, are fairly tearing from their fair arms and fingers and bodices the gold and silver ornaments which have adorned them in order to raise money to carry on their bloodless war. The sacrifice is splendid, and as the rings, brooches, chains, gold mesh bags and ornamental combs are tumbled into the melting pot these contributors to the cause cannot fail to feel the thrill of joy that is often the only recompense of true heroism."

At the headquarters of the Empire State campaign committee, 303 Fifth avenue, contributions have come in most generously. The more attractive pieces of jewelry were sold, and the headquarters set up shop in a small way to give visitors an opportunity to make purchases. There were bargains for buyers, too, and consequently more money for the cause. Old silver bracelets and chains were there in plenty, and as for the silver napkin rings—well, suffragists say they are doing the world good by giving it an opportunity to get rid of all the old napkin rings.

SOMETHING MUST BE DONE.

Woman Suffrage and Child Labor as a Foreigner Sees It.

A distinguished Hindu nobleman, Prince Garath Ghosh, now in the United States, says apropos of Woman Suffrage: "The condition of the women and children shows that the men have not made good. Therefore something must be done, however desperate, to change these conditions.

"In the United States out of 18,000,000 children of school age 6,000,000 never saw the inside of a school because they are sweating and turning their bodies into gold for somebody. That is something to think about, especially now, as the summer months are coming when the canneries will be in full swing. In the string bean canneries there was one case where the children were awakened at 3:30 in the morning and did not go to sleep until 11 at night—nineteen and one-half hours' work for children of five years of age and upward. They had no time to go to bed. They had to sleep on the crates. One little girl of six years of age was found asleep with an unstrung bean in her hand, ready to resume work the next morning. From the economic point of view, it seems to me that is one of the strongest arguments for woman suffrage."

Echoes of the War.

The United States is having the usual luck of the innocent bystander.—Kansas City Times.

What the world ought to do is to take away the license of the theater of war.—Detroit Free Press.

Most of the plowshare factories seem to have been turned into plants for the making of swords.—Philadelphia Inquirer.

It would be a real pity to spoil America's distinction of being the only neutral first class power on earth.—Kansas City Journal.

The pen may be mightier than the sword, but we haven't heard of any pen factories working overtime these days.—Baltimore Star.

The House of Lords.

Britain's house of lords has now and has had in times past many nicknames. Some modern Englishmen call it the "chamber of horrors" and the "lethal chamber." When William Pitt "fell upstairs," as Lord Chesterfield put it, and became Earl of Chatham, Chesterfield spoke of it as that "hospital of incurables." Chatham himself used to call it "the tapestry," in allusion to its usual splendid lifelessness. Disraeli had the same thought in his mind when, shortly after he had become Lord Beaconsfield, Lord Aberdare asked him, "How do you like this place?" "Well, I feel that I am dead," said the new peer, adding, with second thought tact, "but in the Elysian fields."

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over 30 years, has borne the signature of [signature] and has been made under his personal supervision since its infancy. Allow no one to deceive you in this. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic, all Teething Troubles and Diarrhœa. It regulates the Stomach and Bowels, assimilates the Food, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

FLYING SQUADRONS HOW THEY WORK

Empire State Campaign Committee Sends Out Mobile Organization.

TO HELP LOCAL LEADERS.

Members of the Squadron Canvass Voters For Signatures, Form Clubs of Local Women to Carry on Suffrage Work and Hold Public Meetings on Streets, In Churches and Before Clubs and Other Organizations.

One of the interesting chapters in the history of the campaign for woman suffrage in New York in 1915 is the story of the "flying squadrons" sent out over the state by Mrs. Carrie Chapman Catt, chairman of the Empire State campaign committee.

The work of the squadrons is varied. The members canvass the voters for signatures to the little yellow printed slips which attest a favorable inclination toward votes for women; they hold women's meetings and form clubs of local women to carry on the work for suffrage in that vicinity after the squadron has passed on; they do press work, getting all the publicity possible for the enfranchisement of women in the columns of the local newspapers; they hold street meetings; they speak in the churches, at the movies, before every club and organization of men or women to which they can gain access, making sometimes three and four speeches a day, one day after another.

"Some work? Yes, but work of the kind that counts, work that pays, for you feel as if you are hearing the heart beats of the people, and you know that the vote of the up-state men is going to be given to the women this fall." So the suffragist worker tells you.

"How do you know it?" you will ask.

Because these men will tell you it is. They come to hear you speak on the steps of the country store or on the village square, and after your speech is over they crowd around you and ask questions or discuss your arguments shrewdly and cannily, so that you are fortified with material for many a future speech, and they sign your proffered yellow slips with calm deliberation, but with a conviction that makes them as valuable in your eyes as gold certificates.

This plan of sending out the "flying squadrons" is democratic work, meet for the great democratic movement for the enfranchisement of women it is helping along. You do not exactly leave civilization behind you as you get into it, for you come in touch with some of the best and shrewdest minds of the country—with the people who are thinking things out for themselves; but if you are a child of luxury and insist upon finding your private bath awaiting you at the end of each day's journey, apply to this case the famous advice to the young men about to be married, and don't go.

One suffrage worker, good and true, who had never before worked outside of New York city, was dismayed when first sent on her country job.

"I must have my bath every morning," she announced, "and I don't want to get out of reach of my daily telegram from my husband."

The only comfort she received was the gibes of her fellow squadders, who assured her she would be lucky if she did not have to roost in the trees overnight or stretch out on the floor of the station shed. Her very back looked the dejection she felt as she shouldered her roll of suffrage posters and marched to the fray. But she proved to be a soldier, for she made light of the hardships and at the end of the two weeks reported the organization of three live clubs and fourteen villages and hamlets visited.

SUFFRAGE IN COLORADO.

Female Voters Blamed For the Shortcomings of the Men.

Judge Ben B. Lindsey of the Juvenile Court of Denver, writing in Harper's Weekly, says:

"It is true that there has been dissatisfaction, and I am ashamed to confess that I myself felt it here in Colorado. There was a general expectation that equal suffrage would usher in the millennial dawn. Out of recognition of his own failures, the average man felt that the women would achieve instant success, and when they failed to bring about every desired reform in the twinkling of an eye he groaned dismally.

"Every criticism of equal suffrage has its base in this feeling. It is not that the voting woman hasn't worked wonders, but that she has not worked EVERY wonder. In many ways and many things she has many of the stupidities of the man, and for this we have criticised her. It is absurd when one thinks about it seriously, yet it is true. In all the laws that I have proposed, the reforms I have suggested, I have looked to the women of Colorado, and when defeat has been the portion of these measures it never occurred to me to blame the men, for we have fallen into the habit of expecting little of them, I suppose.

"Take the case of the Colorado coal strike. According to the opponents of equal suffrage, the women of the state are not only to blame for its commencement, but for its continuance. As a matter of fact, it was a man's war, and upon men only rests the responsibility for the rejection of conferences and the subsequent wretchedness. Yet it was women, and women alone, who gathered in mass meetings after Ludlow, and forced the governor to ask for federal troops in order that bloodshed might end.

"Like every state in the Union, practically, Colorado is without political machinery for the adjustment of industrial disputes caused by private control of natural resources and absentee landlordism. The voting men of Michigan and West Virginia and New Jersey and Massachusetts are not blamed for industrial war, but by some peculiar process of reasoning the voting women of Colorado are expected to end every strike.

"Women live in the same world with men and are exposed to the same influences of environment. It is idle to assume that they will spring into the political arena with all the civic virtues and excellences. There is this to say, however. They ARE more independent, they DO look upon municipal government as municipal housekeeping, and they WILL strike much of the cruelty out of laws and put a finer justice in."

A PURE FAKE.

Thomas Mott Osborne Repudiates Anti-suffrage Interview.

An array of newspapers has come out within a few days of each other stating that Mr. Thomas Mott Osborne, warden of Sing Sing, had declared against woman suffrage on the ground that it "would increase crime." Now, it seems that this story falls within the class of information which Artemus Ward said he hated to have. "I don't mind not knowing things," said he, "but I hate knowing so many things that ain't so." The trouble with the Osborne story is that it "ain't so."

A letter has been written by Mr. Osborne himself to deny the entire interview. He characterizes the incident as "faked up journalism."

"I wish to state that I never said anything of the kind; that the whole interview is imaginative, and I am credited with all sorts of expressions and ideas which are absolutely contrary to my views. I am not a suffragist, but as for suffrage increasing crime I think it is nonsense, and it is a pity that a paper which can report so well and accurately a meeting, such as the one in Mechanics' hall, will lend itself to such faked up journalism as this alleged interview."

Alcohol, the dynamite of modern civilization.—The Hon. John D. Long.

* * *

What we must do to be saved? Alcohol must cease to be used as a beverage. Its sale and distribution to humanity must be prohibited. Feed beer to your dog and see what it will do. This is not a temperance lecture—it is science! It is truth.

* * *

Resolutions urging national prohibition of the liquor traffic were adopted by the northern Baptist Convention, in session at Los Angeles. Dr. Cortland Myers, the noted divine of Boston, expressed the belief that the liquor traffic would be driven out of the country within the next four years.

* * *

In response to repeated requests we reprint the following verses, to be sung to the tune of "It's a long way to Tipperary.":

It's a long way to prohibition,
It's a long way to go;
It's a long way to prohibition
To the fairest land we know.
High license we'll not spare;
It's a long, long way to prohibition,
But we are almost there.

* * *

Mifflin county, Pennsylvania, has demonstrated to its own satisfaction that liquor license revenue is not at all necessary to run its affairs. For five years it has been without saloons, and conditions have improved each year since the bars were closed. Bank deposits in the three banks have increased from \$885,000 to \$1,122,000 during the dry regime. The county commissioners have just paid \$15,000 of the county's bonded indebtedness of \$53,000 standing against the county since 1889, and promise a further reduction of the debt six months hence from the \$16,000 retained in the county treasury.

* * *

The Brotherhood of Locomotive Engineers in national convention at Cleveland, Ohio, last week endorsed state and national prohibition, by the unanimous vote of its over 800 delegates, representing over 70,000 locomotive engineers in all parts of the United States and Canada.

* * *

At the sixty-second annual conclave of the grand commandery of the Knights Templar of Pennsylvania, a resolution was passed by a large majority which makes it impossibel in the future for any one, directly or indirectly connected with the liquor business, to join any commandery in the state.

FOR SALE

A good business known as Henry's Baggage and Express also transient shed business equipped for all kinds of heavy work. Piano moving, light work and a good freight business; office and furnishings with sheds.

Purchaser can go on with business as soon as possession is taken.

PEOPLE CONCERNED OVER I. C. SCHOOL FINANCES

Keen interest is taken in this city and throughout the Middle States in a reported crisis in the financial affairs of the International Correspondence School of Scranton and affiliated concerns. At a meeting of stockholders this week the International Text Book Company was reorganized. Six Scranton bankers will dominate its affairs henceforth.

Many thousands of shares of the Scranton School's stock have been distributed throughout the country. It is stated that some of the stock is held in this city. Not long ago the shares sold well above par, but the price has been dropping steadily of late.

The correspondonce school at Scranton, and corporations affilited with it, was the largest organization of its kind in the world. T. J. Foster, is president of the schools and their founder. It is alleged the present trouble in which the corporation now is is due to "high finance" operations, and, according to the printed reports a financial maze has resulted. Just how much of the stock of the International Text Book Company is held in this city can not be ascertained. In Syracuse it is said $250,000 worth of the stock is held in small lots.

REV. C. J. TAFT GOES TO BOSTON

After Working Four and One-Half Years in Corning Former Local Minister Accepts Big City Position.

The Rev. Clinton J. Taft, former pastor of the First Congregational church, of this city, and a brother of Ernest Taft, of Hulett-Taft Co., will about September 1, as announced in last night's Times, remove to Dorchester, Mass., a suburb of Boston. There he will become pastor of the Central Congregational church.

In the following letter, taken from The Leader of Corning, Mr. Taft explains his resignation and acceptance: Greeting:

Four and one-half years ago I accepted the call to become your pastor under the conviction that God had assuredly led me to labor in your midst. I came to you "in the fullness of the blessing of the gospel of Christ," determined, like the great apostle, "to know nothing among you save Jesus Christ and Him crucified." And during the time of my sojourn here, I have tried to adhere tenaciously to that ideal, working with all my physical, mental, moral and spiritual might to edify the Body of Christ, to call sinners to repentance, to improve community conditions, and to extend the Kingdom of God into all parts of the world. My wife has been engaged heart and soul with me in all this service, as you will readily bear winess. And many noble people have loyally co-operated with us. The success which has attended our combined efforts you all know about quite fully. Many worthy things have been accomplished, not the least of which was the freeing of the church from an indebtedness of more than $8000 which hung like a millstone about its neck when we came here. In all the other projects undertaken, something worth while has been accomplished, for "our labor is not in vain in the Lord." To God, therefore, be the praise for whatever of good these years of work together have brought forth.

And now, brethren, I come to remind you that "all things human change," as Tennyson has remarked. "There is no abiding." Everything mundane is in more or less of flux. "Such are the vicissitudes of the world, through all its parts," declares Johnson, "that day and night, labor and rest, hurry and retirement, endear each other; such are the changes that keep the mind in action; we desire, we pursue, we obtain, we are satisfied, we desire something else and begin a new pursuit."

The time has come, my friends, when it seems wise for me to "begin a new pursuit." Not in the sense of a new calling. "Woe is unto me, if I preach not the gospel." But a "new pursuit" in the way of a new field of labor. A very cordial call has come to me from a Boston church—the Central Congregational church of Dorchester, located in one of the most delightful and strategic parts of the historic, New England metropolis. I spent a Sunday and part of a week looking over the ground there recently, and after much deliberation and prayer over the matter I am persuaded that it is my duty to accept the call which has been extended to me. The Lord seems to be saying: "Behold, I have set before thee an open door." And while not unmindful of the opportunities for doing good that still exist in this parish, I am strongly impressed that my work for the next few years should be in the Massachusetts city to which I have referred. In other words, I am as clear in my conviction that this is the call of God to leave Corning as I was in the Fall of 1910 that the Lord wanted me to come here. Therefore, brethren, I herewith tender you my resignation to take effect September 1, 1915, and I suggest that if it is agreeable to you action upon the same be taken at the close of the mid-week prayer service Wednesday evening next. And now "commending you to God, and to the word of His grace, which is able to build you up, and to give you an inheritance among all them which are sanctified," I remain,

Yours in the fellowship of the saints,

CLINTON J. TAFT.

Mr. Taft became pastor of the First Congregational church of Corning January 1, 1911, coming to Corning from Binghamton where he was pastor of the East Side Congregational church of that city for five years. He succeeded here the Rev. Nathan E. Fuller who was leaving Corning for Syracuse after having been pastor here for many years. Mr. Taft has labored assiduously in his Corning field and with splendid results. An $8,000 debt which encumbered the church at his arrival has been paid off, that event being celebrated by a mortgage burning last July. The membership of the church has increased, and there has been increased activity in all the departments of the church work. The Sunday school has been built up until at the present time it is enjoying the most prosperous period in its history.

Mr. Taft's pastorate has also seen a bell swung in the tower of the church for the first time, this having been the gift of Mrs. Rachel Macanty who has also given liberally for other purposes of the church. Mr. Taft will leave the First Congregational church in a very flourishing condition.

Mr. Taft's activities have not been confined to the work of this own church. He was a leading spirit in organizing the Steuben County Christian Endeavor Union, and he has also been very active in promoting the welfare of the Steuben County Sunday school Association. He has taken an active interest in all that has gone on in the city, and sought to make the influence of himself and his church felt on whatever side of controversial questions he thought was right.

Mr. Taft and his estimable family will leave Corning with the best wishes of the members of his church and congregation, and the good will and respect of the people of the city.

The Central Congregational church of Dorchester, Mass., of which Mr. Taft will become the pastor September 1, is a vigorous organization with a fine record. It is located in the very center of Congregationalism. His acceptance of the pastorate will mean for Mr. Taft a substantial increase in salary over that received here, and it will also mean an increased opportunity for service.

WEATHER FORECAST

Local showers this afternoon; generally fair tonight and Sunday.

CITY'S SUNDAY SCHOOLS TO MEET AS USUAL

An erroneous impression has gone abroad in the city, in effect that no Sunday schools sessions are to be held tomorrow. It is announced by Sunday school officers that the usual exercises will be held at the usual hours in all of the churches.

Little Business to Be Done Here Next Monday

Most of the stores in the city will close promptly at 12 noon on July 5, and many will be all day.

The clothing stores are divided, some having announced noon closing, while others will not open at all Monday. The butcher shops and groceries will cose at noon, athough many of these stores anticipate a rush of business Monday owing to the fact that the family larder runs low over the week end.

Barber shops will close at noon. The department stores have also adopted the noon hour closing. Some of the dry goods stores will close all day. The jewelry stores will close all day.

The Evening Times, in accordance with the custom of most afternoon newspapers in the country, will not print an afternoon edition Monday.

BUSINESS RUSHING AT THE CHOCOLATE WORKS

Ever since the beginning of hostilities in Europe there has been continued and almost unprecendented activity at the Peter Kailer Kohler Chocolate Works here. A number of employes are employed on a night shift—all departments running full time during daylight hours.

PAINTER TO TWIRL IN RED MEN-CLIPPER GAME

The Red Men of this city will meet the Clippers of Oswego for the second time this season at the Fair grounds tomorrow afternoon. The Red Men expect to bring home the bacon, but the Clippers are a fast aggregation and the locals will have to travel at top speed to win. Johnny Painter will do the hurling for locals and Fayette will work behind the bat.

The attendance at the Sunday games has been growing steadily since the beginning of the season, and it is expected that the high water mark will be reached tomorrow, for the teams have a holiday crowd and many visitors in the city to draw from in addition to the regular fans.

LEAGUE TO STAMP OUT ENLISTING

Local Socialists Plan to Attend Mass Meeting in Syracuse Protesting Against Enlistments.

Socialists in this city are greatly interested in the campaign started by the Socialists of Syracuse against the war spirit. Members of this parrty in different parts of the state and country have denounced war since the beginning of the European struggle, and quantities of literature giving arguments against warfare have been sent throughout the state from headquarters in New York.

It is expected that several of the Fulton Socialists will go to Syracuse to attend a meeting to be held next week at which Rev. J. A. Burchit, pastor of the Centenary M. E. church, of Sracuse; Prof. A. C. Flick of Syracuse University, T. Aaron Levy and Gustave A. Strebel will be the principal speakers.

The Sracuse people are planning on arousing interest among the Socialists in different parts of Central New York.

In connection with their campaign the Syracuse Socialists are considering a request from the Anti-Enlistment League to form a branch embracing Central New York with headquarters in Syracuse. Persons joining the organization take the following pledge:

"I, being over 18 years of age, hereby pledge myself against enlistment as a volunteer for any military or naval service in international way and against giving my approval to such enlistment on the part of others.

The legue in justification of its existence, says:

"In view of the fact that the advocates of armament are gathering in league of defense those who hold themselves ready to serve their country by killing other men, it seems that the time has come for a roll call of those of us who are prepared to serve or indorse the murder called war.

"The establishment of a new peace society is not contemplated, but rather the banding together in a personal policy of those whose opposition to war has become unconditional. Women as well as men, are invited to enroll as refusing their approval to enlistment; but we ask the support of no persons who have not carefully weighed the arguments concerning war, both offensive and defensive."

NEILSON WRESTLES IN JERSEY TOWN MONDAY

Henry Neilson, of this city, will leave tonight for Asbury Park, N.J., for the holidays. Oluf Neilson, a brother of the local man, who is considered the coming light heavyweight champion in the wrestling arena, will meet Young Ajax, a metropolitan first rater in a bout for the title at the New Jersey resort Monday afternoon.

Henry Neilson hopes to arrange a trip for his brother through New York State, reaching Fulton about the time of the fair. It is very probable that Oluf Neilsen will be seen here at fair time, and he will take on all comers.

FEINGLOS GOES SOUTH

M. Feinglos of the Amudrsky Company, leaves tonight for a week's trip south. He will visit New York, Philadelphia, Baltimore and Washington. Mr. Feinglos, on his trip, will visit the large clothing centers of the metropolis for the purpose of completing the fall buying for the local company. He expects to return to this city next Friday.

FULTON EVIDENCE FOR FULTON PEOPLE

The Statements of Fulton Residents Are Surely More Reliable Than Those of Utter Strangers.

Home testimony is real proof.

Public statements of Fulton people carry real weight.

What a friend or neighbor says compels respect.

The word of one whose home is far away invites your doubts.

Here's a Fulton man's statement.

And it's for Fulton people's benefit.

Such evidence is convincing.

That's the kind of proof that backs Doan's Kidney Pills.

P. J. Butterman, cigar maker, 312 W. Broadway, Fulton, says: "Nearly every spring I have an attack of lame back and severe pains across my kidneys. At such times my kidneys don't act as they should. I use Doan's Kidney Pills and they never fail to give me prompt relief."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Butterman had. Foster-Milburn Co., Props., Buffalo, N. Y.

AUBURN'S INDEBTEDNESS REDUCED IN A YEAR

Auburn—The bonded indebtedness of the city has been reduced $112,693.50 since June 30, 1914, according to figures made public at the office of thhe mayor.

The total of the indebtedness is $1,239,890,84, as compared with $1,352,528.34 a year ago or a reduction of $66,209.18 since the beginning of the present administration. The debt at that time was $1,306,000.02.

In addition to reducing the debt the administration has caused $20,000 to be held in reserve to pay all claim. contracted during the past fiscal year which have not been presented to the office of the comptroller.

Thus the city today started the fiscal year with a clean sheet for the first time in several years. It is expected there will be a small balance from this reserve fund, after current bills are paid.

This is the first time since 1907 that there has been a decrease in the amount of the bonded indebtedness at the close of the fiscal year.

ALBANY LETTER DAY BY DAY

Cardoze Tells Times Readers the Doings of Officials and Lawmakers

By Frederic T. Cardoze

Albany, July 3.—Notwithstanding the fact that the delegates to the State Constitutional Convention are a power unto themselves and thus need not heed the suggestion of Secretary of State Francis M. Hugo that it were best to so proceed so that he would be provided with the proposed amendments to the Constitution, so that final adjournment could be taken by August fifteenth, in all liklihood it will be followed.

The general impression has prevailed that the delegates would be in continuous session until late in September and only recently did the fact become apparent that in order to have the people vote upon the propositions endorsed by the delegates it would be necessary to furnish the Secretary of State with copies of them in ample time for him to include them with the election notices which by law must be sent to the various boards of election through the State. These boards must prepare and print them and distribute them among the electors.

Article Fourteen, section two, of the Constitution plainly sets forth the fact that the delegates need not limit themelves to any specified time in performing their work. This section reads:

"The delegates shall convene at the Capitol on the first Tuesday of April next ensuing after their election and shall continue their session until the business of such convention shall have been completed."

The above clause plainly illustrates the right of the convention to continue with its deliberations far beyond August fifteenth if the delegates see fit. It will thus be seen that it is a matter of option whether the delegates comply with the request of the secretary of state.

Further along in section two it is provided that "any propose Constitution or Constitutional amendment which shall have been adopted shall be submitted to a vote of the electors of the State at the time and in the manner provided by such convention at an election which shall be held not less than six weeks after the adjournment of such convention."

Thhe Constitution as it stands does not specify what election the approved proposed amendments shall be submitted, not whhether the election shall be a special or a regular one.

During the session of the legislature of 1915 a law was passed and subsequently signed by Governor Whitman whichp rovides that the secretary of state shall include in his notice of the general election to be held in November, 1915, a copy of the text of every amendment to the Constitution proposed by the Constitutional convention held in the year 1915 and submitted by such to the people for approval at such election, etc."

Despite the above provisions, the delegates have the authority to ignore it and continue their sessions to such a time as it would be impossible to comply with them, in that the Constitution comes before all legislative acts and it is plainly written that they may remain in session until their business has been transacted. Delegates to a Constitutional election are elected for the duration of the session and not for a stated period of time, as is the case with a legislator.

That it may not be necessary for the delegates to the present constitutional convention to sit through the remainder of the year, considerable activity on the part of the convention as a whole is now noticeable after weeks of apparent inactivity.

Sunday school and Brotherhood at noon. The pastor will speak at the Brotherhood upon "The Failure of a Handsome Man."

Union services beginning at 6.30. Everybody welcome to the services in this church.

Congregational Church

Charles Olmstead, Pastor.

Sunday morning at 10:30 the pastor will speak on the theme, "From Dust to Deity, or Indications of Revival." New members will be received and the rite of baptism administered. Delegates to the convention and all visitors will be heartily welcomed. The Sunday school will meet at the noon hour. The church will unite in the convention services in the afternoon and evening.

First Baptist Church

Milton George Buck, Minister

The Church of Cordial Welcome bids you welcome to any and all of its services, especially if you are a stranger in town or without a church home.

The services for Lord's day are as follows:

Morning worship 10.30, subject of sermon, "Christian patriotism."

Bible school 12 m.

No evening service on account of union service at the First M. E. church.

The Stars and Stripes Council No. 57, I.O.U.A.M., will attend service in a body, July 4. Special reserved seats for the order in the body of the church.

Zion Episcopal Church

Rev. Minor J. Peters, Rector

Sunday, July 4th, fifth Sunday after Trinity. Services as follows:

Holy Communion......... 7.30 a.m.
Summer church school..... 9.45 a.m.
Holy Communion, Sermon 10.45 a.m.
Evensong and sermon...... 7.30 a.m.

Subject of sermon at 10.45 a.m., "Success and Failure," St. Luke 5:4.

Subject at Evensong, "Worship," Hebrews 10:25.

During the summer months the rector will conduct a summer church school, to which all are invited. A series of informal lectures will be given on Sunday mornings at 9:45 o'clock bearing on the general subject of the church and the Bible.

All the seatings are free and all will be cordially welcomed.

DOG LICENSES EXPERIENCE AN INCREASED DEMAND

While very few stray canines have been corraled by City Dog Catcher Snow, his advent into the arena has been the occasion for a scramble on the part of dog owners in the city to get licenses for their pets. Mr. Snow took the new post July 1 and since that time there have been 31 licenses taken out. Snow received 25 per cent. of all the license money collected. The license fee is one dollar, and after giving every one a chance to get the license, Snow will begin an active campaign against the stray dogs and all dogs found without licenses will be taken to the city pound, and detained there until the owner arrives and pays the fee.

Dr. Sears Finds Canal Bed to Be Very Bad

Dr. F. W. Sears, state sanitary supervisor, came to this city yesterday afternoon for the purpose of investigating complaints which have been received by the State Department of Health from the Chamber of Commerce, Mayor Fox, and citizens of that section of the city near the old canal bed between Lock 10 and the 6th st. bridge.

Dr. Sears found the district very unsightly and malodorous at times. He stated that an appropriation had been voted for the purpose of filling the canal bed at the point in question and was of the opinion that the work would be pushed as soon as he had submitted a detailed report of conditions.

The Chamber of Commerce has already tendered a report of conditions to the State Department, and has asked that the tow path on the west bank of the canal, which rises high above the street level, be used to fill the canal bed at the point objected to. The chamber also has an offer of as much dirt as can be used on the fill.

Dr. Sears will submit his report at Albany next Tuesday and the Chamber of Commerce looks for some immediate action on the part of the state.

Wants to Have Sanitary Traps "Made in Fulton"

Mrs. John Fisher of Rochester is in the city today at the Chamber of Commerce headquarters interviewing manufacturers and mechanical experts on the question of the manufactuer of a novel mouse and rat trap invented by Mr. Fisher. Mrs. Fisher withes to organize a stock company, capitalized at $20,000 and today she explained the merits of the patent to many local business men, who are members of the Division of New Industries.

The trap is called the "Sanitary Selfsetting Live Trail Rat and Mouse Trap," and is entirely original in every way. The models on view at the Chamber of Commerce office are about a foot high. The rodents enter upon a door which tips. The trap is built for long service and with the proper machinery for manufacture could be sold at low cost.

Mrs. Fisher explains the model very clearly and concisely. She expects to remain in the city a few days.

HOLIDAY POST OFFICE HOURS

Postmaster P. T. Conley announces the post office hours for Monday, July 5, to be as follows: The stamp window will be open from 7 to 19 a.m., but the money order window will not be open. The lobby will be open all day until 8 p.m. One city delivery will be made, the carriers working the entire morning. No carriers will sally forth on the R. F. D. routes.

EASTERN STAR PICNIC

That the Eastern Star Lodges comprising this district, which embraces Fulton, Oswego, Phoenix, Baldwinsville, Constantia, Central Square and Hannibal, will have a jolly time of it on July 14, is a foregone conclusion. The date has been set for a grand [illegible] picnic, and Mrs. Fred Blodgett, Mrs. William Dutcher and Mrs. Wm. Pollard are busy preparing for the event.

ATTACKS WIFE WITH CLUB; TRIES SUICIDE

Zacariah T. Wolfe of Oswego made a murderous attack upon his wife early last evening and then attempted suicide. Both are in a serious condition at the Oswego hospital. It is alleged that Wolfe attacked his wife with a baseball bat, inflicting serious wounds, but no broken bones, on head and body. He soon afterward slashed himself with a penknife.

Mrs. Wolfe has two severe wounds at the back of her skull besides bruises on her back. Her skull, however, was not fractured. Later in the evening Wolfe was removed to the county jail.

It is claimed that on several occasions Wolfe has caused this family trouble. He was discharged from the county jail a week ago after serving a sentence of twenty-five days. On this occasion he was arrested on complaint of his wife and sent to jail by Judge Gill.

NOTICE

MONDAY, INDEPENDENCE DAY, we will send up a number of balloons. On each balloon there will be a tag which will entitle the finder to his or her choice of an ELECTRIC IRON or TOASTER or an ELECTRIC GRILL if presented at our office not later than 6 P. M. Tuesday, July 6th. Balloons will be sent up between 8 and 9 P. M. in the vicinity of the Broadway bridge.

THE QUIRK

Thousands of theatregoers have heard of Lillian Russell, but have been given an opportunity to see her. The opportunity presents itself today at The Quirk where she positively appears with Lionel Barrymore and a notable cast in a Shubert feature production of George Broadhurst and George V. Hobart's famous play "Wildfire." Tomorrow "The Mystery of Edwin Drood," a Shubert pictorization of Charles Dickens' last novel featuring Tom Terris; Charles Chaplin in "The New Janitor," and 4 others will form the program.

Mrs. Bowser Goes A-visiting

And Mr. Bowser Refurnishes the House.

By M. QUAD.

Copyright, 1915, by the McClure Newspaper Syndicate.

When Mr. Bowser came home the other evening he found Mrs. Bowser with tears in her eyes and a sad look on her face.

"Has the cook left her job?" he asked.

"No; she is all right," was the answer.

"Has the cat lost herself again?"

"There she is on the lounge," she answered.

"Then what is it?"

"It's bad news from mother. She is very ill."

"Well, I'm not glad to hear it, though we don't like each other. Did the news come by letter?"

"Yes; she got some one to write me."

"And of course she wants you to come up there?"

"Yes. Can I go?"

"Of course you can. You can start in the morning and stay until the old lady is on her feet again and ready to come back with you and give me the usual hot time."

"You are a good husband, Mr. Bowser," said Mrs. Bowser as her tears flowed afresh.

"Pooh!" he replied. "It won't put me out in the least. The cook and I can run the old shanty for a couple of

A HALF DAY OFF FROM THE OFFICE.

weeks as well as not. You pack your trunk tonight, and I will get you off early in the morning. After I have eaten dinner I will go out and telegraph that you will be there tomorrow."

When the cook was consulted about the arrangement she had some objections.

"But you know, ma'am, Mr. Bowser is always experimenting. He will be worse than ever when you are gone. I shall walk around in fear of being blown up or blown down or blown somewhere or other."

"Nothing of the kind will happen," replied Mrs. Bowser.

"But won't he bring home a fire escape and want me to give it a trial?"

"I will make him promise that he won't."

"Will he ask me to use a patent fuel in the range?"

"No."

"And there won't be any burglar alarms to go off with a buzz at midnight and scare me into jumping out of my window?"

"Mr. Bowser will be very good, and you can depend on it."

"Then I'll stay, ma'am, and I'll do my best to see that the cat don't get lost or that tramps don't steal the ash cans."

Next morning Mrs. Bowser was off, and Mr. Bowser's last words to her were:

"Feed your mother plenty of chicken soup, and don't worry a minute about me."

It was two days later that Mr. Bowser got a plan in his head and might have been heard saying to himself:

"By George, I'll do it! Mrs. Bowser was speaking the other day about some new things for the house and lamenting that we could not afford them for another year. We can afford them now, but I wanted to curb any extravagant notion on her part. She shall come home to find almost a new house. She is a mighty good woman, although she does sit down on me pretty hard at times, and she shall be rewarded. It will be fun for me to be buying this and that and will keep me from being lonesome."

Mr. Bowser must take the cook into his confidence, for he needed her help. When he told her what he proposed to do and asked her opinion she replied:

"Mr. Bowser, if I was a married woman, which I ain't and may never be, and had the home which I may never have, and should go and see my sick mother, which died five years ago, and her soul is now in heaven, and while I was gone my husband should take it upon himself to refurnish the house"—

"What?" asked Mr. Bowser, as he halted there.

"I think I would call him an idiot, when I got home."

"But why, Maggie?"

"Because no man has the taste and wit to refurnish a house. You know what harmony is, Mr. Bowser?"

"Humph!" he grunted.

"It will be the harmony of the thing, Mr. Bowser—the harmony—and if you will excuse me for saying so, I don't think you've got it. But I will help you all I can."

"Well," said Mr. Bowser as he turned away, "maybe I haven't got the harmony of a he angel, but I guess this house won't scare a tramp out of it when I get through with my work. It's good of you to offer to help me, and I will pay you extra wages for extra work."

Mr. Bowser took half a day off from his office work to go through the house and see what was needed, or he thought was needed. The parlor carpet had been down for three years, but had been taken care of so well that it looked almost new. Still, there were roses in the pattern, and he had heard Mrs. Bowser say that people of refined taste avoided rose carpets. He would get sunflowers if he could; if not he would get violets.

The sitting room carpet had several holes burned in it, and there was a threadbare place or two. The holes had been burned as he carelessly threw away his cigar stub and the spots had been worn by his feet, as he sat rocking to and fro. He had laid the damage to the cat when Mrs. Bowser complained, but he knew it was his own work. He would buy another. He wasn't sure yet what pattern he would get, but it would be something lively. He wasn't always lively when seated in that room of an evening, but a lively carpet might help his spirits.

There were the upholstered chairs. The cat had slept on every one of them and wear and dust had given them a somewhat dingy look. They must be reupholstered and the colors must be bright and lively.

The most of the pictures on the walls had been in the Bowser family for a good many years. There was one of a widow weeping over her husband's tombstone; another of an angel hovering over a dying infant; another of Niagara Falls in winter, and yet another of a river flowing past an old barn on its way to the sea. What was in that old barn no one could ever make out and why the river flowed to the north instead of the south was another vexed question. There were three pictures among the lot that could be saved. The rest must go. There should be nothing on the walls to bring grief to the heart or tears to the eyes. Mr. Bowser had always been fond of British hunting scenes and he would hang up half a dozen if he could find them. The piano was a square, with four legs. He could not see his way to improve it any unless he removed two of the legs, and he decided to meddle with them.

Ten years before he had disposed of the wooden bedsteads in the bedrooms and had bought those of brass and iron. He would now make a new purchase of ash and walnut ones. They would be no better, but they would help make a change. When Mr. Bowser had made a note of what was needed he began the active work of refurnishing. He sent away the chairs to the upholsterer's and the bedsteads to a second hand store. He was lucky enough to find a purchaser for the carpets on the floor, and thus the house was cleared for what was to come.

Mrs. Bowser wrote that her mother was much better and that she could be home the next week, and Mr. Bowser wrote her in reply:

"Do not think of coming home for the next three or four weeks. Your dear mother is liable to have a relapse, and if she does it will be the grave for her. Things are running happily and smoothly. Your affectionate husband," etc.

The cook was not taken along when Mr. Bowser selected the covering for the chairs and the new carpets. She kindly offered to go, but was purposely left behind. If the above said selections were not howling successes it was not the fault of a devoted husband. The salesman in the carpet store started in to tell Mr. Bowser what the latest thing in carpets was, but was met with the reply:

"Sir, I was selling carpets before you were out of your cradle, and I think I know what I want."

This settled the salesman and also sold some fifty yards of carpeting which had been in the store for the past twenty years.

All things have an end, and Mr. Bowser's refurnishing had one two weeks later. He hustled. He made others hustle. He used the telephone and his legs unsparingly. He coaxed and he threatened, and at length all the changes were made and the house awaited Mrs. Bowser's homecoming.

She came. The cook had been through the house several times and shook her head at every change and said to herself:

"Harmony! Wait till Mrs. Bowser gets home and see if there'll be harmony. Red, green, blue, brown, all mixed together. It's no wonder the cat shows signs of going insane."

Riding home from the depot, Mr. Bowser was very enthusiastic, but he did not even hint at what had been done at the house. He let Mrs. Bowser find out for herself. She found out. Before she had taken off her hat she had gone through every room and noted every change, and just as the smiling Mr. Bowser looked for her to break forth in words of praise and gratitude she fell full length on the floor in a dead faint and did not recover from it till three or four of the neighboring women had rushed in and worked over her a quarter of an hour.

The harmony was too much.

She was a brave, strong woman, but she could not stand it.

As for Mr. Bowser—but he had done his best.

THE MESSAGE TO A BURGLAR

Strange Adventure of a Young Woman In a City.

Winifred Bolles, an unsophisticated country girl, went to town in search of employment. Walking from store to store she at last found herself unwittingly in the private office of a benevolent looking old gentleman, Mr. Herman Knowles, who, though she did not know it, was the head of the firm.

"What is it, little girl?" he asked kindly.

Winifred asked for work and was sent to the proper person with Mr. Knowles' order that she be employed. She was directed to begin her labor the next morning.

As she was leaving the store a man stepped up to her and said:

"Would you mind taking this to the telegraph office over there, my dear? Here's a quarter to pay for it."

"Certainly," said Winifred, and, without even asking why the man didn't take it himself, she started for the telegraph office. The message was inclosed in an envelope, and when she reached the window where messages were received and handed it in the clerk took it out of the envelope and with it a peculiar looking instrument made of steel wire.

"H'm!" he said, looking at the girl suspiciously. Then he read the message.

Ben—Don't come tonight. We are watched. ROSE.

Again the clerk looked at the girl, scanned her features closely and said:

"Sit down while I count the words."

Winifred obeyed, but had not been seated five minutes when a policeman entered and went to the window, where the clerk handed him the message and the wire instrument. Then the policeman turned to Winifred and told her to come with him. She was taken to a police station and led up before an inspector, the policeman at the same time producing the articles he had received from the clerk, saying:

"The girl tried to send the telegram, evidently warning a burglar. She'd unintentionally left the skeleton key in the envelope and handed both to the clerk at the telegraph office."

"Did you order the message sent and its receiver arrested?"

"Yes."

"All right. Take her away."

Poor little Winifred was led away to a cell without the slightest knowledge of where she was going. When she found herself behind bars she was in an agony of distress. After crying awhile she bethought herself what to do. She knew no one in the city, but the face of the kind looking gentleman who had employed her kept coming up to her, and she determined if possible to send word to him of her misfortune. Her message was delivered, and the firm's lawyer was instructed to attend to her case. He called to see Winifred, listened suspiciously to her story, then heard the statement of the inspector, forming the opinion that Winifred was in service and had a lover whom she had been intending to introduce into her employer's premises for the purpose of robbery. This opinion he reported to Mr. Knowles, with the remark. "All depends upon whether the telegram reaches its destination. Thus far the messenger has not been able to find the person to whom it was addressed."

"Nor will he," said Mr. Knowles. "The man who gave her the message watched her and saw her arrest. He doubtless found a way to a warning."

"How do you account for her having a skeleton key?"

"I have no theory as to that. I judge of the girl only from what I saw of her for a few minutes, and I am never deceived as to an honest face. What is your explanation?"

"That the girl put the key which her lover had given her into the envelope and forgot it."

"I do not believe it."

"And you do not consider her application to you for work a mere blind?"

"Certainly not. Please assume that she is innocent and do the best you can for her."

The plan adopted by the police was to have Winifred held for trial and the trial put off in hopes of developments or an implication by the girl of her confederate. When Winifred was brought up for examination there was really nothing to be said in her favor. One thing and one alone gave her hope. Among the visitors in the courtroom she saw the kindly face of Mr. Knowles.

The judge heard the statement of the prosecution and would have listened to the evidence of the defense if there had been any. Since there was not, Winifred's attorney contented himself with forming improbable theories as to how Winifred came into possession of the incriminating articles. The judge remanded the prisoner for trial, fixing her bail at $1,000.

"I will furnish that bail," said Mr. Knowles, rising, and, the paper being signed, Winifred was discharged. Her benefactor told her to go to work at his store the next morning.

Before the trial came off, by Mr. Knowles' orders, Winifred's history from the time of her birth was collected, testimonials as to her character were obtained from her home in the country and were produced by able counsel. Winifred was acquitted and became one of the most important of the employees of Knowles & Co. But neither the man who gave her the telegram nor the one to whom it was addressed was ever found.

Care of the Baby In Summer

Artificial Feeding.

[Prepared by the children's bureau, United States department of labor.]

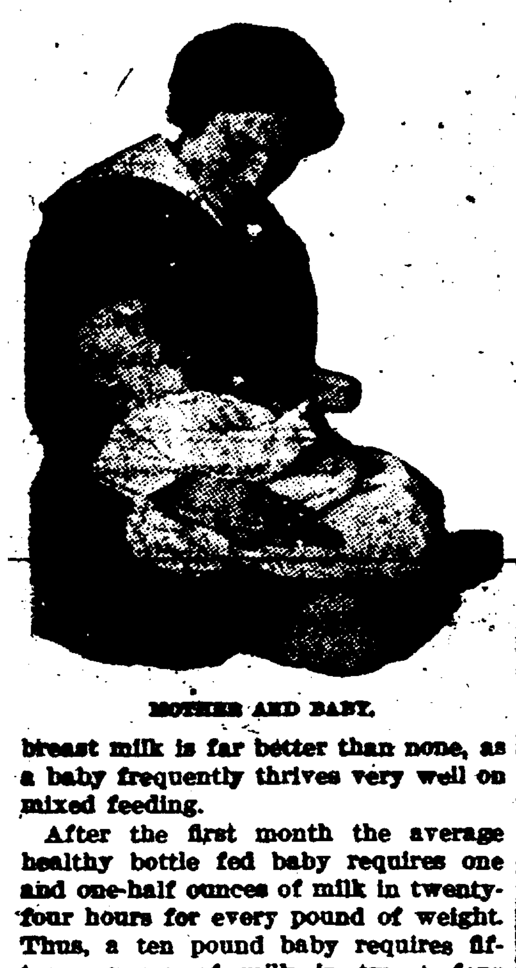
When a baby is deprived of breast milk altogether and fed entirely from a bottle this method is called artificial feeding.

If he is partly nursed and partly fed from the bottle this method is known as mixed feeding. In both of these methods the preparation of the bottles and the amount and kind of food to use are questions of vast importance to the baby. Many thousands of bottle fed babies die every year because they do not have breast milk or because of some mistake in feeding or because they cannot adapt themselves to a strange food.

Artificial feeding is not only hard on the baby, but imposes no slight task upon the mother. To bring up a baby on the bottle without mishap requires unremitting daily attention to a multitude of petty details which can only be neglected at the risk of making the baby sick.

The milk must have special care from the moment it is delivered at the house until it is fed to the baby.

The utensils used in the preparation of the feedings and the bottles and nipples must be kept scrupulously clean. The strength and quantity of the food must be increased or decreased in accordance with the baby's varying needs as indicated by his age, his weight, the condition of his bowels and other things. All this necessarily makes such demands on the time and strength of a mother that she will not undertake this burden if breast milk can possibly be had. Even a little



MOTHER AND BABY.

breast milk is far better than none, as a baby frequently thrives very well on mixed feeding.

After the first month the average healthy bottle fed baby requires one and one-half ounces of milk in twenty-four hours for every pound of weight. Thus, a ten pound baby requires fifteen ounces of milk in twenty-four hours, increased by the proper amount of water and sugar to suit his age.

It is impossible to give complete directions for milk mixtures in a brief article. As far as possible the feeding of a bottle baby should be under the direction of a good doctor. City mothers may take their babies to the nearest infant welfare station for the advice and help they need.

Country mothers who are far from the doctor will need to have some book giving directions for the feeding of the baby. There are several good books of this kind which may be bought. The children's bureau of the department of labor at Washington will send free to all who ask for it a little pamphlet called "Infant Care," which gives some simple rules for feeding.

VALUABLE HINTS.

Tuck For Shrinkage.—When making up wash material to allow for shrinkage before turning the hem the first time take a tuck on the inside before turning and stitch down at the second time. This can be easily let out and the result is most satisfactory. This is especially good for growing girls' dresses.

To Make Gas Mantles Last.—When lighting the gas do not turn the key on full, but only three-fourths of the way, and see that sufficient air enters through the air passage. This will eliminate the hissing and give proportional flow of air and gas. When the mantle gets black throw a little ordinary salt in the same from the top, which will consume the carbon and make your mantle clear and white. It also adds a thin coating to the mantle which makes it last much longer.

A Cure For Runners.—I had such a time with runners in my silk stockings, and after trying many plans to prevent them I finally hit upon a satisfactory one as a final experiment. Buying two inch satin ribbon I put it around the top, catching it in the garters to hold it. Since I have not a single runner, and so I feel that for me the luxury of silk stockings is no longer one I must be denied.

INDEPENDENCE DAY HINT.

The Housewife by Careful Planning May Find Her Day Free From Care.

It is often true that holidays for the family in general are not at all holidays for the housekeeper—so much food to cook, so many dishes to wash, extra work at all times. But every housekeeper can make the glorious Fourth a true Independence day, free from work and worry, even if she has a number of guests.

Make the cleaning as easy as possible and do it several days in advance, so that the rooms need only the very slightest brushup the day before the holiday. Plan your menu for the six or more meals of the week end and market for them in the middle of the week before the stores are crowded, when you will get better service and materials. As it is likely to be "typical scorching" weather, your menu might be almost cold.

A meat loaf, a fresh ham, a veal or chicken aspic can be made two days in advance and should serve two meals or more. A quart of boiled mayonnaise and cake made either in a loaf or in small shapes will also serve for double meals, different vegetables being used on different days and the same cake being iced differently. All of the desserts of the Bavarian cream type can be made in advance and left on ice until needed. A quantity of lemonade sirup and cocoa sirup can be prepared so that an instant beverage will be at hand.

FASHION FANCIES.

How to Select Cottons For Your Summer Frocks.

The woman who must select her dresses with an eye to the future would do well to plan a few frocks of the new crisp cottons. There is a positive trend toward self supporting weaves, probably the natural result of the prevailing modes—fluffy ruffles and rippling skirts. And while the clinging crepes, soft voiles and other supple fabrics will continue to be very fashionable during the summer, the indications are that their supremacy will wane with the season and in another year will be entirely superseded by the crisp weaves having sufficient dressing to give light and airy effects. In this class the organdies hold a high place, and the shops are showing a large line of those pretty cottons in attractive floral patterns. In lawns, dimities and batistes there are also large assortments to select from.

In the softer materials crapes still have a strong hold on popular favor, and whether in embroidered figures or printed patterns they are fashionable. Voiles, especially in the printed forms, are still greatly favored. Linens will probably be scarce later on, but just now there are plenty to select from. In the novelty weaves there are the Cossack linen and the covert linen that make up into such smart suits, and where a fabric with body is desired there are the piques, cotton velours and Bedford cords to select from.

Floral designs are favored in printed fabrics this season, but stripes will also be modish and are well represented in the present displays. A decided pattern shows alternate stripes of black and white, each one and one-half inches wide. Black and white effects are very fashionable and many of the new cottons show black flowers scattered over a white surface.

Even though the printed patterns will be so popular, every woman wants one or two white dresses in her wardrobe and the probabilities are that when she gets into the shops she will select material for several dresses because the displays are almost too alluring to resist. The transparent organdies that became popular last summer are being shown in both plain and embroidered effects. Voiles are in high favor and are being shown in endless varieties. In fancy white cottons the favorite snow flake patterns, known as neige, are again very popular. And then there are the cords, checks and stripes. Those carried on in groups and irregular effects that make up into such charming frocks are prominent.

How to Make a Real Strawberry Shortcake of Biscuit Dough.

The strawberry in its shortcake form is deservedly popular, but not, pray, the cake dessert palmed off in place of the genuine biscuit basis on which all good shortcakes depend. Any dough mixture like that for baking powder biscuits, only made a little richer, is far more delicious combined with the berries than any piece of sponge or other cake. It takes only a half hour to complete a strawberry shortcake of two hot biscuit crusts, thickly buttered, spread with mashed berries and garnished with whole ones. Any woman with two hands should be ashamed to offer an imitation shortcake of stale sponge cake when a delicious biscuit dough is so easy to make.

How to Make Lunch Cloths of Embroidered Damask.

Some of the newest lunch cloths are being shown of embroidered damask. The material itself is unfigured, but the embroidery is usually elaborate. A very silky mercerized cotton is employed for working out the design, and this, with the soft sheen of the mask, makes a very rich cloth.

These cloths are more practical when made in the size of a large centerpiece, for then the individual plate and tumbler doilies of plain lace edged damask can be used to protect the polished table surface and are more easily laundered than the heavily embroidered cover.

Black and White Figure Largely In Toilet Accessories

SNAPPY NEW STYLES.

THE metropolitan shop windows show bewildering displays of charming accessories to the toilet, and black and white, like Abou ben Adhem's name, lead all the rest. A parasol, hatband, necktie and girdle in black and white silk are shown in this illustration.

QUAINT AND CHARMING.

Daphne Silk, Which Is Pink and Also Flowered, Makes Chic Frock.

AFTERNOON CREATION.

Frock of pink and white flowered daphne silk, the bodice simply cut and the skirt a series of slightly gathered flounces. The surplice vest and frilled sleeves are of white net. Worn with this frock is a bonnet of Leghorn, the top piled high with stiffly arranged flowers.

DAMES AND DAUGHTERS.

Mrs. Gabriel Siyufy of Chicago for thirteen years spoke to no man except her husband.

Mrs. Mary Bohnefeld has been a police matron in Atlanta for thirteen years, and in all that time she has lived at police headquarters.

Dr. Louie Garrett Anderson has been granted the rank of major in the British army. She was in charge of the first women's hospital to start for the front.

In more than five years Mrs. Barbara Guentert has missed only two nights in a St. Louis "movie" house. She always has sat in the same seat and has seen 9,000 motion pictures and nearly 10,000,000 feet of film.

Miss Lucy A. Goldsmith of New York city has been intrusted with the important commission of investigating and making economic study of the general conditions in the leading South American countries. Her trip, carrying her entirely through South America, necessitates crossing the Andes mountains.

At the Zoo.

"Why, there's nothing but bees here."

"What did you expect to find?"

"Well, when I asked to be directed to the apiary I certainly thought I was going to the place where they kept the apes."—Baltimore American.

MANY USES FOR POTATO.

To clean a vinegar cruet fill the cruet with finely chopped potato skin, cork tightly and let stand in a warm place three days, then turn the skins out and rinse the cruet with warm water and borax.

To clean rusty knives use a raw potato dipped in brick dust.

To kindle fires potato parings dried in the oven are good, as they light easily.

To clean carpets grate a raw potato and rub over the surface of the carpet and finish off with a clean cloth wrung out in warm water.

To clean dresses grate two raw potatoes into a pint of cold water, strain through a sieve, add another pint of water and let it settle. Dip a sponge into the water and rub the soiled garment carefully, afterward rinsing with clear water.

To clarify drippings slice a raw potato into the fat while rendering. It will absorb all impurities.

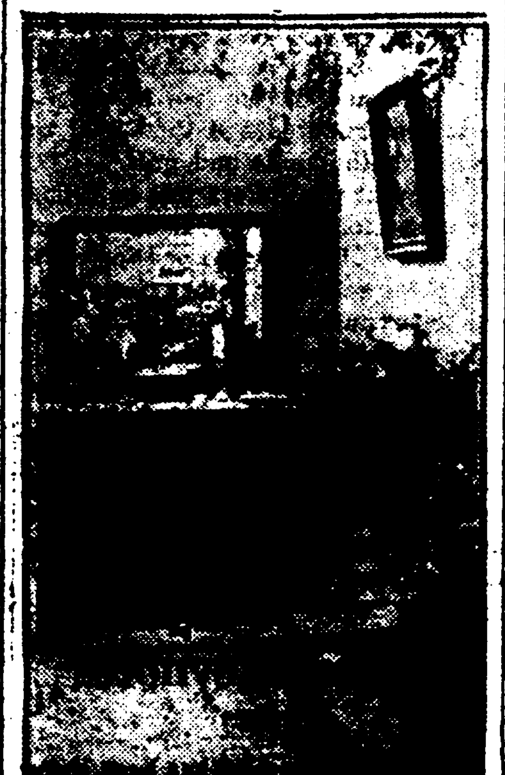
To clean silk from mud spots, after washing thoroughly rub soiled places with a raw potato.

When a fern turns yellow slice a raw potato and put it on top of the soil. This will draw out the worms.

PAINTED FURNITURE.

Black Picked Out In White Makes Charming Bedroom Furniture.

The fad for black and white has penetrated to the bedroom and many pieces of old, castoff furniture are be-



BLACK AND WHITE DRESSER.

ing rejuvenated by the handy little paint pot. The dresser shown in the illustration is one which had been discarded, but is now a pretty and useful piece of furniture.

The New Taffetas.

Some of the new taffetas are really lovely, supple, wonderfully light and lustrous, and exquisite of line. The radium, glazed and changeable, and the taffetas in chameleon effects are all pressed into service.

FOR FLETCHER'S
CASTORIA

WEDDING GIFTS.

How to Make the Hearts Glad of Newlyweds by Appropriate Presents.

Summer brides are almost as numerous as summer flowers. What to give the future newlyweds is the question agitating many a mind at present.

There are so many things suitable for wedding gifts that there should be no difficulty in choosing useful presents if the donors only spend a little thought and care in their selection. The first point to be considered in buying a wedding present is the future and present means and station of the bride. Does she come from a family that is amply able to furnish all her needs for the new home? Is she to marry a man of money who can provide his home with the finest things on the market or, on the contrary, does the girl come from a family of limited means to marry a man in practically the same circumstances?

You would buy entirely different articles for the latter than you would for the former. The girl who either has plenty of money or is marrying money is usually given personal gifts, such things as jewelry or wearables, or else extra luxuries for her home, such as single silver spoons or serving forks or set pieces or handsome bits of china. On the contrary, the girl of moderate means who expects to furnish her new home a little at a time is only too grateful to have her friends help furnish it with their presents.

If you are buying a wedding gift for a bride of limited means don't give her a pretty but foolish vase or a dainty but useless bit of pottery. Help her by giving something she can use and is only too glad to have. For instance, a pretty luncheon set need not be a very expensive gift. Then there are sets of long strips in flowered or figured linen to be used for little home dinners or for lunch. China sets are always useful and welcome, and if the buyer's purse is limited there are simple but dainty tea, coffee or breakfast sets to be had at fairly low prices.

For the donor who cannot pay more than $10 or perhaps less there are many things which will be acceptable. One bit of advice to buyers of wedding gifts is this—do not buy any pictures, for your taste in pictures may be quite different from the bride's.

Lamps are lovely presents and can be found for as low as $3. The donor of a lamp need not fear duplication, because the bride can use many lamps in her home, but the buyer must be sure to find out whether gas or electricity is to be used in the new house. Covers for tables can be had at $2 or $3 each and very dainty ones too. An acceptable gift for any pair of newlyweds is a set of Poe, Dickens or other classic master.

Any presents in silverware or pretty glassware are acceptable and useful. Then there are many things for bedroom usage. Bureau, window and bed sets in dainty mull of white and pink or blue are as welcome as can be. Toilet articles, manicure sets or mirror, brush and comb are always acceptable. All these things are well within the means of almost any buyer.

More expensive gifts are lovely rugs, beautiful cushions, linen bed sets, etc. Such gifts as these can be duplicated or tripled without fear.

How and Why to Use Crepe de Chine For Underclothing.

Crepe de chine as a material for underclothes is thoroughly established. The charming, almost untrimmed models in the heavy quality, which have been seen recently, are giving way to the lighter weights, lace trimmed or ribbon run, which are more appropriate to the warmer weather.

Untrimmed garments in this weight are also procurable for those who have adopted the simple line in lingerie, which the pussy willow taffeta, requiring no ornamentation beyond its beautiful self, first taught us to like. Advocates of crepe de chine for summer wear, and there are many, extol its noncrushable qualities.

It is well to remember, in buying silken undergarments, that a flesh color or pink is preferable to white, as washing only makes it prettier, while the white is almost sure to become yellow with continued trips to the laundry.

Lovely as the silken materials undoubtedly are, practical as they have shown themselves, there are women, after all, for whom linen remains the material par excellence for underclothes.

HOW TO MAKE A VERY HANDSOME CROCHETED EDGING CALLED "THE GRETNA."

Abbreviations.—Ch., chain; d. c., double crochet; tr., treble.

Use crochet cotton No. 36. This pattern is an inch wide.

First Row.—Make a chain the length required, turn, * 3 spaces of 2 ch. and 1 tr., missing 2 stitches below, 10 ch., 1 tr. in next stitch below, repeat from * turn.

Second Row.—Five ch., 1 tr. in second space, 3 ch., 1 tr. in same place, * 3 ch., 3 tr., 3 ch. and 3 tr. in 10 ch., 3 ch., 1 tr., 3 ch. and 1 tr. in second of 3 spaces below, repeat from *, turn.

Third Row.—Five ch., * 2 tr. in space of 3 ch. (between 3 tr.), 10 ch., 1 tr. in same space, turn, work 14 d. c. under 10 ch., 1 d. c. in the next 5 ch., turn, work 5 loops of 5 ch. and 1 d. c. in each third d. c., then 1 tr. in same space of ch. below (between two 3 tr. groups), 5 ch., 1 tr. in 3 ch. space below, 5 ch., repeat from *.

Work a footing, 3 ch., miss 3 stitches, and 1 tr. in next.

Woman's World

Queen of Montenegro Most Successful Mother-in-law In Europe.

QUEEN MILENA.

Queen Milena of Montenegro, though somewhat overshadowed by the aggressive personality of King Nicholas, enjoys a unique distinction, that of being mother-in-law to more royalty than any other woman in Europe.

"Sire, I have noticed that Montenegro has no exports," once remarked a distinguished foreign traveler to King Nicholas.

"Monsieur, you forget my daughters," wittily retorted the reigning monarch.

The retort was justified, for queer little Montenegro has supplied two monarchs and three other important royal personages with wives. One Montenegrin princess is the present queen of Italy, and another now would be queen of Servia but for her premature death, while three other daughters of Prince Nicholas are the Grand Duchess Militza of Russia, the Duchess Anastasia of Leuchtenberg and Princess Anna of Battenberg.

The number of brides that Montenegro has supplied to the courts of Europe is altogether disproportionate to the size and importance of the little country. Montenegro has an area of 3,500 square miles and a population of a quarter of a million. The capital, Cetinje, is a village with a population of 3,000. The princely palace in which so many distinguished royal brides were born and brought up is a modest structure, in which a moderately successful American tradesman would never condescend to dwell.

But in these modest surroundings the princesses of Montenegro grew up to be splendid specimens of womanhood. As children they enjoyed the greatest liberty and escaped the restraints of court etiquette, which are the curse of most royal boys and girls. In the severe winters which are experienced in the country of the black hills, as Montenegro is called in the Balkans, the princesses were encouraged to harden their constitutions by sleighing, running in snowshoes, skating and indulging in other cold weather sports and pastimes. At the warmer seasons of the year they made long excursions into the wooded and mountainous interior and paid frequent visits to the prince's villa on the shores of the Adriatic sea. By the time they were in their teens they could ride a bareback horse, drive a four-in-hand, hunt and shoot, swim and sail or row a boat to perfection.

While thus enjoying childhood to the full, the royal girls were educated by French and German tutors and governesses, who polished off the roughness which might otherwise have become apparent in their characters. Prince Nicholas allowed each of his daughters to run wild in Montenegro until sixteen years of age, after which the princesses were sent to Vienna and Paris to gain a knowledge of the western world, with its totally different manners and customs. After attaining her seventeenth birthday each princess spent six months of the year abroad and six months in Montenegro, and this plan proved to be an effective conclusion to an excellent scheme of education. The Montenegrin princesses developed from tomboy girls into women of unusual grace and beauty, of exceptional personal distinction and of remarkable talent in many directions.

A Suffrage Exhibit.

One of the exhibits which are attracting much attention in the suffrage booth at the Panama-Pacific fair is made of tiny imported dolls representing all the voting and nonvoting countries of the world. The nonvoting dolls stand behind a wall, "symbolic of the conservatism, inertia and self interest which keeps women from the ballot," the Empire State campaign commission announces. The costume of each country is carefully presented, except that midgets from the unenfranchised countries are dressed in mourning.

Another effective exhibit is a framed copy of the record of the Sixty-third congress, giving each representative's vote on the woman suffrage amendment.

When She Talked.

Patience—I understand his wife is a great conversationalist.

Patrice—Yes, she is. You just ought to hear her play bridge whist!—Yonkers Statesman.

WHAT THE CITY MANAGERS ARE EXPECTED TO DO

Courtesy American City Magazine

The following is a summary of the duties of city managers as given in the various charters or ordinances creating the office of City Manager in the municipalities, where such officers exist. Although such titles as general manager, business manager, etc., are assigned in some instances to the individuals officiating in these positions, the commonly known term of "City Manager" has been used. Also, in referring to the act creating the office, reference is made in every case to the Commission as the governing body, although a few of the city managerships are created by ordinance of the Board of Trustees of a village or of the City Council of a municipality which has not adopted the commission form of government.

The City Manager is the administrative head of the municipal government under the direction and supervision of the Commission. He may not hold any other office or employment, except that of notary public, nor be interested in the profits or emoluments of any contract, job, work, or service for the city.

Before entering upon the duties of his office, he is required to take the official oath and to execute a bond in favor of the city for the faithful performance of his duties in such sum as may be fixed by the Commission.

He is vested with power to appoint and remove officers and members of all boards and commissions, head of departments, and all subordinate officers and employes of the city, except as otherwise specified. All officers appointed by the City Manager serve until removed by him or until their successors have been appointed and have qualified.

Most of the charters give very wide powers to the City Manager, and in addition to enumerating specific duties, some of them provide that the City Manager shall exercise and perform all other executive and administrative functions and duties which he deems essential, unless other designation shall have been made in the charter or by act of the Commission. Specific duties assigned to the City Manager in various charters or ordinances include the following:

To prepare an annual budget and keep the Commission advised of the financial condition and future needs of the city.

To instal a complete andpra ctical system of municipal accounting, with the proper system of checks between the various departments.

To take active control of the fire, police and engineering departments of the city, and to engage such assistants therein as are provided for in the charter or ordinance.

To see that, within the city, the laws of the state and the ordinances, resolutions and by-laws of the Commission are enforced and faithfully executed; in so doing, to sign warrants and cause arrests when necessary.

To supervise, under the direction of the Commission, the administration of the affairs of the city.

To attend all meetings of the Commission, and to recommend to that body from time to time such measures as he deems necessary or expedient for it to adopt.

To draw up resolutions and ordinances for adoption by the Commission and furnish them with any necessary information respecting any of the departments under his control.

To prepare and submit to the Commission such reports as may be required by that body, and to draw up an annual report which shall consolidate the special reports of the several departments.

To revoke licenses, pending the action of the Commission.

To administer oaths and take affidavits.

To sign such contracts, deeds and other public documents on behalf of the city as the Commission may authorize and require.

To manage and control all charitable, correctional and reformatory institutions and agencies belonging to the city; to enforce all laws, ordinances and regulations relative to the preservation and promotion of the public health, the prevention and restriction of disease, the prevention, abatement and suppression of nuisances, and the sanitary inspection and supervision of the production, transportation, storage and sale of food and foodstuffs, and the supervision of weights and measures; to cause a complete and accurate system of vital statis tics to be kept, and in times of epidemic to enforce such quarantine and isolation regulations as may be apporpriate to the emergency.

To manage and supervise all public improvements, works and undertakings of the city except as otherwise provided in the charter or ordinance, such as the construction, improvement, repair and maintenance of streets, sidewalks, alleys, lanes, squares, bridges, viaducts, aqueducts, public highways, sewers, drains, ditches, culverts, streams and water courses, and of all public buildings, including the management and control of market houses, crematories, sewage disposal plants and farms.

To take charge of the making and preservation of all surveys, maps, plans, drawings and estimates for the public work above mentioned; to supervise the cleaning, sprinkling and lighting of streets and public places, the collection and disposal of waste, the preservation of tools and appliances belonging to the city and pertaining to the functions of the departments. He is to manage all municipal water, lighting, heating, power and transportation enterprises. He is to manage and control the use, construction, improvement, repair and maintenance of all recreational facilities of the city, including parks, playgrounds, public gymnasiums, public bath houses and social centers.

He may not appoint any relative of his to any office of trust.

He is required to devote his entire time to the duties of his office.

The City Manager has the exclusive right to suspend any of the officers or employes in the respective departments who may be under his management and control, for incompetence, gross neglect of duty, gross immorality, drunkenness, failure to obey orders given by the proper authority, or for any other just and reasonable cause. If any officer or employe is so suspended, the City Manager is required to certify the fact to the Commission in writing, giving the cause for the suspension, and the Commission then renders judgment thereon, which judgment, if the charge be sustained, may be suspension, reduction in rank, or dismissal—such judgment in the matter being final, except as otherwise provided. The City Manager, in any such investigation, has the same power to administer oaths and secure the attendance of witnesses and the production of books and papers as is conferred upon the Commission.

Any officer appointed or elected by the City Council to a position in any department, who has been suspended, fined or dismissed, may appeal to the City Council at any of its regular meetings, and it is required to review his case, affirm or modify, or reverse the order of the City Manager and make any restitution within the law which it may deem advisable.

The City Manager may, without notice, cause the affairs of any department, or the conduct of any officer or employe to be examined. Any person or persons appointed by the City Manager to examine the affairs of any department or the conduct of any officer or employe shall have the same power to compel the attendance of witnesses, and the production of books and papers and other evidence, and to punish for contempt, as is conferred upon the Commission or a committee thereof.

The City Manager is entitled to a seat in the Commission, and has the right to introduce ordinances and resolutions and to take part in the discussion of all matters coming before the Commission, but he has no vote.

He is the recording officer of the city, the custodian of the corporate seal and of all records, books, files and documents of the city, and is required to keep a record of the proceedings of the Commission.

He is required to see that the business affairs of the municipal corporation are transacted in a modern, scientific and businesslike manner, and that the services performed and the records kept are as nearly as possible like those of an efficient and successful p rivate corporation.

ITALIANS WILL MARCH TONIGHT

J. W. Stevenson to Take Active Part in Dedicating One Flag, While Frank Zaia Will Unfurl Old Glory.

Three Italian societies from Oswego and all the local Italian organizations are expected to be in line tonight when the Societa Mutuo Soccorso Vittorio Emmanuelo III. of this city will celebate its foundation and also dedicate an American and Italian flag with services at the Church of the Immaculate Conception.

The societies will meet at 7 o'clock and at 7.30 the procession will proceed to the church. An Italian band from Syracuse, said to be one of the best organizations of its kind in central New York, will head the procession.

At the church, John W. Stevenson will stand sponsor for the American flag, and Frank Zaia, of the society, will present the Italian banner. Both flags are very beautiful and costly emblems.

After the dedication ceremonies at the church, the procession will march to Church's hall, where a dance will be held. Music will be furnished by the band, and several native Italian dances as well as the American numbers will have places on the program. A buffet lunch will be served in connection with the dance.

COUNTRY CLUB'S GOLF TOURNAMENT

Monday is expected to be a lively day at the Oswego Country Club. Luncheon and dinner will be served to several hundred and there will be play at both tennis and golf.

The event for golfers will be a flag handicap tournament. Each player will add his handicap to par for eighteen holes and after he has played the resultant number of strokes will place an American flag wherre his ball comes to rest. The owners of the leading flags, at the end of the day, will be winners of trophies offered by N. L. Bates. Both men and women will be eligible for this tournament and it is expected there will be nearly fifty starters.

Fulton Keynotes

James Thomas, who has been living in Pittsburgh for the past two months returned to thsi city today to spend the holiday.

* * *

Mr. and Mrs. William Malone of Worth st, are the recipients of a ten-pound baby boy. The stork arrived yesterday.

* * *

Rev. and Mrs. H. D. Holmes will leave Monday to spend two weeks in camp in Cayuga county.

* * *

John Moore of New York is a guest of his parents in this city.

* * *

Mrs. W. B. Halstead of So. 4th st. left for Syracuse this afernoon where she will be the guest of relatives. Dr. Halstead will go Monday to Old Forge where the Halstead family will gather.

GEAR COMPANY WILL NEED 500 MORE MEN

Syracuse—"The practically certain prospects today are that the New Process Gear Corporation, now employing approximately 500 persons, will have 1,000 works on its pay roll by next spring."

This statement was made yesterday by T. Goldsborough Meachem, vice-president of the corporation, who had returned from New York city, where he closed a deal for the purchase of an acre and a quarter of land from the New York Contral Railroad Co. The lansd is bought for the purpose of plant expansion in addition to that already under way.

The acre and a quarter just acquired adjoins the present property of the company and is on Onondaga creek. One-half acre is in Plu mstreet and immediately west of the corporation's new four-story North West street building now nearing completion.

LOCAL MAN LEADS ANGLERS AT CLAYTON

Frank S. Bowman, 511 Broadway, Fulton, who is a guest at The Manatauk, at Clayton, has made a fishing record at the beginning of the river season that will be hard to beat. It is not a record for big fish caught or lost, neither is it a record for many fish caught during the day, but a recordr for good sized fish caught within a short space of time. His catch was twenty-four fish, and in the lot were nine black gass weighing from 1½ pounds to 3½ pounds and they were caught within fifteen minutes. Mr. Bowman fished upon the Manatauk fishing grounds, within ten minutes' row of the Manatauk dock.

COLUMBIA SHADE MILLS ASSESSED $800,000

The assessors of Oswego Town have completed their work and filed their rolls. The Columbia Mills, Inc., is assessed upon its plant and water power $800,000, an increase of $624,000 over last year.

The total assessed valuation of the town last year was about $1,311,000, which if followed this year will leave about $287,000 to be levied upon the remanied or the town.

The Minetto company will be called upon to pay under the above assessment a tax of about $24,000. It is said that the courts will be asked to review the assessment.

CARD OF THANKS

We wish to thank our dear friends for their kindness during the illness and death of our beloved mother; also the employes of the combing-room of the American Woolen Co. for their beautiful floral offerings. Fred Pooler, Ada Spencer, Eva Ware, Dora Barnes.

CAZENOVIA MAN COMING

During the absence of the Rev. H. D. Holmes the pulpit of the State Street M. E. church will be filled by at least two visiting ministers or laymen. Sunday, July 11, W. H. Giles of Cazenovia Seminary will preach.

G. J. Emeny May Have a Legacy of $100,000

Within the past few days G. J. Emery of South 4th st., received a letter from Madrid, Spain, announcing him as the prospective heir of $100,000—but "thereby hangs a tale."

The letter received by Mr. Emery is very lengthy and is written in script. Abellardo Romey, of Avila, Spain, is the personage who addresses Mr. Emery and he states, he is in grave health and that 'Mrs. Anna' was Mr. Emery's near kinswoman and so he (Mr. Emery) could see the close relationship existing. But Mr. Emery doesn't see, even when $100,000 is promised him in return for the small favor of sending the Spanish relative the amount which would transport the relative's beautiful daughter and luggage to this country. The luggage is said to include one trunk with a secret compartment which contains the fortune.

The Spanish gentleman says he has been thrust into prison because becoming too officious in the affairs of war in Europe.

The whole letter indicates some mind has been "hatching up schemes." However, Mr. Emery thinks he won't sent the price for the luggage and the beautiful daughter. The $100,000 evidently doesn't cut much of a figure with Mr. Emery.

MISS RICHARDSON TO WED

Herbert Baum and Miss Myrtle Richardson, both of this city, took out a marriage license at the office of the city clerk yesterday. Miss Richardson is very popular and well known and Mr. Baum has many friends here.

Germany Believes Peace Will Come In Recognition of Empire's Strength

Berlin Newspapers Declare Country Bides Its Time with Patience; Discuss Proposed Annexation of Belgium as Part of Peace Terms.

Berlin's two most prominent journalists, Herr Theodor Wolff, of the Tageblatt, and Herr Eugen Zimmermann, of the Lokalanzeiger, in their publications enthusiastically support the Norddeutsche Allgemeine Zeitung's reply to the French press on the deductions drawn by the French newspapers from the social democratic peace programme.

Both agree with the Norddeutsche Algemeine Zeitung that Germany will wait without impatience, until its opponents draw "the inevitable conclusions from Germany's favorable situation," and that draughted in the conviction that Germany's opponents "could not longer hope for a betterment of their own military situation, and after other organizations, confident of victory, had formulated what they believed our demands for peace ought to be."

The other organizations referred to are six great business associations which have gone on record to the imperial German Chancellor, Dr. von Bethmann-Hollweg, as favoring the annexation of Belgium.

Herr Wolff declares:—"We all know that this is the status of things and that the various announcements and manifestoes formulated by various camps and containing peace ideas do not orginate from a feeling of weakness, but from a universal consciousness of strength.

"With what zeal the French press utilizes everything the wind blows to it, every one knows who follows its daily utterances. Out of every grape it squeezes juice to prolong the intoxication of its public."

Every such proposal, Herrr Wolff declares, is misconstrued, both in the enemy and neutral lands, as, for example, in Roumania, where, he adds, "every street gossip in the morning pictures our agony on the deathbed, and in the evening our power and hungry insolence that demand subjugation by the other peoples."

He concludes:—"Nothing is so welcome to them who hinder peace and seek to prolong this murderous war as some word of proof from a degating circle of German stay-at-home warriors, with which they can bolster up hope or truss up hate, and they are almost disarmed if they find no possibility to deny the unimpeachable strength of the German people, and if the desired opportunity, is taken away from them to distort Germany's political future into a picture of terror."

Herr Zimmermann dubs the French interpretation of the various peace proposals as "paper shells that do not explode," and adds:—"In Germany a united nation battlesf or the same goal. Opinions as to how the object may be gained the quickest are varied. Every man, from the chief War Lord to the last citizen, is permeated with the purest partiotic intention to make every necessary sacrifice. Just as Germany is unanimous that the submarine warfare must never be given up, so we are unanimous in all important questions." tions."

Captain Killed at Wheel in Fight With Submarine

Queenstown, July 5.—The British steamship Anglo-Californian, from Montreal, with a number of Americans, Russian reservists and a cargo of horses for the allies, arrived here a veritable shambles, after the most dramatic running fight with a submarine that has yet occurred. The bodies of nine dead men, including the captain, and eight others mortally wounded, lined the decks.

For four hours the Anglo-Californian withstood a continuous storm of bullet and shell from the submarine. Captain Parslow manoeuvred his ship in spirals to prevent the German torpedo from getting home until a shell, exploding over his head, killed him at his post.

His son, the first mate, sprang forward and took the wheel from the mangled hands of his dead father. Another shell, directed at him, tore the wheel out of his grasp, leaving him wounded on the deck. He was able to prop himself up, and, pursuing the tactics of his father, kept the ship afloat until a fleet of torpedo boats, summoned early in the fight by the Anglo-Californian's wireless, appeared and rove away by submarine.

Four other ships, the French Line freighter Carthage, the French schooner Hirondelle, the Norwegian back Fiery Cross, and two schooners were sunk by German submarines yesterday and today.

The Anglo-Californian left Montreal for Liverpool on June 24. Included in the crew, in charge of horses, were the following Americans: D. F. Feeney, John Mahoney and John Vaughan, of Newport News, Va.; George Rogers, of Richmond, Va.; R. L. Martin, of Boston, and L. C. Carroll, of Syracuse. None of the Americans were injured in the attack.

The trip was uneventful until Sunday morning at 8 o'clock, when, off the coast of Ireland, in the same lane where the other recent attacks have taken place, a submarine was sighted to the east and rear of the Anglo-Californian.

PAVING WORK HELD UP UNTIL COMMISSIONER STEVENSON'S RETURN

First st. will not be paved before August and may not be paved this year.

The Board of Public Works, at a meeting held last week, rescinded its resolution to make the street four feet wider, and now the plans in the hands of the State Highway department call for a 34-foot roadway, the same width as it is at present. But the city has not, as yet, announced its readiness to receive bids, and it is very probable that nothing further will be done in the matter until the return of John W. Stevenson, president of the board, from his western trip.

Two of the three members of the board spoke emphatically in favor of making the street wider at that meeting held early in June, in the course of which Commissioner Wiltsie withdrew from the session and refused to vote for the resolution making the street wider, but claimed later that the sentiments of the property owners wider, but claimed later that the sentiments of the property ownerrs had been misrepresented to him.

Last week the Board rescinded its previous resolution, and now the paving question has become a most complex one. Many of the property owners along the street have openly declared their intentions of halting the paving work by injunction if the city attempts to make the street wider. The property owners who have shade trees along the strip to be added are particularly opposed to the plan. Whether this had anything to do with with the latest action of the Board has not been learned. Commissioners Stevenson and Garret have urged [illegible] made wider, and said they would fight the opposition to a finish. It remains evident that the two commissioners do not relish facing a series of injunctions and have concluded to let well enough alone.

NEGRO WORKMAN DROWNS IN CANAL; BODY FOUND

Aleck Roberts, colored, a drill operator on the Walter Bradley contract for the Oswego Falls Pulp & Paper Company plant, was drowned at 11.30 last night when he fell into the canal above the Broadway locks. Roberts was running a drill on the foundation of the old power plant and started for the blacksmith shop on the other side of the canal, to get a new drill. As he was walking along the west bank of the canal his hat blew off and when he tried to catch it, he lots his balance and toppled off the bank into the canal.

Some Italian laborers nearby heard Roberts cry out ashe fel and they ran to his aid, but the man did not come to the surface. Workmen immediately started dragging for the body, and Peter DeBarbour and Jack Perkins brought the man to the surface at 2.30 this morning.

Roberts has a sister living in Philadelphia and Undertaker Young has taken charge of the remains pending her arrival. The dead man was about 35 years old, and had been in the employ of the Bradley company for some time.

PATHFINDER ISLAND WINS ADMIRATION OF YOUNG FOLK

Delegates to the Y. P. B. convention to the number of 200 are being entertained at Pathfinder Island this afternoon with a picnic. The visitors were taken to the island shortly before noon today, immediately after the closing session of the convention. The party made the trip in automobiles which were kindly loaned by residents of this city.

The company will return to the city about 5 o'clock this afternoon. Many of the delegates left for their homes immediately after the closing session this morning.

Y.P.B. Re-elected Stratton President; Federation Making Great Gains

Noted Speaker Denounces Local Option, Scoring Anti-Saloon League and Old Parties---Yesterday Fulton Had One of Its Greatest Parades.

Mason Stratton and his efficient corps of officers were re-elected for the ensuing year at the annual election of the Y. P. B. Federation. Mr. Stratton, who has just graduated from the Cortland Normal School, has made an efficient president, and his re-election is a satisfaction to the workers of the organization throughout the State. The other officers re-elected were: Vice-president, Miss Mildred O. Moody; corresponding secretary, Miss Helen G. H. Estelle, of Poughkeepsie, N. Y.; recording secretary Clarence Jarvis, of Kenwood; and treasurer, Miss Mary Tozer, of Ithaca.

A song entitled "Prohibition Made in U. S. A.," and sung to to the tune of "Tipperary", was adopted as the state song for the year.

During the morning session yesterday reports were given of Miss Tozer, state treasurer, which showed a great gain in the finances during the year. Reports of the Anti-Narcotic Department, Scientific Temperance Department, Press Department, Health and Heredity Department, Medal Contest Department, and Department of Parliamentary Usage showed a great gain all along the line.

The meeting of officers on Moody afternoon elected the following as the superintendents of the several departments of work for the ensuing year:

Anti-Narcotics, Walter W. Manford, of Ithaca;
Christian Citizenship and Compaign Work, Wilfred Moody of Wilson;
Co-Operation with Other Societies, Miss Edna L. Conkling, of Whitestone, Queens County.;
Franchise, Miss Olivia Harvey, Rochester;
Evangelistic and Sabbath Observance, Miss Muriel Ayres, of Penn Yann;
Flower Mission and Relief work, Miss Mary Doran, Coddington Rd.;
Health and Heredity, Miss Ida Burdick, of East Syracuse;
Medal Contest, Miss Pearl M. Stratton, of Cortland;
Medical Temperance, Miss Harriett Bethel of Brooklyn;
Press, W. W. Reid, of Whitestone, Queens County.
Scientific Temperance Instruction, Miss White of Ames.
Systematic Giving, Mr. Bordwell, of Alleghany Coounty.
Parlimentary Usage, Charles Howard, of Sandy Creek.

Plans fot group meetings of several counties combined were made by the Executive Committee and the following persons named as the leaders of the group in the immediate section where they reside: Niagara, Miss Mildred Moody; Tompkins, Miss Maud Pratt; Hudson Valley and Long Island, Miss Helen G. H. Estelle; Broome, Mrs. Lottie Evans; Yates, Mrs. D. C. Ayres; Onondaga, Miss Welton; Alleghany, Mrs. Crawford.

* * *

The officials of the Anti-Saloon League of America, who stand for the principle of local option instead of for national constitutional prohibition, and the members and officials of churches who vote tickets other than the Prohibition, were severely scored yesterday afternoon by Newman Raymond, a noted temperance orator from New York city. His address was made before some six hundred young people and residents of Fulton at the annual Y. P. B. Federation convention being held in the First Methodist church.

In his opposition to local option as opposed to nation-wide abolition of the saloons, Mr. Raymond was cheered to an echo by the large gathering of people.

"The Anti-Saloon League," said the speaker in part, "tells us to stay in the old parties and vote for good men within these parties. That's just what the devil wants us to do. But the Bible says 'Come ye out from among them.' In the old parties the Sunday school superintendent marches with the brewer on election day and is the laughing stock of modern civilization.

"It is the superintendent, the pastor and the class leader who

Whether a rigid press censorship is a military necessity or even a military advantage in these days of scouting aeroplanes, field telephones and wireless is an open question. Certainly in this war the German general staff has known exactly what the British army was doing considerably before the British public knew, and the German navy, as its raids show, has not needed English newspapers to apprise it of the disposition of the British fleet.

The question of military censorship is an old one and has always led to friction. It is worthy of note that the New York Evening Post, whose editor is the son of a prominent army correspondent in the civil war, considers the correspondent at the front a military evil.

The harm that the army correspondents may do lies not alone in the betrayal of secrets; they often become the spokesmen of the generals whom they accompany and unwisely foster antagonism between rival generals, also between generals and their superiors and between the army and the government.

In some sections of the country the inhabitants take it as an evidence of hard times that tramps are appearing in greater force than usual. These tramps come from the cities. This is an indication that employment is on the wane. They go to the country, asking for food on the plea that they are tramping to some distant place where they are promised employment. If shown to the woodpile or asked to go into the fields they demur, which is perhaps just as well. The city derelict has no muscle for the bucksaw and ax, the crowbar and spade.

Incidentally there is further evidence of hard times in the scarcity of money in circulation. All classes doing business complain that collections are slow. However, they account for this on the ground that the slow payers have money, but hoard it, so there is really no hard times at work. If everybody would live normally, buy what he wants and can afford, and pay for it, hard times would be a topic to talk about in the corner grocery and nothing more.

Better to apply firmness to the Mexican situation late than not at all, and nothing is to be gained by waiting. The firmness must be drastic, and therein lies the trouble. Mexican character must be made over. Partly through distrust of foreigners similar to that in China, partly owing to distrust of rulers in the past who never developed faculties of self-rule among the masses, there is a spirit of unrest at work in Mexico which amounts to uneasiness. The average Mexican of good intent will be slow at learning when to trust, whom to trust and how to trust somebody or some entity higher up.

The weather freaks of the year recall the spotted record throughout the United States ninety-nine years ago. The year 1816 had to its credit a January so mild that no fires were needed in towns, and February was free from the usual blasts of winter. March and April were growing months for vegetation, but May brought snow and ice. Corn was planted two or three times over, and Vermont had a snowfall of ten inches in June.

Congress by an act of March 2, 1907, decreed that "any American citizen shall be deemed to have expatriated himself when he has been naturalized in any foreign state in conformity with its laws or when he has taken an oath of allegiance to any foreign state." A military oath is an oath of allegiance, therefore many Americans now fighting in Europe are expatriating themselves without perhaps intending it.

Once upon a time the egg industry in the United States was merely a matter of housewife's barter for sugar and Yankee notions. Last year the value of the egg crop exceeded that of wheat, as it has averaged for a decade at least.

Five inches short of average on the rainfall for the first five months of 1915. But a hoeing counts as one rain, so more power to the agricultural elbow.

WEEK-END HOLIDAYS

There is little to commend in the opposition to movements that make for the observance of whole or partial closing of stores and manufacturing plants on Saturday, the last day of the week, and a great deal to condemn. Little by little momentum is gained by organizations having in view to give as much time as consistent with good business ethics to the workers in shop, factory and store, the results being the more noticeable in large centers of population.

Troy, N. Y., furnishes the latest example of the success achieved by merchants to have a Saturday half holiday by keeping the stores open Friday night. There the manufacturers and other employers are being induced to make Friday their payday so that employes can buy their supplies Friday nights and allow the stores to close Saturday afternoons and evenings without loss to them or inconvenience to their customers.

In Fulton the merchants feel that by closing their stores Monday evenings they are doing their best toward giving their employes relaxation and recreation, yet the Troy plan might work here. It is probable that an objection might be raised that the out of town trade is in the habit of dealing Saturday evenings, but this feature might adjust itself by advertising to educate the out of town trade to make Friday and Saturday forenoon its shopping time.

It might be unwise to work toward a Saturday half holiday at the present time, as the city's merchants have quite a number of irons in the fire by reason of the attempted readjustment of conditions by the reorganized Chamber of Commerce, yet it is not too soon to offer the suggestion, for no matter how secure we may be in our methods, it is found necessary to keep abreast of the times.

GINGER COUNTS

Mayoralty booms seem to have the hardest sort of luck getting started, and so far most of them have fizzled out before they could even get away from the home plate. There is apparently a disposition in the camp of the men who want for Fulton the good things that come through an administration honestly and efficiently handled to wait and wait—to avoid playing off the base a bit. Do those men realize that the successful politician plunges into risks; that the timid, conservative man usually plods along sluggishly?

One thing is as sure us the setting sun, that if a ball player wishes to score he seldom hugs the base. Watch him and you will see that he keeps ginger in his feet and that he does a lot of shuffling and dancing.

The ball player, in other words, who wants to reach the home plate is always ready to steal third when the fielder muffs the ball. Fulton's opportunity to make a home run is almost here, but unless there is ginger injected into the campaign we are apt to experience the unpleasantness of getting left at the base. An old story.

WEEDS! WEEDS!

There is no garden without its weeds. Where they come from nobody can tell. No one plants them. But the weeds persist. The only way to exterminate them is to dig them up by the roots.

Weeds abound everywhere. We have them in public service—sensation lovers, like Chairman Walsh of the Industrial Commission, legislators seeking the limelight, grafters in the disguise of reformers, and ballot-box stuffers pretending to be the guardians of elections.

In our social system, weeds abound. Dynamiters betray the cause of honest labor; black sheep bring anguish to the family circle; an occasional hypocrite defiles the church and quacks lower the professional standard, as yellow newspapers curse the press and muckrakers the magazines.

In finance, we have the gold brick fakers and promoters of bogus schemes robbing the pockets of an unsuspecting public, according to Post Office reports, of $170,000,000 a year.

Weeds mar the records of some of the noblest lives in history. Great men have been victims of deep and uncontrollable passions; illustrious statesmen have found their harvest of fame choked by the weeds of selfishness; conscience has been stifled by the weeds of indulgence and even the angels have fallen in the midst of the weeds of ambition.

How many weeds are in your garden, good reader? Before you complain of those that are in your neighbor's field, pull up your own!—Leslie's weekly.

Opinions

The Cross of Gold.

There is an impulse everywhere, and a very natural one, to rejoice over the fabulous size of Uncle Sam's trade balance. It arises from the common mistake of considering the nation in the light of an individual. A man whose income so far exceeds his expenditures as to permit him to put half of it in the bank is considered a wise and fortunate person indeed. But is the nation able to do so in as happy a position? The author of the July letter of the National City Bank thinks not, and his reasoning accordsw ith the very best economic thought. A very "dismal science," economics!

In normal times, when the currents of foreign trade are flowing freely, it is impossible for any nation to sell abroad so much more than it buys abroad, so much more as the United States has done in the last fiscal year. A favorbale balance of trade of small proportions invites imports of gold which raise prices, which in turn invite imports of commodities to overcome the balance. A nation cannot say with the individual: "I will continue to sell and not buy," for the simple reason that the individuals who make up a nation act independently ot it and of each other and will invariably buy abroad when things become too dear at home.

But the war has set everything at sixes and sevens in the economic world. Europe is organized for war, not for commerce. We can buy precious little from her the while we are impelled to sell to her in ever increrasing quantities at ever increasing prices (computed over a long term) foodstuffs, clothing, weapons, ammunition, supplies of all sorts. And not only do the fighting nations, on the other side find it next to impossible to spare us the goods to whittle down the balance, but they find it almost as difficult to send us gold in payment.

It happens, however, that in spite of ubiquitous submarines and other obstacles the United States has imported $31,000,000 more gold in the last fiscal year than it has exported. Thansk to a long period of retrenchment, it had an excellent supply of the metal before the war started. Even greater retenchment since the first of last August has added to the fund, and the change to the Federal Reserve Banking system has released some $300,000,000 more for general purposes. In short, as Sir George Paish has remarked, New York and the country at large is swimming in a flood of gold. And more seems bound to ome by hook or crook, from Russia via Vladivostok or from South Africa—by whatever route it may escape the Kaiser's submardines.

This hoard of gold is a menace. If used freely here it will inflate values, encourage over-speculation, put our whole econic fabric on a fictitious basis, with no other support than the continuation of the war. If we could buy back our foreign held securities with it, well and good. But foreign investors don't want to part with them. The next best scheme is to lend it abroad. And just now there appears to be maturing an opportunity of the sort. Negotiations are on foot to float here a British bond issue of from $100,000,000 to $300,000,000 (not subject to the British income tax), to run from three to ten years and to pay interest at 5 per cent. The establishment of some big credit like this seems as urgent for Uncle Sam in the embarrassment of his indigestible riches as for Great Britain, with exchange running ruinously against her.

Of course such an issue will not dispose of the problem. As the war continues many more of the same size will be needed safely to employ our accumulating credit and to keep exchange within bounds. The National City Bank's letter mentions a billion as the amount we might conveniently lend tomorrow. And in advising such a loan (secured, preferably(by deposit of "Amercans") the writer as in mind that not improbable day of reckoning when, "with the war over and the natural laws again in play, with prices and wages on fictitious basis, the best country in the world to sell in and the poorest to sell from, with productive capacity over-developed and the export business gone," the sudden eaction could not fail to be intensely painful to the business world.

Uncle Sam is in very truth in some danger of crucifixion upon a cross of gold.—N. Y. Tribune.

Expert Advice for the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

What is the approximate saving in current when using the two headlights switched on as dimmers instead of switched on full?

This all depends on the method of dimming used. If the lamps are dimmed by connecting them in series then the current consumption is cut in half if the resistance in the wires is neglected, and since this is small it may be. If two bulbs are used in the headlight, a large one in focus for country driving and a small one out of focus for city driving, the saving may be much greater, the small bulb taking about a fourth the current of the large one.

I am troubled with fire coming from the exhaust cut out underneath my car when running rapidly and shutting off quickly; also when pulling hard. It is not the regular exhaust from the engine, but a large blaze like gasoline fire which comes clear to the ground and spreads out several feet each way. Can you explain it?

It is difficult to say exactly what is causing this trouble without seeing the car. However, it may be that the valves are improperly timed or the mixture may not be correct. If the valves have been reset lately it would be wise to make certain that the timing is correct, but if they have not been reset they probably are all right. If the mixture is at fault it is a simple matter to adjust the carburetor. Possibly there is carbon in the exhaust pipe or it may be that you are running with the spark too late.

My front axle is bent about one and one-half inches from the spring seat to the outer end of the axle, a distance of about ten inches. How should it be straightened?

This axle should be heated to a cherry red heat and then straightened. The heat should be applied at the bend only, and as this is ten inches from the king pin bushings there is no reason why the latter should be heated and therefore no danger of them becoming enlarged. In fact, it is doubtful whether they would be enlarged even if exposed directly to the heat. It is not necessary to give the axle any heat treatment after it is straightened.

Does it make any difference how many teeth are in a bevel gear in relation to the gear it works in?

The relation of the number of teeth on the driving pinion to the number on the large gear gives the ratio between the number of revolutions the motor makes as compared with the number the wheels make when the car is traveling on high gear. Any change in either the pinion or bevel gear alters the ratio.

What is the cause of inner tubes becoming cemented or fastened to the casing so it is very difficult to remove them?

This is caused by neglecting to use enough tire talc between tube and casing. Whenever a tube is placed into a casing always sprinkle talc over the inside of the tire. Talc is a white powder, which is cheap, and may be bought at any supply store.

How do you fit babbitt bearings on crank shaft and connecting rods, either when putting in new ones or when taking up slack in old ones?

If only slightly worn bearings may be adjusted by removing shims or by filing the bearing caps. If the bearings are scored or worn out of round or if new bearings are put in the surfaces must be scraped.

If the bearing surfaces are in good condition and not worn out of shape a slight adjustment should be sufficient to make them tight. There are usually several shims under the bearing cap, and by removing these one by one the looseness will disappear. Remove only enough shims to make the bearing a snug but not a tight fit. When shims are not used the lost motion may be removed by placing the bearing cap in a vise and filing down the surface. In case too much material is removed a copper or paper shim or shims should be inserted to make the cap fit. In filing the flat surface of the bearing cap should be preserved, the file not only being held flat against the surface, but the movement of the tool being carefully executed.

If the bearing is scored, new or worn out of round, it will need scraping. This should be done by an experienced man. Connecting rod bearings may be scraped without tearing down the motor, but if the main bearings require scraping the motor must be disassembled and the crank case placed upside down with the crank shaft and flywheel still in position. The main bearing caps are removed, and the crank shaft bearing surfaces are painted with a solution of Prussian blue. After rotating the crank shaft a few times and removing it the high spots of the bearings will be coated with the blue. These spots are carefully removed with a special scraping tool, care being taken not to cut too deep. Then the crank shaft is repainted and the operation repeated until the few large high spots have given place to more evenly distributed small ones, showing that the bearing makes contact at practically every point.

Queer Plants.

The searcher for curiosities among plants finds much to interest him in Kew gardens. There are primroses which blister the hand if stroked, leaves divided into two sections which snap together and imprison any insect which alights upon them, plants which live absolutely on air without any root in the ground, walking plants, sleeping plants and plants which grow whiskers. And all these marvels can be seen by any visitor for nothing.—London Graphic.

ROMANCE OF THE FROZEN NORTH

Ship on Its Way to Relieve MacMillan Party.

A ROMANCE of the arctic regions has been exploded by Donald B. MacMillan, who among other things in a letter recently received by the New York Tribune, said:

"Crocker Land, reported seen by Peary in 1906 and indicated on the latest maps, does not exist. I succeeded in covering the whole distance of 1,200 miles in seventy-two days. To us, standing on the heights of Cape Thomas Hubbard, and for several days on the polar sea, there was every appearance of an immense tract of land extending along 120 degrees of the horizon, hills, valleys and snow capped peaks."

It was confidently expected that this unexplored land of the arctic had a real existence, but it now turns out that the land that Peary thought he saw was merely a series of ice banks or a mirage.

According to Admiral Peary's description, a territory of vast dimensions lay off the coast of Axel Heiberg Land, separated from it by an arm of the arctic ocean. With his description as their guide, MacMillan and his followers raced from Etah across the frozen Smith sound, across the difficult reaches of Ellesmere Land, across Axel Heiberg Land, and then dashed under the light of the midnight sun 125 miles out over the floe filled arctic in a daring effort to be the first men to set foot upon the continent which Peary thought he had seen.

They found no continent. Not even an island broke the dreariness of the tumbled icy wastes of the frozen sea. Where Peary said the coast of Crocker Land broke the horizon was nothing but an expanse of jagged ice.

Rumors of a great northern continent have been current since the beginning of polar exploration. It remained for Peary to crystallize them

Photos by American Press Association.

CAPTAIN H. C. PICKELS AND THE GEORGE B. CLUETT.

into more positive form. When the rear admiral returned after nailing the stars and stripes to the pole he told of this legendary land. He thought that he had seen it, and he named it. In his mind there was little question that beyond the northern cliffs of Axel Heiberg Land stretched the uncharted shores of a great continent.

It was Peary's report which aroused the American Museum of Natural History to fit out an expedition to attain an actual foothold upon this continent. Donald B. MacMillan, who had accompanied Peary for part of the way on his final dash to the pole was chosen as its head.

MacMillan left New York on board the Diana on July 2, 1913, but in Belle Isle strait the ship leaked so badly that the explorer put back to St. John's, N. F. He started again on Aug. 5, 1913, in the Erik, Peary's old supply ship, for Flagler bay, but was obliged to winter at Etah, Peary's former base.

Now the little schooner George B. Cluett of the Grenfell association is on her way to the far north to relieve MacMillan and the members of his party. The ship is commanded by Captain H. C. Pickels, a veteran sailor of the arctic. Accompanying him are Dr Edward Otis Hovey and Captain George Comer, representing the American Museum of Natural History. The ship is provisioned for two years in case the MacMillan party should not be located at Etah, North Greenland, Admiral Peary's former winter quarters. It is expected that the ship will reach Etah by the middle of August. The schooner also carries stores for the hospitals in Labrador maintained by the Grenfell association.

Professor MacMillan in his letter to the New York Tribune, which started on its journey southward last February, stated that he and Ensign Fitzhugh Green, U. S. N., would start on a 1,500 mile trip to explore new regions and should be back at Etah around June 11. Other members of his party will engage in more exploration work in different sections of the arctic region. He said that if the George B. Cluett fails to reach them their friends in the United States should not worry, as they can easily live as the natives do

PACKING THE HALL.

Antis Call Twenty-two a Great Crowd. Not Hudson Woman's Idea of a Multitude.

It was left for a suffragist to call by name the "great crowd" which, so the Hudson Republican said, packed Guild hall at Philmont recently. Her letter to the Hudson Register, reprinted below, details the lively challenge:

I read the Hudson Republican this morning, which gave large headlines to a meeting held in Philmont last night at Guild hall, at which Miss Lucy Price was the speaker. In the headlines it stated, 'Anti-suffragists evoke enthusiasm; meetings in Chatham and Philmont last night were live ones." The article went on to say: "Two more anti-suffrage meetings were held in this county yesterday and both drew crowded houses and evoked great enthusiasm. In the afternoon Miss Price spoke in Chatham; a great crowd greeted her.

"In the evening the meeting at Philmont duplicated the scene at Chatham, making a glorious windup to the week's work * * * The Philmont meeting was held in Guild hall, which was packed, and former Assemblyman Crandell made an able presiding officer."

I was one of the persons who helped 'pack' Guild hall last night. The other people who helped "pack" the place were as follows: Mr. Crandell, John W. Gillette of Hudson and Edward Harder of Philmont, Mrs. Gillette and Miss McMaster of Hudson and Miss Price and fifteen Philmont women, about thirteen of whom are known suffragists and, I believe, two of the others are suffragists or undecided.

Thus in this "packed" hall there were twenty-two people—three men and eighteen women—four of whom came with the speaker, although I think the hall can comfortably seat 150 or 200 people.

It seems to me that the people of this county are entitled to know of this wholesale misrepresentation which is used as an adjunct by those who are attempting to block woman suffrage. They must feel that the facts are horribly against them when misrepresentation to this extent is indulged in. Very truly yours,

MAY E. HOTALING.

THE TROUBLE WITH BETTY.

By ROSE YOUNG.

In a little story with the pink mark on it (pink being this year's anti-suffrage color) Betty goes to Billy with this naive question: "Now, Billy, you always say I can have anything I want. Do I want the vote?"

Nobody can blame Billy for making the most of the minute. Any woman who has to go to a man to find out whether she wants to vote not only shouldn't have political liberty; she shouldn't have personal liberty. She should be kept indoors, preferably in a quiet, dark room.

The whole trouble with Betty is the old time anti-suffrage insistence on inertia of the brain for women. Billy's efforts to form Betty's mind and mold her opinions on the suffrage are interesting as showing the dear old masculine ingenuity in obscuring the issue for Betty, but they are not worth one dime as an answer to Betty's question.

When Betty really wants the answer to the question, "Do I want to vote?" she doesn't trouble Billy. She begins to dig it out for herself. And once she begins digging it doesn't take her very long to dig through to—

Yes!

CAN STOP THE BULLET.

But Women Mustn't Be Permitted to Use the Ballot.

"The women of all nations will be proved 'fit for the franchise' as a result of the present European war," said Mrs. Erna von R. Owen in a speech recently made at Amsterdam, N. Y.

"Women in Serbia are fighting side by side with the men," Mrs. Owen went on to say. "Englishwomen are stepping into the industries which men have always said women could not fill. They are doing so in order that the men may go to war, and they are filling the positions successfully. They are running tramcars, omnibuses, acting as clerks, cleaning streets, and so on.

"German women, it is reported, are helping to run the railroad trains. The trenches are the only places where women have not yet gone to help the men of those countries. But from Russia come stories of women who are fighting side by side with their husbands and brothers. And all the while all the women are nursing the sick and wounded, making clothing for the soldiers and caring for the orphans. Voting seems to be the only dangerous thing we women must stay at home to avoid."

Women Voters Favor Workers.

The only amendment which passed in Wyoming at the last election was one to make provision for workmen's compensation. It carried by a vote of 24,258 to 3,915, and because of this vote the legislature was able to pass the workingmen's compensation act at its last session. Wyoming was the first state to give women the vote. Six other suffrage states, Washington, Oregon, California, Nevada, Arizona and Kansas, have compensation laws.

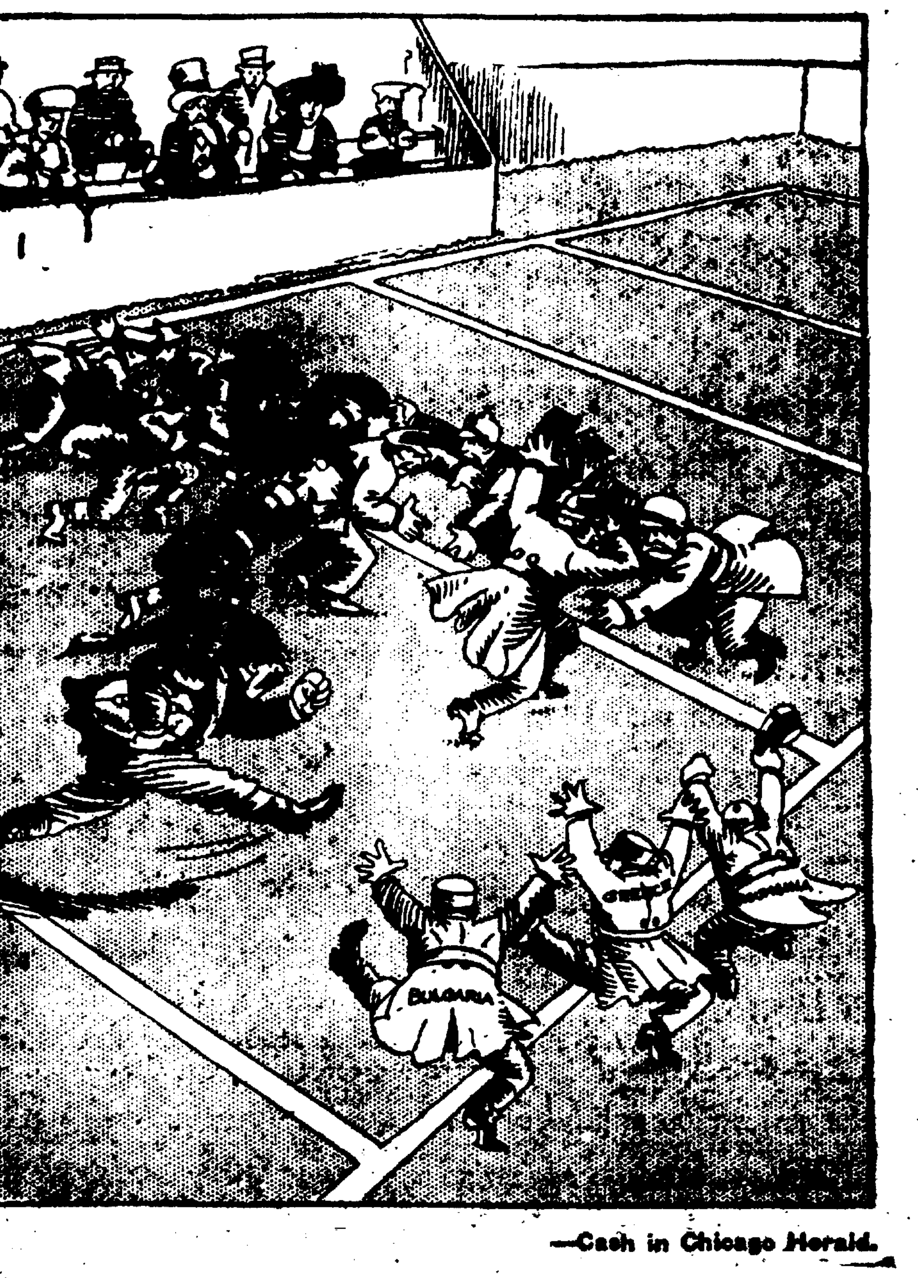
Woman Garbage Contractor.

Garbage in Hastings-on-Hudson, N. Y., is to be removed by a woman. Mrs. Mary Eliot has been awarded the contract for collecting the ashes and garbage, her bid, $2,400, having been lower than that made by any of her male competitors. She has announced that she expects to superintend her men and teams personally. This is the first time in the history of Westchester county that a woman ever competed for such work.

Why?

Why should New York women be taxed to pay for the expenses of elections, at which only men are allowed to vote?

CAN HE SMASH THE LINE?



—Cash in Chicago Herald.

KEEPS MR. WILSON IN TOUCH WITH EUROPE

Colonel House, Confidential Adviser of the President.

Colonel Edward M. House, who has recently returned from a secret mission abroad, is doubtless closer than a cabinet officer as a presidential adviser. He is a very intimate, yet not an old friend of the president, who first met him about three years ago.

All that officials in Washington have admitted concerning Colonel House's visit to Europe has been that he was expected while there to look into the question of co-ordinating American relief work abroad.

Colonel House admitted that he had talked with leading government officials of Germany, France and England,

© 1915, by American Press Association.

COLONEL EDWARD M. HOUSE.

but denied that his trip to Europe was in any way connected with a possible mission looking toward peace or that he was the personal emissary of President Wilson. "I did not talk peace, and that was not my mission abroad," Colonel House declared.

It is known that Colonel House has made frequent confidential reports to the president on the sentiment toward peace, following his visit to the capitals of the various nations. These reports have told particularly of the results of interviews with government officials in the different countries.

The president has relied on Colonel House more than upon any other one man for correct information concerning official and popular opinion in the belligerent nations. Through the colonel he has kept in very close touch with peace discussions, with the hope of urging his original offer of mediation at the proper time.

Colonel House was born in Houston, Tex., in 1858, and was graduated from Cornell college in 1881. For years he was active in Texas politics, although he always refused to run for any office himself. He is indeed a mystery in politics, for he wants nothing for himself. He has been mentioned as a possible successor to Mr. Bryan as secretary of state, but it is doubtful if he would accept the office.

SCOUTS IN OPEN COUNTRY.

Soldiers That Steal From Trenches and Take Their Lives In Their Hands.

Though the soldiers at war in northern France are mainly fighting in the trenches, there are many scouts who take great chances in leaving ensconced positions in the trenches and stealing about the more open country. The illustration shows a party of German

Photo by American Press Association.

GERMAN SCOUTS ASLEEP IN AN ORCHARD.

scouts who are peacefully sleeping in an orchard just as if no such thing as war existed. There are, of course, plenty of sentries stationed about to give quick warning in case the enemy is scented. There is more of the old romance of war in adventures of this sort as well no doubt as a sense of relief from the close confinement of underground warfare.

Canadian enterprise is building a new railroad from the rich western wheatfields to the shores of Hudson bay. This new railroad and new route of traffic is another proof that "transportation follows the lines of least resistance." Transportation by water is vastly cheaper than by rail. The water route by Hudson bay will save a thousand miles of rail haul and enable the farmers of western Canada to lay down their wheat in the European markets at a lower freight rate and consequently a greater profit to them than the wheat growers of western United States.

Former President Taft thinks that the United States should have a "council of defense." But cabinets are only councils, and some of them are prone to fatal disagreements. The idea amounts to an agreement of the old adage that "two heads are better than one." On the other hand, there is the military adage that "one bad general is better than two good ones." Military decisions cannot be recalled and tried over like most human problems, therefore the greatest wars have been directed by real Caesars.

On an average land devoted to golf is worth $600 an acre, and as there are 130,000 acres in the United States devoted to the game there is a matter of about $78,000,000 tied up in golf real estate. Add $20,000,000 or so for clubhouses and the snug sum of $100,000,000 is invested permanently in the game.

The outer fringe of first Bull Run battlefield was packed with civilians as rampant as a crowd of baseball fans. But never again. One touch of battle makes the war zone the least sought place in the world for any one not forced to go there.

CENSUS BUREAU TELLS WHERE WEALTH OF NATION LIES.

The following figures, taken from a census table, show where the $200,000,000,000 wealth of the United States is to be found:

Real property and improvements taxed	$98,362,813,569
Real property and improvements exempt	12,313,519,502
Live stock	6,238,388,985
Farm implements and machinery	1,368,224,548
Manufacturing machinery, tools, etc	6,091,451,274
Gold and silver coin and bullion	2,616,642,734
Railroads and equipment	16,148,582,502
Street railways, etc	4,596,563,292
Telegraph systems	223,252,516
Telephone systems	1,081,433,227
Cars not owned by railroads	123,362,701
Shipping and canals	1,491,117,193
Irrigation enterprises	360,865,270
Privately owned waterworks	290,000,000
Privately owner central electric light and power stations	2,098,613,122
Agricultural products	5,240,019,051
Manufactured products	14,693,861,489
Imported merchandise	826,632,467
Mining products	815,552,223
Clothing and personal adornments	4,295,008,593
Furniture, carriages and kindred property	8,463,216,222

The six New England states are credited with sharing to the extent of $11,805,422,012, New York with $25,011,105,223, Illinois $15,484,450,222, Pennsylvania $15,457,530,277, Ohio $2,-906,432,948, while Delaware is lowest with $307,946,612.

REVOLT IN INDIA WAS HATCHED IN AMERICA.

Hindus Foiled In Plot Say They Had Aid of Germans Here.

The full story of a carefully planned effort to effect a revolution in British India, hatched, it is said, in California, has been revealed in court proceedings under the new defense of India act at Lahore. Eighty-one persons are charged with "conspiracy to overthrow by force the lawful government of India."

The attempt at revolution, according to the witnesses, was launched under German auspices at a meeting of 5,000 or 6,000 East Indians at Sacramento in August, 1914.

"It was thought," declared one witness who was present at this meeting, "that as a great war had broken out in Europe it was a good chance for East Indians to demand their rights and, if necessary, to use force." The witness was one of a party of seventy Indians who sailed from San Francisco on Aug. 29 for Hongkong en route for India.

The Sacramento meeting was one of a number held at various places in America after the failure of the attempt of Gurdit Singh to obtain the entry of 400 Indian laborers into Vancouver, contrary to law, and their return to the east.

Following the arrival at Hong Kong of the party which sailed from San Francisco on Aug. 29, Indians went to various ports of the far east with a view to seditious propaganda.

A general rising in the Punjab was fixed for Feb. 21, but on Feb. 19 suspicion fell on one Kirpal Singh, who had arranged to go and excite the troops at Main Mir. The conspirators were surrounded at a house in Lahore and the plot was frustrated.

MAKE VEILS FOR SOLDIERS.

Women of South Africa Protect Their Men From Mosquitoes.

While the women of Europe have been knitting socks and making anti-gas respirators the women of South Africa have been equally busy making veils for the army of the Cape Colonies.

The chief enemies of the army steadily pushing into German Southwest Africa are the swarms of deadly disease carrying insects—mosquitoes, sandflies, and so on. Veils cover the soldier's head and neck and are tucked into his tunic.

Veil making at afternoon tea parties, though less exciting, has entirely cut out the diamond hunting which used to be the entertainment at Kimberley women's gatherings.

USES MULE TO LOCATE OIL.

Colonel Green Has Novel Method of Finding Spot For New Wells.

Colonel E. H. R. Green of New York and Dallas, son of Mrs. Hetty Green, firmly believes that there is nothing like a mule for locating a new oil field.

The other day Colonel Green and a party of Dallas men associated with him in an oil venture went out to locate a site for the first well. He selected a mule as master of ceremonies. The mule was driven into the field and allowed to take his own time in coming to a stop.

Where the mule first started to graze a stake was driven and plans begun for the erection of the first derrick. If oil is struck the mule will be placed on a pension.

WIFE BEATER IS WHIPPED.

White Man Gets Fifteen Lashes at Post In Maryland.

To Charles S. Dove of Middlebrooke belongs the distinction of being the first white man to be whipped in Montgomery county, Md., for wife beating. Fifteen lashes upon his bare back were administered in the Rockville jail yard by Sheriff Peyton Whalen in the presence of the jail physician and a number of witnesses.

Several of them drew blood.

WILLIAM J. BRYAN'S SILVER TONGUE

Retired Secretary of State Has Great Earning Capacities.

The sensational resignation of William Jennings Bryan as secretary of state—marking the first break in the cabinet that President Wilson was hoping to maintain intact throughout most of his administration—to conduct a propaganda for peace again affords the famous Nebraskan free scope for the use of the pen and the rostrum. In the conduct of this campaign the retired premier, endeavoring to raise the

WILLIAM J. BRYAN IN FRONT OF OFFICE OF DEPARTMENT OF STATE.

issue between force and persuasion, will try to demonstrate that the pen is mightier than the sword. He will also, it is believed, depend largely upon his oratorical powers to advance the cause to which he is devoting himself. Of Colonel Bryan's persuasiveness on the platform there is no doubt.

A well known manager of a lyceum bureau has recently said that the tremendous earning capacity of Mr. Bryan as a platform lecturer in the Chautauqua circuit was not generally appreciated.

Based on the tours of many public men this manager estimated that Mr. Bryan could easily earn $137,000 a year in lectures by diligently devoting himself to the Chautauquas and lyceums upon his recent scale of prices. It is thought that if Mr. Bryan should turn his wonderful ability as an orator to the making of money he could make more than any other man in the world out of his forensic talents.

MRS. ASTOR MAY REMARRY.

Young Widow of John Jacob Astor Reported Engaged to Clarence Mackay.

Hope and love spring eternal in the human breast. When John Jacob Astor, aged forty-seven, kissed his nineteen-year-old wife, Madeleine Force As-

MRS. MADELEINE FORCE ASTOR AND CLARENCE H. MACKAY.

tor, goodby, stepped out of the lifeboat and died a hero's death, the world said:

"Poor young thing! Widowed at nineteen. She can never marry again. Life will be one long suttee for her."

Now, three years after the Titanic tragedy, young Mrs. Astor is said to be about to marry Clarence Hungerford Mackay, son of Bonanza King Mackay.

If she gets married again she will lose $3,000,000 placed in trust for her by John Jacob Astor. But losing a little amount like $3,000,000 will scarce worry Mrs. Astor if she marries Clarence Mackay, for Mr. Mackay is worth millions upon millions.

MR. LUCIUS WILSON

Said

CONCERNING THE YOUNG PEOPLE OF A COMMUNITY:

"Carry the idea to the young men of the community; they are your asset; keep them with and let them work with you. Do not discourage them; let them have their fling in business here that they need not go to other lands to vent their spirit of adventure. Keep the young man with you and you restore to the community the asset which you may be seeking.

"In slavery times a good slave was worth $1,000; today the young man who makes good is worth many times that to his community. You must create a willingness to let the young man try if you want to keep him. Don't discourage him in his plans, for initiative and creative ideas are the finest things in the world. Optimism, belief and a willingness to try is the saving grace in communities, as well as in individuals. In the west whole towns have gone bankrupt, but ten years later have been on the top shelf of prosperity."

A YOUNG NEWSPAPER

IS NO LESS VALUABLE TO YOUR COMMUNITY THAN A YOUNG MAN

when that newspaper is printed and published at home thus making for Fulton a real live industry.

THE EVENING TIMES

IS FULTON'S ASSET AND "A HERALD OF PROGRESS"

Dr. Edmonds' Patient

A Tale of a Haunted House.

By CLARISSA MACKIE

A severe thunderstorm was raging when the telephone bell tinkled softly.

Dr. Edmonds' man, Josiah, roused himself from slumber on the office sofa and reached apprehensively for the receiver.

"I don't like techin' telephones noways when de lightning's kyooting around," muttered Josiah. "Hello, dar!" he called timidly. "Ya-as, sah, dis am de doctor's—ya-as, sah. He'll come right away."

Josiah hung up the receiver and went up to the doctor's bedroom on the second floor. The doctor came out—a tall, lithe, red bearded man, rubbing his eyes sleepily.

"What is it, Josiah?" he yawned. "Mr. Dixon got another bad spell?"

Josiah's eyes rolled affrightedly.

"No, sah; it was a call from de Gedney place."

"Gedney place! You've made a mistake. It's been unoccupied for years."

"Dat's what he said. 'Tell de doctor he's needed at once at de Gedney place on de Hollow road.'"

"Humph!" muttered the physician. "Well, you better go out and harness Daisy and get out my raincoat."

It was a dreary ride to the Gedney place.

Josiah, huddled in one corner of the buggy, was shaking with fear of the approaching ordeal. Dr. Edmonds was puzzling over the strange summons. To his knowledge the Gedney place had been unoccupied for the past ten years. As a family the Gedneys had died out, all save one son, the black sheep of his generation. William Gedney was serving a life sentence in prison, convicted of killing a man in a quarrel. The plea was self defense, and Gedney had escaped with his life.

The village people had gossiped ever since the last funeral at the place ten years ago. It was said that the spirit of the murdered man, Tom Collins, haunted the rooms of the fine old mansion on the Hollow road. Lights had flickered there at midnight, and men straggling home between midnight and dawn had declared that a man's dim form restlessly paced the pine grove that was growing up around the neglected house. But little credence was given to such tales.

"Here we am, doctor," quavered Josiah. "I'll jest git out and open de gate."

The long unused gate creaked open, and the doctor turned into it, trusting more to Daisy's instinct than to anything he could see. Josiah did not return to the buggy. He tramped beside the doctor, muttering charms under his breath.

They were in the protection of the front porch now. Dr. Edmonds brought out his electric torch and found the doorbell. He pulled it vigorously, and a resonant peal rang through the house.

There was no answer.

Again and again the doctor rang, and at last he impatiently turned the doorknob. To his amazement it responded to his pressure.

The door was unlocked!

They entered complete darkness.

"Hello, there!" shouted the doctor, standing at the foot of the great staircase that wound up into darkness. "Anybody here?"

In the silence that followed they distinctly heard the distant striking of the town clock in the valley below.

It struck the hour of midnight, and on the heels of the last stroke there came a sound in the Gedney house.

It was a cry, a moaning cry, that sent a shudder through the doctor's strong frame.

Josiah almost sank to the floor.

"De ghos'!" he gibbered.

Dr. Edmonds recovered his nerve, poked Josiah in the ribs with the automatic pistol he always carried at night and brought the darky to his senses.

"Some one is upstairs," he said sternly. "Some one who is hurt and needs me. Understand! Take my bag and follow me. If you try to run away, remember, I'm a dead shot!"

Josiah mutely fell into step behind the doctor as they mounted the stairs. He would have been more terrified than ever if he had remotely guessed why the doctor had handed him the medicine case. It was that both his own hands might be free to grapple with any danger that menaced them in the deserted house.

The cry had come down from the upper regions of the house. They searched the second floor and found it untenanted save by spiders and scuttling mice. Here, as in the lower rooms, the furniture was covered with dust.

Now the moaning cry was repeated. It came from the third story under the mansard roof.

They reached the narrow upper hall, went down its carpeted length to the southwest chamber. The door was ajar. The doctor pushed it open and raked it with the light of his torch.

The light revealed several startling facts.

There was a narrow cot on the carpeted floor, a pine bureau littered with bottles and dishes and crusts of bread, kets hung before the three windows, and besides one or two rocking chairs there was a pile of books from the library downstairs and a man's blackened pipe on the deal table.

Like lightning the doctor's keen eye searched the room and then went back to the space in front of the cot. A man's body lay there inert.

"Hold this torch," commanded the doctor, and, bending down, he lifted the man's emaciated form to the cot. The ragged coat fell back, revealing a glimpse of a broadly striped garment underneath.

It did not need this betraying glimpse of the convict stripes for the physician to recognize in the man William Gedney!

The room revealed that it had long been the habitation of some recluse. Who was it? Hardly Gedney, for he was still in prison.

The doctor made a brief examination and found that the man had been stabbed in the right shoulder. An ugly wound, but not necessarily dangerous.

Josiah, relieved at this practical laying of the Gedney ghost, waited upon his master with unusual intelligence. He heated water on the oil stove, found a lamp and lighted it and held it, together with the torch, while the doctor skillfully washed and dressed the wound. When it was bound and a pillow placed under the injured man's back the doctor administered a strong stimulant and presently William Gedney opened his wild, dark eyes and searched the physician's countenance.

"Edmonds!" he gasped. "You? How did you come here?"

"A telephone message," said the doctor quickly. "And you, William, you have escaped?"

Gedney nodded wearily. "Sit down, and I will tell you all," he said.

His story was brief and to the point. He declared that he had been innocent of the crime charged against him. Although there had been a fight and a shot had been fired, he swore that he had not held the weapon. His companions had scattered, leaving him with the body of Tom Collins—to be the scapegoat.

Circumstantial evidence was against him, and to save his client Gedney's lawyer had pleaded self defense; hence the life sentence.

"I've always intended to escape," muttered Gedney, "and at last came the opportunity. I grasped it. My first thought was to come home here. I arrived this evening at dusk. The place was home to me, although there remained none of my dear ones to welcome me, the black sheep of the family. Doctor, I may have been wild and foolish, but my hands are innocent of blood.

"I came afoot—I had traveled by night—and at last I reached here, gained an entrance through the pantry window and went up to my mother's room. I—I was going to pray there and ask their forgiveness—you understand," he ended brokenly.

"I had reached the upper hall when I met a man; it was Tom Collins' brother! He was carrying a candle, and he looked old and ragged and unkempt. When he saw me he gave chase, screaming madly that he would kill me. I was unarmed, and I was weak from lack of food. He pursued me up the attic stairs to this room, and there he stabbed me, leaving me for dead on the floor. It was a welcome sound indeed to hear your ring at the door! I suppose I must go back to prison, but I think I have solved the mystery. Jim Collins killed his brother. That is why he has hidden away here, a prey to his own guilty conscience. He must have lived a hermit life for several years. A fellow prisoner told me that Jim had disappeared from his usual haunts. I hope—I pray that he has left a confession of some kind that will clear my name!"

Leaving Josiah in care of the sick man, Dr. Edmonds went back to his horse and drove rapidly in the direction of the railroad station. He suspected that the fleeing Collins had in a moment of contrition telephoned from some pay station to the doctor's house so that Gedney's wound might be attended to.

Dr. Edmonds found a strange situation at the little railroad station.

A strange man had found shelter there during the thunderstorm. He was a ragged looking tramp. He had entered the wire cage where the public telephone was placed and had used the telephone. As he finished speaking there came a crackling hiss, and a bolt of lightning ruined the instrument and sent the man senseless to the floor.

The station agent had vainly tried to reach Dr. Edmonds, and his appearance now was taken as a matter of fact.

There was little he could do for Jim Collins save to take his dying statement and confession that he was his brother's murderer. He had heard that the Gedney place was deserted, and he resolved to conceal himself there with his gnawing remorse. By night he stole out and bought food and tobacco, tramping many miles to the next village.

When the sun rose over the rain swept mountains Jim Collins breathed his last.

Dr. Edmonds went back to the man in the Gedney house with freedom in his hands.

William Gedney, exonerated of the charge, took possession of his property and in the course of time married. Children play around the pleasant lawns, for the pine grove has been cut down, and sunshine enters every nook and cranny of the old house and grounds.

But nothing can give back to William Gedney the lost years spent behind prison bars.

Concealing a Gem

By DONALD CHAMBERLIN

When I was a youngster casting about for something to do for a living I spent a good deal of time groping in the dark. I was of an adventurous disposition and longed for new fields. Finally I settled on a career.

I went out to India to seek my fortune and found—well, for three years I found poverty, then I found something better. Walking on a street in Calcutta, I saw at my feet a brilliant spot emitting the colors of the spectrum. I stooped and picked up, to my surprise, a diamond. It was not one of enormous proportions, nor yet was it small. It was worth not less than $10,000 nor more than $20,000, but as I was no judge of diamonds, I did not know. It was surely of sufficient value to take me home to America and give me a new start.

Nevertheless, I was sufficiently honest to look in such mediums as would serve to advertise its loss. I did not advertise it myself because there is so much rascality in that benighted country that had I done so I would have been beset by persons whose object would have been to get possession of it surreptitiously. I did not see any advertisement of a lost diamond, so I considered myself its owner. My theory of its loss was this: There had been a gathering of Indian potentates in Calcutta, and some one of them had dropped it. These fellows have so many jewels that the loser may not have missed it, or perhaps if he did miss it he may have considered it beneath his dignity to issue any public notice of the fact.

One incident in its finding troubled me. Upon picking it up, while I was examining it I looked up suddenly to learn if any one saw me and encountered the gaze of an Indian. There was a diabolical expression on his face that told me if he had a chance he would murder me to relieve me of my find. I put the gem in my vest pocket and walked away, not looking at the man to see what became of him.

I had a room in a low grade hostelry—I could afford nothing better—and that night in order to make sure of my gem I tied it to the palm of my hand and slept with it in my grip. During the night I heard some one rummaging in my room. I lay perfectly still, and by and by whoever was there went out. I had not told any one of my find and could not understand who could have had a motive for robbing one whose very appearance indicated poverty.

I had a friend in Calcutta who was in good circumstances. I went to him, told him of my find and that I wished to go home. He loaned me the money to pay my fare, and I sailed for San Francisco. I had not been out twelve hours before I recognized in one of the passengers the man who had seen me pick up the diamond.

It is a very uncomfortable feeling to know that you are cooped up with one who is determined to relieve you of a valuable article. It seemed to me that, whatever I did to conceal my diamond, this Indian would get it from me. I was sure that he had come on board for it, and the natives of India are so stealthy, have so many insidious ways of securing their ends, that I considered my property as good as lost.

On the forward lower deck was a coop containing chickens. They were of a rare variety and were going to some American chicken fancier. One morning, standing before the coop, a singular plan of concealing my diamond occurred to me. It was to let one of the chickens swallow it. He would hold it in his crop, and I could shadow him as the Indian was shadowing me and in time get it away from him. From my next meal I took away with me some crusts of bread and, going to the chicken coop as soon as I was sure I was unobserved, began feeding a stately rooster. He took down one piece of crust after another, and among them I fed him my diamond. It was rather large for him, but he got it down, and I congratulated myself that if it was lost to me that rascally Indian would not get it.

I visited the bird, that was now worth a small fortune, the same evening and went again to the coop the next morning. He was there in the evening, but at my morning visit I was horrified to see that he was missing from the coop. I knew that the Indian had got him, but did not trouble myself to discover how. Not a word did I say to any one on the subject. I met the Indian later walking the deck and fancied that there was a look of triumph in his eye. As for me, I endeavored to conceal any evidence of knowing that he had secured possession of my property. If he was obliged to kill the rooster for the diamond I was resolved to kill him before I would permit him to leave the ship with my property.

Where did he keep the bird? I was not long in finding out. My stateroom was in the stern of the ship directly over the steerage. In the middle of the night I heard a crow. Jumping from my berth, I threw on some clothes, ran below and hunted for the crower. I found him in possession of the Indian. I drew a long knife, with which I made a pass at the man, seized the rooster and ran with him to my room and locked the door.

I never left the room, nor did the bird till after reaching port. I killed him in my stateroom and was delighted to find the diamond in his crop. I got it safely ashore and sold it to a jeweler for $18,000.

Great July Sale

Andre Boutin, the great millinery provider never deviates from his practical way of doing business. Every July he sells out his great stock of Millinery at prices that makes everybody buy, whether they need the goods or not. The temptation is too great for them to resist, when they see that the purchasing power of a dollar is worth four times more in July than it was in April, May or June. It gives the public the opportunity to buy for their present needs, and for another season at about one-fourth less than at any other time.

This Great Sale and this grand chance begins now.

Our stock is larger than all the other millinery stores combined.

Untrimmed Hats will be sold at 5c, 10c, 19c, 25c, 49c, 69c, 95c and $1.49.

Trimmed Hats, at 25c, 49c, 69c, 95c, $1.49, $1.95, $2.49, $2.95, $3.95 and $4.95; worth ten times more.

Flowers, 5c to 49c. Fancy Feathers, 5c to 95c. Ostrich Tips, 15c and upward. Long Ostrich Plumes, at 49c upward. Wonderful Value.

10,000 Pieces of Ribbon, at 2½c, 5c, 10c, 12½c, 15c, 19c and 25c.

Thousands of Children's Hats, at 10c, 15c, 19c, 25c, 39c, 49c, 69c and 95c.

Baby Bonnets, 10c, 19c, 25c and 49c.

Millions of other bargains that you are all in need of at your disposal during this big clearing sale. We want you to help us make this wonderful Millinery Sale the greatest of all sales.

Yours for Universal Peace,

ANDRE BOUTIN

Wholesale and Retail Millinery.

325 SO. SALINA STREET SYRACUSE, N. Y.

Y. P. B. Re-elected Stratton, President

(Continued from Page One)

have put the politicial parties that support the liquor traffic into power. I did not. The man who votes for principle cannot lost; the man who votes for policy is a disgrace to American manhood.

* * *

"The liquor traffic cannot be killed by prayer alone. There must be votes also. The Almighty ought not to have any respect for the man who votes for the old party that sustains the liquor traffic—and I do not believe he does.

"Local option is no remedy. It simply sends the liquor business from where it is to the more benighted, the more ignorant and others less able to cope with it than we are. Local option is a form of license."

Over three hundred delegates and friends have registered for the convention and all of these took part in the parade on Monday afternoon, through the principal streets of Fulton. A banner on which was inscribed "The Liquor Traffic Must Go" led the parade. Then followed the officers headed by President Mason Stratton.

The delegates proper were led by the big Whitestone, L. I., banner carried by Neil Dow Cranmer, and W. W. Reid, the "heavyweights" of the convention. The parade was more than six blocks long. Large numbers of persons from Fulton and vicinity greeted and cheered the paraders on all sides. All the banners and emblems that have decorated the convention hall were placed on standards and borne by the young people throughout the entire march.

A striking feature of the parade was the Citizens Band, nearly 40 strong, each man dressed in spotless white. Another feature to attract attention was the band of Suffragists who were dressed in white trimmed with yellow, the women carrying white and yellow parasols.

Cortland Y. P. B. Won First Badge

The Cortland Y. P. B. was awarded four badges of merit, and the Whitestone (Long Island) Y. P. B. was awarded three at the meeting of the Federation at Fulton Saturday. The awards were made by Miss Helen G. H. Estelle, of Poughkeepsie, in connection with her report of the work of the organization.

Cortland led in the amount of money raised during the year—$251.49 Whitestone, second, $209.07; East Syracuse, third, $199.01. Whitestone has the most membership paid in full, 105; Cortland, 98. Cortland has the largest number of men who paid dues into the organization, 59.

During the year there was raised throughout the State for the work the sum of $2,810.25. A total of 1031 meetings were held, according to the reports.

Girl of 14 Years Wins Diamond Contest

A fourteen year old girl won the diamond oratorial contest held Saturday evening under the auspices of the Y. P. B. Federation at Fulton First M. E. church. She is Miss Laura Alvers, of Wilson, N. Y. Her selection was entitled "The Three Homes," and showed the effect of liquor on home life. This diamond medal is the highest award in the State in Y. P. B. contests. She has already the silver, gold and grand gold medals.

Miss Esther Turner, of Franklin county, was awarded the gold medal in the music contest.

A pleasing feature of the evening was a declamation by Miss Stratton, of Cortland, sister of President Mason Stratton, of the Federation, and the singing of the national Y. P. B. hymn by Henry Goutremout, musical director of the Federation.

Mrs. Charles Olmstead, of Fulton, was chairman of the judges in the diamond medal contest, and Mrs. N. H. Haviland, of Fulton, chairman of the musical contest.

PRESIDENT PLEADS FOR MORE ENTHUSIASM

President Mason Stratton of the Y. P. B. made his annual report to the convention Saturday afternoon. He reviewed the progress of the temperance cause in the State and nation and of the pending legislation which in the fall will doubtless come before the various legislative bodies. Mr. Stratton spoke interestingly of the campaign throughout the state last winter regarding prohibition legislation. He recommended a continuance of the win-one campaign for the coming year, and asked for increased enthusiasm and loyalty on all sides.

Girls Advised to Be Careful as Men

"Girls should be as careful of the choice of the men they are to take into their lives, as Connie Mack is of the men he takes into his baseball team. And Connie Mack will not take a man who either drinks or smokes."

This was part of the motherly talk given the girls of the Young People's Branch Federation on Saturday by Mrs. Ella A. Boole, Ph. D., president of the New York State W. C. T. U., the mother organization of the Y.P.B. Continuing Mrs. Boole said in part:

"Never marry a man to reform him. There is too much danger. Better choose one into whose life the stains and scars of drink have never entered.

"A young woman should have the same respect for herself that a young man has. And a young man would not be seen walking on the street with a young woman who was smoking a cigarette or who carried on her teeth the stains of chewing tobacco.

"The young woman should demand the same standards as does the young man. I have seen too much unhappiness come into the home from the use of alcoholic liquors, not to know what it means. Selfishness, forgetfulness and neglectfulness follow man's use of alcohol and then unhappiness enters the home."

J. W. Distin Makes Strong Comparison

An ardent plea for temperance was made by Alderman John Distin, president of the Board of Aldermen, at the convention of the Young People's Branch Federation, W. C. T. U., held Saturday afternoon in the First Methodist church.

"Let me tell you," said the speaker, "that the temptations of the boys at the front during the Civil War were small as compared to the temptations which the youth must face in our large cities today. We are selling our own blood to get money. I have found that the drink traffic has much to do with our political life—and I do not speak of any particular party.

"I tell you the Raines Law is the most damnable law ever put onto the books of the State. More young men and young women are ruined by it than by any other thing in New York State.

"I have seen the tax for the insane keep growing greater and greater in the county when I was a member of the Board of Supervisors. After a while the insane tax got as large as all the other taxes of the county combined, then it got to be larger. When people began to try to find out the reason for this, the insane tax was changed from a separate tax and put into the general taxes, so that we could not tell how much it was."

Alderman Distin was given a rousing reception by the young people. He took the place of Mayor Fox who was scheduled to give the greetings of the City of Fulton to the convention.

Unite the Forces Says a Minister

The Rev. J. W. Barrett preaching in the First Methodist-Episcopal church Sunday morning advocated the union of all temperance forces on a simple platform of prohibition as the only means of ridding the country of the liquor traffic. A large number of members of the Y. P. B. Federation, who are attending the annual convention in the church, heard the chairman. Mr. Barrett said in part:

"If all organizations working for temperance will unite and push forward their cause vigorously this will be a saloonless nation in 1920. Our representatives in Albany will have to vote right if we insist upon it. We should vote as we preach and as we pass resolutions. When re do not we are practicing hypocrisy.

"The liquor traffic exists at the sufferance of the Christian Church. The moral cause has reached such a height that the man who deals in liquors is barred from the churches, from the lodges and from the trades unions. But as citizens we must learn to vote the same way.

"We are putting up mother's son 'for revenue only.' Tens of thousands of them have been sold since 1800. A million of them are on their way now. Their disfigured faces and bodies show that the liquor business is not legitimate."

HUNTER ARMS PLANT OPENS TOMORROW MORNING

The gladsome tidings are given out by a prominent official of the Hunter Arms, Inc., that the big gun-making plant will resume operations tomorrow morning, with a complement of about 175 men. This number was employed prior to the recent temporary suspension of work at the plant. The good news traveled at a rapid pace through the city today, and many were the congratulations expressed by mechanics and merchants.

UTOKA OFFICERS TO BE INSTALLED TONIGHT

At tonight's session of the Utoka tribe, No. 420, I. O. R. M., the newly elected officer will be installed by John Oathout, installing officer. The officiasl will be: Edward McCormick, Prophet; William Brown, Sachem; John Oathout, Senior Sagamore; Joseph Diggle, jr., Junior Sagamore.

John Oathout will go to Newburgh as delegate to the Great Council of the order when it meets next month.

To Rent—Rooms in Waldhorn block. Offices and living rooms. tf

LIBERTY BELL OFF ON ITS LONG TRIP

Philadelphia, July 5.—The Liberty Bell, precious relic of the American Revolution started Monday on its eighth and longest journey from Philadelphia since it was first hung in the old State House of the Province of Pennsylvania in 1752. It goes to the Panama-Pacific International Exposition, and before it is returned to its big glass case in Independence Hall next December it will have travelled more than ten thousand miles and will have been seen by millions of people.

On its journey to San Francisco the Liberty Bell special train will traverse Pennsylvania, Ohio, Indiana, Illinois, Iowa, Missouri, Kansas, Nebraska, Colorado, Wyoming, Utah, Idaho, Washington, Oregon and California.

Elaborate arrangements have been made for the journey and everything has been done that will aid in safeguarding the bell from injury. Four policemen from the Philadelphia traffic squad will guard the relic until it it again returned to its home.

The First Brigade, Pennsylvania National Guard, escorted the bell to its special railroad car. This is a specially constructed [illegible]r, with an iron railing at the sides and ends. The crack in the bell will be on the right hand side of the car as it journeys west. Even cities traversed in the night will get a glimpse of the relic, a system of illuminnation having been devised that will throw a blaze of light on the bell as it passes through in the darkness.

The train will arrive in San Francisco on Friday night, July 16, and Saturday, July 17, will be Liberty Bell Day at the Exposition. Early in the morning the relic will be conveyed to its place in the Pennsylvania building on the exposition grounds, where exercises will be held. The bell will leave San Frrncisco in November, and will return by the Southern route, through Los Angeles, San Diego, Arizona and Texas.

Sending the bell to the western coast will cost the city of Philadelphia $75,000.

PAUL F. GREENWOOD

Funeral services were conducted yesterday by the Rev. H. D. Holmes over the remains of Paul F. Greenwood, infant son of Mr. and Mrs. Fred Greenwood, of Natick, L. I., who died at the home of his grandparent sat Bowens' Corners. The services were held at the Case Memorial chapel and burial was made in Mt. Adnah cemetery.

ALBANY GOSSIP DAY BY DAY

Chronicle of Events and a Forecast of What is Doing in Officialdom—Special Correspondence.

By Frederic T. Cardoze

Albany, July 5.—With five proposed amendments to the State Constitution on the day calendar, the delegates will have considerable to occupy their attention when they return tomorrow after an adjournment of several days owing to the July Fourth holiday.

Although half a day has aready been devoted to debate upon the proposed amendment offered by H. Leroy Austin, which would permit the leasing of lands for agricultural purposes for more than twelve years, the proposition has not been disposed of; it may be tomorrow. Then there are proposed amendments by Delegates R. B. Smith, J. G. Saxe, H. Leroy Austin and Jacob Gould Schurman, which may be taken up by the Committee of the Whole before the convention finishes its work for the week.

The propositions presented by the above delegates provide as follows:

Prohibiting the granting of extra compensation to any public corporation, association or individual the right to approve a claim against the State.

Striking out the provision which authorizes the passage of a bill in either house of the legislature when accompanied by an emergency message from the governor.

Providing that the senate shall consist of six senators to be chosen by the electors and eighteen senators to be chosen in senate districts, such change to be effective after January 1, 1917.

There is another proposition on the calendar, whch is not expected to be reached during the present week, which also deals with a new method of dealing with the legislators.

Hearings will be in order during the week, several having been scheduled which are likely to be largely attended. Before the Committee on Suffrage on Wednesday, several propositions will be taken up. The most important of which provides that a qualified voter must be a resident of the county, town, ward or election district in which he may offer his vote for such time as may be provided by law. At the present time the time of residence is fixed at four months in the county and of the town, word or election district, thirty days.

Seven proposed amendments dealing with highway funds, bonds and cost will be discussed before the Committee on Public Utilities tomorrow also.

The Committee on Prisons will take up for consideration on Wednesday too, the proposition which seeks to provide for the creation of a State Board of Pardons and the proposed amendment to abolish the present State prison department and substitute a new department under another name.

Propositions dealing with the State Court of Claims will be discussed by the Judiciary Committee on Thursday. This committee will also deal with the several proposals aimed at the jurisdiction of inferior local courts. Capital punishment will also be discussed.

Various proposals dealing specifically with the city of New York will be taken up by the committee on Bill of Rights on Wednesday also.

From now on there will be no lack of activity in the Convention halls and debate of long duration will soon be prevalent. The large majority of the proposed amendments are expected to go down to defeat.

SUFFRAGE TORCH TO BE IN SYRACUSE

Syracuse, July 6.—Plans are being made here for the arrival of the suffrage torch which is being carried across New York State and which is displayed in every city and village where there are branches of the Woman's Political Union.

The torch, which is in the charge of Mrs. Harriot Staton Blatch of New York, president of the state union, is destined to arrive in this city July 12. when it will be taken to headquarters in East Genesee street by Mrs. Blatch and received by Mrs. Frederick R. Hazard, president of the Syracuse organization.

There's a homey taste to Black Baking Co.'s products. It's seldom found in bakers' goods. ... adv

Those You Know

C. I. Kingsbury of Mexico and Don A. Colony of Lacona were in the city yesterday, the guests of H. Putnam Allen.

* * *

Mrs. J. W. Barrett is entertaining her sister, Mrs. W. M. Holbrook, or New York, at the First M. E. parsonage.

* * *

Mrs. Belle Lewis, of Detroit, is visiting a number of relatives and friends in this city.

* * *

Mrs. Andrew Miller and son Bernard, who have been spending the past week with Mr. and Mrs. William Millier, of Rochester st., returned to their home yesterday.

* * *

Herman and Raymond Geinor of Minoa are the guests of Mr. and Mrs. William Miller.

* * *

Mr. and Mrs. Arthur Spaulding and family of Syracuse are guests of Mr. and Mrs. M. F. Crahan.

* * *

Mrs. Robert Ottman and son, who have been spending two weeks at North Bay, returned yesterday.

* * *

Miss Frances McCormick spent the Fourth with her sister, Mrs. Lynch, of Geneva.

* * *

Mrs. Daniels and two daughters of Rochester st., are spending a few days out of town.

* * *

The annual picnic of the Church of the Immaculate Conception will be held on the Fair grounds Saturday, July 26.

* * *

The young ladies of the church of the Immaculate Conception, who held a food sale at the Palmer-Hope hardware store, realized $16 from the work.

* * *

Andrew Crowe is entertaining his mother and his sister, Miss Alice Crowe.

* * *

Mr. and Mrs. M. O. Toole of Oswego, are rejoicing over the birth of a son. Mrs. O'Toole will be remembered here as Miss Anna Sheridan.

* * *

Miss Alice Tucker of Boston is the guest of her parents, Mr. and Mrs. A. P. Tucker, in 4th st.

* * *

Miss Emma Jones and mother and Mr. William Hicks spent the day at Long Branch.

* * *

Dr. and Mrs. Halstead of South 4th st. spent Sunday and the holiday at Syracuse and Old Forge.

* * *

Mrs. A. J. Donovan, who for the past three weeks has been ill at her home in 5th st., is improving.

* * *

Mrs. E. S. Scanlon of Rome, who has been with her daughter, Mrs. A. J. Donovan, has returned home.

* * *

Miss Ernestine Scanlon of Rome is with her sister, Mrs. A. J. Donovan.

* * *

Mrs. J. M. Piper has returned from a brief visit in Philadelphia and Allentown, Pa.

* * *

Miss Esther Ingamell of Emery st. has gone to Owasco lake, Auburn, to spend a vacation.

* * *

J. C. O'Brien returned today from Old Forge, where his family are summering. Mr. O'Brien is having improvements made to his Old Forge cottage, E. L. Stanton conducting the work.

* * *

J. W. Branche spent the Fourth in Mexico where he was the guest of his brother, Louis.

* * *

The Misses Elizabeth and Anna Murray of 101 S. 4th st., had as weekend guests, Mrs. William Burke and two daughters, Kathryn and Adelaide.

* * *

Frank Elliott of the McKinstry store is on a trip to Putnam, Conn., and New York. In the latter place he will look over the latest in Fall goods.

* * *

John E. Moore has returned to New York where he will take up a summer course at New York University.

* * *

Mrs. C. K. Howe, Mrs. J. Harry Howe and daughters left today for their summer vacation at Pleasant Point Club.

* * *

The Salvation Army realized about $33 yesterday from its annual "Tag Day." This, the Ensign states, is about one-third of that of last year.

Nothing quite so near the real home article as products of Black's sanitary bakery. adv

DAILY PROGRAM AT CHAUTAUQUA

FIRST DAY.

AFTERNOON. — Opening Addresses. Popular Vocal and Instrumental Concert.

WEATHERWAX BROTHERS QUARTET.

All brothers—All artistic entertainers.

4 P. M.—Organization of Junior Chautauqua for all children under fourteen years of age. Free.

EVENING.—Musical Prelude, High Grade Concert.

WEATHERWAX BROTHERS QUARTET.

Address, "Sour Grapes,"
DR. EDWARD AMHERST OTT
of Chicago,
A witty and purposeful speaker.

SECOND DAY.

AFTERNOON.—Grand Concert by a Great Company.

AIDA QUARTET and C. POL PLANCON

In a program of high order.

3:30 P. M.—Opening Series Lecture.

EVENING.—Musical Prelude, Choice and Snappy.

AIDA QUARTET and C. POL PLANCON.

Address, "The Mormon Kingdom of Today,"
HON. FRANK J. CANNON,
Ex-U. S. Senator from Utah.
A thrilling patriotic message.

THIRD DAY.

MORNING.—Lecture, 10:30 a. m.

AFTERNOON.—Musical Prelude, In Variety Program,

ROBERT and HELEN BARNARD.
Cornet, Stories, Xylophone.

Debate—For Woman Suffrage,
MISS HELEN TODD of California;
Against Woman's Suffrage,
MISS LUCY PRICE of Ohio.

EVENING.—Musical Prelude. More of the Same Quality.

ROBERT and HELEN BARNARD.
Comedy—Shakespeare's "Much Ado About Nothing."
THE BEN GREET PLAYERS.

FOURTH DAY.

MORNING.—Lecture, 10:30 a. m.

AFTERNOON.—Grand Popular Concert,

QUINTANO AND HIS BAND,
And HARRY BARNHART, Singer.

EVENING.—Musical Festival by a Real Master,

QUINTANO AND HIS BAND,
And HARRY BARNHART, Singer.
An entire change of program from afternoon.

FIFTH DAY.

MORNING.—Lecture, 10:30 a. m.

AFTERNOON.—Musical Prelude of Rich Variety.

R. H. and F. T. M'GRATH, Banjoists;
MISS GLADYS COOPER, Pianist.

Address, "The Misfortunes of Mickey,"
JUDGE BEN B. LINDSEY
of Denver,
The famous Juvenile Court Judge.

EVENING.—An Evening of Popular Selections,

R. H. and F. T. M'GRATH, Banjoists;
MISS GLADYS COOPER, Pianist.

Choice Entertainment by One Who Knows How,
MISS KATHARINE RIDGEWAY
of Boston.

SIXTH DAY.

MORNING.—Lecture, 10:30 a. m.

AFTERNOON.—Musical Prelude With Ginger In It.

CHRISTINE GILES-BINGHAM CONCERT COMPANY.

Address, "Community Building,"
J. S. KNOX.

EVENING.—Devoted to a Very High Grade of Fun.

CHRISTINE GILES-BINGHAM CONCERT COMPANY.

Entertainment,
RALPH BINGHAM
of Philadelphia,
One of the greatest humorists.
A joy night festival.

At the annual organization meeting of the Clifton Springs (N. Y.) Redpath Chautauqua Association, Mr. H. J. Van Dyne, secretary of the association, reported receipts and disbursements of $1. In explaining where he got the dollar Mr. Van Dyne stated that a lady insisted upon leaving it with him because her conscience troubled her for having paid only [illegible] [illegible] [illegible] for her Chautauqua season ticket. Next year's Chautauqua is guaranteed by [illegible] people.

CHARLES W. CANDEE

Phoenix, July 6.—Charles W. Candee died here yesterday at the home of his only surviver, a son, Charles Candee.

Mr. Candee was more than 90 years old, a life-long Congregationalist, and highly esteemed in Oswego and Onondaga counties where he lived all his life.

The funeral will be held tomorrow in Phoenix at 2 p.m. at the home of his son.

DID YOU SEE THE FOURTH O'JULY RAINBOWS?

Yesterday evening those who had occasion to turn their faces westward about 7 o'clock beheld a most beautiful spectacle.

Old Mother Nature observed the Fourth in all the splendor of the seven spectrum colors, by setting in the high heavens one of the most perfect rainbows ever seen. Then not satisfied she placed a secondary bow above the first, and the double spectrum arch against the leaden sky, crowning the rich vari-green foliage of the treetops, made a picture that set many tongues exclaiming. An old man with his umbrella tucked under his arm, and who had evidently walked in frrom the outskirts of the city, was heard asking about the evening's celebration, if there was to be one, and then said quickly, "Did you see the rainbow?—most perfect one I ever saw."

Patriotism Brought Trouble to Them

Hotelkeeper Charles F. Jones sustained a slight loss when a rocket pierced one of the show windows in his newly-fitted storeroom in West Broadway, Saturday night.

A number of young men were having fun by placing rockets in the trolley track grove, depending upon the contact of car wheels to explode the projectiles which were in most instances sent east or west through space. The rocket to make an exception to the rule of its prrecedessors was fired by a west-bound trolley car, but instead of following the car-track grove, in a friendly way, it left the track at the intersection of West 2d st., sailing directly toward the store window, without hitting a single neutral person in the neighborhood. A vulnerable spot must have been in the way of the projectile as the window was pierced through and through in a clean-cut manner.

Mr. Jones' loss is said to be trifling as the sheet of place glass was insured.

* * *

The rattle of a machine gun had nothing on the noise produced along West Broadway last night when the local trolley car ran over torpedoes for two blocks. On every trip the car was saluted with the string of torpedoes.

* * *

Several young men derived great pleasure from throwing cannon crackers into the doorway of the Onyx confectionery last night, until Officer Sweet, called from headquarters, appeared on the scene.

* * *

Pedestrians along Cayuga st. Saturday night were greeted with a gauntlet of young men who threw firecrackers, torpedoes and other fireworks, at the feet of the passers-by. One young rowdy threw a cannon cracker at a young woman, and the sparks ignited her dress. Her escort was nearly mobbed after he had punched the offender in the jaw.

BOY BROKE ARM JUMPING FROM CRACKER

Millard Francis, one of the Evening Times carrier boys, broke his arm yesterday in jumping from the explosion of a giant fire-cracker.

Millard, in company with some other boys, was near the N. Y. Central station when one of the boys set off a big firecracker near Millard, who was unaware of the fact. He jumped quickly but fell to the pavement and the result was a broken arm.

Last winter Millard suffered a boken arm as the result of a playful tussle with some companions.

PRINGLE AND FRIEND HAD TO FACE THE BAR

A man named Pringle with a friend named Howell, were escorted to the bar before Judge Wilson in City Court this morning, charged with public intoxication yesterday. Pringle had a badly damaged optic, which he received during the course of his celebration, and after both had entered pleas of guilty, Judge Wilson remanded them until Thursday morning.

OUTDOOR COOLNESS
with
Indoor Comforts

In the long summer evenings, when the house is still a little too "stuffy" for comfort, you will appreciate the pleasant coolness of the porch. Make sure that your porch is just as well lighted as any room in the house.

A 60-Candle Power Mazda Lamp

on the porch requires no more current than an old style carbon giving one-third as much light. An extension cord will give you light any place on the porch.

10 Watt to 60 Watt Lamps inclusive, 27c each

PHONE 144

Powder Explodes in Boy's Face

George Hall, the eight year old son of Mr. and Mrs. George Hall, of S. 3d st., may lose the sight of both eyes as a result of an accident yesterday. The little fellow went to his aunt, Mrs. William Hall, to get some gunpowder for a cannon. When he went he poured some of the powder into a flour bag and touched a match to it. When the bag did not explode, George picked it up and opened it. At that moment the powder exploded and the lad received the full force of the explosion in the facf and eyes. Dr. L. Fowler Joy was called at once and he succeeded in removing most of the powder from the boy's face. The eyes are so swollen, however, that Dr. Joy will not be able to determine the exact extent of the injury to the sight until the swelling is reduced. The boy was resting comfortably at his home this morning.

GRANGE PICNIC TO BE HELD ON FAIR GROUNDS

Arrangements have been completed for a Grange field day to be held on the Oswego County Fair Grounds, West Side, Wednesday, July 28.

Speakers of State and national prominence in Grange work will be invited and the program of music and fields sports will be on par with anything attempted heretofore.

The committee of arrangements comprises Henry J. Mace, master of Pomona Grange; W. C. Hubbard of Fulton; L. D. Beardsley, of Fulton, and D. W. Pickens, of Mexico.

THE QUIRK TODAY

The feature photplay is a Shubert five-reel masterpicture entitled, When Broadway was a Trail," with Barbara Tennant in the lead. "Paramount Travel series No. 8, passing through the Panama Canal from the Atlantic to Pacific, is also being shown. Tomorrow "The Hoosier Schoolmaster," in fivep artsw ith Max Figman in the start part, and "Housekeeping Under Cover," with Kathryn Osterman forms the usual excellent program.

FARE $3.00 DAILY BETWEEN BUFFALO & CLEVELAND

The Great Ship "SEEANDBEE"

"CITY OF ERIE" — 3 Magnificent Steamers — "CITY OF BUFFALO"

BUFFALO—Daily, May 1st to Dec. 1st—CLEVELAND

THE CLEVELAND & BUFFALO TRANSIT CO., Cleveland, Ohio

MR. LUCIUS WILSON

Said

CONCERNING THE YOUNG PEOPLE OF A COMMUNITY:

"Carry the idea to the young men of the community; they are your asset; keep them with and let them work with you. Do not discourage them; let them have their fling in business here that they need not go to other lands to vent their spirit of adventure. Keep the young man with you and you restore to the community the asset which you may be seeking.

"In slavery times a good slave was worth $1,000; today the young man who makes good is worth many times that to his community. You must create a willingness to let the young man try if you want to keep him. Don't discourage him in his plans, for initiative and creative ideas are the finest things in the world. Optimism, belief and a willingness to try is the saving grace in communities, as well as in individuals. In the west whole towns have gone bankrupt, but ten years later have been on the top shelf of prosperity."

A YOUNG NEWSPAPER

IS NO LESS VALUABLE TO YOUR COMMUNITY THAN A YOUNG MAN

when that newspaper is printed and published at home thus making for Fulton a real live industry.

THE EVENING TIMES

IS FULTON'S ASSET AND "A HERALD OF PROGRESS"

MILLIONS EAGER TO VENERATE LIBERTY BELL ON ITS LONG TRIP

Famous Relic of Independence Visits Seventeen States In Its Journey to Panama Fair.

Special Precautions Taken For Its Safety and to Enable It to Be Seen Day and Night.

IT is a safe estimate that millions of people will see the Liberty bell during its triumphal journey across the continent from Philadelphia to San Francisco and back. Never before in all its long and stirring history has the old bell aroused such keen and widespread enthusiasm.

On its trip to the Panama exposition its special route will take it through seventeen states, and it will probably make at least 150 stops. But if the appeals of all the places that want to honor the great symbol of American independence could be listened to the bell would visit every state in the Union and even make a tour in Canada.

The famous relic has been revered by millions on its previous trips, and it has been fertile for patriotism wherever it has been seen. On this occasion its patriotic significance will be felt more than ever before, and it will bring new fervor to Americans everywhere because of the critical times in our present national relations as pertaining to our position with the big powers now at war in Europe.

Illumined at Night.

Even at night and at places at which it cannot make a stop on its trip it will be seen. Arrangements have been made for it to be flooded with light during all the hours of darkness. Every hamlet on the way will therefore see it. It will ride through 3,000 miles of swelling cheers.

The nation's most revered historical relic will form the central feature of a great Fourth of July celebration at Philadelphia and will start next day on its big journey. It will remain on view in the Pennsylvania building at the exposition until October.

The trip will take twelve days, with generous stops allowed all along the line and the party of Philadelphians who will escort the bell will remain in San Francisco three or four days, as the guests of the Golden Gate City. They will return directly to Philadelphia then and the whole trip will require about three weeks.

Brigadier General John J. Pershing of Fort Bliss, Texas, has asked that the bell on its way back stop at El Paso, as there will be 5,000 soldiers there to see it, and a fitting ceremony will be arranged.

From Baker, Ore., a petition thirty-six feet long has reached Philadelphia asking that the bell stop there, where 12,000 school children want to see it.

All along the route traversed special opportunity is to be given children to see the beloved relic. At San Francisco every boy and girl in the city and surrounding districts will line the streets as the bell passes by. During its stay at the Golden Gate 5,000,000 youngsters hope to gaze upon the bell with awe.

$39,000 For Trip Cost.

The city of Philadelphia has voted $39,000 toward the expenses of the trip. Some of the items are: Fares (100 have to be paid for), $12,500; $500 switching charges, $250 for the special construction of the bell car, $3,700 for four Pullmans, $600 for the dining car and $2,500 for meals at the rate of $1.20 a meal for each person. These charges aggregate $22,800.

There are also the expenses of the parade incident to the moving of the bell from Independence Hall to the car, the cost of printing souvenir booklets, badges and the like and the pay of board for four policemen who will remain in San Francisco four months as a guard of the bell.

The members of the accompanying party are to be assessed $150 each to defray their incidental expenses. None of the appropriated money is to be used for cigars or incidental refreshment for instance.

The Liberty bell train is to consist of locomotive, tender, bell car, baggage car and three sleepers. The councilmanic party will be made up of twenty-four members, the presidents of the two chambers, two sergeants-at-arms, two chief clerks, a stenographer, a photographer, one representative for all the newspapers, four policemen, a rigger, the Pullman conductor, tourist agent and dining room steward.

Mayor Blankenburg of Philadelphia, head of the commission which has charge of the bell, was invited to accompany the party, but declined on the ground that he could not spare the time. He hopes, however, to make the trip direct and meet the bell on its arrival at San Francisco.

Patriotic organizations and citizens' committees all along the way will welcome the old bell. Apart from its special patriotic significance at the moment and the interest that has always attached to the Liberty bell, this occasion will be a historic one. It is almost certain that this will be the last trip the old bell will be permitted to make.

Fear For Its Safety.

There are many who fear the treasured bell will not return whole. There was strong opposition against its being subjected to the risks of the jolts of the long journey. Permission would not have been given but for the many petitions that sought it. Among those who urged the council to consent were President Wilson and almost everybody else whose name is in "Who's Who In America."

Metallurgists say the bell has a bad, chronic case of "disease of metals." There was much discussion among them as to whether its health would not be lost completely by reason of the long trip to the exposition. Some of the experts feared that it might be ruined utterly.

Imperfect mixture of metals in the original bell and the failure to get a homeogeneous admixture in the recasting are blamed for the cracks that are constantly spreading over its surface.

To minimize to the fullest extent the perils of the trip a special car, a veritable Pullman gondola, has been built to carry the bell westward. The car will offer the slightest possible vibration to the venerable metal structure. Passenger car springs have been provided, and strains and stresses will be reduced to the minimum.

The cracks in the bell are chiefly due, it is thought, to the frequent trips the bell has made about the country to various expositions. These journeys have not only extended the original crack, made at the time it was last rung, in 1835, but new hurts have been suffered, and there are a series of cracks that extend to many parts of its surface.

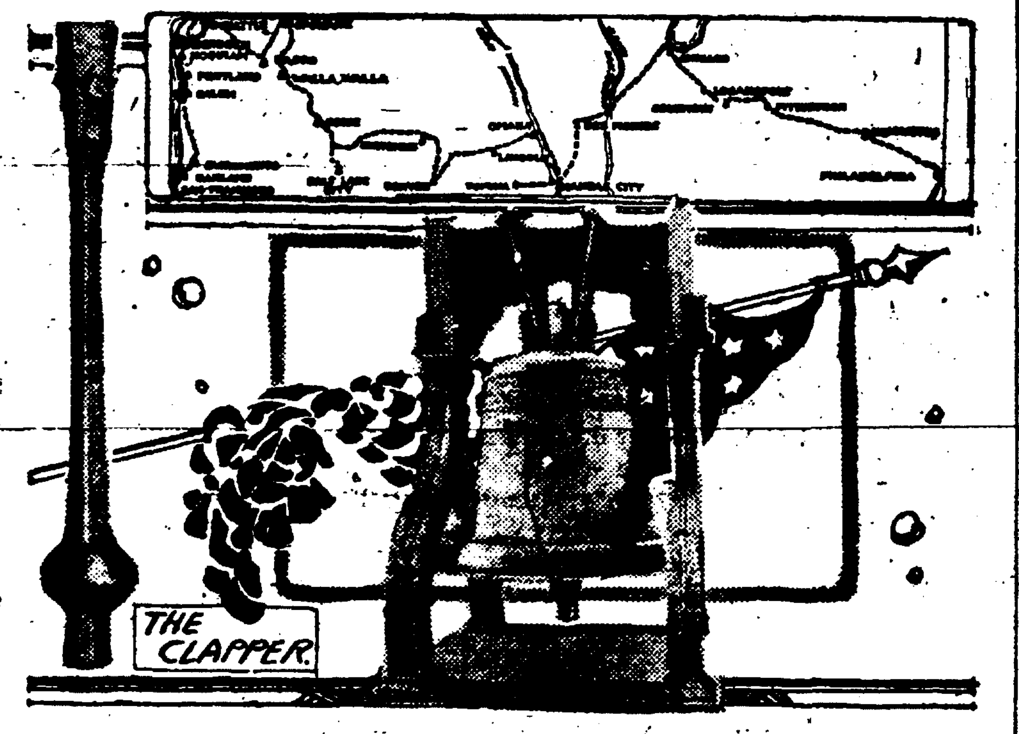
Old Crack Extends.

The bell was taken for exhibition purposes to New Orleans in 1885, to Chicago in 1893, to Atlanta in 1895, to Charleston in 1902, to Boston in 1903, to St. Louis in 1904, and it appeared in the Founders' day procession in Philadelphia in 1908.

A new extension of the crack to the crown is said to have developed when the bell was removed from its stand in Independence hall, Philadelphia, for the clapper to be taken out and preparations made to insure the bell's safety on the trip. Last year the old crack widened and reached the crown. The new crack is declared to have extended this at least six inches.

A steel "spider" has been clamped to the interior to prevent any further widening of the old crack by jolts and jarring on the railroad. This is of excellent workmanship and well inserted. It would even hold the bell together should a disastrous break occur. But it cannot in any way relieve the internal strain in the metal which is the cause of the cracking.

The bell has been mounted on special new supports carrying the original swinging block, and the "spider" framework inside is not visible. The old relic will be shown in its glass car on its long journey, and the clapper that helped to peal out the first glad tidings of American independence will also be exhibited beside it in a mahogany case.



LIBERTY BELL AND MAP OF ITS ROUTE TO PANAMA FAIR.

ITINERARY OF LIBERTY BELL ON TRIP TO WEST.

Monday, July 5.

Via Pennsylvania railroad.
Leave Philadelphia, E. T. 3:00 p. m.
Arrive Lancaster, Pa.... 5:00 p. m.
(Stop thirty minutes.)
Arrive Harrisburg, Pa. (capitol) .... 6:30 p. m.
(Stop thirty minutes.)

Tuesday, July 6.

Arrive Pittsburgh .... 2:00 a. m.
Via Pennsylvania lines.
Leave Pittsburgh ...C. T. 2:30 a. m.
Arrive Mansfield, O....... 7:00 a. m.
(Stop fifteen minutes.)
Arrive Bucyrus, O........ 8:15 a. m.
(Stop five minutes.)
Arrive Lima, O........... 9:50 a. m.
(Stop thirty minutes.)
Arrive Fort Wayne, Ind. 12:00 noon
(Stop forty-five minutes.)
Arrive Gary, Ind......... 4:15 p. m.
(Stop fifteen minutes.
Arrive Chicago .... 5:30 p. m.

Wednesday, July 7.

Via Chicago, Rock Island and Pacific railway.
Leave Chicago .... 12:05 a. m.
Arrive Peoria, Ill........ 7:00 a. m.
(Stop one hour.)
Arrive Rock Island, Ill.. 11:00 a. m.
(Stop fifteen minutes.)

(Stop fifteen minutes.)

Friday, July 16.

Arrive Marysville, Ore... 12:15 p. m.
(Stop fifteen minutes.)
Arrive Sacramento, Cal. (capitol) .... 2:00 p. m.
(Stop one hour.)
Arrive Oakland pier, Cal. 5:30 p. m.
Arrive San Francisco.... 6:00 p. m.

SEVENTEEN YEAR PEST DUE.

Farmers Are Warned to Protect Trees Against Swarm of Locusts.

That well known pest, whose reappearance at stated intervals has given him the name of "seventeen year locust," is on his way again. A warning from the department of agriculture says the coming horde of hopping, flying, buzzing things is expected to appear this month.

"Some recent experience," says the warning, "indicates that trees thoroughly sprayed with Bordeaux mixture or a lime wash are apt to be avoided, especially if there are other trees or woods in the neighborhood. The most reliable means of protecting nurseries and young orchards is by collecting the insects in bags or umbrellas from the trees in early morning or late evening.

"The worst affected branches should be removed. The less injured limbs may be coated on the wounded parts with grafting wax or moderately hard soap."

A FLOWER AMONG WEEDS

Story of the Eighteenth Century.

By F. A. MITCHEL.

During the reign of Louis XV. France [illegible]ched a culmination of profligacy [w]hich had been growing for years. [W]hile the king was in his minority the [re]gent, his uncle, Duke of Orleans, set [th]e example of debauchery to the court [an]d through the court to the kingdom. Louis himself, on assuming the scep[te]r, by continuing in his uncle's foot[st]eps completed the work of laying the [fo]undation for the French revolution [w]hich broke out during the reign of [hi]s successor.

During the regency of the Duke of [O]rleans the wealthiest nobles owned [e]states in different parts of France. Only the more moral of these lived in their country chateaus, for the profli[g]ate could not endure to live elsewhere than in Paris, where the intriguing [a]nd debauchery were going on. Among those who preferred the virtue of rural life was the young Marquis Gaston de Roquette, who, though a soldier of acknowledged bravery, had a mind capable of foreseeing the ruin the regent, the princes of the blood and the nobility were bringing upon France.

However, the marquis was obliged occasionally to go to Paris either at the call of the regent or on account of some duty connected with his station as a peer of the realm. One day on the street on which stands what was then the palace of the Louvre he passed a young lady riding in her "chair," the very sight of whom deeply impressed him. She was not only beautiful, but a natural purity showed itself in every line of her countenance. This was the more noticeable, for at that time the women of the court were as bad as the men, and the lives they led were discernible in their features.

The marquis followed the young lady with his eyes, and when he saw her carried into the palace he heaved a sigh, for he did not believe that any woman could enter that royal abode and be good. Her entrance there, however, proved that she was a lady of rank.

The marquis' duty to the sovereign later called him to the court, and he saw there the lady whom he had met in her "chair." Hanging over her was a famous but notorious duke, the most pronounced and successful beau of that period. He was a very wealthy man, and he was also the most accomplished villain of his day. Three times he had been in the Bastille, the third time for having attempted to betray France.

Another sigh marked the marquis' discovery that the girl who had made such an impression on him was probably falling into the hands of this notorious villain. Leaving the palace without even inquiring the name or rank of the young lady, M. Roquette returned to his estate and, shutting himself up in his chateau, endeavored to banish her image, which had haunted him since the first moment he had seen her.

This was not possible. To the young such impressions are very strong. What it was in that pure face that had taken hold of him he did not know. What he did know was that she was a member of a profligate court, that he had seen its most notorious rake hanging over her, and he did not doubt that sooner or later she would go down under the influences which surrounded her.

Gaston de Roquette remained on his estate for a month without returning to Paris. Often was he tempted to go there for another glimpse of the face that had enthralled him, but he believed that in yielding to the temptation he would only bring upon himself greater pain. So he devoted himself to the care of his estate and to his tenants. He endeavored to occupy himself with his books, but this was impossible, for, whatever he did, his mind was upon that pure being, growing like a flower in the midst of poisonous weeds.

Whether it was that the young marquis was a poor sleeper or that Cupid was keeping him awake, he went to bed late and at times when unable to sleep would arise, dress himself and walk about outside. Not far from the chateau was the church where he and his household and his tenants worshiped and about which their forefathers slept. Within the structure were the bones of the De Roquettes incased in sepulchers or under the flags, the sepulchers supporting marble figures of the departed, while here and there were the arms the men had borne in war.

Gaston de Roquette often strolled about during his midnight walks in the churchyard, but had never cared to enter the church at night when it was deserted. One night when troubled with sleeplessness he was strolling in the grounds near the chateau when, glancing toward the church, he saw a light apparently within the structure. Thinking that he had seen a firefly, he was turning away, when he saw the light again, this time shining evidently through a different window than before. Surely some one was moving in the church. Walking toward it, he went to a window and looked in, [illegible] no light except that the [illegible] revealing the recumbent marble figures on the sepulchers.

Thinking again that he had been mistaken, he was about to turn away when it occurred to him to try the knob of the door at the main entrance. To his surprise, the door was not locked. Entering the church, he found no one, but through a crack in a door leading from the chancel to a room used by the priest and acolytes came a ray of light. What could it mean? The pastor of the church was an old man, too feeble to be engaged in any church duty at dead of night. It was no religious matter that was being observed.

The marquis was about to walk toward the door through which the light came when it opened and half a dozen persons came out of the apartment. They bore lights, but so dim were they that De Roquette could not distinguish the faces of the several members of the party. There were a priest who was unknown to him, two men and two women, evidently persons of rank, and the last two to enter the church were a man and a woman. From this woman's dress De Roquette judged that the couple were about to be married. The little party moved toward the chancel, where the priest stationed himself, the couple before him, the two other men on the side of the groom, the two women on the side of the bride.

The marquis walked softly forward, hoping to get a nearer view of the faces, but before he reached a point of vantage their backs were to him. The priest faced him, and he saw at once that he was not the pastor of the church. To the marquis' astonishment he recognized in a priest's garb a worthless fellow of the neighborhood, who had served several terms in prison as a malefactor.

Assured that some piece of villainy was being perpetrated, De Roquette seized an enormous sword resting on the tomb of one of his ancestors and, pushing forward till he stood directly behind the wedding party, cried out:

"I forbid the bans!"

The false priest looked up from a book he held in his hand, and the others turned quickly.

Then did the marquis meet with a great surprise. The attendants were men and women of the court. The groom was the profligate duke, while the bride was the lady of whom the marquis had been dreaming. She had entered with apparent reluctance and now looked up like a frightened bird. The duke, with the assurance that often characterizes vice, knit his brows and said threateningly:

"Who are you, monsieur?"

"Gaston, Marquis de Roquette, proprietor of the estate on which this church stands. No ceremony is permitted here except it is conducted by Father Arouet, the pastor. Surely none will be permitted by one not in orders and the veriest scamp in the province!"

Paralyzed by these words, the group, all except the bride, stood as if discovered in a crime. Then she, breaking away from them, flew to De Roquette and, catching at him for protection, stood regarding the others in terror. Raising the ponderous sword, the length of which was nearly equal to his own height, he stood ready to bring it down upon whomsoever might interfere with him or her. The duke, drawing the rapier at his side, advanced, paused, then said to the girl:

"Emilie, will you not return to me?"

She made no other answer than to cower behind her protector.

"This is no place, marquis," said the duke, "for a dispute among men. Let us go out among the graves. The sexton will not have far to carry you in the morning."

"I will certainly give your grace an opportunity to cross swords with me," replied the marquis, "but not at the present moment, unless you force me to do so. My first duty is to protect this lady, and I see no one here with whom I may safely leave her."

One of the attendant men sprang forward and seized the duke by the arm. He was followed by the other man, then by the women. All pleaded with him to desist.

"This will make a scandal," they argued, "that will put you again in the Bastille and send the rest of us to our country estates, where we will have nothing to do but pine for Paris. We were foolish to abet you in this wild scheme. And the Countess Emilie! Do you suppose the powerful family to which she belongs will not avenge this insult if it becomes known? Give up your mad scheme. It is doubtless fortunate that it has been interrupted, and if it can be kept secret none of us may suffer on account of our part in it."

The duke stood burning to proceed, but all declared that it was of them that he should think and not of himself, though an exile to the country would be less irksome than the Bastille. Finally he sheathed his sword and, after one more appeal to the countess to come to him, he was hurried out of the church by his friends, leaving the marquis and the girl he had saved from a mock marriage alone together.

Here stops the chronicle of one of the vilest episodes of the time of the regency of Philippe of France, but one which in that day was known only to a few. Later Gaston Marquis de Roquette and Emilie Countess de Vandiere were married in the very church where the mock marriage had been interrupted. And it is a matter of record that neither of them ever again appeared at court. Surrounded by their children, adored by their tenants, they lived a life of simplicity and purity.

But when at the end of the eighteenth century the people of France rose to throw off the yoke of a profligate nobility the innocent were made to suffer with the guilty. The marquis and marquise's grandchildren paid [illegible]

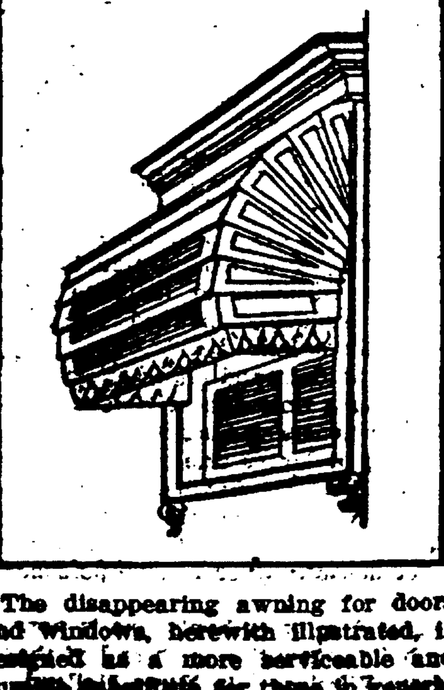
Fairylike Creation of Tulle

Designed by Hickson, New York.

THIS fairylike creation is built up principally of tulle and satin. The tulle is used lavishly and forms a two flounced skirt, with an underskirt of shell pink satin daintily embroidered with tiny seed pearls in a sunburst design. The bodice is sleeveless and has a high girdle of the shell pink satin with tulle in soft folds drawn over the shoulders, forming shoulder straps. The snug little bodice is also studded with seed pearls and a string of the pearls suspended from the girdle and twining around the neck may also be worn as a further ornamentation. ANNA MAY.

HINTS FOR THE BUSY HOUSEWIFE

Collapsible Metal Awning For Doors and Windows.



The disappearing awning for doors and windows, herewith illustrated, is designed as a more serviceable and durable substitute for those in general use. An additional advantage claimed is that, when the new style awning is raised, it entirely disappears and leaves the full opening of the door or window for the passage of air. With the use of awnings of fabric there is always a certain amount of the opening blocked off with the loose fabric of the shade. The new idea consists of metal forms shaped to collapse one within the other and all pivotally mounted at either side. Small perforations and slots made in the metal permit of the passage of the air without admitting the sunshine.

Chili Sauce, Oregon Style.

Five pounds ripe tomatoes, five medium sized onions, three large tart apples, one bunch celery, three green sweet peppers, one chili pepper, one-fourth tablespoonful each cloves, cinnamon, allspice, ginger; one tablespoonful ground mustard, one heaping tablespoonful salt, two tablespoonfuls brown sugar, one pint cider vinegar. Cook the tomatoes, run through a sieve or ricer to remove seeds; chop the onions, apples, celery and peppers [illegible] or, better yet, run them through the food grinder; add to the tomatoes, cook until well done. When nearly done add the other ingredients. Seal while hot.

Washing Knitted Shawls.

To wash knitted or crocheted shawls fold them as flat as possible and lay carefully in a pillow case, run through at intervals with basting thread to keep flat. Then they should be handled like other flannel or woolen goods. If washed separately observe the usual precautions for woolen goods, gently squeezing through the hands and keeping the suds and rinsing water of the same lukewarm temperature. Take out of pillow case, but do not hang knitted goods up to dry. Lay on a clean cloth in the sunshine.

Chocolate Pie.

Two eggs, one-half cupful of sugar, two tablespoonfuls of grated chocolate and two tablespoonfuls of flour. Mix together the flour, chocolate and sugar, then add the eggs and, lastly, one and one-half cupfuls of boiling water. Cook the mixture until thick, pour into a baked pastry shell and cover with a meringue made of the stiffly beaten white of an egg, one tablespoonful of sugar and a few drops of any preferred flavoring.

Rice and Pimentos.

A small can of pimentos, a cupful of rice, a cupful of grated cheese, two eggs, one and a half cupfuls of milk, salt and pepper to taste. Wash the rice and boil it in boiling salted water, then drain. Add the cheese, the pimentos, first having cut them in small pieces, the eggs which have been well beaten, the milk and the seasonings. Turn into a buttered fireproof dish and bake in a moderate oven for twenty minutes.

Shaker Codfish.

Pare six medium sized potatoes and boil till soft with one-half pound of salt fish that has been soaked twelve hours or overnight. Drain off the water. Cut the potatoes into slices and pick the fish into small pieces. Add one cupful of thin cream and a piece of butter the size of an egg and let simmer. Season with salt to taste. Slice hard boiled eggs on top of the fish and potato, and over all pour a white sauce before serving.

[illegible] past lives build the present, [illegible] must mold the lives to be.—Sir [illegible] Arnold.

CHERRY SEASON.

This Is the Time of Year When Fruit Is at Its Best.

MANY WAYS TO USE IT.

Desserts and Salads Can Be Made as Well as Frozen Dainties—Several Recipes For Use of Cherries Given Below.

Try a cherry dessert with rice for the children's dinner. Drop large cherries into a hot rich sirup until they are heated through. Have some boiled rice ready and pile the cherries on a nest of it on the platter, serving the whole with whipped cream. Garnish, if possible, with a few cherry leaves or two or three clusters of the dipped cherries to which the stems are still fixed.

Cherry Salad.

Select some firm, ripe bananas that are not too long. Loosen a strip of the skin, turn this back with a spoon carefully and remove the inside in small pieces. Allow half a cup of the banana to each cup of cherries. To make the dressing, take the juice from the cherries and mix with lemon and orange juices to taste, sweetening with pulverized sugar as necessary. Pour this over the salad and put the mixture on the ice. Just before serving stir the ingredients together lightly, pack them into the banana cases and serve on individual plates garnished with cherry leaves and pitted cherries.

Cherry Betty.

Butter a deep baking dish and cover the bottom with a layer of stoned cherries. Sprinkle the fruit with sugar, nutmeg and cocoanut. Add sufficient cherry juice to moisten. On top of this spread a layer of breadcrumbs and continue in alternate layers of fruit and crumbs until the dish is full. See that the top layer is one of breadcrumbs. Cover and steam in the oven for one hour; then uncover and brown quickly. Serve hot with sweetened cream as a sauce.

Cherry Roll.

Sift together two cupfuls of flour, two teaspoonfuls of baking powder and a pinch of salt. Beat two eggs, add to them a cupful of milk and a rounding tablespoonful of melted butter. Mix with the dry ingredients to a light batter and stir in two cupfuls of pitted cherries. Turn into a well greased pudding mold having a tightly fitting lid and steam for two hours. Turn out, garnish with cherries and serve with hard sauce.

Cherries In Jelly Mold.

To one pint of juice drained from stewed cherries add sugar to make quite sweet and let it come to a boil. Dissolve a tablespoonful of granulated gelatin in cold water to cover, pour over it the boiling hot cherry juice and strain into a border mold. Set aside to become firm; then turn out carefully on a low glass dish, fill the center with pitted, sweetened cherries and heap over all whipped cream.

Cherry Shortcake.

Sift together two cupfuls of flour, a heaping teaspoonful of baking powder, two tablespoonfuls of sugar and a teaspoonful of salt. Rub in half a cupful of butter and mix with a well beaten egg added to a half cupful of milk. Make the dough soft, roll out about an inch thick and bake for about twenty-five minutes. When done split carefully, butter well and cover with half of the cherries, from which of course the stones have been removed. Sprinkle with sugar. Butter the top layer, cover the cherries, sprinkle with powdered sugar and serve with whipped cream. The cherries should be very ripe.

Cherry Toast.

Cook a pint of pitted cherries with a cupful of sugar until the fruit is tender. Have buttered slices of toast ready, pour this mixture over them and when cold serve with whipped cream.

KING BECOMES CORPORAL.

Victor Emmanuel Gets Grandfather's Place In Famous Zouaves.

King Victor Emmanuel of Italy has been appointed a third corporal in the First section, First company, First battalion of the Third Zouaves by the regiment's commander, Lieutenant Dencausse.

This place was held by the king's grandfather on the night of the battle of Palesto, June 1, 1859, in which the Austrians were defeated by the French and Italian allies.

The United States wants peace [in] Mexico, and 99 per cent of the Mexicans want help, not nagging, toward securing and preserving peace.

Any way you look at it, youngsters, that graduation essay will be cheerful and instructive reading in your later years. So salt it down.

Whether to get the warring Mexican factions together or keep them everlastingly on a long distance circuit, who will decide?

More power to Wilson's elbow to win the Mexicans back to the peaceful cigarette, the long mute guitar and chile con carne.

Arbitration always appeals to the public, which eventually bears the burden of [illegible]

Hints For Housewives

American Housewives Can Mix Their Own Flour.

That the American housewife is herself quite capable of doing all the flour mixing desirable, is the commentary of Assistant Secretary of Agriculture Vrooman on the mooted mixed flour question. He says further that the American housewife could materially reduce the cost of living if she were to get the flour mixing habit.

"There are some thirty substitutes that can be mixed with wheat flour in making bread. Many of these are more nutritious than wheat flour; some of them are cheaper than wheat flour, and of these two or three at least are commercially obtainable almost anywhere.

"Potatoes, corn flour and rice (in certain sections) can be used with profit in mixture with wheat flour in making yeast bread. With wheat flour as dear as it is now, the careful housewife stands to effect quite a saving by using one of these products to eke out her wheat flour. Experiments have shown that the substitutes can be used successfully in the proportion of one part to three parts of wheat flour. At least three-fourths of the mixture must be good wheat flour.

"Potatoes have a certain advantage in this regard, since potato bread can be made without going to the trouble to get the commercial potato meal. Plain mashed potatoes, four parts of mashed potatoes to three parts of wheat flour, will serve the purpose quite well. If the dry potato meal or flake is used the ratio should be one part of potato to three parts of flour. Boiled rice can be used in much the same way as mashed potatoes, care being taken to allow for the water in the rice and to use about three times as much in bulk as would be used of the rice flour.

"In making potato bread the sponge should be used and just enough water to serve to mix the yeast with the potato, since the sponge becomes very soft after partial fermentation. The remainder of the flour is worked in afterward, care being taken to make an extra stiff dough, which should be raised till quite light. This bread is much moister than bread made of straight wheat flour.

"Corn flour, which should cost about two-thirds the price of wheat flour, may be mixed with wheat flour direct, one part of corn flour to three parts of wheat flour. Use the mixture just as though it were wheat flour, and mix it yourself.

"It should be remembered that the addition of starchy materials, such as potatoes, rice or cornstarch (which is sometimes used to adulterate wheat flour in baking), tends to make a loaf less rich in protein and hence less nutritious than the straight wheat flour. The addition of corn flour makes little if any change in the nutritive value of the bread, but makes it cheaper.

"There are other flour substitutes, such as soybean meal and pea flour, which serve to add greatly to the nutritive value of the loaf when mixed with wheat flour. These products unfortunately cannot be recommended in the present emergency, since they are not as yet common articles of commerce in this country.

"In this connection it should be said that a great saving could be effected if the housewife would emulate the professional baker and buy low grade wheat flours. There are flours on the market quite as good for home baking as the fancy patent flours, which cost in bulk from 25 to 40 per cent less than the fancy grades. Such are the so called 'second clear' and 'low grade' flours, which are graded lower than patents merely because they are darker, not because they are any less nutritious or less palatable. In fact, the darker color may be evidence that the flour is more nutritious than white flour.

"Boston brown bread may be mentioned as a good and very popular medium for the profitable use of flour substitutes. It is made of equal parts of corn meal, rye meal and graham flour and is a very nutritious bread.

"There are various ways of making over bread itself so as to effect a considerable saving. Thus stale bread, crusts, crumbs, etc., can be worked into palatable products such as bread pancakes, breadcrumb biscuit and breadcrumb cookies.

"The nub of the mixed flour question hangs on who does the mixing. If the housewife does the mixing she gets the saving entailed. If the baker or the wholesaler does it he is very apt to get the saving as additional profit."

To Make That French Twist.

A simple way to arrange the French twist is to gather up the hair that grows upon the crown of the head, as if one were to form an old fashioned roach, as displayed in the old time photographs. Pin this so it will be out of the way. Take the back hair and a bit above the ears and do in a French twist. With the topknot hair form a thick, wide roll from one side to the other. Anchor with a hair net. You will look a bit weird, but what matter? You will be in style, and think what glory that is. Though the freaks of fashion be absurd, to disregard them entirely is to drop behind. And then, who knows? It may be comfortable to be frumpy, but it creates a positive dislike for the lady in the looking [illegible]

HOLT IDENTIFIED BY FOUR AS CAMBRIDGE WIFE MURDERER

New York, July 6.—Frank Holt, the assailant of J. P. Morgan, although sullenly refusing yesterday to aid the authorities to clear up the mystery of his real identity, announced that when arraigned on Wednesday he would tell the whole story of his life.

He informed Dr. G. F. Gleghorn, the Mineola jail physician, he was ready to tell in open court of his recent movements leading up to the placing of the bomb in the United States Capitol at Washington and the attempted assassination of Mr. Morgan.

This statement, according to Holt, will include the details of where and how he secured the dynamiate used in the Washington bomb and the three sticks of the explosive found in his suit case when arrested on the Morgan estate.

Positive indentification of Holt as Erich Muenter, the Cambridge wife murderer for whom the authorities have been conducting a nation-wide search the last seven years is still incomplete. Four Chicago relatives, however, insist after seeing his photos that Holt and Muenter are one.

The mass of information collected by the New York and Cambridge police served only to confuse the Nassau County authorities who are using every endeavor to establish the origin of Holt and his movements prior to 1906.

Charles Wood, assistant district attorney of Nassau county, who was in Harvard University while Muenter was there as a German instructor, visited Holt in the Mineola jail. Holt denied that he had ever murdered a wife, and Mr. Wood announced it as his opinion that Holt was not Muenter.

Still doubtful, however, Mr. Wood made a second visit to Holt's cell, after which he announced that he desired to withdraw the first statement as he was not surre Holt was not Muenter after all.

DETECTIVES UNDER FIRE OF ANARCHIST'S SHELL

New York, July 6.—Anarchists, angered by the conviction of the men who placed a bomb in St. Patrick's Cathedral, gave defiance to the detective force last night when they attempted to blow up Police Headquarters, Grand and Center streets, by exploding a powerful dynamite bomb beneath the offices of Inspector Gray and the Detective Bureau.

Dynamite in a gas pipe containing a time fuse and concealed in a cheap suitcase was placed in the door of a basement areaway on the Center street side about twenty feet from Grand street and the corner stone of the building.

At seven minutes to nine o'clock the bomb exploded, smashing all of the windows on that side of the building, reducing a three-inch oak door to kindling wood, hurling desks and furniture from their positions and sshowering glass as fine as powder for fifty feet both inside and outside of the building.

The windows on the opposite side of the street also were broken, and persons in the police department were thrown frrom their chairs to the floor. Large metal slugs whistled thrrough the air like shrapnel from a shell, cutting through doors, windows and partitions and completely wrecking that part of the basement where the bomb had been placed.

No one was injured, the block being empty at the time and only a passing trolley car in sight. Heavy shades on the windows of the detective bureau, which were drawn, saved Lieutenant Edward F. Malley and Patrolman Joseph Evans, in the room above the explosion, from injury, although glass, a quarter of an inch thick, from an upper window, showered around them. One great jagged pane passed the face of Evans, sitting at a typewriter, and cut through a report he was making out.

HOLT ATTEMPTS TO END LIFE; OPENS WRIST

Guard Prevented Him from Using Lead Pencil to End Life—Loses Much Blood.

Glen Cove, N. Y., July 6.—The assailant of J. P. Morgan, Frank Holt, confessed to setting the bomb that exploded at Washington Friday night and then attempted to kill himself by opening an artery in his wrist with the tin end of a lead pencil.

The atempt was unsuccessful, as he was discovered in his cell by an attendant, suffering from pain and loss of blood.

LARGEST AND SMALLEST FISH CAUGHT ON ONE DAY

W. E. McCormick, who is spending the warm months at the Smokeless Powder Gun club camp north of the city, caught a four pound black bass yesterday at the camp and carried off the holiday honors among the anglers.

Frank Rumsey and W. C. Morgan occupied the same boat, and although Mr. Morgan was hauling the fish in at a great rate, Mr. Rumsey had little luck until he electrified the party by catching the smallest fish of the day, a black bass measuring exactly two inches over all.

The campers enjoyed a beautiful fireworks display in the evening until the rain forced the company to seek shelter.

HEAVY MORTGAGE TAX RECEIPTS IN FIVE MONTHS

The five months ending Saturday were record breakers at the county clerk's office, reports Zopher D. Stanton. In that period the office received a total of $23,364.76 mortgage tax, of which the State gets one-half and the towns in which the property mortgaged is located receives one-half.

The record by months follows: February, $3,329.30; March, $13,884.30; April, $558.33; May, $167.58; June, $55,725.25. The 50,000,000 mortgage of the New York Central and the mortgage of the Northern New York Power Company at Minetto are among the larger sources of income from this tax.

CHURCH PLANS RECEIVED FROM ARCHITECT BRAZER

Lawrence W. Brazer, architect for the new Zion Episcopal church, has forwarded to Rev. M. J. Peters, pastorr of the church, a set of plans and outlines for the new edifice. None of the details have been planned as yet, and the set just received will simply give a general idea of the architecture and exterior of the church.

Rev. Mr. Peters said this morning that the committee expected to let the contract for the work within the next four weeks.

STAGE MEMBERS' EYES UPON THE WEATHER MAN

If good weather doesn't take a vacation tomorrow, the Pathfinder Boat club will hold the first Stag day of the season. The club has planned the Stag day some weeks back, but rain put a danger on the proceedings every week. With fair weather, the house committee believes many of the male members of the club will gather at the island tomorrow afternoon.

Saving a Gunboat.

When the United States gunboat Princeton struck an uncharted submerged rock in the harbor at Pagopago, Samoa, a very unusual engineering feat was employed to save the craft. A pinnacle of the rock which was struck entered the hold of the ship, filling the rent torn in the hull and preventing any progress being made. It was possible to keep the water out by means of canvas and plank sheathing. Then the projection of rock which had cut into the boat was cut from its ledge and by re-enforcing and cementing made fast so that it plugged the hole it had made. This accomplished, the Princeton was able to proceed to drydock for repairs.—Exchange.

Midnight Messages.

The hour grew late.

"Do you believe in mental telepathy?" asked the first clubman.

"I do," answered the second clubman. "I know what my wife is thinking right now."—Washington Herald.

WEATHER FORECAST

Fair tonight and Wednesday; west to southwest winds.

ARE PUMPING DRY THEIR ZUIDER ZEE

Dutch Busy on Big Scheme Despite War.

COST WILL BE $75,000,000

Will Reclaim Half Million Acres of Land on Which 250,000 Persons Are Expected to Find Homes—Railroad on Embankment Will Connect North Holland With Friesland.

Despite the war Holland is proceeding with the giant project of pumping the Zuider Zee dry. Thus will be reclaimed 500,000 acres of land, on which 250,000 persons are expected to find a home. The cost will be about $75,000,000. The work will occupy thirty-three years.

Holland owes her independence today largely to the fact that 38 per cent of her surface is below sea level. Any neighbors that covet Holland's magnificent seaboard know that to conquer they have to reckon not only with the Dutch army, but with the sea the Dutch would let in between themselves and the invaders.

The Zuider Zee itself is a result of the bursting of the dyke. This happened in the thirteenth century, and in addition to Holland being cut virtually in two and Friesland being separated from the rest of the country by a turbulent sheet of water, hundreds of villages were submerged and some 80,000 persons drowned. In 1421 there were terrible inundations, in which seventy-two villages were swept away, with the loss of nearly 100,000 lives.

When the Dykes Burst.

More terrible still was the disaster of 1570, when at one time it looked as if the greater part of the country would be blotted out of existence by the angry seas. A continued and violent gale from the northwest had long been sweeping the Atlantic waters into the North sea and had piled them up on the fragile coasts of the provinces. The dikes, taxed beyond their strength, burst in every direction. Dutch Flanders to a considerable distance inland was suddenly invaded by the waters of the ocean.

Dort, Rotterdam and many other cities were for a time almost submerged. Along the coasts fishing vessels and even ships of larger size were floated up into the country, where they entangled themselves in groves and orchards or beat to pieces the roofs and walls of houses. Over 100,000 persons perished.

A great dam or embankment is now being built across the north end of the sea from Wieringen, in North Holland, to Piaam, in Friesland.

World's Longest Embankment.

It will have a length of nearly fifteen miles, easily making it the longest of sea embankments. On the inner, or Zuider Zee, side it is to carry a double line railway and a road for ordinary traffic, thus affording easy access between North Holland and Friesland. Communication with the North sea will be maintained by thirty-three large sluice gates and a couple of locks for shipping.

The construction of the embankment is alone expected to occupy nine years.

Within the embankment four areas known as the northwestern, southwestern, northeastern and southeastern are to be drained and reclaimed, each of which is to be apportioned to the province which it adjoins. These reclaimed sites will have an area of 54,270, 78,800, 127,125 and 269,410 acres, respectively, or a total of 529,605 acres, of which 436,025 are clay and sandy soil suitable for farming.

The northwestern area will be the first to be drained, and the method of procedure will be as follows: After the great embankment has been built along its northern end it will be divided into four parts by construction of low inner dikes, from each of which water will be pumped out separately. For this work four steam pumps of 1,900 horsepower each will be erected.

BRITISH FOOD PRICES SOAR.

Cost of Living Jumps 43 Per Cent as Result of War.

Prices of foodstuffs in Britain have advanced 43 per cent all round since the beginning of the war. Bread has gone higher still. It is now 18 cents a four pound loaf, which in peace times was only 10 cents.

According to figures furnished by the British board of trade it would appear that certain articles of food have increased much more in England than in either Berlin or Vienna. A comparison of the increase in the same articles in the various cities is as follows:

	Per Cent. London.	Berlin.	Vienna.
Beef, hind quarters	67.2	11.3	48.0
Pork	44.7	45.7	182.0
Butter	36.1	26.9	121.0
Potatoes	24.1	75.0	3.4
Sugar	84.45	8.0	6.7

Would Vaccinate Federal Employees.

The public health service has issued a warning to the 400,000 government employees in the United States to get vaccinated against typhoid fever during the summer months. It states that seventy-five government workers die every year from the disease.

"NO WAR WHILE I AM SECRETARY," MR. BRYAN DECLARED IN 1913.

In a speech on May 12, 1913, to visiting British, Canadian and Australian delegates on the treaty of Ghent celebration Mr. Bryan told the diners that there would be no war while he was secretary of state and that he would never have accepted the portfolio of the premiership if he had thought for one moment that there would be war during his incumbency of the office.

In his speech Mr. Bryan said: "I made up my mind before I accepted the offer of the secretaryship of state that I would not take the office if I thought there was to be a war during my tenure.

"When I say this I am confident that I shall have no cause to change my view, for we know no cause today that cannot be settled better by reason than by war.

"I believe there will be no war while I am secretary of state, and I believe there will be no war so long as I live. I hope we have seen the last great war."

ELECTRIC FANS IN TRENCHES.

German Officers' Quarters Underground Had "All Modern Improvements."

The officers' quarters of German trenches captured near La Quinque Rue in France were wonderful concrete constructions fitted with electric lights and electric fans and drained by electric power. The electricity was supplied from a plant at the coal mines of La Bassee.

The French who captured these trenches benefited by all these modern improvements for several hours until the Germans cut the wires.

AMERICAN WOMAN HONORED.

Roumania Decorates Mrs. Jackson For Red Cross Work.

The Roumanian government has decorated Mrs. John B. Jackson, wife of the former United States minister to Roumania, for her aid in Red Cross work during the last Balkan war.

Mr. Jackson, whose home is in Trenton, N. J., is in Germany as a special investigator of German prison camps for Ambassador Gerard.

PITH AND POINT.

European nations are finding war is easier to start than to stop.

The first thing a young man learns at college is how little his parents know.

Many a girl, when she marries, loses a good friend and gets a boarder—who grumbles.

An ounce of prevention is worth a pound of cure, and then it costs so much less.

Europe's great war in some of its aspects strangely resembles an American political deadlock.

By the time Europe gets through the manufacturers of antiques will find their occupation gone.

The trouble seems to be that lots of times when a man makes up his mind he doesn't use good material.

The dove of peace and the olive branch have been replaced by the airship and the long range gun.

The small boy who sits on the bank after his first summer swim learns too late the disadvantages of a place in the sun.

If San Marino and Monaco should ever lock horns a half dozen postholes would give them an ample supply of trenches.

The country has been warned of the approach of the seventeen year locusts. Fortunately it doesn't take them that long to transact business.

The American Bible society has issued 6,370,405 copies of the Bible during the last year, but then Europe's been too busy of late to read them.

Town Topics.

Cleveland now understands the meaning of an empty honor. John D. Rockefeller lives there, but pays taxes elsewhere.—Detroit Free Press.

Chicago would hate to see its city council as impotent and overshadowed as New York's aldermanic body has been these many years.—Chicago News.

Visitors to Philadelphia who complain that it is too noisy are not the same persons who are everlastingly talking about Philadelphia being sleepy. The latter never come here.—Philadelphia Press.

Train and Track.

There are 39,000 miles of railway in Germany.

Chilean railway receipts and expenses for 1915 are expected to balance at about $10,000,000.

The first electric railway in the world was built in Ireland, from Bushmills to the Giants' causeway.

The [illegible]electrically operated double track [illegible] railroad bridge at the Lachine canal at Montreal is said by Canadian papers to be the most up to date in America.

Capital of an automobile factory jumped from $2,000,000 to $100,000,000. The auto plays a great part in peace and in war, too, nowadays.

James J. Hill predicts a population of 400,000,000 by the year 2000. That means four men, four women and four kids for every one in evidence now.

As Mexico's revolution spree has cost that country nearly $400,000,000 it should be glad to have Uncle Sam step in with a cleanup squad.

It's Permysl here and Przemysl there, and you take your choice, but just can't pronounce it either way correctly.

Now we'll be likely to hear more about macaroni "made in America."

LUCIUS E. WILSON RETURNS TO FULTON; WILL SPEAK AT LUNCHEON TOMORROW; COMMISSION GOVERNMENT THE SUBJECT

Kaiser Making Ready to Drive Against Calais

Ten Army Corps Marching Westward to Reach Coast of France---Russians Stiffening Resistence in the East and Teutons Fail to Gain.

London, July 7.—"Break through to Calais—now!" is the Kaiser's latest order to his troops in the western zone, according to reports received here from Zurich, Paris and Amsterdam. That credence is placed in the reports, indicating a new and serions offensive, is proved by the prominence given in the London newspapersr to the dispatches. One of these, from Zurich, goes so far as to state that ten German army corps are moving westward after a season of rest from their work in Galicia.

In support of this belief G. F. Steward, of the Daily News, in a Rotterdam dispatch says:

"Reinforcements are expected by the Germans during the next few days in preparation for a new attempt to break through to Calais. In the main they represent new armies of young men, many of whom are volunteers who were advertised to be ready for the front by July. Travellers who have returned from Germany this last week state that the places where they went swarmed with men of the new formations ready to take the field."

The military men here in discussing the reports of a savage attack on the Allies, with Calais as the objective, see evidences of a German scheme to repeat the tactics employed against the Russians, regardless of the cost in human life, but that the Kaiser will reach Calais nobody believes possible.

In the meantime the Austro-German onrush in the eastern zone seems to be losing its momentum. The Russians have braced themselves and are holding at most points along their line, although the Austrians tell of continued progress to the northeast of Krasnik and further east, along the River Vierpriz, in the neighborhood of Tarnogera.

This is a critical sector so far as a northward blow at Warsaw is concerned, but it is evident that the Russians are stiffening their resistance after their long retreat, and the British press, for the first time in weeks, takes a more cheerful view of the eastern situation.

It is noteworthy that today's Berlin official communication speaks only of a gain on the Northern Poland front, leaving the southeastern field entirely to the Austrians, who in their official statement emphasize that an advance on the center between the Vistula and the Bug was made by "Austrians."

The quiet which had prevailed on the British front in Flanders so long has been broken by a British gain of German trenches to the north of Ypres. The advance was made after typical trench warfare tactics, backed by French artillery.

This part of the western front stoll holds its reputation as a gas area, Field Marshal French again recounting how the Germans have been bombarding Ypres with gas shells.

PETROGRAD SAYS ADVANCE ON WARSAW IS CHECKED

London, July 6.—The Teutonic allies, according to dispatches from Berlin, have broken in two the Russian line near Krasnik. One part of the lien is being driven to the east, and the other, the main section, is hotly pursued by General von Mackensen northeast toward Ludlin and Warsaw.

Krasnik is but twenty-eight miles from Lublin, a city of 75,000 inhabitants and one of the most beautiful in Russia. Mackensen's forces have covered almost half of the distance to Lublin and are pushing desperately on in an effort to reachand capture the fortress of Ivangorod, which guards the way to Warsaw.

Russian military experts insist that even the fall of Ivangorod

WANTED!

BOYS for Evening Times Routes on West Side.

Only hustlers need apply.

READER MAY RETURN FOR ENTERTAINMENT

Miss Pearl M. Stratton of Cortland, who gave the reading at the Y. P. B. convention Saturday evening from "The Lion and the Mouse" and on Monday evening from "The Prodigal Son," may return to the city later and participate in an entertainment.

Miss Stratton is a reader of fine interpretation and would receive a hearty welcome were she to return.

Public Discussion of Modern Forms of City Government to Be Invited by Division Having in Charge the Betterment of Conditions Here

The Division of Membership and Entertainment of the Chamber of Commerce held a meeting last night to complete plans for the meetings to be held during the stay of Lucius E. Wilson. Mr. Wilson will return to Fulton sometime this evening and the first meeting will tomorrow at 12:30 at the Clark Hotel. During the morning it is expected that Mr. Wilson will be in conference with the various officers of the Chamber. At the meeting in the Clark Hotel at 12:30 he will talk on the work of the Chamber to date and will make suggestions as to what should be done by the various divisions.

The members of the Chamber were called on the telephone this morning and from the replies received a good attendance is expected at the luncheon tomorrow.

One of the [illegible] stay will be a public meeting to be held Thursday night at 8 o'clock in the City Hall. At this time Mr. Wilson will discuss the "Commission form of Government with a City Manager." This meeting will be open to the public and should prove exceedingly interesting as Mr. Wilson is thoroughly familiar with the subject. He was active in the campaign for the Commission Form of Government in Des Moines and Dayton and can give his personal experiences in connection with the new form. The City Government division of the Chamber will present a report at this meeting in connection with the City Manager plan, and there will be an opportunity for open discussion.

COUNCIL TURNS DOWN CONCERT APPROPRIATION BUT THE BAND PLAYS ON

In spite of the fact that the Common Council at last night's meeting refused to appropriate the sum of $300 for summer band concerts, which, added to an equal appropriation by the Chamber of Commerce, was to have been expended for ten concerts throughout the city during the summer months, the city will enjoy the concerts. The Times has been authorized to announce that J. W. Stevenson will personally guarantee the $300 necessary to meet the Chamber of Commerce appropriation. Mr. Stevenson made this announcement two weeks ago, but it was withheld from publication at his request until the Common Council should take decisive action on the question.

Arrangements have been made with the Chamber of Commerce through L. F. Cornell, chairman of the committee from the Chamber, and as soon as the Chamber of Commerce takes action on Mr. Stevenson's proposal, the concerts will begin. The first concert will doubtless be given next week.

The Chamber committee had arranged for a series of concerts, one concert to be held in each ward, and these plans will probably be carried out. The Morin Bros., lumber dealers, have kindly offered to donate the lumber necessary for the band stand, which will be moved about the city to the points where the concerts will be held, and the Fulton Light, Heat & Power Company, through Manager J. J. Jordan, will donate the lights and current for the concert. The amount necessary to cover incidental expenses will be covered by the proceeds of ice cream festivals which will be held at each concert under the auspices of the Chamber of Commerce.

Aldermen Turn Down $300 Appropriation

Attorneys Serve Summons and Complaint---Bond Issue Awarded to Harris-Forbes Co. ---Charities Department Runs Short of Cash and Loan is Made.

Alderman Myron Foster was as solid as the proverbial Rock of Gibraltar on the band-concert question at the regular meeting of the Common Council last night. Alderman Distin, acting mayor, presided and, after all other business had been transacted the concert question was given its final hearing. Alderman Quirk introduced the resolution which called for an appropriation of $300 for the concerts and Alderman Foster voted against it. Under a charter provision a unanimous vote was necessary to pass the resolution and the motion failed to carry. However, the band concerts will be held in spite of the city's failure to appropriate the necessary funds. Alderman Foster defended his stand, as before, by stating that the city needed several things more urgently than it needed music to while away the summer evenings, and argued that industrial conditions here at present did not warrant any such expenditure for amusements.

The Harris-Forbes Company of New York was awarded the [illegible] covering the city's share of the debt contracted by the paving up to date, amounting to $46,262.87. The company bid $46,417.30 for the bonds, or at a rate of $100.00 for each $100 worth of bonds. George B. Gibbons bid $100.03; the city's share to bear 4½ per cent interest and the taxpayers' share, amounting to $13,142.37 to bear 5 per cent. A. B. Leach & Co. bid $10,29 7-10 on each $100 of the city's share and $100,37 9-10 on the taxpayers' share.

H. A. Kahler's bid of $100.01 on the taxpayers' share with interest at 4.90 per cent was accepted. The Kahler firm bid $100.11 on the city's share, interest at 4½ per cent.

The council voted to borrow $1,000 to cover the deficit in the police fund. This money was borrowed in anticipation of the receipt of the excise money in October. The sum of $100 was borrowed for the poor fund. The council audited bills to the extent of $400.76 for the charities department. Bills to the extent of $384.49 were aduited for the general city fund.

It developed last night in the report of the Commissioner of Charities that the city is paying another physician fo services which are included in the duties of the city physician, and are covered under the salary of the city physician. Dr. Schlappi tendered a bill of $15 for services to a charity charge, and some of the aldermen raised a question. Commissioner Woodbury explained that Dr. Terpening was not available at the time and he was obliged to call in another physician.

The bill of Buell Bros., plumberrs, for improvements on the bath room for the police department at city hall was ordered paid last night after Mr. Buell had explained the charges. When his bill was presented at the last meeting Aldermen Foster and Gardener considered it exorbitant, as the police department, when asking for the improvement, placed the cost at only half the figure of Mr. Buell's bill. Mr. Buell knew nothhing about thhe estimate given by the police department and said he had done the work laid out by those in charge.

The sum of $375 was appropriated for the library. The bills received from the Department of Charities for the month of June amounted to $396.45 and Commissioner Woodbury stated that there was little change in conditions among the poorer class of people in the past month, and added that he anticipated no change for some time to come. The amounts paid out for charitable purposes this year has exceeded those of past years by large margins.

A summons and complaint was served on the city by Piper and Pendergast, attorneys for Christian M. Johnson, in the matter of the title to the Johnson farm south of the city. Mr. Johnson appeared before the council some time ago, with an attorney who represented a prospective purchaser of the farm and explained that he did not have clear title to the land, and could not sell it on account of the uncerthin quantity of the city's holdings in his property.

While the city was still a village, accorrding to Mr. Johnson's story, a committee appointed from the village purchased a portion of

Communication

"In time of peace prepare for war."

The writer sees in the anti-enlistment league—should it gain supporters of any considerable numbers—a grave menace to our nation, as we should positively have a body of trained men for the defence of this broad land of ours.

To defend the Stars and Stripes, the emblem of the free which we would not have, if the anti-league had its way.

Everybody with ordinary foresight knows that man to be competent to run in a race must train himself to the work, in order to be able to withstand the test.

Now I leave it to the public in general if I am right or wrong on this point. If I am right, ought we not encourage the enlistment of our young men, rather than to discourage them? For we know not how soon we may have to defend our flag, which, being bought with price of many brave lives, should it not be well taken care of by us as a nation of free born Americans, and not be allowed to degenerate into a meaningless piece of bunting which the "Antis" seem to advocate?

It is true, war is to be deplored, yet shall we ever see universal peace? No, not until the millenium dawns, if I read the Bible correctly. "We shall have wars and rumors of wars; nation shall rise up against nation until the end of time." But the end is not yet—bye and bye; therefore, would it not be fatal to us as a nation to be unprepared in an emergency which we may bec alled upon to face at any time? Now we leave it to any father and mother—which is best for our young men, to enlist thereby placing themselves under military discipline which will make men of them? Or is it better that they should remain on our street corners or in the saloons as many do here in our city? We leave the verdict to the thinking public of our commonwealth.

A CITIZEN.

TRAFFIC FAILS TO WARRANT MORE CARS

Editor, Evening Times:

Please advise, why it is that the trolley company does not have to put into effect its summer schedule this year?

The franchise calls for half hourly service during the summer. Why isn't this enforced by the city administration?

Yours truly,
JNO. F. JACKSON.

(Inquiry at the local terminal elecits the information that by running two-car trains the L. S. & N. is able to accommodate its traffic to better advantage than in preceding years. In other words, "hard times" have so affected travel that it is deemed unnecessary to return to the usual summer schedule. Mr. Jackson's query is referred to the City Attorney for a reply, and The Evening Times extends to that gentleman the same courtesy as heretofore to answer public questions in a public way.—Editor.

JUDGE LINDSEY IS A CHAUTAUQUA FEATURE

Judge Ben B. Lindsey is one of the most interesting figures in American public life today. His work as head of Denver's juvenile court has brought him fame, while the vicious attacks of the "ring" and liquor interests have gained for him the sympathy and admiration of a nation. The recent election in Denver clearly demonstrated how ineffective the underhand methods of his enemies were when he received a majority of 35,000 votes, the largest any candidate for a local office ever received, and this after a ten year period of sevice as judge of the juvenile court.

The court over which he presides is a local institution, specializing in the correction and protection of the city's children. Last year it dealt with immediate wants and troubles of more than a thousand families, and the cost to the city was about $20,000. In 1914, the same year, the district court of Denver dealt with less than 2,000 cases and cost the city and state about $200,000.

Judge Lindsey's address here will draw a large crowd not only because of his well known qualities as a public speaker, but also because American citizens like to pay personal tribute to "one of their own" and to one who battles for the forces of righteousness and purity against the powers of graft and political corruption.

MAKING UP A RAFT

The Evening Times is in receipt of a letter written by a man to a man, which bears upon the local political situation. The writer is dissatisfied with the situation as it is found today by hundreds and hundreds of the city's taxpayers. He believes that in selecting timber for the mayoralty raft the people have a lot of scouting to do, and to a Republican the saddest comment the writer makes is that the G. O. P. in Fulton has been in former times hard up for the right kind of material.

A second correspondent in addressing The Evening Times along the same line favors a man who has reached middle-age—one who has good executive and administrative ability, to all of which everybody except, perhaps, a very small minority of the citizenship will O. K. The writer of this communication has in mind his ideal of the man for the job, the man who has the punch to do things for himself, and the grit to see that men surrounding him in official capacities, are made of the right stuff.

A fact exists that is overlooked in making a search for a piece of mayoralty timber, which is, that too often a mayor is little more than the mouthpiece of his legal adviser—the city's attorney, and thereby rests the conviction that it is an easy thing for a mayor to be in the right church, but in the wrong pew. In other words, the mayor of average ability does not find his real location until too late in life.

If Fulton would progress, if the city is to press forward toward greater things, and not fall back into the obsolete class, it is up to the taxpayers, who are the voters, to submerge many differences of opinion and go forth in their quest for mayoralty timber armed with the conviction that nothing but the best is good enough for this town; and further, in cutting down the tree for the raft, let those who are going to make the selections remember, that while the young men should be given a chance to move upward and onward, the man of keen judgment is the fellow who has reached at least his fortieth year. He is the man who will undo what the man of twenty would do, and he is less likely to be found a pliant sapling in the raft.

THOUGHT-COMPELLING

A farmer, not so very many years ago, lived in Pennsylvania, and he got discouraged trying to get a living on a farm—on a Pennsylvania hill farm. He wrote to a relative in Canada, and he told this relative that he wanted to come to Canada and secure a position collecting coal oil.

The relative replied that he could not employ him, "because," said the relative, "you don't know anything about the coal-oil business." "Then," replied the Pennsylvania farmer, "I will know about it."

With commendable ambition, the Pennsylvania farmer started to study the theory of coal oil. He found that, in the beginning, away back ages and ages ago, there were immense forests of vegetation. Then he found, by consulting scientific books, that the first sun was put out, and the whole earth was locked in a world of ice. These mighty icebergs planed down the mountains, beat down the hills, and buried this original vegetation. Then the old world fell into the wake of the present sun, and life again appeared.

He also learned from the books that this original vegetation was finally turned by chemical action into coal, and that only in the vicinity of these coal beds is coal oil found in paying quantities.

He found out all about coal oil the second day of God's administration down to the time he wrote his second letter to his relative in Canada. And he told his relative that he was now ready—that he knew everything about coal oil.

His relative told him to come on to Canada, and he went. Later, the farmer who had purchased the old Pennsylvania hill farm found a stream back of the barn, covered with a dreadful-looking scum. Even the cows refused to drink from the creek. It was coal oil. And here you have the beginning of the oil business.

My point is this, Friend Reader: You have given up a part of your life to know all about some one thing, and, with all this knowledge on hand, you look longingly toward Canada—some far-away field.—Silent Partner.

OUR WASHINGTON CORRESPONDENCE

News Mostly of a Political Nature From the Nation's Seat of Government for Times' Readers.

Washington, July 6. (Special correspondence—Senator Oscar W. Underwood, who, as chairman of the Ways and Means Committee, presented the tariff bill which completely demoralized our industries and our national finances, came out with a statement recently in which he urged the construction of merchantmen rather than of battleships. As Mr. Underwood is the leader in the councils of his party his utterances in regard to party policies are of great moment in indicating the adherence of a considerable number of his followers to the doctrines which he advocates. That he is of a pacificist turn of mind is shown by his statement on the floor of the House, February 5th, last, when he said: "I do not think the time will ever come when it will be necessary for this country to maintain the great principles of our fathers at the point of the sword." The naval appropriation bill was up for consideration at the time and Mr. Underwood immediately followed this statement by offering an amendment to strike out a provision for four battleships and make it one.

Mr. Underwood is another mild-eyed visionary. If all the nations could unite in a "federation of the world" and divide the industries, resources, and carrying trade of this earth in a manner which would give mutual satisfaction, and then by law so regulate the birthrate that fecundity would not sow discord, the two policies for which Senator Underwood stands—free trade and disarmament—would come into existence automatically, and so probably would a static condition of humanity. But so long as competition existed and human nature is prone to envy, those international jealousies which follow in the wake of keen commercial rivalry will make the theories championed by the Democracy nothing more than Utopian dreams. This country has neverr had free trade that it was not followed by industrial disaster, and the European conflict furnishes sufficient comment on the subject of preparedness. Even the lamb-like Secretary Daniels, no longer under the benign influence of the Apostle of Peace, has become Josephus Militant.

Dr. J. Paul Goods, of the University of Chicago, recently pointed out the position in whichh the United States will assuredly find itself if our proposed efforts for increasing foreign trade are crowned with success. Said he: "Our natural resources are of the greatest importance in bringing the nation commercial success. That means that there will be a great industrial and commercial expansion in this country, and unless we find some way to settle the questions of trade supremacy we will find ourselves facing a jealous set of nations in a bitter conflict to maintain what we will consider to be our rights." Mr. Underwood would be contented if we had the naked "rights" and the other nations had the battleships.

Mr. Underwood, Mr. Redfield, and the rest of the Democrats kick up a lot of dust in trying to create enthusiasm for the capture of foreign markets. This might be a commendable endeavor if there were not so much evidence of an attempt to becloud the situation in regard to the capture of our home market by the foreign beneficiaries of the Underwood-Wilson law. Two things our manufacturers demand before they extend their trade appreciably in foreign lands: First, the assurance of a tariff sufficient to protect them in the home market, and, second, the confidence that Americans who are successful abroad will not placed in the category of "selfish exploiters" and denied the bodily protection which should be guaranteed to them as American citizens. The first will never be vouchsafed them while Democrats hold the reins of government, and that the second will not be forthcoming is inferred from the attitude of the present administration.

How much more practical was the suggestion of William McKinley in his Buffalo speech shortly before his assassination, in which he said: "If, perchance, some of our tariffs are no longer needed for revenue or to encourage and protect our industries at home, why should they not be employed to extend and promote our markets abroad?" These were the words of common sense, not of imagery.

Liverymen recommend Hanford's Balsam of Myrrh as a valuable remedy to be always kept on hand.

Opinions

Will Probably Keep the Trees.

There is a growing interest in the question of what the constitutional convention proposes to do with the people's forest in the Adirondacks and the Catskills; and as time goes on and as more consideration is given to the subject, the greater the insistence that no liberties be taken with this most valuable possession of all the people.

In times past the Albany Knickerbocker-Press has advocated a conservative degree of cutting of timber on State lands, but since it has observed the propaganda by the lumbermen before the constitutional convention, this paper concludes an editorial by saying: "The safe side, judging from the scientific and longer experience of older countries, is to prohibit the removal of timber from the State preserve."

This is palpably the safe side in view of the history of the State government for the past 20 years right down to the present day. There is so little promise in a marked and consisten improvement in the quality of that government, that it is absolutely certain that if any entering wedge is permitted toward the removal of any timber from the people's land, the privilege will be abused grossly. It isn't a theory which the people of the State have to deal with but a practical condition. The people cannot afford to trust the forest in the hands of politicians during the next 20 years. The trees are too valuable as conservators of water for our farms and our industries; we need them for the park right in the midst of millions of people. The grocer, the lawyer, the mechanic, the farmer—the average citizen—realizes that there is nothing in it for him if lumbermen are permitted to feast upon the people's lands. On the contrary, many of them realize that it would be a direct personal loss if the State's lands were commercialized, hacked up and partially denuded.

The Albany paper from its point of vantage, for the convention is being held in that city, observes: "That there are powerful interests at work intent upon permitting lumbermen again to invade the forests has been plain from the beginning of the convention." The propaganda of the lumbermen has been conducted shrewdly and quietly. They have not appeared boldly before committees, but have enlisted certain foresters, some of them college professors, who advocate their theories and tell of results in the West and in Europe, taking little consideration of political and governmental conditions in this commonwealth.

It is the information of The Observer that the delegates are little disposed to open the great park in the Adirondacks and in the Catskills to lumbermen, and the information of the Albany paper is the same. That speaks well of the good sense and foresight of the delegates. The people want to keep their trees, and they will defeat any proposal that interferes with this desire.—Utica Observer.

A DOG'S A DOG WHEREVER FOUND

By Horace Seymour Keller

A dog's a dog the world around,
No matter where he may be found.
Some dogs they came from Galilee—
Dogs! dogs are all the same to me!

I never knew a dog to fail
In frisking of the friendly tail
To kindliness; 'tis dogs rejoice
Responsive to the human voice.

A dog's a dog in sunshine time;
A dog's a dog in wintry clime.
For, where the tropic sun is hot
He's the same watcher on the spot;

Or, when the chilly winds assail
There you will find him without fail—
Asleep, awake, he's ever there,
Dog-like and faithful, aye, and square!

A dog has no mean selfish ways—
No matter whence he barks and bays
Up to the moon his soul's delight
In summer's calm or winter's blight.

His is the quick impulse to save
your life—or die upon your grave
After your fitful fever's o'er—
This market servitor of yore.

Ah! give to him the wreath of fame—
This dog, who knew God e'er you
came.

Constipation Causes Most Ills

Accumulated waste in your thirty feet of bowels causes absorption of poisons, tends to produce fever, upsets digestion. You belch gas, feel stuffy, irritable, almost cranky. It isn't you—it's your condition. Eliminate this poisonous waste by taking one or two Dr. King's New Life Pills tonight. Enjoy a full, free bowel movement in the morning—you feel so grateful. Get an original bottle, containing 36 pills, from your Druggist today for 25c.

Buckingham's Pranks.

After the defeat and flight of Charles I. the daredevil Duke of Buckingham disguised himself as a mountebank, set up a stage in the heart of London and for days laughed in the faces of the stern Puritans, who were thirsting for his life. One day when his own sister, the beautiful Duchess of Richmond, was passing the jocular duke set the mob on to drag her from her carriage. They forced her to witness the pranks of her brother, whom she recognized, but could not betray.

HANNIBAL NEWS

Mr. and Mrs. Botsford of Brooklyn arev isting their parrents, Mr. and Mrs. A. Strong.

Miss Mary Ellen Stevens was the guest of Miss Lula Adamy Saturday and Sunday.

Mrs. George Minar, who has been spending a short time with friends in Hannibal returned to her home in Ithaca last week.

George Minar of Ithaca is a guest of friends in town.

Mr. and Mrs. Jasper Hopper were over Sunday guests of Mr. and Mrs. W. Wilbur, Bowens Corners.

Mr. and Mrs. Ezra Tucker were in Fulton Tuesday attending the reunion of the 184th regiment.

Mr. and Mrs. Leon Bell and family of Scranton, Pa., were over Sunday guests of Mr. and Mrs. William Cooper, Hannibal Center road..

Mrs. Richard Fleming and Mrs. Cynthia Gage of Victory are guests of Mr. and Mrs. Frank Cooper.

PUBLIC UTILITIES IN STRASSBURG

Republished from "Concerning Municipal Ownership"

The city of Strassburg, Alsace, has attempted to work out the vexed problem of private and municipal ownership of public utilities by methods that are believed to be quite unique. There is to be neither private monoply nor municipal monoply in the lighting and street car services, but these are to be owned and managed on a dual or mixed management system.

When the present city council of Strassburg entered office in 1908 it found a different organization of the gas and electrical works, and also of the street railway service from that obtaining in other German towns. During the past few decades these services have been taken over by the municipalities in most German towns; in Strassburg, however, they were controlled by private capitalists.

Mixed Management Inaugurated—Suburbs Developed.

The question of the city's interest in these undertakings was first discussed in December, 1908, and it was decided then not to eliminate private capital from them altogether, but to take over part of the stock and to establish asystem of mixed management whereby the city council secured some measure of control over the company. This system has aroused much interest not only in Germany but in other parts of the world. Being an entirely new system here no general principles have as yet been evolved, each case being decided on its merits and according to the particular circumstances which brought the two contracting parties together. It has been found that the interests of the community are best served when the public body is able to command a controlling influence in the direction of the company.

Strassburg has succeeded in bringing all the above-mentioned services into alliance with itself, and has asserted in each case the superiority of the public over the private interest. Private capital is invested in the undertakings, but its direction is conditioned by the needs of the town. This is the point of major importance. It is obvious, for example, that the carrying through of a progressive municipal development and improvement policy stands in the closest connection with the control of the street railways. If the electric railways at Strassburg had remained entirely in private hands, it would have been difficult, if not impossible, to develop thinly settled suburban districts.

The Electrical Works—Profits and Dividends.

Strassburg is a city of 186,000 inhabitants. The credit of having introduced the mixed management system belongs to the Strassburg mayor, Dr. Schwander. He applied it first to the electrical works. In December, 1908, when the franchise accorded to the Strassburg Electric Co. was approaching its term, the city council resolved not to purchase the works outright but to proceed with a contract in accordance with which the electric company reserved for the city council 40 per cent of its 11,750 shares of 1,000 marks ($238) each and three seats on the board of 10 directors. In consideration thereof the council extended its concession to the company until the year 1940. On February 17, 1909, the city purchased 1,182 more shares, thus bringing the larger portion of the stock into its own hands.

So far the dual ownership and control has worked well. The use of electricity for lighting and power has increased rapidly. In 1911, 1912 and 1913 the company paid dividends of 11 per cent. The company pays a royalty to the city on its surplus profits, which royalty amounted to about $100,000 in 1911 and $130,000 in 1913. The total net profits to the municipality in 1913 amounted to 710,375 marks ($168,980), after payment of 432,205 marks ($102,616) for interest on the borrowed capital and for the reduction of liabilities. This represents a profit of 8.68 per cent on the entirre capital ($3,088,944) invested by the city council in the electrical works, and is by far its best investment.

The Electric Street Railway.

Encouraged by the good results of the mixed ownership of the electrical works, the municipality in 1912 made a similar change in the street railway organization. The old private street railway company was re-organized. The capital of the new company was divided into 2,500,000 marks ($595,000) preferred stock, privately owned, and 2,500,000 marks ($595,000) common stock in the possession of the city council. Both kinds of shares bear an immediate dividend of 6 per cent. Of the remaining profit the city takes 30 per cent in dues for the use of the streets and bridges until the profit reaches $71,400; 40 per cent of the surplus profits between $71,400 and $95,200 and 50 per cent of the surplus over $95,200. The concession extends to 1956. The statutes of the company were modified and adapted to the new convention. The municipal council appoints 4 of the 10 members of the board of directors.

The street railway company of Strassburg has prospered. The length of the line is about 56 miles and there are 144 cars with motors and 319 trailers. The net profit for 1913 was $140,443, of which $3,570 was added to the reserve fund and $71,400 was paid as 6 per cent dividends on the capital stock; extra dividends of 1¾ per cent on the common stock and 4 per cent on the preferred stock were also paid. Thus the city received in first dividends $35,700; in dues (30 per cent of the surplus), $19,696; and extra dividends, $10,402; total, $65,798. To this sum may also be added the dividend on one extra majority share and that portion of the directors' percentage which falls to the four directors nominated by the council. The above total received by the city is not net profit to the city, howver, since the city must pay about half of the amount as interest on borrowed capital invested in the business and for reduction of liabilities.

A number from this place attended the ball game at Lysander between theh Lysander team and the Warners team.

The ice cream social Friday night did not sell all the ice cream because of a rainy night. There was not a very large crowd. They took in eight dollars and thirty-five cents clear, which was pretty well considering the weather.

Miss Mary Boss of Marathon is visiting at Mr. Pingree's.

Franklin Pierce, wife and two children arrived at Elmer Fisher's Tuesday from Olean to spend their vacation. Mr. Pierce will go to New York to Columbia College for six weeks.

John Garrett and famly were guests at Wilson Stewart's Sunday.

The prayer meeting and Bible study will be held at the school house Tuesday evening this week.

Miss Edna Sednar is the guest of her sister, Mrs. Ruth Countryman.

The Misses Edna Cook and Lottie Andrews accompanied their uncle, Milo Austin and wife to Syracuse Sunday where they will visit for some time.

Miss Esther Coyill is employed in Lysander.

Mrs. Lottie Cook attended the Wilson-Bull wedding at St. Mark's church in Syracuse last Tuesday evening.

Miss Flora Fisher has gone to Edwin Palmer's in Fulton.

Lester Dickerson and his cousin Norwood Terpening have been visiting their grandparents, Mr. and Mrs. Reuben Terpening, for a week. They arrived home Sunday.

Mr. and Mrs. Allen Austin of Jersey City, visited Mrs. L. T. Austin the last of the week.

Miss Mildred Cook was the guest of Lela Andrews Sunday.

Mr. and Mrs. Morgan Butler and their mother, Mrs. Mary Brown, were in Baldwinsville Sunday to Mr. Amos Ott's to celebrate the birthday of Mrs. Brown who is 77. The children were all there and with the mother there were ten in number. A bountiful dinner was served and a very enjoyable time was had.

Mr. and Mrs. Ed Palmer were callers at Floyd Dickerson's Sunday.

Mr. Milo Austin and wife were guests of their sister, Mrs. Alice Cook Sunday.

Mr. and Mrs. Roy Austin and son Raymond visited her parents, Mr. and Mrs. A. L. Hannum Sunday.

Mrs. Carrie Hannum visited her sister, Mrs. Anna Foster Thursday, it being her birthday.

BUNDY'S CROSSING

Mrs. Marvin and Harvey Burchin were in Fulton Friday.

Mrs. Anna Witchley and children called on Mrs. Samuel Graham Sunday.

Mr. and Mrs. James Stevens, Mr. and Mrs. Uula Adams, Mr. and Mrs. Edward Echard, Misses Bertha and Elizabeth Echard and Mr. Howard Simons of the Kingdom went by auto to Syracuse then to Skaneateles, Auburn, Allbridge to Syracuse and home on July Fourth.

On Saturday night occurred the marriage of Miss Margaret Peavey of Minetto and Mr. Harold Waugh of this place. Miss Edith Dodge acted as bridesmaid. The bestman was Harry Kennedy of East Minetto. Rev. Crawford performed the ceremony.

Mrs. Bell Dodge had her finger caught in a machine at Minetto.

Walter Adams called at C. J. Echard's Monday.

Many persons attended the dance at Mt. Pleasant Monday night.

Mr. and Mrs. James Stevens and Fred tSevens of Minetto went to Mt. Pleasant on Monday.

For mosquito bites and any poisoned wound, apply Hanford's Balsam to kill the germs. Always have it on hand.

TOM BROWN KNITTING EXHIBIT AT EXPOSITION

Specimens of the knitting work done by members of the Auburn Prison branch of the Tom Brown Knitting Class will be on exhibition at the Panama-Pacific Exposition. A shipment of 70 specimens of the knitted goods will be expressed Monday to John Shetland of the local prison office force, who is in charge of prison exhibits at the exposition.

A shipment of 233 scarfs, 22 caps, four shawls, five pairs of gloves and mittens, one pair wristlets have been sent to the Poland War Relief Committee. Martin T. Looney who is at the head of the knitting work in the prison has received a letter from the officials of the committee thanking him—Auburn Advertiser.

A Medicine Chest for 25c

In this chest you have an excellent remedy for Toothache, Bruises, Sprains, Stiff Neck, Backache, Neuralgia, Rheumatism and for most emergencies. One 25c. bottle of Sloan's Liniment does it all—this because these ailments are symptoms, not diseases, and are caused by congestion and inflammation. If you doubt, ask those who use Sloan's Liniment, or better still, buy a 25c. bottle and prove it. All Druggists.

MEET IN ROME

Binghamton Lost 1916 Convention by Few Votes; Session Closed Yesterday; Picnic For Delegates.

The state convention of the Young People's Branch of the W. C. T. U. of the State of New York closed yesterday at 11 o'clock after a most successful session. The session ended with the singing of the hymn "God Be With You 'Till We Meet Again," by all the delegates and the spectacle was a most inspiring one.

The last session was called to order promptly at 8 o'clock by the president, Mason Stratton, of Brooklyn. Miss Harriet Bethel of Brooklyn led in prayer and the reports of the superintendents of the various lines of work followed.

The treasurer's report shows that $2810.25 has been raised by the branch during the past years. The Cortland branch leads with the total of $251.49 collected.

A debate between the Lowville branch and the Kenwood branch on the question, "Resolved, that the Influence of Heredity is Greater than that of Environment," followed the reports of the superintendents. Mrs. Charles Olmstead of thisc ity was chairman of the judges and Mrs. Edna Moore, also of this city acted as judge.

Binghamton extended a corrdial invitation for the next convention and the workers from the city near the border line had many of the delegates lined up, but the Rome contingent won out by a few votes.

After a Bible reading by Miss Muriel Ayres of Penn Yan and a prayer by Marion Clark of Frewsburg, the last anthem was sung and the convention adjourned until July 3, 1915, at Rome.

At 11.30 the delegates numbering more than 200 were taken in automobiles to Pathfinder Island. The Chamber of Commerce arranged the trip. The young people spent the afternoon at baseball, canoeing and other out door sports and returned to this city about 5 o'clock. A dinner was served at the island under the direction of Mrs. Holmes, stewardess of the club.

Most of the delegates left for their homes last night but several remained in thec ity until today. All were loud in their praises of Fulton as convention city, and of the hospitality of the people here.

Wallace Owes His Life to a Fellow Camper

Nicholas Wallace, the genial clerk at the Setz & McCormick store, took an involuntary bath Monday night in the cool waters of the Oswego river, north of the city near Indian Point. Wallace, accompanied by Cyril Reed, also of the Setz & McCormick company, spent the day at the point and early in the evening, Wallace, in a canoe, started for the middle of the stream to fish. Attempting to light his favorite meerschaum pipe, Wallace lost his balance and fell into the stream. His cries for help attraction the attention of Reed, who hastily donned his bathing suit (Benjamin model) and went to the rescue. At first nothing was visible except the pipe, but Reed, by superhuman efforts, finally brought Wallace to the surface. By that time scores of campers had arrived on the scene and Wallace was take nto shore, where a pulmotor soon rescuscitated him. He is able to attend to his duties today and is none the worse for his experience. Reed is very modest concerning his brave act, and would divulge none of the particular this morning. His friends intend to apply for a Carnegie medal for the young man, who only recently took up his residence here.

CARRIES HOME A LESSON IN SPEED LIMIT

C. W. Hobbie has returned from Olean where he spent nearly a month. While in the business section of that city he witnessed a distressing accident, the result of a collision between a boy on a small play cart and a swiftly moving automobile. The boy was killed and Mr. Hobbie testified before a coroner's jury, in effect that the driver of the car was to blame for the death of the boy, as he was exceeding a safe speed limit.

THAN 12,000

Official Figures Given by County Superintendent of Census Places Fulton's Population at 11,138.

This city shows a gain in population since the last census of 658, according to the official figures compiled and issued by H. L. Wallace, county superintendent of census enumerators. The official figures do not vary greatly from the estimates made by many persons in advance of the census taking and immediately following the announcement of the official figures.

Every town in the county, with the exception of Redfield, Williamstown, Amboy and Boylston, show a gain. The four counties lost in population in the last five years.

The official figures follow:

Albion	1501	Gain	29
Amboy	673	Loss	63
Boylston	578	Loss	89
Constantia	2123	Gain	100
Granby	2035	Gain	13
Hannibal	2334	Gain	186
Hastings	2362	Gain	47
Mexico	3193	Gain	211
New Haven	1476	Gain	15
Orwell	949	Gain	20
Oswego Town	3091	Gain	420
Palermo	1281	Gain	26
Parish	1393	Gain	82
Redfield	678	Loss	125
Richland	3955	Gain	164
Sandy Creek	2325	Gain	219
Schroeppel	3155	Gain	448
Scriba	2260	Gain	61
Volney	2421	Gain	14
West Monroe	935	Gain	20
Williamstown	861	Loss	35
Oswego City	25434	Gain	2066
Fulton City	11138	Gain	658

Cities, 36,572; towns, 35,579. Total, 76,151.

SNOW RESIGNS AS DOG CATCHER; HAS OTHER WORK

George Snow, the city dog catcher, appeared at last night's meeting of the Common Council to offer his resignation. Snow has secured a position with the Hunter Arms Company and believed some other local man would be glad to have the dog catcher's job, in view of the industrial conditions here at present. The aldermen took no action last night on Snow's resignation and he may continue to work in his spare time at the dog catching job. Snow announced last night that he had completed a canvass of the East Side and found only thirty dog owners are now without licenses for their pets. The west side of the river is still to be covered.

HELPED HIMSELF TO CONTENTS OF REGISTER

Solomon Mursky was arraigned before Judge Wilson this morning on a charge of juvenile delinquency and petit larceny. Young Mursky, who is but 12 years old, walked into the Perkins floral store on 1st st yesterday and opened the cash register belonging to W. J. Nicht, owner of the Electric shop. The lad took a sum of money from the register but one of the girls employed by Mr. Perkins noticed him acting suspiciously and called an officer.

The lad was very penitent this morning and promised to mend his ways. Judge Wilson will take action in his case tomorrow.

GOOD TEMPLARS PREPARE FOR STATE CONVENTION

W. F. Stewart, together with his associates on the committee of arrangements, Floyd Cox and George Grant, are taking good care to see that all preliminaries for the Good Templars' convention to be held in this city are looked after. Many of the 200 delegates will arrive here on August 21, but the convention proper will not open until Monday.

The Complete committee on entertainment is made up of Floyd Cox, chairman; George Grant, Mrs. Joseph Hawks, A. P. Bradt and Lawrence Stewart.

SELF RESPECT.

It is a mistake to associate pride or foppishness with self respect. The one rises from a judicious consideration of what we are, the other from an extravagant notion of what something extraneous has made us. The one is true, the other is false, and both cannot exist together. A man that respects himself cannot be proud, and a proud man does not respect himself.

Baseball Pool Operators Are Balked Here

Agents of baseball pools throughout the city have been notified that the Federal authorities have refused the use of the mails to the pool companies in this state, and unless the express companies accept the goods, the pool operators will be unable to get the paraphernalia unless by messenger. The Federal authorities have refused admission to the mails of the pool matter on the grounds that it covers a lottery, and the Interstate Commerce ulaws forbid the shipping of the matter by freight from one state to another.

H. P. Weidman, of Oneonta, a pool, promoter, who furnishes several local men with pool tickets, was arrested Monday by Federal agents. The government has also started other actions against pool operators in Buffalo and New York city, and in several cities the local police have ordered the pool operators to cease operations. There are several hundred baseball enthusi? asts in thsi city who use the baseball pools daily.

MRS. BACHE SERVED TEA TO CHURCH WORKERS

The women of Zion Episcopal church to the number of thirty were entertained at a delightful silver tea at the home of Mrs. F. E. Bache, 73 Worth st., yesterday afternoon. The house was tastefully decorated with white and pink roses.

Mrs. Bache, assisted by Mrs. William Dingle received, and Mrs. Carl Pilch poured the tea. Dainty refreshments were served and the company enjoyed a veryp leasant afternoon.

LEWIS KENNEY RESIGNS POSITION AS FIREMAN

Lewis Kenney has resigned from the city fire department. Mr. Kenney is an electrician and has obtained a position with the Seneca River Power and Transmission Company.

John Young, another memberr of the department, is to be absent for two weeks on his vacation. Each fireman receives twelve days' leave.

MRS. BJORKMAN READY FOR COUNTY CAMPAIGN

Mrs. Frances Maude Bjorkman has arrived in Oswego, ready for active service in the cause of suffrage. She will tour the entire county and speak in every town and district.

Mrs. Bjorkman is well known in Fulton where she has held open-air meetings. Wherever she goes her message is driven home, and without a doubt by the middle of the month the leaders feel that they will be able to guarantee that Oswego county will not be at the bottom when the votes are counted on the constitutional amendment to be voted on this fall to determine whether woman will hereafter be classed with the insane and criminal in the way of suffrage.

QUINTANO TO GIVE TWO CONCERTS HERE

Here is good news for those who never tire of listening to the music of the big brass band.

Quintano, the bandmaster of nation reputation, is to bring his company of musicians here for two concerts on the fourth day of Chautauqua week.

In most of the largest cities of the country Quintano has appeared in notably successful engagements, playing many return dates. His programs here will be made up of such a variety of numbers that everybody will be pleased.

This band and its leader have met with remarkable ovations in Chautauqua work the past few seasons. In response to unanimous requests they have returned for the second season tour over some of the biggest Chautauqua circuits in the west.

As a leader Quintano is absolutely unique. His baton flashes like lightning, but not in wild or absurd gyrations. His style is individual, picturesque and fascinating. No living bandmaster is more resourceful or authoritative in the conveyance of his ideas of interpretation to his men.

DOG QUARANTINE ALL OVER ONEIDA COUNTY

The State Department of Agriculture has ordered a dog quarantine placed upon the entire county of Oneida. This order goes into effect at once, and it will probably be continued for at least 90 days.

This is said to be the first time that the entire county has ever been placed under a dog quarantine at one time.

The prevalence of a number of cases or rabies in the towns hitherto quarantined, and the probable danger of the spread of the disease into towns not quarantined are believed to have influenced the State Department of Agriculture to take the action named.

Strict rules will govern the quarantine, and severe penalties are providing for their violation.

DAY BY DAY

Chronicle of Events and a Forecast of What is Doing in Officialdom—Special Correspondence.

By Frederic T. Cardoze

Albany, July 7.—Taking the position that it would be superfluous to write into the State Constitution amendments which are already provided for in the Code of Criminal Procedure, many of the delegates to the Constitutional Convention are of the opinion that the propositions covering capital punishment, prize fighting and race track gambling will not be favorably reported from committee.

The fact that murder, first degree, is not dealt with in the Constitution and yet the State has for years dealt with those found guilty of it, is considered as sufficient argument that the laws relating to the offense are sufficient. It is also pointed out that there is also a law governing race track gambling which is sufficient, if enforced, to make it unnecessary for the delegates to the Constitutional Convention to deliberate upon any proposal seeking to strengthen the Constitution in that respect.

Reform organizations throughout the State have been busy with the preparation of literature with which to deluge the delegates and petitions and circulars in great numbers have been sent to Albany urging that race track gambling be made impossible by amending the Constitution so as to prohibit it beyond a possibility for it to exist. This wealth of endeavor has not had a potent effect, inasmuch as many of the delegates appear to have taken the position that the peace officers of the State are clothed with sufficient authority to stop the betting practice and that it is quite unnecessary to amend the Constitution in this respect.

Considerable attention is being devoted to the various proposals aimed at reconstructive financial methods, the budget system being the one proposition which is gaining the close scrutiny of both Republicans and Democrats. It is recognized that some drastic amendment must be written into the Constitution to prevent extravagance and that failure to take this step will mean that the resources of the State, seriously threatened during recent years, will be further depleted.

While there is opposition to the budget system proposition, many of the delegates agree that in order to protect the funds of the State a more eract and definite method of preparing the estimates for the support of the government must be devised. The opinion is quite prevalent that without a more substantial barrier against extravagance and haphazard financiering the prosperity of the State cannot be assured and that the present system, comprising the preparation of the annual supply and appropriation bills, should be supplanted by a business-like plan, such as a budget system.

The position of the committee chairman is that very few of the proposals before their respective committees should be reported. They will sit tight accordingly upon the great majority of the proposed amendments only releasing those which are beyond all doubt necessary for the improvement of the Constitution.

Amendments to the Public Service Commissions law appear quite unlikely. The members of the public utilities committee seem to be satisfied with the law as it stands and the forecast is made that amendments to the Constitution in this respect will be ignored. In view of the fact that Governor Whitman found no particular fault with the public service commissions after a legislative probe has apparently had the effect of convincing many of the committeemen that the law under which the commissioners operate is adequate.

ATTORNEY BLAMES SKIRTS AND HEELS FOR ACCIDENTS

Attorney P. W. Cullinan, in a brief filed yesterday, says that "hobble skirts and French heels were the real cause of the accident" which befel Miss Agnes Frawley of this city. Mr. Cullinan represents the N. Y. O. & W. and his brief is to sustain an appeal to the County Court. The appeal is taken from Judge Wilson's court, in which a jury awarded Miss Frawley $500 for injuries which she claims to have received when she was thrown from the steps of a passenger train at the Broadway station. The total amount of the judgment is $529.25.

Mr. and Mrs. Charles Cavanaugh and family are visiting friends in town.

* * *

Mrs. Arthur Drake and son of Newark are the guests of Mrs. Drake's parents, Mr. and Mrs. John Carroll.

* * *

Harold O'Keefe of Geneva is visiting Mr. and Mrs. M. E. Reynolds of the West Side.

* * *

Miss Celia Smith left yesterday for a week's vacation at Watertown.

* * *

Mr. Schartz of Ilion has been sepnding a few days with Mr. and Mrs. S. Waldhorn.

* * *

Miss Kahn of Michigan and Miss Lavine of Buffalo, spent the Fourth with Mrs. and Mrs. Samuel Waldhorn.

* * *

Miss Edna Briggs of Oneonta is visiting Miss Francis Goman.

* * *

Mr. and Mrs. William Braker and daughter Edna of Oneonta motored to Fulton yesterday and spent the day with Mr. and Mrs. J. M. Watson. Mr. and Mrs. Brakes returned home last night. Miss Edna will remain in this city during the summer months the guest of friends and relatives.

* * *

Mrs. George Corregon and son Winston arrived here today where they will spend the summer with Mrs. Corregon's mother, Mrs. Adeline Bilhardt, of S. 5th st.

* * *

James Frazier of Canada is spending a few days with friends in this city.

* * *

Prof. and Mrs. Leland Freeman of Canton, spent the Fourth with the Misses Freeman of Academy st.

* * *

Mrs. George Drury of Rochester is spending two weeks with Mr. and Mrs. John McDonald.

* * *

Mrs. Arvin Rice and daughter Nellie left today for Big Moose Lake where they will spend the summer months.

* * *

The Elizabeth Robertson class of the Presbyterian Sunday school will hold a picnic at Bradley's grove, near Phoenix, Friday next. Excursionists will leave this city on the 10.59 trolley car.

* * *

Mrs. Gertrude H. Connell of Carthage is the guest of the families of L. W. Rice and E. J. Petrie.

* * *

Mr. and Mrs. C. K. Anderson had as Fourth of July guests, Mrs. Kirk of Albany and Mrs. Clark of Syracuse.

* * *

Mr. and Mrs. O. Clark and daughter spent the Fourth with Mr. and Mrs. James Prentice of North Volney.

* * *

Mrs. Frances Maule Bjorkman, one of the ablest suffrage speakers, is expected in this city in the near future.

* * *

Miss Florence Slauson in company with Oswego friends is spending a vacation at Kamp Kum Inn at Selkirk.

* * *

Mrs. Bessie Seeley of Syracuse has returned to her home after spending a few days with her sister, Mrs. Harry Allen.

* * *

Master George Hall is recovering from the effects of the powder explosion he experienced on the Fourth.

* * *

The First M. E. church of Oswego will picnic at the fair grounds on July 15th.

* * *

John Gillard has as his guest Geo. Fletcher of Minneapolis, Minn., a former resident of this city.

* * *

Robert L. McCully is slowly recovering from his recent serious illness.

* * *

Orin Bogardus has returned from Clifton Spring greatly improved in health.

* * *

Orin Henderson, Fulton's pioneer resident, has been confined to the house the past few days by illness.

* * *

Water rentals for the quarter ending June 30 may be paid without fee until July 20.

* * *

Miss Kennedy, manager of the Henderson stor,e has returned from a visit with relatives at Oneida.

ATLANTA BIDS TO THE ELKS

Georgia City to Rival All Former Efforts in Making the B. P. O. E. Entirely at Home.

In the month of May, 1914, Atlanta won a brilliant and enduring place among the convention cities of the United States.

The laurels of that great Shriners' Convention crown the capital of Georgia as a host without a superior in the wide range of American hospitality.

The greatest assembly of Imperial Shriners that this illustrious social and fraternal order ever knew—ten thousand in number and twenty thousand in enthusiasm—were Atlanta's guest for seven days; happy, comfortable, untroubled, uncrowded well fed, well housed, cordially welcomed and superbly entertained—from the opening day to the final goodbys.

It was an extraordinary and seemingly impossible feat for a city of 175,000 people to entertain the Shrine—the gayest and brightest and perhaps the richest organization in fraternal life. But to entertain the Shrine at its best—gathered in its greatest numbers, educated by the lavish hospitality of larger cities, and keyed to the top notch of expectation—and to entertain the Shriners confessedly better than they had even been entertained before—has simply made Atlanta's reputation and stamped its invitations to other conventions with a guarantee as standard as the coin of the realm.

Now for 1916 Atlanta fervently desires to entertain the Grand Lodge of Elks of the United States. The Grand Lodge this year meets in July in Los Angeles, and Atlanta's invitation will be presented there by an able and eloquent committee of the Atlanta Elks.

Atlanta Elks will be able to say truthfully to the Elks of all the country: "All and more than we did for the Shriners of the United States in 1914 we will do for the Elks of the United States in 1916! If we gave the Shriners the greatest meeting they ever had, we are able to promise the Elks an even greater entertainment because we have behind us the experience and the education of that other brilliant convention."

And surely this brief speech, sincerely made, ought to carry to the American Elks the abundant assurance of everything that hospitality can provide or that the fraternal heart can desire.

It is worth a trip across the continent or from any part of the continent to see in the soft young Springtime this radiant and beautiful Atlanta of the South—most famous, most popular and most prosperous of all its cities.

It is a liberal education to an American who has not seen the south to go traveling through that beautiful and wnderful country when the trees and the grass are green, when the streams are all flowing softly, and the young crops are bursting from the earth, and the hearts of the most cordial and gracious people of the Republic are pulsing and glowing with hospitality.—N. Y. American.

Rolls, best by test, is the verdict of those who eat Black's. adv.

CHARLES W. CANDEE, 97, BURIED THIS AFTERNOON

The funeral of Charles Wilson Candee, 97, was held in Phoenix this afternoon. Services were held at the Candee home at 1.30 o'clock and later at the Congregational church, Rev. N. S. Allen, officiating. Burial was made in Rural cemetery.

Mr. Candee was born in the town of Volney, on the farm which his father, Barzil Candee, then owned and occupied, a mile and a quarter north of Gilberts Mills. His parents came from Litchfield, Conn. In 1835 the warm was sold and they moved to Mexico in March, 1837, to the farm of 150 acres one half mile east of Phoenix. This farm is still in the family, being owned by C. E. Candee, jr., a grandson.

He married Ann H. Marsh, of Whitesboro on Febuary 3, 1847. In 1849 he purchased his father's farm near Phoenix, which he continued to operate until here moved to this village. Mr. Candee was engaged in the grocery business with Orange Chappell, their store standing on the present site of the Howard House, in 1841-42.

His wife died October 29, 1893, and on December 31, 1896, Mr. Candee married Mrs. Antoinette Francene Cheever, daughter of Allen Hicks of Seneca Falls.

Mr. Candee served as supervisor in 1864 and always was an interesting figure at th supervisors' annual banquets. He also served as commissioner of highways and poormaster. He was a staunch Republican and from majority to his death never missed a general election, nor since moving to the village a charter election.

Mr. Candee was one of the incorporators of the Oswego and Onondaga Insurance Company. For many years he was an active member of the Congregational church, of which he was the oldest deacon, having served in that capscity since 1854.

During the Civil War, Mr. Candee was chairman of the town committee to fill the town quota required under the several calls made by President Lincoln. He was in good health until a short time ago and his mind and memory were remarkably clear.

Besides his widow, he is survived by one son, Charles E. Candee.

WAS-TO-BE BRIDE WAS IRRECONCILABLE

"Nothing doing," said a Corning was-to-be bride when the groom arrived forty-five minutes late and now her parents announce that there will be no wedding. The bride-to-be is Miss Grace Sands of Corning and the groom-to-be William Godden of Hornell. It is said that when Mr. Godden arrived on the scene he brought with him two keys, one to a newly furnished home in Hornell and another to a cottage on Lake Keuka, where the honeymoon was to have been spent, but nothing appealed to the young lady after she had waited, worried and fretted for nearly an hour.

Worms Cause Many Children's Ills

Worms, by thousands, rob the child of nourishment, stunt its growth, cause Constipation, Indigestion, Nervousness, Irregular Appetite, Fever and sometimes Spasms. Kickapoo Worm Killer gives relief from all these. One-fourth to one of these pleasant candy lozenges, taken as directed, kill and remove the Worms, regulate your child's bowels and restore its health anl vitality. Get an original 25c. box from your Druggist. Don't endanger your child's health and future when so sure and simple a remedy can be had.

For the Children

A Sweet Little Girl at the Flower Show.

Photo by American Press Association.

Not long ago there was held at one of the big New York hotels a flower show that was attended by many society folks. Among the visitors was Miss Ruth Atkins, a sweet little miss, whose portrait is shown herewith. Ruth was greatly pleased at the beautiful display of flowers, and many of the people at the show thought Ruth was the most charming rosebud of all the gorgeous display. As she was going about with her mamma the camera man came along, and he was so struck with Ruth that he snapped her picture then and there. If by chance Ruth should see her picture in the paper she would be a surprised little girl.

Kick and Run.

This is a boy scout game and is played in a clearing or open field with a regular association football or basketball. One scout takes his position in the clearing, and the rest seek cover as near as possible. With a scoutmaster acting as umpire, the ball is rolled into the open space and the scout inside immediately kicks it out and rushes out to tag any other scout he can find and catch, but directly the ball is kicked back into the clearing he must return and kick it out. The umpire watches the ball and as soon as it comes to a standstill inside the clearing blows his whistle to indicate the fact. While the one scout is returning to kick it out the others may change their positions or seek fresh hiding places.

The scouts who are caught remove their scarves or wind a white handkerchief around one arm and then help their captor to catch other scouts. They must not kick the ball, but must return to the clearing each time the whistle is blown. The winner is the scout who is caught last. In an open field the "clearing" is indicated by a white mark on the grass or by corner posts and scouts have to elude capture more by dodging than by seeking cover.

As a variation successive patrols may "hold" the clearing and endeavor to capture the rest of the troop in the shortest posible time. The patrol leader only is allowed to kick the ball out of the clearing. The winning patrol is that which takes the shortest time. In this variation the scouts who are caught do not take any further part in the game.—Scouting.

Wall Scaling For Scouts.

The exciting and trying sport of wall scaling is being taken up by many of the more [illegible] troops of boy scouts. Wall scaling looks daring, appeals to the eye and gives opportunity for snappy contests. Teamwork counts and fumbles are glaring. Altogether, to the troop which has or can make the necessary equipment wall scaling is well worth the effort. There are few exercises so thrilling with so little of the element of danger of mishap. Many troops are practicing wall scaling at this time with a view to putting on exhibitions at various public gatherings, encampments, and the like this summer.

Girlie's Troubles.

My name is little Albertine,
But mother calls me Tommy
Because my clothes are never clean,
My hands are always gummy.

She stops me racing through the house,
She says I make a racket;
Declares she'll dress me in a blouse
And put on pants and jacket.

Because I climb up fence and trees,
Make mud pies in the gutter,
Forget to say "Thank you" and "Please"
When I want bread and butter.

And after I am bathed at night,
She prays, "Lord keep her cleanly."
But daddy holds me close and tight
And [illegible]

BEAUTIFUL LAMP SHADE.

How to Make One That Has Some Novel Features.

Have you a child's discarded parasol in the house? If so, bring it to light and transform it into a handsome lamp shade for electric light. The very latest and most beautiful shades are exactly this shape, and once the handle is removed from the parasol the rest is easy.

So take the handle as carefully as possible and then remove the covering. The frame will probably look hopeless to the amateur interior decorator, but she must get a strong piece of cord and take it around the edge of the frame, holding down each rib firmly. In doing so she should pull the cord rather tight between the ribs so that the shape becomes more bellied than formerly.

The next step is to rip away one of the sections of the covering and press it well, especially along the seams. This is the pattern by which all the new sections are cut.

A soft, thin india silk makes the best kind of covering for a lamp shade, and the most satisfactory colors are old rose, orange brown and yellow tones.

When cutting the sections follow the pattern exactly, but cut an inch or so longer at the wide end. Next baste each section carefully together and stitch up on the machine. Place the finished cover over the frame and secure at the top temporarily. Draw the material down each rib and turn up the surplus to form a hem. Stitch the hem and insert a narrow elastic. The cover is now complete, ready for the frame.

Sew it at the top and finish with a covered button mold, a pompon or any small ornament at hand. With very strong thread secure the cover to the ribs and then with the fingers draw the fullness away from the ribs at the center. There will be little or much fullness, according to the bell effect given.

$1,300,000 FOR SUFFRAGE.

Women to Get More Than Expected From Mrs. Leslie's Estate.

Appraisal of the estate of Mrs. Frank Leslie, who was the Baroness de Bazus, indicates that the legacy to the women's suffrage cause will be much more than the expected $1,000,000. It will be at least $1,300,000 and probably more.

The appraisal shows Mrs. Leslie's personal estate amounted to $1,737,477, but her realty holdings were $30,000 more, making a total of $1,767,477. The bequests to friends and relatives named in the will, the sums paid to avoid contests and the expenses will not, it is thought, amount to as much as $400,000.

The Unwilling Worm.

Damon Runyon and Sid Mercer, New York sporting writers, were fishing in Great South bay one Saturday afternoon in the autumn. Mercer caught fish regularly. Runyon had never a nibble. Finally he reeled in.

"Come on, Sid; let's quit," he said.

"Why?" inquired Mercer. "There's an hour yet before dark."

"I think I might as well quit," said Runyon sadly; "my worm's not trying."—Saturday Evening Post.

One of Choate's Retorts.

During Joseph Choate's early practice he was opposed in a certain case by a hot tempered attorney who possessed more brawn than mental acumen. In the progress of the case Choate's adversary wholly departed from his self control and threatened physical hurt to his opponent. "I can whip six like you," asserted the lawyer. Choate looked at him with a profound calm contempt. "When I was a boy," he returned, "my father owned a bull. He was a wonder to fight. He could whip all the cattle in the neighborhood and did it. But at that," concluded Choate, "he couldn't win a lawsuit."

Silk Very Popular.

For several seasons past the cry has been heard early in the autumn or the spring, "This is to be a silk year." Probably the wish was father to the thought, and as a matter of fact, silk really has been growing in favor year by year until now it may be asserted with a fair degree of accuracy that this is a silk year.

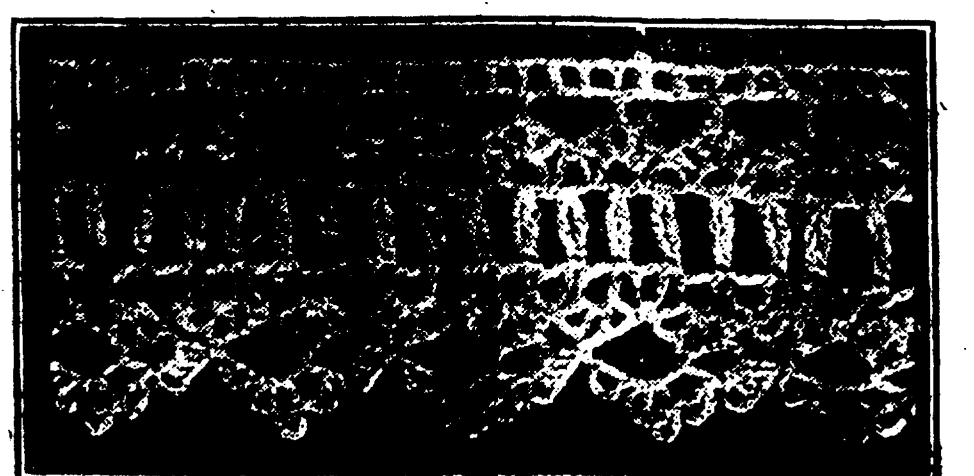
THE AWKWARD AGE.

Many girls feel the "awkward age" very intensely and shrink from comparison with their smarter friends. It is a question of temperament and perhaps environment, and it is a time when the help and consideration of their elders is invaluable. Mothers have been heard to remark, "I don't know what to do with my girl. She is so careless about her clothes and is so fat and clumsy that it is useless trying to make her look nice."

Really, it is never "useless." No doubt her dress will need very special care and thought, but even the plainest young girl may prove to have been only an "ugly duckling" and blossom into a very nice looking woman if she is properly looked after at this critical time.

Well fitting clothes, nice shoes, becoming hats, and, above all, good corsets, will do much to remedy defects, while frocks can be simple and yet designed to counteract too generous proportions, or that thick waisted appearance which so often comes with immature years.

Women Are Crocheting Many Dainty Lace Patterns



ROSENEATH CROCHET LACE.

ABBREVIATIONS.—Ch., chain; d.c., double crochet; tr., treble; d.tr., double treble.

Use crochet cotton No. 24 or No. 22. This pattern measures 1½ inches in width.

Nine ch., 1 tr. back in the first ch., repeat for the length required, turn.

This row forms an insertion. The edging and footing rows are worked each side it respectively.

Edging, First Row.—Eight ch., 1 triple tr. (thread 3 times over hook) under the tr. of insertion, * 1 picot (of 9 ch., 1 tr. back into first), 2 triple tr. under next tr. below, taking off last two stitches together, repeat from *, turn.

Second Row.—Five ch., 1 tr. in first picot, * 3 times work 2 ch. and 1 tr. in same picot, 1 d.c. in next picot, 1 tr. in next picot, and repeat from *.

Third Row.—* 9 ch., 1 tr. in first ch., 1 d.tr. in middle space of 2 ch. below, 5 ch., 1 tr. under d.tr. (just made), 1 picot (of 5 ch. and 1 tr. back into first), 1 tr. under same d.tr., 1 picot, 1 tr. in same place, 1 d.tr. in end space of 2 ch. below, 5 ch., 4 tr. under this last d.tr., 1 d.c. in middle space of next group of 2 ch. spaces, repeat from * and fasten off.

Footing, First Row.—Like the third row, but putting the tr. and d.c. under the ch. loops.

Second Row.—Seven ch., 1 tr. in middle space, * 7 ch., 1 tr. in next middle space, repeat from *.

Third Row.—Work spaces of 2 ch. and 1 tr. all along, missing 2 ch. below.

SEES PERIL OF FAMINE THREATENING AMERICA.

Botanist Says Population Is Outgrowing Food Supply Twenty to One.

There is grave danger that a famine will descend upon the United States some time in the near future, according to Professor John M. Coulter, head of the department of botany of Chicago university. Population is increasing twenty times faster than the food supply, he finds.

"We ought to have enough foodstuffs in this country to feed the world," said Professor Coulter. "Instead we soon shall not have enough to feed ourselves. This growing discrepancy between food production and population is the basis of the high cost of living.

"Four remedies present themselves to prevent famine in the United States. First, we should develop scientific methods of soil cultivation. We must manipulate the soil properly and farm intensively, as the Europeans do. By scientific treatment of the soil crops can be increased 300 per cent in the United States.

"Second, we must plant on every area the crop which will give the maximum yield in that section. Stop planting wheat in corn land, and don't try to raise potatoes in swamps. Too many farmers plant their crops without knowledge of what their land is suited for.

"We must, in the third place, develop drought resisting crops. This is the work of the professional botanist and is to be accomplished through experiment.

"Then, at last, we must produce disease resisting crops, for plants, like animals, are subject to ills of the flesh. This, too, is the work of the botanist.

"If these suggestions are carried out with reasonable thoroughness the high cost of living will vanish as concerns foodstuffs."

FASHION'S FEATHERS.

Large broad brimmed hats are trimmed with flat flower motifs, which are made of long ostrich fronds, usually in two contrasting tones, such as pistachio green and pale beige, gunboat gray and terra cotta, scarlet and soldier blue, black and white, etc. Chrysanthemums, marguerites and gardenias are imitated in long flued ostrich plumage and are sometimes used with flowers, sometimes independently, on dress hats of all descriptions. Some toques are covered with plumes.

Large wings in either a solid color or two contrasting tones, and also entire birds, are used on tailored hats. Quills are much used on sailor shapes and on toques to add width. It is not unusual to see as the sole trimming two immensely wide, but only medium long quills pasted to foundation sections of bias, unhemmed piece velvet in the shade of the straw and arranged over the left side of the toque to create width as well as height. Four long, very fine quills made of ostrich are arranged at random over the brim of a hat. They are held in place at either side by unique square motifs braided in checkerboard effect from narrow leghorn braid and equally narrow folds of satin. These squares are folded diagonally across the center, forming two triangles which clasp the brim at either side, and form an exceedingly chic as well as novel finishing touch.

To Cure a Felon.

For a felon put salt on cloth, saturate it with turpentine, then bind on.

ROSES FOR DECORATION.

Rug and Curtains to Match Are a New Fad Which Is Very Pretty.

Cretonne hangings, which match the flowered tapestry border of the rug,

RUG AND CURTAIN.

will prove a popular novelty for the summer cottage or bungalow.

Winning a Smile.

The Small Boy—Are you the boneless man?

The Caller—Boneless? Why, no. What gave you that idea?

The Boy—Pa said you was a contortionist.

"A contortionist?"

"Yes. He said you was always patting yourself on the back."—Cleveland Plain Dealer.

To Remove Discolorations.

What neat housekeeper is not annoyed when she sees on the spotless woodwork of her door or windows those long, dark scratches which reveal that some one has tried to light a match by drawing it across the paint? Here is a remedy for the marks which quite defy soap and water. Cut a sour orange or lemon in half, apply the cut half to the marks, rubbing for a moment quite hard; then wash off with a clean rag, dipping first in water to moisten it, and then in whiting. Rub well with this rag, dry thoroughly, and nine times out of ten the ugly marks will be conquered.

All finger marks on painted walls, etc., should be rubbed off with a little damp whiting in the same way and never washed with soapsuds, which destroys the paint.

Don'ts For the Sickroom.

Don't cry in the room—ever.

Don't every few minutes ask the patient how she feels.

Don't let her know her sickness is an added expense, perhaps heavy.

Don't walk on tiptoe if not necessary.

Be considerate, pleasant, offhand, but don't fuss.

Don't forget to see she has bits of interesting news from the outside world each day.

Don't let everybody crowd into the room at once or stand in the doorway with long faces.

Debar depressing relatives who "mean well," but are lacking in tact. Use force if necessary.

Avoid all friction from any source. Never under the most trying circumstances allow the patient to feel for one moment that she is a [illegible].

A TABLE OF LOGARITHMS.

Its Use In Working Out Complex Mathematical Problems.

A logarithm is an exponent, and an exponent is a number showing how many times another number has been used in any multiplication. Ten times 10 equals 100. It was used twice, and its exponent is 2. Ten cubed equals 1,000, and its exponent is 3; while 10 to exponent 4 equals 10,000, and so on out toward infinity. But suppose that we wish to use 10, say 1¼ times or 1⅞ times instead of twice. Then the exponent must be computed, and exponents thus computed are always printed in tables.

Thus, as I am now writing, the paper, as always, by day and by night, is very near a precious book, a table of logarithms for all numbers from 1 to 108,000, computed out to seven decimal places. To give examples of their use, suppose that you wish to multiply 8 by 11. Look in the table and you will find the logarithm of 8 to be .9030900, and the logarithm of 11 to be 1.0413927. Add these and the sum will be 1.9444827. Look along the column and it will be seen that this is the logarithm of 88.

Easy. But suppose you wish to multiply two strings of figures of from 5 to a dozen. In the great standard mathematical sciences, such as astronomy, physics and chemistry, the multiplication and division of immense numbers are required. Thus, let us square the number 31558149—that is, multiply itself by itself, a tedious job. But this toil can be saved by the use of logarithms. Thus, the logarithm of 31558149 is 7.4991289, taken directly from the table. Then, to square any number multiply its logarithm by 2, and this logarithm multiplied by 2 equals 14.9982578. Now, by looking in the table, the number of which this is the logarithm is 995916962096951. Hours of work are performed in a few minutes.—Edgar Lucien Larkin in New York American.

STONE MEASURE.

There Is No Regular Unit, and It Fairly Revels In Variety.

Owing to the variety of uses to which stone is put, there is no regular unit of measurement employed by the quarrymen, the stone being sold by the cubic yard, cubic foot, ton, cord, perch, rod, square foot, square yard, square, etc. Building and monumental stone, especially the dressed product, is usually sold by the cubic foot or the cubic yard, although this unit varies with the class of stone and with the locality; a large quantity of rough stone is sold by the perch, cord or ton.

Rubble and riprap, including stone for such heavy masonry as breakwater and jetty work, are generally sold by the cord or ton. Fluxing stone and stone for chemical use—as for alkali works, sugar factories, carbonic acid plants and paper mills—are sold by the long ton. Flagstone and curbstone are sold by the square yard or the square foot, the thickness being variable and dependent on the orders received. Granite paving blocks are sold invariably by number, but the blocks are not of uniform size, the value depending on the size of the block and the labor necessary to cut into the shape desired. Other paving material is sold by various units, such as ton or cubic yard.

Crushed stone is usually sold by the cubic yard or ton, the short ton being more generally used. The weight of a cubic yard of crushed stone varies from 2,300 to 3,000 pounds, the average weight being about 2,500 pounds. In certain localities crushed stone is sold by the "square" of 100 square feet by 1 foot, or 100 cubic feet. Crushed stone is also sold by the bushel, 21½ bushels representing a cubic yard of about 2,700 pounds.—Geological Survey Bulletin.

The Senate Barber Shop.

Here's an odd thing about the United States senate barber shop: Although the number of senators has hardly increased at all, the number of shaves has increased at a surprising rate in recent years. The reason is simply that the senate is now inhabited largely by comparatively young men with smooth faces or wearing mustaches at most, and they are obliged to get shaved every little while, whereas the old style senator with a riot of whiskers never had occasion to visit a barber shop except every few months to get his hair trimmed.—Cincinnati Enquirer.

Disgusted.

One day while her grandfather was paying a visit to Florence's home the little girl said to him:

"Grandpa, your talk about perseverance winning is all nonsense."

"Well, well, child!" cried the grandfather. [illegible]

"Why," said the little girl, "I've worked all the afternoon blowing soap bubbles and trying to pin them on mother's hat."—New York Times.

A Little Ambiguous.

Musician—You didn't get around to my recital last night. Friend—No. I had a splitting headache. However, everybody told me I should have gone, because you would have made me forget all other suffering.—Richmond Times-Dispatch.

Heard on the Train.

"What book is that you are reading, Jim?"

"'The Sorrows of Satan.'"

"Well, I'll say this for you, Jim; you always do take considerable interest in the troubles of your friends."—Boston Transcript.

Wise men say nothing in dangerous times.—Selden.

DAINTY DANCE DRESS.

Maize Colored, Flowered With Pastel Figure and Lace Trimmed.

FOR THE SUMMER GIRL.

A dainty dance dress of pussy willow taffeta in maize color with pastel flowered figure is shown in the illustration. A lace trimmed drop peeps from under the circular skirt while a suggestion of a bodice with draped satin girdle and streamer ends afford a charming combination. Silk net in soft folds and plaited sleeve caps with dainty flowers supply all that is necessary to the bodice.

THE SUNNY SIDE.

Do Not Envy Your Neighbor; He Has Troubles of His Own.

Don't allow yourself to fall into the way of thinking that you have all the troubles there are in the world. Don't for a moment think that life is unfair, that the scales are unevenly balanced by an unjust fate; that you have all the sorrows and cares while some one else has all the joys. You will be in a bad way when you begin to follow such a train of thought.

Life is, after all, very square, very even. If we have sorrows we also have joys. If we have shadows we also have sunshine. But neither you nor any one of us can have a monopoly of either the shadows or the sunbeams; we each have an equal share of both. And if any one of us seems to have more than his share of shadows, if he seems to have been given the lion's share of care and trouble, it is only because he does not make the most of the sunshine while it is with him. He is too busy worrying about the sorrow he has had and the care he may have in the future to enjoy the happiness of the present.

Don't envy your neighbor who rolls about in a high priced automobile, while you have to walk. He has his share of troubles, even though poverty may not be among them. Don't wish you were in his place just because he seems to have every luxury. If you were in his place you might give anything to be back home again in your own home.

Our happiness is such as we make it. It is lying ready within hand's reach. We have only to stretch out our arms and take it. The difficulty is that most of us are too busy looking for trouble to see the happiness at our door. Most of us are no sooner through with the problems of today than we begin anticipating the difficulties of tomorrow. Is it any wonder that we find so much trouble in life when we are looking for it so [illegible]?

Let us reverse our usual mental processes and begin looking for happiness. If we keep thinking of the pleasures of life we will surely find them. "Search and ye will find." This being so, why not search for the beautiful, the happy and the bright instead of the dark and gloomy? Let us forget about trouble for a while and look only for joy. You will be surprised to see how much of it you will find.

Don't let the [illegible] fall on every path spoil your [illegible] the sunshine. Far better to [illegible] so full of the subeams that [illegible] shadows fall you will not notice them for the brightness in your heart.

Timely Tips.

Here is a description of an outside coat that one can wear through an entire day, say, if one comes to town from the country home, goes shopping in the morning, to tea in the afternoon and stays in town to dine and the theater. For this suede cloth or a first class duvetyn is just right. Taupe, dull green or one of the dull orange or golden brown shades can be had in these materials. A king's blue, futurist or Roman striped lining gives life to such a garment and lends it individuality when it is thrown back over the chair.

WAR TAX LAW IS A BLUNDER

Party Responsible for Its Passage Would Remedy the Act, But Hesitate to Call Extra Session.

Washington, D. C., July 6.—One of the most vital and inexcusable errors a legislative body can commit it to pass a law containing a discrepancy in the date it shall take effect.

The Democratic Congress incorporated just such a blunder in the "war tax" law.

Section 21 of this law declares that "the stamp taxes prescribed on the articles provided for in Schedule B shall attach to all such articles tirty days after the approval of the act."

Schedule B itself, however, provides that "all articles and preparations provided for which are in the hansd of manufacturers or dealers on December 1, 1914, shall be subject to the payment of the stamp taxes herein," etc.

The two provisions are absolutely contradictory. When the Treasury Department came to enforce the law it was unable to harmonize the two conflicting dates. Congress had adjourned and it was impossibel to correct the blunderr by proper legislative action.

A forced interpretation was the alternative. The Department arbitrarily fixed the date of enforcement, virtually assuming a function that belonged only to the legislative body.

The whole subject of financial legislation seems to have been a fatal stumbling block to the Democrats. While they have blundered in scores of other important measures, this tendency has been specially emphasized in every statute dealing with the receipt or expenditure of money to conduct the affairs of government.

The last Congress passed three laws notably designed to raise money—first, the tariff law; second, the income tax law; and third, the "war tax." It is significant taht the revenues from each fell short of the amount needed, thereby contributing to the treasury deficit, and has led to a mass of expensive litigation because the legislative intent could be determined only by judicial interpretation.

JUDGE COVILLE TO MAKE NEW BOARD APPOINTMENTS

Judge Coville is empowered under the law creating widow's pensions to appoint the county child welfare board, but he has until some time in August to name the persons who will serve. Two of the six members must be women, and one will be County Superintendent of the Poor C. A. Stone, ex-officio. The members serve without compensation but have control over an appropriation to be made by the board of supervisors. No appropriation will probably be made in this county until the regular session in November.

R. H. McKAY HAS RETURNED FROM CLAYTON

R. H. McKay, of 212 South 6th st., has returned from Clayton where he spent a few days with Mrs. McKay and children. Mr. McKay has resumed his occupation, that of painting and decorating and will remain in Fulton the entire season, and will not leave as has been stated in error.

Fulton Keynotes

Mrs. Belle Wheaton of Gilbert's Mills visited friends here Saturday.

J. C. O'Brien returned with his family from Old Forge yesterday after spending the week-end at his summer camp in the woods. The camp, which was erected three years ago, is to be improved and enlarged before Mr. O'Brien and his family occupy it for the summer months. A local carpenter is at the camp this week engaged in the work.

ALDERMEN TURN DOWN $300 APPROPRIATION

(Continued from Page One)

his land. The option on the property secured by the city before the sale was consummated specifically states that the amount of land to be purchased by the city was not to exceed one half an acre or the land necessary for the site of a pumping station and wells. Other agreements were also entered into, according to the option. Mr. Johnson claims a city surveyor went over the property and surveyed the plot to be purchased by the city and according to the surveyor's figures the city owns the larger portion of his land at present. Inasmuch as he only agreed by the opition to sell one-half acre or the land for the pumping station and buildings, and his entire farm is more than forty acres, he asked the city council when he first appared to make some settlement with him in order that he may sell his property.

The city attorney was asked his opinion and advised a suit against the city to recover the land in question, stating that he knew of no other way for the city to return the land. Mr. Johnson has acted upon that suggestion.

PETROGRAD SAYS ADVANCE ON WARSAW IS CHECKED

(Continued from Page One)

would not necessarily mean an easy march into Warsaw, despite the fact the victors would control the railroads. The call attention to the splendid defenses of Warsaw, which includes the famous Alexandria citadel on the north and fifteen detached forts which surround the city.

The most disquieting reports from the front, however, are to the effect that the morale of the Russian army is broken. Large numbers of prisoners are being taken, and the Slaves are not fighting with the dash and courage that marked the earlier stages of the campaign.

The Russians do not admit that the day is permanently lost. The Muscovite commanders are hurling the flower of their armies against the Austro-Germans, in an effort to stop the advance. The most reassuring news from the front is to the effect that with the excepion of the district between Vistula and the Bug the Austro-German armies have not made any marked progress. The Russians are expected to desperately resist any further advance toward Ivangorad and Warsaw, nad are stiffening their lines for the supreme fight.

In all of the fighting of the last few days, the losses on both sides have been terrific, accordin gto all reports.

ASSESSMENT ROLLS READY FOR INSPECTION

The assessment rolls are now on file at the office of the city clerk and all taxpayers are requested to inspect the files at once in order to see if their assessments are correct. Last year there were several eleventh hour complaints, largely from property owners who were assessed for land and buildings which they no longer owned. In order that all complaints may be heard and mistakes reectified at once, all property owners, especially those who have disposed of property during the past year, should view the assessment rolls as soon as possible.

CITY SEALER HAD ONE BUSY MONTH

City Sealer Harry M. O'Brien in his report to the Common Council last night covering the months of May and June, stated that 101 weights and scales had been condemned, following his investigations, during the past two months. The list of the condemned articles follows: Platform scales, 8; counter scales, 5; spring scales, 6; beam scales, 2; computing scales, 3; dry measures, 8; liquid measures, 15; pumps, 2; oil-cans, 3; yard-sticks, 3; tapes, 2; weights, 13; crates, 20; dump wagons, 8.

A total of 743 articles were inspected.

Chief Dyer's Traffic Suggestion Stamped With Public Approval

Police Department to Try to Prevent Congestion of the Regular Saturday Night Rush of Street Traffic---The Old Trolley Bridge Closes.

The suggestion made by Chief of Police Edward Dyer regarding the parking of automobiles on the state lands in South First st. eventually to become a city park, has met with universal approval on the part of the merchants along lower First st., who forsee great congestion in that quarter for the next few weeks, while the work of removing the final sections of the Oneida st. bridge progresses. Conditions are such now in lower First st. that two vehicles can find just enough space to pass each other on the street and the operations planned by the trolley company and the canal contractors for the next few days will have even a greater tendency to narrow the available roadway at that point.

The manager in charge of the fill at Oneida st. outlined the operations planned by the trolley company to a Tmies reporter this morning. Tonight after trolley traffic ceases the company will shift its right of awy to the temporary tracks laid across the filled-in canal, south of the bridge. No trolleys will pass over the bridge after tonight, and tomorrow I. Alderman, the contractor in charge of the bridge removal, will start work on the large girder that still remains of the southern section of the bridge. As soon as the large girder is removed and the trolley roadway filled up, all traffic will move across the trolley fill, and the paving on the last section of the bridge, which is now being used as a roadway, will be removed. The removal of the bridge proper will follow. The work of filling in the canal to the required height will progress rapidly as soon as the bridge is removed, but these operations will tie up traffic to a considerable extent.

Saturday night is the busy night for tarffic and many people unaware that Oneida st. is closed at its western end, will drive in from both streets, expecting to make the circuit of the block. They will be turned back and confusion is sure to result. No automobile will be allowed to park along lower First st. in the congested section tomorrow night, as the merchants along the West side of the street claim the cars prevent people from corssing over, and it hurts their trade. If the Park Commission gives permission to autoists to park on the plot referred to by Chief Dyer, many will doubtless take advantage of this privilege, and leave their cars standing while they do their shopping on foot.

The suggestion made to the Fulton Auto Club to the effect that signs at First st. and Broadway advise automobilists to detour along the west side on account of the condition of First st. between Rochester and Broadway and the operations at Oneida st. becomes even more apropos in view of the announcement made yesterday that the East river road between this city and Oswego will be closed for traffic as the town of Volney is to erect a new bridge near Battle Island on the road, and there is no available bridge between this city and Oswego over which traffic can cross.

ARE THE ALLIES BUYING FULTON-MADE SMOKES

Are the Allies to smoke Fulton-made cigars?

Ask the Boland Brothers, who are manufacturing a new brand of smokes.

At any rate, the Boland Brothers' cigar-making plant is exceptionally busy. In former years the plant was always dull at this season of the year, but this week three additional workmen were employed by the Bolands and everybody is working full time.

When The Evening Times' reporter called the factory on the 'phone this morning, ex-mayor Boland answered. He was asked whether the wave of prosperity had hit his firm and the reply was, "Why, yes, we are busy; we've employed three new men, and are rushing work."

"How do you account for the increased business at this time," said the reporter.

"I can't account for it unless the Allies are buying our '50-50' cigar to smoke in the trenches," said Mr. Boland.

The "50-50" is said to overcome the evil effects of German asphyxiating gas, and in order to keep the men of the ternches in good trim for the defense of the French and English seacoasts, Fulton's industries are again drawn upon, is the current belief here.

KOWALSKI TO GET ANOTHER HEARING

Paul Kowalski, a saloon-keeper, of the West Side, who was recently adjudged in contempt of court for refusing to answer questions regarding his assets put to him by the referee in bankruptcy, was arraigned before Judge Coville in Oswego yesterday. Claude E. Guile, attorney for Kowalski said his client was ready to answer questions but the [illegible] him [illegible] represented by counsel. Judge Coville ordered Kowalski to appear before him for examination Monday next, and adjourned an application for a receiver until that time. The largest claims against Kowalski are held by a brewing company.

WEATHER FORECAST

Fresh southwest and west winds. Thunder storms this afternoon and tonight. [illegible]

Bureau of Information

Getting Ready for Fulton's New Era of Prosperity

The Division of Industries of the Chamber of Commerce, at its meeting, Thursday night, voted to establish a bureau of information. They are anxious to have a complete list of all houses for rent, houses for sale, houses being built or to be built—apartments and rooms furnished or unfurnished, with and without board and regular boarding houses. This information should include the name of the owner or his agent and his address; the location of the building, the number fo rooms; the facilities, such as hot and cold water, electricity, gas, bath, toilet, furnace, etc.; the rent asked, the time when such building, apartment or room would be available; rates for board and whether or not the families who might take boarders will take single men or families.

This information should be sent to the office of the Chamber of Commerce as soon as possible. The Division of Industries requests that whenever possible the information be sent in writing, as information given over the telephone is sometimes misunderstood.

The purpose of this list is to facilitate the placing of expected new comers to this city.

175 NAMES ON PETITION FOR SPECIAL ELECTION

The Chamber of Commerce announced this morning that more than 175 signatures have been affixed thus far to the petition asking the Common Council to call a special election on the question of Commission Form of Government in this city.

The petition was given its first impetus at the stag day gathering at Pathfinder Island Wednesday afternoon and at that time 61 voters signed. The necessary quota of approximately 250 signatures will be secured within the next two weeks, the Chamber hopes. The petition must be presented so that the special election may be held in September.

Clemens' Barn Burns; Loss Said to Be $3000

A fire in the barn owned by Louis Clemens, south of the Foster-Chatillaon Knife works in West First st. at 2 o'clock today, resulted in the total destruction of the building and its contents and a a loss amounting to $3,000. The building was insured but property of Mr. Clemens in the barn which was destroyed will amount to several hundred dollars.

The fire was first noticed by neighbors, who turned in an alarm. Instead of taking the lower bridge to the fire, one piece of apparatus took the route around Broadway, almost twice as far, as the building is near the lower bridge. When both pieces of apparatus arrived on the scene the fire was well under headway, and in spite of the rain that poured down in torrents, the flames gained ground. The typical west side water pressure was available and only small streams which at times could not reach to the top of the barn were brought into play. The rain assisted the firemen materially, and the downpour was a fortunate one, as the barn is surrounded by dwellings and on a clear day with a breeze, the flames could not have been held in check.

Five hundred people witnessed the blaze from beneath umbrellas and the shelter of porches in the vicinity. The chemical wagon made a trip to headquarters after the fire had been burning about thirty minutes, in order to procure additional hose. Three streams were finally put on the blaze and at 2.45 the firemen had the conflagration under control.

Mrs. Louis Clemens and an unknown man were taken in charge by Chief Dyer on the corner of South First st. and Broadway about 2.30 o'clock. The Chief would not say that Mrs. Clemens and her escort are suspected of having started the blaze but people in the vicinity of the fire this afternoon informed the Chief that Mrs. Clemens was in the barn shortly before the fire and made the remark to a young girl in the vicinity that "she was going to get out of town right away." It is said that Mr. and Mrs. Clemens have had some marital troubles, and Mr. Clemen's household is managed at present by a housekeeper. The Chief left for the Clemen's home at 3 o'clock and he will bring several neighbors and Mr. Clemens to headquarters for examination.

THAW FREED ON $35,000 BAIL; STATE APPEALS CASE

Neew York, July 16.—Supreme Court Justice Hendrick today vacated the order committing Harry K. Thaw to Matteawan, approving the verdict that the slayer of Stanford White is sane which was returned by a jury on Wednesday afternoon.

The State filed an immediate notice of apepal which will delay Thaw's final release from the hands of the law for several months, but Justice Hendrick admitted Thaw to bail in the sum of $35,000.

AIDED YOUNG LAWYER; GETS $5,000 BY WILL

Toledo, O., July 16.—Because she befriended the late Judge Isaac Pugsley when he came here from New York as a young lawyer in 1870, Miss Sarah Throckmorton is given $5,000 under his will.

No Crossing Flagman on Duty When Eames Collided With Train

Signal Bell Too, Has Been Out of Commission for Some Time at Same Crossing---Presence of Mind Probably Saved Motorist's Life.

Fred Eames, the 21 year old son of Clark Eames of the Emory road, had a miraculous escape from death last night when a motorcycle upon which he was riding crashed into the engine of a New York Central passenger train at Cayuga and Second streets. Eames is an enthusiastic motorist and has two machines of his own. The machine he was riding last night, however, is the property of a friend.

Young Eames turned into Cayuga st. from First st. about 8:35 o'clock and according to witnesses of the accident, was riding along at a fifteen-mile gait until he neared Second st. Intending to go up Cayuga st. hill, Eames increased his speed a trifle just before reaching the corner, when to the horror of the spectators, the 8:33 New York Central train, north bound, loomed into view directly in front of him and not more than fifteen feet away. Eames acted quickly, and shutting off his gas, turned the motorcycle sharply into Second st., intending to avert a collision by running with the train or in front of it. The sharp turn caused the machine to skid, and the motor crashed into the driving wheels of the engine, dragging Eames with it. Many spectators were certain that he would be killed, and men turned away, while women screamed.

The machine was caught in the driving wheels, but Eames managed to disengage himself, and picked himself up as the train came to a stop. He sustained many bruises and his clothing was torn, but he announced that he was unhurt. The engineer of the train hastily leaped to ground and was greatly relieved to find Eames alive. The machine was pratically a wreck. Eames refused medical attention and proceeded to his destination.

According to witnesses, Eames, at no time was drivin carelessly, and the blame for the accident lies wholly with the railroad, as no flagman was stationed at the grade crossing and the signal bell which should be in operation, did not ring, as it has been out of commission for some time.

There have been several narrow escapes at the crossing.

CITIZENS BAND TO GIVE SEVEN PUBLIC CONCERTS

The first of a series of summer band concerts made possible by donations of $200 on the part of the Chamber of Commerce and John W. Stevenson, will be held at the Elks' club next Thursday night, the band concert committee of the Chamber of Commerce announced this morning. The $400 subscribed will be used to defray the expenses of seven concerts, which will be distributed about the city as follows:

July 22 and August 19—Elks' Club.
August 5—First Ward.
August 26 and August 17—Second Ward.
August 12 and September 2—East Park.

No concerts will be held during Chautauqua and, after next Thursday's concert at the Elks', no concert will be held until August 5. The date of the concerts is subject to change, if weather conditions interfere.

It is unlikely that an ice-cream festival will be held in conjunction with next week's concert as the members of the committee feel there is insufficient time for preparation. The residents of the various wards will have an opportunity to select the sites for their concerts, and it is probable that Triangle Park, at the junction of Worth and Hannibal streets will be suggested for the First Ward affair. John W. Stevenson will be allowed to name the site of the Second ward concerts, and several available points have been suggested.

QUIMBY CONVICTED, TO APPEAL HIS CASE

Harry Quimby, the Oswego mail clerk, who was convicted of petit larceny in City Court last Tuesday and fined $15 by Judge Wilson, announced yesterday through his attorney, John J. Mournighan, of Oswego, that he would appeal the case.

Quimby was arrested on complaint of Robert Morrison, manager of the West Side garage, who claims he put four new electriu lights in Quimby's car on the night of June 14, and that Quimby drove off, refusing to pay for the lights. Quimby says that he was under the impression that the job was being done by a mechanic from an Oswego garage, which he called on the telephone from the Royal Hotel, on the West Side.

CURB AT ROCHESTER ST. TO BE LOWERED

Many truckmen who draw loads down Rochester st. along the canal bank, have complained of the high knoll that projects above the street level where the roads starts at First st. The teams have to draw the heavy loads over aten -inch curb at that point and although a wooden block has been placed there to aid somewhat, many teamsters have complained because the curb has not been cut out.

Frank Rumsey, of the Board of Public Works, stated this morning that the Board had delayed cutting the curb at that point until the street was paved, but added that he would see that the spot was improved at once.

Opinions

Sanatoriums for Gluttons

Mr. Henry Ford believes that something in the neighborhood of a million a year may be saved if the few thousand workers he employs can be taught to eat in moderation. Perhaps it is because over-eating is so general a vice that reformers rarely preach temperance in this respect, for while there are hundreds who profess to cure drunkards and consumers of narcotic drugs, it would be hard to find one who sets up as a reclaimer of gluttons.

It was only when alcoholism came to be less general that the reformers began to crop up. When drunkenness was a popular pastime there was no great demand for them, ad so today it may be doubfed whethher Mr. Ford's Department of Dietetics will be much sought after. However, if any one can create a general desire for a thing of this sort, Mr. Ford is the man. He is not only an enthusiast himself, but the cause of enthusiasm in others, and no man has ever succeeeded in gathering so many whole-hearted optimists about him. Consider, for instance, the glowing stories given to the newspapers so liberally by the medical men who have been aiding him in the admirable work of curing drug victims. Two of these unfortunates have just been discharged, after twelve days' treatment, and we are assured they are ready to take a new hold on life." Both arrived in "a desperate condition," and one "had been addicted to the habit for more than fifteen years." But when thhey left the hospital they told the doctor "they did not want any more drugs," and he let them go. A less enthusiastic doctor might possibly have been a little skeptical, but this one was quite satisfied. "Neither of them," hhe says simply, "has had any drugs of any sort for about four days," and so he "deemed it safe to let them go home alone."

These quick curers are an obvious improvement on the tedious old methods of other days. It is safe to say that up to this time no doctor ever would have dared to declare his faith in the permanency of so speedy a recovery. At this rate a dinner or two in Mr. Ford's dietetic establishment should set most gulttons on the right path. In the meantime specialists concerned in this enterprise have a glorious opening to talk.—N. Y. Tribune.

Keeping Her Faithful.

An Ohio judge has decided that a young man engaged to a young woman has no legal right to assault any other young man whose company she has accepted. In deciding a case involving such an assault the judge said:

"An engaged woman has the right to go with others. The fiance may have an action against her for breach of promise, but he can have no action against the third party. After marriage the third party may be sued for alienating the wife's afffection. But an engagement is merely a promise to enter into the marriage contract. The engagement, of course, should be held sacred, but just the same the lady has the right to accept the attention of other men."

For the engaged young man to submit in peace may be law, but it is not human nature.

For the engaged young man who must use his fists to keep the engaged girl faithful to him before marriage will not find in matrimony an end to his troubles.—Elmira Star-Gazette.

Policewomen as Editors.

Pittsburgh has appointed four policewomen to examine all magazines and determine whether their contents are suitable for the perusal of the citizens.

Every magazine which the policewomen are to scrutinize has been prepared by editors fitted for their task. not only by long study and experience, not only by at least a more than average share of literary cultivation, but, in the case of the more successful editors, by a rare natural aptitude for judging thel literary quality of an article or the artistic merit of an illustration.

But the policewomenare to overrule them!

We don't know precisely the qualities the policewomen are to bring to their task or the training they have undergone for it. If they are fit to perform the duties assigned them they would do better to discard badge revolver and club (if policewomen have the latter accessories) and seek editorial employment.

However, Pittsburgh should not be half-hearted in its zeal for purity. Why not have policewomen head the proofs of all the newspapers and sit warningly in the pulpits lest sensational preachers trapscend the bounds of Pittsburgh prudery?—N.F. American.

PUT CITY ON PEDESTAL

Where will the new high school be built? When will it be built, and will it house facilities for vocational guidance? These are questions that should be under lively discussion by Fulton people. The value of vocational training in itself is a topic in which every person should naturally be interested. The embryo working man and the budding manufacturer are equally to be served by the development of vocational guidance in the schools.

Today in Fulton, as well as in every other place which has not really faced its school problem, a wrong face has been put upon education. Education in error has been sought as a tool whereby an escape may be made from work. Work, the real blessing of mankind has become the thing which hundreds seek to avoid, and why? The workman unfitted for his work finds no pleasure in execution. To him, it is a grind, a hardship and a punishment, life doesn't mean much. However, watch the man who is happy in his work, and nine times out of ten it will be found he does his work well.

Thousands of persons daily go to tasks for which they are not equipped, and yearly our schools turn from their doors without true guidance their hundreds to enter trades or professions who become in countless cases unhappy, unsuccessful misfits in place of happy, useful men and women.

Education instead of being a scheme to avoid work or to make work easy, is rather a plan for preparing people to perform service, and the only way to obtain effective training for service is to perform it while in training.

A vocational high school for Fulton, one, too, by the way which could be used as a social center (with gymnasium and auditorium) would set our little city on the pedestal of real progress. The Falley site is the logical spot for such a building.

At the convention of the advertising clubs of the world, which was held in Chicago late in June, one speaker said that more than $600,000,000 was spent for advertising in the United States last year. It is a vast sum, but business men have learned that money spent in honest advertising, skillfully worded and judiciously placed, is one of their most profitable investments.—Youth's Companion.

SOME MORE OLD ONES

I have heard of the musician who died during a concert tour of an orchestra, and the following telegram was immediately despatched to the parents of the deceased: "John Black died today. Advise as to disposition." In a few hours the answer was received as follows: "We are broken-hearted! his disposition was a roving one." I have also heard of the young man who asked his father to change his course of study. "Talk to your mother, son," directed the father, who was reading the sporting page. "Mother," said the son, "I made a mistake when I elected chemistry. But it is not too late to change even yet. I want to take astronomy instead." The mother searched the eyes of her son sharply. Then she said: "Nope. You'll have to think up some better excuse for staying out at night." I have heard of the local band who were one day playing in Scotland when an old native came up and asked the bandmaster what the piece was they were rendering. "That's 'The Death of Nelson,'" replied the bandmaster. "Aye, man," said the native, "ye hae given him an awful death!" But the best story that I have heard is on Mrs. Flaherty who burst into the prinicpal's room, and stormed, "What do you mane by writing me that my Jimmie can't pass into the next grade? An' after him doin' such grand work all the year." "Why, Mrs. Flaherty," replied the teacher, "you must know better than that. I've sent you his report cards every month, and you know that his marks have been nearly all 'D's.'" "Indeed they hov, and yit you say he can't pass. I don't understand it, mum." "I'm afraid you don't understand our system of marking. 'D' means deficient, you know." "Sure, I don't know phat that may be, mum, but Jimmie told all about the letters. Sure, 'D' is dandy, 'C' is corking, 'B' is bum, and 'A' is awful—an' he's 'C's' and 'D's' ivery month."—The Silent Partner.

S. P. MASON GIVES REMINISCENCES

Tells Times' Readers of Days Between 1842 and 1850--- Fair Days in the Park.

Mr. Mason says:

"This is a continuation of a letter I wrote awhile ago. I will go back to 1842 and 1843 when they held the general training on the grounds where the park now is. A Mr. Thayer, who had no feet and walked on the stubs of his legs, was the father of the man who ran the carding mill where the Volney Paper mill now stands. The old man, always came with a wagon load of gingerbread, pies, cookies and friedcakes to sell on the days that they trained.

"In 1844 and 1845 the first that was held in this county was held where the park is. You were sure to see the old man and his wagon with the gingerbread and the other eatables to sell at the fair.

"In 1846 and '47 the fair was held on the flat north of the street at the west end of the river bridge.

"In 1848, the next fair was held at Central Square. They used large tents at that time for the floral hall and vegetable and poultry exhibits.

"They had a large exhibit of cattle. There would be from twenty to twenty-five yoke of oxen; more horses than cattle being shown then than now.

"I will take the readers back to 1844. The village of Fulton placed a hollow log on the east side of the canal, between the canal bridges, and fiteed it up for Grif Lathin where he sold candy, popcorn peanuts and toys.

"There could be a ten-foot pole turned around inside of this log giving an idea of the size of it.

John J. Wolcott kept a hardware store between the canal and the river bridge. The building stands there now.

"John Gasper kept a hotel on the corner of First and Oneida streets. There was a drug store on the same street east, and next was a meat market kept by Mr. Clark. Then a blacksmith shop run by Mr. French, where my father had his oxen shod.

"A little south of the hotel on First street, a drug store, kept by Mr. Shumway, next a jewelry store kept by Mr. Morrill, then a dry goods and grocery store which was kept in the basement.

"Mr. Spencer was clerk in the grocery department (fatherr of F. G. Spencer).

"In 1850 the Falley Seminary was built. No house but one south of the seminary. This was built by Parker Dexter in 1848.

"In 1859 there was a man who walked across the river on a rope which was stretcehd across the river opposite the Elks' temple.

"Mr. Oliver French and his brother built the first flour mill in Fulton on the site where the Genessee mill did stand.

"S. P. MASON."

Fulton, N.Y., July 14, 1915.

DYE CONSUMERS WOULD RESTORE TARIFF

New York.— Consumers of dyestuffs are preparing to petitition congress to restore the taric on those products. Petitions are being prepared for circulation among the textile manufacturers of the South. This action is interesting, as fifteen years ago the consumers opposed the levying of a duty on the German dyestucs. The result was, according to manufacturers and consulting chemists, that most American dye makers did not develop their industrry and that those who did remained largely dependent either for crude or intermediate products upon the chemical worrks of Germany. Even what seemed to manufacturing chemists at the time to be a very moderate tariff was bitterly opposed by the textile interests. The indications now are that both the textile mills and the dyestuff makers will make common cause in asking that the duty be restored. At the same time it is hoped that an anti-dumping clause will be enacted, as the American dyestuff industry received its most severe blow from the action of German manufacturers in selling certain cheap dyes very low in order to introduce their very profitable trade in the more delicate and expensive pigments.

WITH THE SUFFRAGISTS

If the opinion of the Chicago Examiner is worth anything, then politics in Chicago are cleaner and better because the women vote.

* * *

In response to Governor Brumbaugh's appeal for help in selecting the most distinguished living Pennsylvanian for honor at the San Francisco Fair, many papers throughout the state have nominated Anna Howard Shaw.

* * *

A poll of political leaders of New York State on the suffrage question published by the New York World on July 4 revealed George W. Wickersham in splendid isolation as opposed, Samuel Koenig as still on the doubter's seat, and all the rest in line for woman suffrage with William J. Connors in the lead believing that it will carry in New York in November.

* * *

It is the opinion of Governor Carlson of Colorado, expressed at the National Convention of the Anti-Saloon League at Atlantic City on July 8, that woman suffrage is a great aid in the enforcement of prohibition.

He must be considered an authority as in his state both woman sucrage and prohibition are in operation.

* * *

Women voters seem to be against socialism in Montana and California; women have helped put some very fine child and family legislation on the statute books of Colorado; they are strong supporters of the prohibition movement, and come out in ever increasing numbers to the polls; these are some of the points made by Frederick M. Davenport in his recent report of conditions in the western states which he made for The Outlook.

* * *

In America thousands of women have marched hundreds of miles in many processions in their quest for the vote.

In Denmark, the first procession organized by women was in celebration of the vote already won. A great demonstration of women was the march to the palace on June 5, the independence day of Denmark, and which waited while the new constitution was signed. After receiving greetings from King Christian the women marched to the House of Representatives where they were also received with honor.

It was a gala occasion unlike a certain suffrage procession in the city of Washington not yet forgotten. Evidently the breasts of Danish statesmen are not torn with those fears which beset Henry L. Stimson, ex-secretary of war, when he stated just the other day that woman suffrage "could not but be fraught with serious peril to the poise, the common sense, and the efficiency of government."

POLITICAL COMMENT BY THE POLITICIANS

The executive committee of the Progressive party in Syracuse is negotiating with the officers and representatives of the other politicial parties to determine whether to suuport the candidates of other parties or nominate a ticket of its own. How many voters are to be delivered in the deal is not stated, nor is anything said as to the spirit in which the proposal is received by the other parties.

* * *

Next year when the duty goes off of sugar $68,000,000 more drops out of the government's income and there is a big deficit already. Does this mean that there will be an inc-ease in the income tax, an addition to the "war" revenue tax or a sale of bonds to keep the government going?

* * *

Just how popular the Simmons-Underwood tariff is with the American people can be dtermined without difficulty on the morning after election next year.

In less than three months the new state tax deparment has been organized and placed on a working basis with four bureaus each in charge of a deputy tax commissioner who is in the competitive class of the civil service. Unfinished business left over by the old board has been cleared up and new business is taken care of as it comes in. This is in cheerful contrast to the conditions found by the board when it assumed office. Then there was no co-operation among the three divisions of the franchise tax bureau, appeals from equalization were pending from seven counties. there was no policy or procedure but throughout the office were duplication. neglect, inefficiency and waste. President Saxe and Commissioners Knapp and Thomas have made a good beginning.

Reliable merchants advertise in The Evening Times—the paper is their asset and the people's newspaper.

MANY SHATTERED CAREERS IN THE WAKE OF HARRY THAW'S TROUBLES

Evelyn Nesbit Says She Is One of the Many Victims of the Jinx.

Three of His Lawyers Have Been In Serious Trouble; One Now In Prison.

IS there a Thaw jinx?

Is there some subtle and mysterious influence which pervades the atmosphere about Harry K. Thaw and renders those who associate with him more liable to the misfortunes of life? asks the New York World.

The question has been called up by the failure of Deputy Attorney General Franklin Kennedy, who has made a wider study of the Thaw case than any other man in the attorney general's office, and who devoted most of his time for the last two years to an effort to get Thaw back to Matteawan, to take any part in the last proceedings before Justice Hendrick.

At last reports Mr. Kennedy was in Buffalo recovering from a nervous breakdown which he experienced soon after the conclusion of Thaw's conspiracy trial last March.

Not long after the beginning of the conspiracy trial Mr. Kennedy's friends began to see signs of nervousness on his part. They became more and more pronounced until after one of the arguments before the appellate division. Attorney General Woodbury sent for him and advised him to take a complete rest. Kennedy went away without leaving word of his destination,

Photo by American Press Association.

LATEST PICTURE OF HARRY THAW.

and for days his office was making vain efforts to get in touch with him.

Later he was found in a restaurant. It being apparent that he was still far from recovered he was persuaded to go to his home in Buffalo for a long rest.

Many Other Victims of Jinx.

Illness, however, is only one of the lesser evils that have followed in the trail of Harry K. Thaw. Other misfortunes that have befallen his associates have included death, state prison terms, the loss of positions, attempts at suicide, insanity and disgrace. Evelyn Nesbit Thaw, who claims herself as one of the victims, says it is all due to the Thaw jinx.

Lawyers are among those who have suffered after association with the slayer of Stanford White. Two have gone to jail since serving Thaw, one as a direct result of that service and the other after enjoying the distinction of being the only lawyer to be engaged by Thaw at both of his murder trials. Two other lawyers who served him died soon after ending their connection with him, and one was disbarred as an attorney.

O'Reilly Incident.

A pathetic instance is that of Dan O'Reilly, who when he was retained as counsel at the first Thaw trial was a popular criminal lawyer in New York. He had been an assistant district attorney and as such had prosecuted the case against Samuel J. Kennedy, who was charged with the murder of Dolly Reynolds. Later he figured in the Nan Patterson case.

He served as a member of the Thaw counsel until Thaw had been sent to Matteawan. Later he appeared as personal counsel for Evelyn Nesbit Thaw.

His final downfall then came in connection with the sensational robbery of Aaron Bancroft, an aged broker who was knocked down in the Produce Exchange building and deprived of $85,000 worth of securities. O'Reilly figured in the negotiations for the return of the stolen property.

After one of the men involved had turned informer and made a statement implicating the lawyer in the attempts to dispose of the loot the once assistant prosecutor was charged in an indictment with having received stolen property. He was tried before Justice Davis in the supreme court, who sentenced him upon his conviction to five months in the penitentiary.

When he came from prison it was as a man broken in body and spirit. His old friends, of whom he had had a host, were shunned, and on Nov. 7, 1913, at the age of forty-four, he died.

Another lawyer whose association with Thaw was followed by death was Alfred Henry Lewis, who was better known as a magazine writer. Lewis became interested in Thaw while the latter was in Matteawan and subsequently became engaged in a publicity campaign in his behalf.

On one of the visits which he made to the asylum he advised the man in whose behalf he was working, if Thaw's own sworn testimony on this point may be taken as true, that if he were sane he had a perfect right to escape. Acting on this advice, Thaw testified that he engaged the men who assisted him in his getaway. Lewis' death made it impossible to get from him his own version of the story.

At Thaw's first trial A. Russell Peabody was engaged by the slayer as his personal counsel. Peabody played a prominent part in all the proceedings and of the many lawyers in the case was regarded as the one best liked by the defendant. When he died in September, 1908, six months after Thaw's commitment to the asylum, the prisoner was deeply affected by the news.

Hartridge Disbarred.

One of those whose downfall is directly attributable to his connection with Thaw is Clifford W. Hartridge, a young lawyer, who acted as Thaw's counsel of record on the first trial. In 1910 he brought suit against Mrs. Mary Copley Thaw for $93,000, which he claimed he had expended in behalf of Thaw.

In the course of the trial evidence was offered to show that about $40,000 had been expended in keeping a number of women friends of Thaw out of the way. Hartridge lost the suit. At the conclusion of the trial Judge Holt directed that an investigation be made to determine whether or not Hartridge had been guilty of obstruction of justice. The matter was finally taken up before the appellate division in disbarment proceedings brought by the Bar association.

Mrs. Hartridge Dies.

Even more tragic than the fate of Hartridge was that of his wife. In October, 1907, the lawyer called at police headquarters and reported that Mrs. Hartridge had disappeared. A search was immediately begun which included the morgues of a dozen cities. It was suspected for a time that she had committed suicide. In the following July a woman died in the Homeopathic hospital in Pittsburgh who, it was afterward learned, was Mrs. Hartridge. It then developed that almost from the day of her disappearance she had been living at Pittsburgh, where she had gone to await the death which she knew she was to suffer from a disease.

Another lawyer who has reason to curse his connection with Thaw is John N. Anhut, who went to New York city from Michigan after serving a term there as a state senator. He was admitted to the New York bar. Up to that time no breath of scandal had ever attached itself to his name, and

Photo by American Press Association

EVELYN NESBIT THAW, VICTIM OF JINX.

he was fast building up a circle of friends both in and out of the legal profession.

He went to live at a hotel in White Plains, N. Y., where he was at the time of Thaw's hearing before Supreme Court Justice Keogh. The prisoner obtained a meeting with the young lawyer, and it was not long before the latter was employed by Thaw.

J. N. Anhut Indicted.

During the habeas corpus hearing Dr. John W. Russell, the then superintendent of Matteawan, was living at the same hotel and was introduced to Anhut. Finally Anhut received, through one of Thaw's agents, $25,000, which the young lawyer called a retainer, but which it subsequently developed was to be used in attempts to bribe the authorities to let Thaw out of the asylum.

In probing the scandal which followed the authorities heard a great

Photo by American Press Association.

J. N. ANHUT, EX-THAW LAWYER, NOW IN PRISON

deal of contradictory testimony. Summoned to Albany, Russell told the governor that William F. Clark, secretary of the Sulzer inquiry commission, had told him the governor wanted Thaw out; that he had been offered $25,000 by Anhut.

Clark charged that the "prison ring" was making money out of pardons, that $25,000 had been paid to Russell by Thaw and that $11,000 had been paid back when the "ring" became alarmed.

There was a public inquiry, during the progress of which Dr. Russell resigned his post as superintendent of Matteawan. The governor's inquiry was followed by a grand jury investigation, which resulted in the indictment of Anhut for attempting to bribe Dr. Russell.

Anhut was placed on trial, Dr. Russell being one of the chief witnesses against him. On May 12, 1913, he was convicted of attempted bribery and a week later was sentenced to a term in state prison of from two to four years. He was released on bail pending his appeal, but the conviction was subsequently affirmed, and he is now serving his sentence. His conviction was followed by his disbarment.

Dr. Russell's Statement.

Dr. Russell claimed that he had twice been offered a bribe of $20,000 to issue a certificate that Thaw was sane and that he had both times refused it. If the jinx was active in his case it contented itself merely with bringing about a set of circumstances that got the superintendent a lot of unpleasant notoriety and caused his retirement from his official position.

Howard Barnum, the guard who was at the gate on the morning that Thaw made his escape from the asylum, lost his job as the result of being there, though it was denied that there had

Photo by American Press Association.

THAW'S DEVOTED MOTHER, MRS. MARY COPLEY THAW.

been any connivance between him and the alleged lunatic.

While Thaw was in the Tombs he became friendly with Rafaello Gascone, who was charged with a double killing in Mulberry street. The two men played checkers and cards together and exchanged confidences. The friendship was interrupted when Gascone was sentenced to die in the electric chair. With the help of Albert T. Patrick, Gascone managed to get a new trial, which resulted in acquittal. A year later he was shot in the little wine shop which he kept at 108 Mulberry street.

As far back as 1900 there are evidences of the strange fatality which has followed the Pittsburgh millionaire. It was then that he was spending his income in making a splurge along the Paris boulevards. A dispatch in 1900 told how six months before the Comtesse Louise de Mortane, a pretty widow and member of the provincial aristocracy, had tried to commit suicide because Thaw would not marry her. She recovered from the grief, however, for she was next reported as contracting for a private submarine boat in which she announced her intention of making her home.

"Big Dick" Butler and four others who helped Thaw escape from Matteawan do not consider themselves victims of the jinx. It is true they had to stand trial on a charge of conspiracy, but they were acquitted. They also got $5,000, it was reported.

False Logic.

"Women are all alike," declared the disappointed suitor bitterly.

"Oh, I don't know," responded the maiden airily. "You must not draw general conclusions from the fact that all the women you have known managed to get on to your curves."—Richmond Times-Dispatch.

WAR SCRAP HEAP AIDS GERMANS IN STRUGGLE.

Every Battlefield Combed For Anything That Can Be Used Again.

One of the most interesting spots at any "hauptpunkte," or headquarters of the German army, is the "war booty scrap yard." Describing one on the eastern front, a correspondent says:

"There I saw captured Russian rifles stacked like cordwood. Twenty thousand of them were delivered in a day. Wagons were bringing in the pickings of the battlefields. Every scrap of metal and leather was carefully picked up.

"The picking up, unloading and some of the sorting was done by prisoners, who get 10 cents a day for it. There were two huge stacks of wicker baskets which had contained shells, a goodly sized pile of German helmets, not a few with bullet holes and blood-soaked.

"There was an immense pile of leather belts, cartridge cases and boots. It is often a case of dying with your boots on in the war, but it does not always follow that you are buried with your boots on.

"In one corner of the yard was a pyramid of empty steel shrapnel cases and nearby hundreds of brass shells out of which they were shot, ranging from the small mountain batteries to the big twenty-ones, which look like umbrella holders.

"A space of ground thirty feet long and fifteen wide was covered a foot deep with unassorted cartridges, single and in clips, gathered from the fields. In taking Jaroslaw the Germans bagged 8,000,000 Russian cartridges.

"These scraps are regarded jealously and so carefully guarded by sentries that it is impossible even to slip one in the pocket for a souvenir. Even the pieces of exploded shells are gathered. All of which is part of the system of the German army."

CHOSE JAIL TO SAVE WIFE.

To Shield Her Name He Took Life Term—Is Now Pardoned.

After keeping silent for the sake of his wife's reputation during twenty-three years of a life sentence in Connecticut state prison Charles I. Rathborn has told his story and received a pardon.

Rathborn, who shot and killed Daniel Chesebro, told Governor Holcomb and the pardon board that he found Chesebro in his home with Mrs. Rathborn and backed the man into a corner, pointing a gun at him to frighten him. His wife suddenly called to him, he looked around, the gun went off, and Chesebro fell dead.

At the trial Rathborn kept silent. He now said that he did so on the advice of his mother, an ardent Methodist, who told him to "trust in the Lord" and not ruin the reputation of his wife. Mrs. Rathborn got a divorce and remarried. She is now dead.

A MONEY-SAVING EVENT!

IN CONVENTION

Binghamton to Entertain Them Next Month—Will be a Live Wire Occasion.

The annual convention of the New York State Association of Postmasters will be held this year August 5, 6 and 7 at Binghamton. The "advance copy" has been received by Postmaster P. T. Conley who will probably attend. The Parlor City has planned a gala time with something doing every minute for the postmasters and their wives or "women folks." It is termed the "live wire" convention.

The business session will be held in the assembly room of the Binghamton Public Library, and the headquarters will be at the Arlington Hotel. There will be a business session on Thursday afternoon and Friday morning. The Saturday morning session will be at the Arlington at 9:30, and will be a "breakfast session."

Thursday evening there will be a nine-mile trolley ride and beefsteak feed at the Casino. On Friday morning the ladies will be given a trolley ride about the city and shopping tour, when it is planned to have handsome souvenirs for them. Friday afternoon the postmasters and their ladies will be the guests of the Parlor City Racing Association at the Stow Driving track, and in the evening there will be a theater party when the visitors will be the guests of Manager Giller of the Stone Opera House.

On Saturday afternoon there will be a baseball game at the Binghamton Baseball Park, when George F. Johnson will be the host. The convention will come to a close on Saturday evening with a banquet.

Postmaster Fancher Hopkins and the Convention Committee of the association and the Chamber of Commerce of Binghamton are arranging everything possible for the comfort and entertainment of their guests.

NO NEED FOR UMBRELLAS FOR AT LEAST A MONTH

Yesterday was St. Swithin's Day, and the conduct of the weather for the next forty days, according to the crystal ball contingent, depended upon what occured in the heavens. Had it rained in Fulton life might be for you just one shower after another for more than a month; being fair it will remain so for forty days and nights.

Persons who have a turn for statistics have frequently asserted that St. Swithin's influence over the weather seems to grow slighter each year. Inas much as he died in the ninth century, the importance of this charge may be readily realized. Despite this, however, the interest of the press has remained unswerving, and the desire to press agent St. Swithin has resulted in his holiday being set forward a day now and again by sympathetic writers with splendid style and scanty information.

SLUGGERS WON, 16-4

Oak St. district team was matched against the West Side Sluggers, Wednesday morning and won, score 16-4 Blackley, Leland and Wallace were heard from and their walloping of the ball presented the leading features of the game. Patoriski made one two-base hit and Socha was good for a three-bagger.

SYRACUSE PICTURE MEN TO IMPROVE THEIR REELS

Forty-two motion picture men met in Syracuse yesterday and the following officers were elected:

President, A. J. Sardino; vice-president, B. E. Cornell; treasurer, Edward Wilds; secretary, Arthur Merriman; corresponding secretary, B. A. Gibbons; sergeant at arms, James Roe.

The purpose of the organization is to standarize, as near as possible, the method of conducting these exhibits in the city. In the past there has been no uniform system as in other cities. In some houses as many as fourteen reels have been shown at one entertainment and the quality has not been satisfactory.

By mutual understanding, the show-managers mean to decrease the number of reels, but better the quality of pictures shown. In the opinion of many of the managers the shows have been so long that they have become extremely tiresome to patrons.

Rolls, best by test, is the verdict of those who eat Black's. adv.

It will pay you to advertise in The Evening Times' Miscellaneous Want Column. See schedule of prices elsewhere. Phone 44.

Oneida, July 16.—Madison county, famous in history as the headquarters of the Iroquois Indians and a meeting place for the Six Nations, will celebrate the 300th anniversary of the battle of Nichols Pond in September.

Champlain, the French explorer, figured in this battle, which took place on the banks of a small lake in the town of Fenner, between a strong war party of Hurons and a fortified camp of Iroquois.

Judge Joseph Beal, a member of the Madison County Historical Society, today recalled that the anniversary of this battle falls in September.

According to Lossing's history, Champlain, accompanied by a large Huron war party, came down Lake Ontario in canoes in the fall of 1615. The objective point was the stronghold of the Iroquois.

Champlain met the enemy at Nichols Pond and gave battle. The Iroquois were well fortified with wooden ramparts and repulsed the attempts of the Hurons to dislodge them. Champlain was at a disadvantage, as part of his band became unruly, and a retirement was necessary.

The famous Frenchman was wounded in the leg and it was nearly a year before he returned to Quebec, whence he started.

A map of the Iroquois camp and a drawing of the lake made by Champlain are still preserved. From his description authorities believe there is no question but that the battle was fought near Nichols Pond, in the town of Fenner.

Lossing's history says it took place near Onondaga lake, but Parkman's history, considered more accurate, gives Nichols Pond as the scene.

"LOLA," WONDER PICTURE, COMING TO THE QUIRK

Who was to blame? Lola or her father? Lola, the sweet-natured, dutiful daughter, the charitable friend to the poor and suffering, the faithful sweetheart who becomes a heartless ingrate, cruel and selfish, mercenary and untrue. This remarkable change was brought about by Lola's father who did only what any father would have done under the same circumstances. Would he have done it if he would have forseen the result of his experiment? A life of happiness and trust was changed into a mere existence full of misery, suspicion and turmoil. Is it a lesson to the world that man is after all only finite and human? These questions will present themselves to all who see the remarkable story of "Lola" unfolded on the screen. The impersonation of the character of "Lola" by Clara Kimball Young is perhaps the lnest work that this famous star has ever done as the varying phases of Lola's life, offer such a wide scope for her wonderful versatility.

"Lola" is an adaptation from the play by Owen Davis and has been picturized and directed by James Young. It is scheduled for release this month by the World Film Corporation, and is the lrst of the Clara Kimball Young features to be shown in their service.

"Lola" will be shown at The Quirk next Monday.

CUTTING DOWN TREES TO MAKE GUNSTOCKS

Leavenworth, Kan.—There will be no walnut trees left in this part of Kansas and across the river, in Missouri, if the European war keeps up much longer. At present three bands of men are cutting walnut trees down and sawing the lumber into twelve-foot lengths, shipping them to the East by fast freight.

The walnut lumberr is wanted for gunstocks for rifles for the European armies. All trees more than six inches in diameter are purchased, and a good price is paid for the lumber. Those selling the trees have not been informed what country the wood is destinted for.

A. P. ASSOCIATION WIRES ITS PLEASURE

The Evening Times is in receipt of a message sent from the Buffalo branch and signed by James H. Lee, manager, which says:

"We are pleased to note that the Hunter Arms Co. of your city will be in full operation, which we are sure will be of great value to your town, and surely The Evening Times should share in the prosperity that will bring it about."

DAY BY DAY

Chronicle of Events and a Forecast of What is Doing in Officialdom---Special Correspondence.

By Frederic T. Cardoze

Albany, July 16.—Considerable has been heard in and about the corridors of the Capitol from visitors attending sessions of the Constitutional Convention, concerning the apparent disinclination on the part of prominent men of the State who are delegates to the convention to engage in debate. Questions have been freely asked as to where this or that delegates sit in the convention hall and why they do not take a more ostentatious part in the deliberations which are aimed at an amended constitution?

As a matter of fact, there has not been a momentous proposition save one which might require the attendance of all of the delegates at any particular time and no slow coll call has been taken. The important proposition which came up, referred to the redistricting of senatorial and assembly districts which would give to New York city a majority of the legislators in both houses.

It is true that there are many distinguished and able men among the Constitutional Convention delegates. With the exception of George W. Wickersham, Emuel Eli Quigg, Edgar T. Brackett, Patrick W. Cullinan and Morgan J. O'Brien, few have shone on the floor. Louis Marshall, William Barnes, Judge Alphonse T. Clearwater, Henry L. Stimson, Seth Low, Jacob Gould Schurman, John B. Stanchfield, Rush Rhees, William F. Sheehan and James W. Wadsworth have all devoted their energies to committee work and their voices have not been heard in lengthy debate or in fact hardly at all with the exception of in connection with points of order

Much curiosity is now being made apparent by visitors with regard to the personality, appearance and where abouts of John B. Stanchfield, the stalwart Democratic delegate from the thirteenth senatorial district. Every day of late inquiries have been made concerning him.

Because of his connection with the trial of Harry K. Thaw to determine his sanity, Delegate Stanchfield has not been a frequenter of the convention hall. Excused because his legal duties called him elsewhere, it has been only at committee meetings that he has been heard and then infrequently.

Mr. Barnes has been unusually silent, although his legislation has fared well. This is also true of Jacob Gould Schurman and Henry L. Stimson. Mr. Marshall has actually been engaged in debate and the defeat of the proposed amendment introduced by H. Leroy Austin, relative to the leasing of agricultural lands for periods longer than twelve years is said to have been defeated as the result of his masterful eloquence and forensic attainments.

Delancey Nicoll and William M. K. Olcott, both of them former district attorneys of New York county, of whom much was expected, have both been passively inactive so far as voicing their opinions in public is concerned.

It may be said that thoroughness of attention has characterized the deliberation of the delegates rather than continued debate; this does not imply, however, that argument of a keen and highly intelligent nature has not been rife at committee hearings.

August is drawing near and after the first two weeks, it is predicted the work of the Convention will have ended. This implies that there may yet be debates well worth hearing on the floor of the convention.

Clearance Sale of many kinds of Hats, Saturday, at 98 cents. Mrs. F. K. Jones, 110 Cayuga st. adv

SUNDAY SYLAN BEACH EXCURSION

Beginning Sunday, July 25th, and continuing each Sunday until August 22d, the O. & W. Sylvan Beach train will leave Oswego at 8:40 a.m., returning leaving Beach at 5:15 p.m.—advt.

Orwell Tuberculosis Hospital

Putnam Allen. A contribution to this fund no matter how small will help to relieve real suffering among most unfortunate people. adv179

HOLDS UP WORK

Firm's Contract Calls For Concrete and Officials Want Macadam, But Duffy Says Job Will be Completed.

The Oswego Times quotes Road Superintendent E. A. Howard as saying that "This is the busiest year that he has had, and, owing to enormous calls in the field, he has been unable to give much time to office affairs. The towns are co-operating with the State and county in the work of improvement. Already five miles of permanent stone road have been built by the towns this season, Richland having two miles and a half and Oswego Town about the same mileage. But every town in the county is active in road improvement of some kind. With all the new State and county roads and this extensive road work by the towns, Oswego county is rapidly transforming its roads into durable and well-constructed highways."

The same official says that there are under construction thirty-two miles of State and county roads. One section of State road, from Central Square to Union Square, remains incomplete. This contract is held by the Pathfinder Construction Co. of this city. Thhe contract calls for concrete and the Board of Supervisors desired to have macadam substituted, btu the State refused to comply with the request.

It is estimated that the thirty-two miles now under contract will cost at least $350,000, the cost per mile varying with the contract from $9,000 to $14,000 per mile. The roads under contract are as follows:

Central Square-Constantia; Pulaski-Camden, Parts 1 and 3; Fulton-Hannibal; Phoenix-Pennellville; East Oneida street, Oswego city; Central Square Union Square.

The J. A. Culkin Co. of Oswego is completing the Fulton-Hannibal road and it will be thrown open to traffic in about two weeks.

The resurfacing of the Volney-Palermo road is completed, as is the resurfacing of the highways between Pulaski and New Haven, except for a strip of five miles at Union Square whichh was not needed, the road being in fine condition. Another big repair contract was the eight miles of the Central Square-Union Square road. The Bowens Corners road is being repaired and is closed for two miles east from Bowen's Corners.

BLISTERS AND BURNED FACES TELL THE STORY

In spite of the day being anything but perfectly clear, nine out of every ten boys and girls who attended the Salvation Army picnic yesterday, have an uncomfortable feeling today. It is hard to say what their feelings would be had Old Sol shone forth in all his glory. At any rate nothing but a good time was had—on the big swings under shady trees at North Bay, and in disporting in the cool waters of Lake Neahtawanta.

Nearly 200 youngsters and their mammas, etc., were carried to the grounds in the autos belonging to F. H. Morin, H. Putnam, Allen, L. Edgerton, E. J. Penfield, Chas. Morrill, and the big VanWagenen truck.

And did you see the immense heap of full lunch boxes that was carried to the grounds? They left headquarters full, and they did not came back in the same condition, and only a very few of them came back at all.

ZION EPISCOPAL CHURCH HOLDS PICNIC TOMORROW

The popularity of the Fair Grounds in this city is attested to almost every day of the present week. Hardly a day has passed when a picnic or outing of some sort has not been held there.

The Zion Episcopal church will wind up the week by holding its annual parish and Sunday school picnic on the now popular Fair Grounds, tomorrow. Mrs. J. S. Torney is chairwoman of the refreshment committee, and George W. Hackett heads the committee on athletic events.

55 N. FIRST STREET

HERBERT A. WILCOX, GROCER, IS DEAD IN OSWEGO

Herbert A. Wilcox, one of Oswego's respected business men and citizens, died yesterday morning in the Oswego hospital.

He was born in McConnellsville, Oneida county, sixty-seven years ago, and arrived in Owesgo when a young man. For several years he was employed by the late W. A. Rathbun.

The Oswego Times of yesterday, in part, says of him:

"He had been a life long Republican and he carried his business principles into his politics. He never sought election to public office, although he was of the type which would have made the most efficient of public officers, but he gave freely both of his time and his money to his party. For many years he was one of the leaders in the county and held the office of chairman of the county committee for a considerable period of time.

"He was a communicant of Christ church and was also a member of Oswegatchie Lodge No. 156, I. O. O. F., the City Club and the Fortnightly Club. He was one of the organizers of the Business Men's Association and was its first vice-president. He became a member of the Chamber of Commerce on its organization and while he was not an officer at the time of his death, he always supported its objects and its interests with the loyalty which marked his entire life.

"He was vice-president and director of the Oswego County Savings Bank and a director of the Second National Bank. For several years, also, he had been president of the Dime Building and Loan Association.

"Because of the illness of his sister, Mrs. Juliet Wilcox, the surviving member of the family, the body was not taken to his home, No. 141 West Fifth street, but was taken to the home of his late brother, George B. Wilcox, No. 142 West Seventh street. He is survived by his sister, Miss Juliet Wilcox; two nephews, Ralph L., and George Eric, and one niece, Miss Ethel M. Wilcox, all of this city."

NEW PARK PRETTY

The new West Side park, namely the Triangle Park, presents a pretty appearance. The grass is closely shaven, the beds of flowers blooming and an attractive fountain splashes merrily in the midst.

The change in appearance is a happy one.

A REAL NEWSPAPER MAN

With a Metropolitan Reputation Was in Fulton During the Week

HE SAID:

"Take it from me, that the most valuable asset the merchants and the people of this city can have is a daily newspaper.

"A daily newspaper is as necessary to the life of the merchants of a town as it is to lose a minnow to catch a salmon. If you want the salmon you must count upon losing the minnow.

"If the merchants of Fulton want to catch the trade of the town and country surrounding the town they must use a daily newspaper as the bait."

One of Fulton's Leading Industries and It Is "A Herald of Progress"

AN AMIABLE BRUTE

The Black Bear Is the Happy Hooligan of the Woods.

HE IS NOT A BIT FEROCIOUS.

This Much Maligned Animal Is Just a Lazy, Playful Loafer That Avoids Men and Fights or Works Only When He Is Compelled to Do So.

The black bear is neither ferocious nor dangerous. The most fitting name I have ever heard given him is the Happy Hooligan of the Woods. He is a lazy, playful loafer and has no evil intentions; but, like a shut-in boy or a boy with a task to perform, he wants company—does not know just what to do with himself.

The black bear has more human-like traits than any other animal I know. He is a boy in disguise—will not work long at anything unless at something to produce mischief. Occasionally he finds things dull and simply does not know what to do with himself. He is happy go lucky, and taking thought of the morrow is not one of his troubles. He is afraid of the grizzly and avoids man as though he were a pestilence.

He plans no harm. In other words, the black bear is just the opposite in character of what he had long been thought and is still almost universally believed to be. A million writers and spoken stories have it that he is ferocious—a wanton, cruel killer. He fights or works only when compelled to do so.

He is the most plausible bluffer I have ever seen. With hair bristling on the back, upper lip stuck forward and an onrush, with a rapid volley of champing k-woof-f-f's, he appears terrible. He pulls himself out of many a predicament and obtains many an unearned morsel in this way. Most of his bluffs are for amusement. He will go far out of his way for the purpose of running.

A black bear climbs a tree almost as readily as a cat, and he climbs a small pole or a large tree with equal ease. The grizzly does not climb trees, but the black bear, with its catlike forepaws, can simply race up a tree trunk. Much of his time, both asleep and awake, is spend in treetops. He might almost be called a perching animal.

Like most animals the black bear has a local habitation. His territory is twenty or less miles in circumference, and in this he is born, lives and dies. In springtime he descends to feed on the earliest wild gardens of the foothills.

The black bear eats everything that is edible. Though omnivorous, his food is mainly that of a vegetarian. He digs out rich willow and aspen roots in the shallow and soft places and tears up or digs out numerous plants for their roots or tubers. Often he eats grass and devours hundreds of juicy weeds. During autumn I have seen him on the edges of snow fields and glaciers consuming thousands of unfortunate grasshoppers, flies and other insects there accumulated. He is particularly fond of ants—tears ant hills and decaying logs to pieces and licks up the ants as they come storming forth to bite him. He tears hundreds of rotten logs and stumps to pieces for grubs, ants and their eggs.

He freely eats honey, the bees and their nests. He catches mice and often amuses himself and makes a most amusing and manlike spectacle by chasing and catching grasshoppers. He will devour carrion. In a fish country he searches for fish and occasionally catches live ones, but he is too restless or shiftless to be a good fisherman.

The black bear is or was found pretty well distributed over North America. His color and activities vary somewhat with the locality, this variation being due perhaps to a difference of climate and in the food supply.

The black bear has a well developed brain and may be classed among the alert animals of the wild. Its senses are amazingly developed. They seem to be ever on duty.

Young black bears have good tempers and are playful in captivity, but if teased or annoyed they become troublesome and even dangerous with age. If thine enemy offend thee present him with a black bear cub that has been mistreated. He is an intense, high strung animal and, if subjected to annoyances, teasing or occasional cruelty, becomes revengeful and vindictive. Sometimes he will even look for trouble and, once in a fight, has the tenacity of a bulldog.

The black bear has never been protected as a game animal. Through all the seasons of the year, with gun and dogs, the hunter is allowed to pursue him. It would be well for a few years to have a closed season on bears. As he is verging on extinction and as he gives to the wilds much of their spirit, there ought to be a closed season to protect this rollicking fellow of the forest.

If I were asked to select the one emblematic animal that best gives and suggests the spirit and the spell of the great outdoors I should select the black bear.—Enos A. Mills in Saturday Evening Post.

Discouragement In a Laugh.

"Don't you always feel encouraged when people laugh?" asked the man at the club of another, who had the reputation of an after dinner speaker.

"Well," was the reply, "I once proposed marriage to a girl, but it didn't encourage me when she merely laughed."—Yonkers Statesman.

A lie always has a certain amount of weight with those who wish to believe it.—Rice.

The Brave at Home

The maid who binds her warrior's sash
  With smile that well her pain dissembles,
The while beneath her drooping lash
  One starry teardrop hangs and trembles,
Though heaven alone records the tear,
  And fame shall never know her story,
Her heart has shed a drop as dear
  As e'er bedewed the field of glory.

The wife who girds her husband's sword,
  'Mid little ones who weep or wonder,
And bravely speaks the cheering word,
  What though her heart be rent asunder,
Doomed nightly in her dreams to hear
  The bolts of death around him rattle,
Hath shed as sacred blood as e'er
  Was poured upon the field of battle!

The mother who conceals her grief
  While to her breast her son she presses,
Then breathes a few brave words and brief,
  Kissing the patriot brow she blesses,
With no one but her secret God
  To know the pain that weighs upon her,
Sheds holy blood as e'er the sod
  Received on freedom's field of honor.
      —Thomas Buchanan Read.

COLUMBIA PROFESSOR IN THICK OF THE WAR.

Henri Cesar Ollinger Tells of Repairing Telephone Wires—Escapes Shells.

Henri Cesar Ollinger, for several years instructor in French at Columbia university, now with one of the French armies in the north of France, is on sick leave and is occupying a part of his time in giving entertainments for the soldiers. At Columbia he had directed the production of several plays in foreign languages. In a letter to a friend in New York Professor Ollinger says:

"The doctor has sent me to the rear for a bad sprain, general anemia and inflammatory rheumatism. All I do now is to mount guard in front of a building. During the afternoons I rehearse plays which are given for the benefit of the wounded. You see my modest dramatic talent helps me to while away the time.

"After I had been in the trenches and on the firing line a few months I was transferred, because of my knowledge of both French and English, to the colonel's staff as special telephone operator. While I lived at his quarters and slept on a pool table, thus enjoying a little more comfort than my comrades, I ran more risks.

"In the first place, the chateau (about three kilometers behind the outposts and concealed in a thickly wooded spot) was regularly bombarded by the Germans three times a day. Once an obus (shell) exploded in my room, killed three and wounded eleven, but I didn't get a scratch. Evidently my time had not come yet.

"The most dangerous part of my work was the repairing of telephone wires which were invariably cut in different places by the shattered pieces of German shells as the obus exploded. That part was grewsome, for you go out alone and the next man follows you ten or fifteen minutes later to see if anything has happened to you. Often, when I thought I was protected by the night, the Germans would fire a skyrocket, which would light up the whole countryside. Then came a real shower of bullets and torn pieces of iron from the German shrapnel.

"Most of the towns teem with men who are wounded for life, and I have given up trying to figure out what part of the population is thrown into a most useless mourning. In Paris one hardly mentions a word about 'la guerre.' The people are confident of ultimate success."

Professor Ollinger left New York Aug. 5 last in order to enlist.

SHOCKED BY SCHOOL PLAY.

Parents of Girls Object to Their Appearance In Kimonos.

Objections on the part of parents, who thought the "kimono drill" of the high school girls at the commencement exercises in Elizabeth, N. J., a little daring, resulted in a rebuke from the principal of the school, John D. Edwards. The drill was the feature of a two part play, "The Rainboat Kimono," given by nine girls of the senior class. The audience objected to the appearance of the girls, who came out in the first act with picturesque kimonos. When these were discarded for knickerbockers and sailor waists the indignation of the spectators increased.

During the intermission Principal Edwards spoke to the spectators to restore order. The principal told them not to interrupt the performance again, and if they were displeased or shocked to leave the building. In speaking of the trouble Mr. Edwards said there was nothing in the lines or costumes that was offensive. When he told those who were shocked to leave, he declared, no one accepted his invitation.

ICELAND WOMEN GET VOTE.

King of Denmark Signs Bill Granting Them Full Suffrage.

Mrs. Carrie Chapman Catt, president of the International Woman's Suffrage alliance, has received a cablegram from Briet Asmundsson, leader of the suffragists of Iceland, which says:

"King sanctioned constitution bill, June 19; woman suffrage granted."

This is the bill that has been waiting for the signature of the king of Denmark since 1914. It grants full suffrage to Iceland's women, and was passed by the parliament of Iceland last year. Icelandic women over twenty-five years of age won the parliamentary suffrage in 1911.

Renting a Houseboat

By LOUISE B. CUMMINGS

"I've tried every way of spending the hot months," said young Mrs. Yardley, widow, "except yachting, and I can't do that because it's too expensive. Besides, a woman can't very well tackle a yacht."

"Why don't you try a houseboat?"

"The very thing! By the by, I saw a houseboat advertised for rent for the coming season, completely furnished and equipped, with a motorboat and two rowboats. There was even a stock of ice laid in. I'll look it up."

The next morning Mrs. Yardley took a train and went to the houseboat. When she reached the shore she saw a gentleman looking about him for something.

"Beg pardon," she said. "Can you tell me where I can find a houseboat that has been advertised for rent?"

"I'm looking for it myself."

"Oh, you are? Of course I wouldn't interfere with any one else who might wish to rent it," said the lady, wondering how she could get ahead of the man.

"I think that's it," he remarked, looking at a queer craft tied to the bank not far away. "I have very little idea of taking it. I certainly wouldn't do so if you want it."

They proceeded to the houseboat, where they were received by an old oysterman, who had the care of it. He naturally supposed that they were man and wife. They passed over the plank and in at the main lower door, and the caretaker showed them what they had come to see.

"I'll take you to the galley first," he said. "Here it is. Every convenience; the best range that's made; china from the finest manufacturers, and all the cookin' utensils necessary. This is the dinin' room—when you don't want to dine on deck—round mahogany table and sideboard to match. This bedroom is for the occupant and his wife. This room adjoining will do for the children if you have any; if not the door between can be locked, and it can be used for a guest."

This was embarrassing. The gentleman's mouth quirked at the corners, and the lady was very sober. In order to spare her further annoyance the gentleman said:

"You are mistaken in supposing we are married."

"Oh! I thought you was rather young lookin' for man and wife. Only engaged, eh? Well, it'll be all the same in a few months, I reckon. But if you're thinkin' o' takin' the boat for the comin' season—in course the weddin' 'll come off soon—I suppose you'd want her by the 1st of July, and this is near the end of May."

"Never mind our relationship," interrupted the gentleman, seeing his companion wince under this chatter. But the words had a different effect on the caretaker from that intended. He looked at the couple suspiciously.

"Beg pardon, sir," he went on, "but I have orders to mind the relationship of applicants, for the owner strictly charged me not to rent her except to respectable parties. If you and the leddy want her you'll have to satisfy him that you're"—

"Have you a library on board?" asked the lady, trying her hand at shutting off the oysterman.

"Yes, mum; there's a good library with illigant bindin' on the books. It's in here."

As the visitors could not very well help coming together, so they couldn't help going together, for when the old fellow finished showing them through the boat they found themselves at the door opening on to the gangplank.

"If the boat suits you," said the gentleman as the couple walked away, "you are at liberty to take it. I have no one but myself and a bachelor friend to occupy it, and he may fail me. In any event, I would not make an offer for it if you want it."

"I am situated much as you are. While I have plenty of friends, I fear most of them have made their arrangements for the summer."

They were going to the station and to the city on the same train. Before they parted they exchanged addresses that they might notify each other as to their future wishes and intentions.

Within a few days Mrs. Yardley received a note from the gentleman, Mr. Auchincloss, that he had discovered they had mutual friends in the Chittendens. If she would permit him to call he would tell her of another houseboat he had found for rent which might please her better than the one she had seen. Permission was granted, and Mr. Auchincloss called.

Now that they were acquainted, they made a joint excursion to the next houseboat and this time were mistaken for an engaged couple by the caretaker, a fisherman's wife, who said she knew they weren't married because the gentleman was too polite and attentive. They were both much pleased with this houseboat, but concluded to look further. For the next two months they continued to look at houseboats together; then Mr. Auchincloss proposed to Mrs. Yardley, and their investigations ceased.

But by this time all the houseboats in the market were rented, and it was rather late in the season anyway. So Mrs. Yardley, who had a trousseau to provide for an autumn wedding, concluded not to go out of town at all that summer that she might make her preparations.

Care of Babies In Summer

[Prepared by the children's bureau, United States department of labor.]

Many thousands of babies die every summer, and many thousands more suffer from illness because of the excessive heat. Bottle fed babies form the greater part of the number, owing to the great difficulty of keeping cows' milk sweet in summer, but even breast fed babies need very particular care during July and August.

The first and most important thing in the care of the baby through the hot weather is to give him the right food. The value of breast milk to babies has been brought out in an earlier article. The next most important thing to do for the baby is to make him as comfortable as possible by plenty of baths, sleep, fresh air and light clothing.

The baby should have a constant supply of clean air to breathe, summer and winter, day and night. Do not be afraid to take him out of doors. In the country it is very little trouble to give the baby plenty of out of door life. A screened porch on the shady side of the house is an invaluable aid to the mother in the care of the baby. It makes a safe place for him to stay, awake or asleep, protects him from his enemies, the fly and mosquito, and at the same time affords him the fresh air he needs.

The poorest place in the house for the baby to stay in is the kitchen, which is necessarily the hottest one. When the mother has to be busy in her kitchen the baby should be kept out of doors as much as possible, and during the warmer weather, when the out of door air is hotter than that indoors, the baby should be kept in the coolest room in the house. A play pen will be a great help in confining a runabout baby within safe bounds. It may be used indoors or out, with a rug or blanket in the bottom.

The baby should be kept clean and cool by frequent baths. He ought to have at least one full tub bath every

BATHING THE BABY.

day, and when he is restless and the weather very hot he may have one or two sponge baths in addition. For a young baby the water should be slightly warm or tepid. The mother may test it by dipping her elbow into the water. If it feels just pleasantly warm it will be right for the baby. After he is a year old the water may be cooler, but should never be cold enough to shock or frighten him, for a baby should find his bath a great delight.

Use only a mild soap like castile and very little of it, rinsing the skin thoroughly afterward. A baby's skin is very sensitive and may be made sore by a harsh soap. If any redness or chafing appears use no soap at all, but try a bran bath.

Make a little bag of thin cheesecloth and partly fill it with ordinary bran. Sew or tie the open side and put in the bath water, squeezing it until the water is milky.

When the baby has prickly heat he may be sponged with a bath made by dissolving a tablespoonful of ordinary baking soda in two quarts of water.

It is important to keep not only the skin clean, but the clothing also. The diaper should be changed as soon as it is wet, for a wet or soiled diaper is quite sure to make the baby's skin sore if worn for any length of time. The country mother has the advantage in being able to dry the diapers in the sunshine after they have been washed or to spread them on the grass to bleach and sweeten. Every soiled diaper should be placed at once in a covered pail until it can be washed.

The baby needs very little clothing in hot weather. On the hottest days he may go with nothing on but his diaper, and, possibly one other thin garment. The mother will, of course, be ready to dress him as necessary to prevent him from chill when the weather cools. Clothe the baby in as few soft, clean, simple garments as will serve to make him comfortable and happy.

Plenty of cool drinking water is essential. Babies and young children often suffer for lack of this. It may be given from a nursing bottle before the baby is old enough to drink from a cup. The water for the baby should be boiled and cooled, as even clean looking water may contain germs of disease which are killed by the boiling process. [illegible] the baby a drink several times [illegible] meals and at night

YOUNG FOLKS' CORNER

Jolly Book Title Game.

Assemble the players and announce solemnly that it has been decided by certain authorities that the books in some libraries are misnamed and also ascribed to the wrong authors and that this assemblage is requested to, at once and in unison, rechristen the volumes and restore them to their proper, if somewhat unknown, authors.

Then, standing in front of the guests, with a tablet and pencil, on which are inscribed the title of some well known book and its author's name, proceed as follows:

Suppose you have selected the book "Tale of Two Cities," by Charles Dickens.

Ask some player at random if he will assist you by giving you the name of some familiar object or animal. He may choose something in the room or from memory, but it must be a common noun, the name of some object or animal. He selects possibly the article "stove," and you proceed to write it under the word "tale" on the tablet. You leave intact the word "of" and ask some other mystified participant for a number, any number except "2." You are given "14" and use it in place of the "two" in the title. Then request a plural noun of some one, and possibly you receive "kittens," which is placed in lieu of the word "cities." Now say that the book being corrected as to title the right author must be found and will Mr. So and So give you a man's Christian name. He offers "Ichabod" an a girl guest presents "Poindexter" as a suitable surname.

With much ceremony you then announce that this company has decided in solemn conclave that the book, "Tale of Two Cities," by Charles Dickens, shall, hereafter, be known to the world as the "Stove of Fourteen Kittens," by Ichabod Poindexter.

Let each one in the party select a book and have it and its author renamed, and the combinations of words make the greatest and most irrepressible merriment possible.

What Boy Scouts Learn.

Boy scouts have always been taught to help humanity and service through the advantage of scout craft. They have acquainted themselves with the flower and bird folk so that they can differentiate between all species. They have been taught to single out the poison plants from the harmless ones and to classify the numerous varieties of flowers and plants. "Be kind to animals and conserve natural resources" has always been a motto of the boy scout.

The boy scout has received unfold benefit from camp life and from communion with nature. He has been taught to swim, to use his mind and body in set up exercises. He has been taught clean habits and methods of building up a strong and beautiful body. Valor and self dependence have been ultimate results of his long hikes. —Philadelphia Press.

Kitchen Outfit For Scout Camp.

The size of a kitchen outfit for a boy scout camping party depends entirely on the size of the party. For a party of six the kitchen outfit should not contain any more articles than one frying pan, one coffeepot, two water buckets, two large saucepans, can opener, large spoon, large knife and large fork and also a piece of one-half inch wire mesh, about 2 feet by 1, to hang over the fire to broil steak or to toast bread. Your stove can be made by placing three lengths of gas pipe, about three feet long, on stones built up about a foot or eighteen inches high, to allow for a wood fire underneath. Care should be taken to secure the piping from slipping by placing stones on it. This is a very inexpensive and efficient way to build a camp stove.—Brooklyn Eagle.

Numerical Enigma.

The name of a chief town in one of the northern countries of Europe will be found in the following words:

1. My 3, 4, 5 is an implement for writing.
2. My 7, 8, 9 is a period of life.
3. My 3, 7, 8, 9 is a part of a book.
4. My 7, 3, 4 is a mischievous animal.
5. My 10, 2, 5, 9 signifies not any.
6. My 1, 2, 10, 4 is the product of a pine tree.
7. My 6, 4, 7, 3 is a number of things piled together.

Answer: Copenhagen. Words: 1. Pen. 2. Age. 3. Page. 4. Ape. 5. None. 6. Cone. 7. Heap.

Boy Scouts Not Soldiers.

The Boy Scouts of America movement is not military and does not believe in military training for boys. It does, however, most firmly believe in discipline—that is, discipline developed from within through the boy scout plan, but not that kind of discipline imposed arbitrarily from without by military methods. The boy scout discipline develops initiative, resourcefulness, character. It shows itself in better health and ability to carry out instructions intelligently, a proper appreciation of the value of co-operation or team work and a due regard for the rights of others.

Concealed Word Square.

[One word in each couplet.]

"If an escape I could but make,"
The monkey said, "a trip I'd take.
I saw a refuge, just the kind
For monkeys on a lark inclined."
And then a creamery he sought—
Such mischief as his antics wrought!
His punishment was swift and sure;
He much preferred a milder cure.
He said, "To diet I'll agree,
I see dyspepsia threatening me."

[illegible]

Stylish Evening Gown and Hat

THIS frock is made of rose colored chiffon taffeta. Although most of the dancing frocks this season boast of wide flaring skirts, this one is exceptional, reveling only in drapery. The bodice as well as the skirt is prettily draped and is cut V front and back. The short sleeve is a frill of lace.

The all black hat has returned and is here adopted for evening wear in the form of a transparent tulle affair. This modish shape is a modified sailor, and the fashionable but scanty trimming consists of a small bunch of paradise tails. Black velvet ribbon is fastened coquettishly in loose ties in the back.

• • •

Our fashions are now particularly womanly and attractive. The summer days will witness the revival of the old world fabrics in dress, the organdie and muslins of our grandmothers and the silken flounces and frills of our grandparents. In millinery, too, we see a revival of the Leghorn, with "drooping feathers" and perky flowers, all flavoring of past glories.

For practical purposes (and we are very practical this season) the combination of silk and cloth or voiles and silks, and a variety of such like alliances, will prove smart and useful.

A simple costume showing the combination of a thin gray face cloth and voile was seen the other day. The pleated skirt was admirably carried out in gray voile, the plaits being held in place by a wide panel of cloth in front, narrowing as it reached the hem. A strap of the cloth also went round the skirt. The little coatee was of gray cloth, with a black kid belt and dull silver buckle and buttons. Tiny buttons also adorned the plain tight sleeves. The collar was lined with white satin. The small hat worn with the costume was of black bass straw, trimmed with white wings.

• • •

The black velvet hat is "in" again. It antedates its last year's debut by two months and is likely to be superseded this year by the black satin hat made in upturned sailor style and faced with white. Hatter's plush, in colors, is another motif in millinery which appears in crown effects, supported by straw brims in contrasting color.

• • •

The girl who dances should take pains to have her complexion in perfect order for the festivity. When the night arrives she will not act as if this were the last time in her life she wished to appear well and so throw caution to the winds. But she will remember that tomorrow is another day and there are other good times next week and the week after, and so she will not allow herself to be too suddenly cooled after becoming heated from dancing, for such sudden cooling means fever blisters. It also in many cases means a sore throat if nothing worse, and if great imprudence is indulged in there results what is known as a heavy cold, this meaning a great loss of good looks, inflamed eyes, a red nose, circles under the eyes, pale lips or a faded and lifeless complexion.

• • •

The woman of today sees to it that her traveling accessories are of correct style. In this age of week ends luggage is planned to combine compactness, lightness and smartness.

For suit cases, hat boxes and steamer trunks black is the fashionable color of the moment, and such luggage is decidedly good looking if kept devoid of labels, which nowadays are of no importance or distinction whatever. Black barley grained leather on a wooden frame makes a bag or case so light that a woman can easily carry it herself.

ANNA MAY.

CHARMING CAP AND GOWN.

Sheer Batiste, Embroidery and Valenciennes Lace Used.

FOR THE NIGHT TIME.

Midsummer brings many new additions to the summer girl's wardrobe in the way of charming lingerie. The pattern shown here is not so elaborate or complicated but that a clever girl could fashion it. Lingerie makes very good "pick up" work, and if a piece is always kept in the work basket it will only be a short time before a useful and dainty article of wearing apparel is fashioned.

A PURPOSE IN LIFE.

A life without purpose is a languid, drifting thing. Every day we ought to renew our purpose, saying to ourselves, "This day let us make a sound beginning, for what we have hitherto done is naught." Our improvement is in proportion to our purpose.

WANTS WRIGHT IN ENGLAND.

Daily Mail Urges That He Direct Great Aeroplane Work.

The London Daily Mail, commenting editorially on the report that the Germans recently became possessors of a new and faster type of aeroplane, urges the British government to seek the assistance of Orville Wright, the American inventor.

"The government is being urged to embark on a gigantic scheme for aeroplane construction, with Mr. Churchill in charge," says the Mail. "It would certainly be unwise to put such a matter in the hands of a politician or anybody except an expert. In so vital a matter we should employ the best brains in the world. The aeroplane was invented by the brothers Wright. Orville Wright is intimately acquainted with all types. We do not know whether he would be willing to come to England, but we know that he is the world's best authority on aeroplanes and a singularly disinterested and uncommercial inventor."

INSTRUMENT DETECTS LYING.

Claim Ananias Is Outwitted by Munsterberg, Harvard Psychologist.

Professor Hugo Munsterberg, the Harvard psychologist, has just completed with the aid of students a series of more than a hundred experiments which prove conclusively that any person who tells a lie can be unfailingly detected in the falsehood. The instrument used is called a sphygmometer.

Professor Munsterberg has thus made successful lying under all conditions, either where the liar is excited or perfectly cool and collected, an absolute impossibility.

In many of the tests where a student jury believed a witness to be telling the truth the little sphygmometer dial showed the opposite. The confession of the witness later proved that the witness had been lying and the dial was correct.

Business genius, like all other, is chiefly a matter of infinite painstaking.

"Beyond the Alps" lies something now besides Italy.

Organdie Over Silk.

Flowered organdies are back in fashion for summer frocks. Lovely effects may be obtained by mounting the flowered organdie over thin silk. The silk need not necessarily match the tint of the flowers. For instance, a lavender flowered organdie is mounted over pale pink pussy willow silk; a rose flowered organdie is mounted over faint lilac, and so on. Black velvet ribbon sashes are much fancied with these pretty costumes.

"BUTTERFLIES" MAKE MOCKERY OF NURSING.

Countess of Warwick Assails Motives of Society Women In War.

The London Chronicle publishes an article by the Countess of Warwick protesting against the "butterfly" sisterhood. After paying tribute to many prominent women who have labored conscientiously with splendid results since the war began the countess proceeds:

"Unfortunately there is in London today a very large company of young women to whom war is little more than a new sensation. They are not old enough to understand or young enough to be restrained. Scores have found their way to great London hospitals to face what they are pleased to regard as training. I have known some who danced till 3 a. m. and presented themselves at the hospital at 8 o'clock. The social butterflies have acquired a trifling superficial knowledge of nurses' work and then set their social influence to work in order to reach some one of the base hospitals where they may sample fresh experiences. They subvert discipline, they are a law to themselves, they are too highly placed or protected to be called to order promptly, they have neither inclination nor capacity for sustained usefulness.

"To sit at the end of a bed and smoke cigarettes with a wounded officer does not develop the efficiency of a hospital. The interlopers want the limelight and plenty of it. Their pictures flood the illustrated papers, and to read what is written of them the inexperienced person might imagine they were bearing the heat and burden of the day, the solitude and anxiety of the night, while in very truth they do no more than search for fresh sensation in an area that should be sacred.

"To do a very minimum of work, to attach themselves to the most attractive cases, to carry small talk, gabble and gossip into places where so many come to die—these are the main efforts of the young society nurses, and all these outrages are being carried on from day to day."

ARTICLES OF VIRTU.

Ornaments For the Den and Boudoir of Unique Material and Design.

At the top of this illustration is shown a jewelry case of bronze ornamented with various Egyptian symbols in bas-relief enameled in old ivory. At the bottom is shown a

SUITABLE FOR BIRTHDAY GIFTS.

smoking set consisting of a jar with a pipeholder attached to one side and a compartment for holding a box of matches on the other side. The inverted cover is fitted with two individual ash trays. The clock is of bronze, also ornamented in Egyptian symbols in bas-relief enameled in old ivory.

Handy Accessory.

A handy article to carry your crochet hook in, to prevent it piercing your work materials, is a cork covered with crochet made by starting with a ring crochet in s. c. until it is as large as the bottom of the cork, which should be the right size, when covered, to carry your thimble on.

Then 1 s. c. in each s. c. to cover cork.

Make a tight row at top to prevent slipping off, and finish by making 3 d. c. in each s. c. to form ruffle on top of cork.

A Stamp Hint.

A stamp without mucilage may be quickly attached to an envelope by rubbing it on the mucilage end of the envelope when it is moistened and you are sealing it. Rub the back of the stamp on the ends farthest from the point of the envelope flap, and you will find both envelope and stamp will stick well when the mucilage bottle is not handy.

For the Children

A Fair Little Maiden In Costume of Long Ago.

Photo by American Press Association.

Every year in Brooklyn, now a part of the city of New York, a Sunday school parade is held. It is a very large affair, about 150,000 children taking part this year. For such an immense number to take part in one procession is, of course, impossible. The city is divided into districts and in each district the children of the Sunday schools have full sway for that day. The parade or walk is accompanied by bands of music and fife and drum corps, and the little folks enjoy themselves hugely. After the walk the paraders are regaled with ice cream and cake at the various churches to which the Sunday schools belong. Sometimes the participants appear in costumes of various periods of history and very pretty they look. The girl in the picture is dressed in the apparel of the old Colonial times, before the United States were organized into a separate and free government.

The Snapping Turtle.

As the snapping turtle is by far the largest of the fresh water tortoises, often attaining a diameter of two feet and a weight of 100 pounds, he is no mean antagonist. A single snap of his horny jaws will sometimes remove a finger or a toe, so it is well to beware of him, says St. Nicholas.

As might be expected from his nature and armament, the snapping turtle does not live exclusively upon plant life, as do other members of his family, but displays great fondness for a meat diet. Young ducks, frogs, fish and muskrats are all dainties to be added upon occasion to his bill of fare. While he is capable of some speed in the water, his favorite method of hunting seems to be to lie quietly until his victim comes within reach and then with a lightning-like dart of his long neck seize his prospective dinner. He varies this in the case of ducks and other water fowl by rising silently beneath them—a snap of the iron jaws on leg or wing, a despairing flutter in the water, and the luckless bird is dragged beneath the surface to be speedily drowned and eaten at leisure.

Advice to Swimmers.

Every one knows enough not to go in swimming right after a meal. Most boys know enough to wait an hour after an ordinary meal and longer after a particularly hearty one. But not all of them know enough not to go into the water while they are overheated. If you have been playing baseball or tennis don't throw off your clothes and plunge into the lake, as a severe cold or chills may result. Wait a half hour to cool off, and then undress slowly and take your swim.

Word Puzzle.

I am a word of two letters. My first letter represents that which is dearer to me than house or lands. My second letter is the name of an article that cheers my life and adds to me enjoyment. My whole is the most definite and the most indefinite words in the English language, which may apply to anything in the universe and yet can designate only a single thing.

Answer—I, tea—It.

The Butterfly.

Dainty butterfly, do tell
Where you flit and hover,
Seeking in each glade and dell
Fragrance to discover.

For an instant now you gleam
On a blossom yellow;
Fluttering you always seem
Such a busy fellow.

Morning, noon and even night,
Ever midst the flowers,
Like a human errant knight
Haunting beauty's bowers.

Stealing sweets from every one,
And with pollen laden
Fleeing after love is won
To another maiden.

Fickle, gay in summer time,
Where are you, I wonder,
When the merry sleighbells chime?
Fast in deepest slumber.

L. A. Palmer, manager of the Palmer-Hope Hardware Co., has returned from an extended business trip to Albany, Boston, Tauton and other New England cities. Mr. Palmer visited several great hardware manufacturing centers.

BIG PARADE ON FOR MONDAY NIGHT

Monday night a monster Chautauqua automobile parade will be held in Fulton. Everybody, according to Dr. Cusack, vice-president of the Automobile club, is invited to join the parade. Those who have cars are asked to get in line, and those who have no cars are invited to "ride along."

The parade will start at 7:30 in the evening from the business section. Today gay Chautauqua banners were strung in festoons across the streets in the business section.

British Losses Greater Than in Country's Previous History

King's Subjects Get Additional Severe Jolts and Would Modify Statesman's Utterances---Miners' Strike Threatens Military Efficiency.

Lord Landsdowne's admission, so far uncontradicted, that the total British forces in the "European theatre of war" are only about 440,000 men has created such a disagreeable impression here that serious attempts are being made to modify it.

One of these methods is to show that England's small army, while it has had only 38 miles out of a total of 435 to guard, has really occupied what might be called the "bloody angle" of the battle line, and that its losses have been appalling.

It is shown by statistics repeated from a statement made by Premier Asquith that up to June 15 the total killed of the British army numbered 3,327 officers and 47,015 men, a total of 50,342, and 207,727 wounded.

	Killed	Wounded
British losses in northern France	50,342	207,727

The claim is made that these are record losses in all warfare, and to prove this the following figures are adduced:

German losses in the Franco-Prussian war	17,570	96,189
Russian losses in Russo-Turkish war	32,780	71,268
British losses in Boer war	22,045	*75,630

*Includes men invalidated home, as well as wounded in action.

It is contended that when the size of the various forces in the above campaigns is compared with the "little army" of the British in Flanders and North France, it will show that the English have sacrificed themselves or have been sacrified with a carelessness that is unprecedented.

BERLIN SEES EVIDENCE OF GERMANIC UNITY

Berlin, July 16 (via Rotterdam).—The Austrian note to the United States protesting against the wholesale exportation of ammunition and war material to the enemies of Austria and Germany is the principal topic of conversation here.

A highly placed official familiar with the attitude of the German Government told the correspondent today that the Austrian protest was cordially welcomed by Germany as a parallel action to that which is now proceeding between the German Foreign Office and the American Department of State. It is intended, he said, to show the unity of the Central Powers.

The friendly tone which pervades the Austrian note proves that Germanic allies wish to leave nothing undone that will appeal to the humanity of the American people; this in spite of the irritation caused here by the tremendous quantity of ammunition exports which are popularly supposed to be killing thousands of Austrians and Germans.

Austria's note should convince Washington doubly of the unity of German and Austrian sentiment, which condemns as unneutral and unfriendly the unprecedented assistance which the United States is giving to the allies.

While this trade in munitions does not violate international law, it is held here that morally the Austrian arguments are convincing, dignified and incontrovertible. They are expected to cause a profound impression, creating a sentiment that will influence the American answer to the recent German note

All the Berlin newspapers quote with satisfaction the comments of the American press which emphasize the view that there is no danger of war between the United States and Germany. "Mr. Bryan hits the nail on the head," says the Mittags-Zeitung, "when he declares that no conflict is possible if Americans will avoid the war zone."

The Tageblatt and the Vossische Zeitung both quote at length the New York American editorial of last Monday on submarine war, and both commend its for fairness.

HELD AS THIEF AFTER CHASE TO BROADWAY

New York.—Shouting "Stop thief"! J. B. Dimon, of Dimon Brothers & Co., furriers, pursued Joseph Brooks, a merchant, of No. 534 East One Hundred Seventy-ninth street, from Lexington avenue to Broadway in 29th st. A large crowd followed.

At Broadway, Brooks was seized by Policeman Coughlin. Dimon accused him of robbing his store last September of furs worth $300 and forfeiting a bond of $2500 after being indicted.

BRITISH ADMIRALTY TAKES RESERVE COAL SUPPLIES

London, July 16.—General business on the Cardiff Coal Exchange has ceased, owing to the Government requisition for the Admiralty of all available coal supplies, while shipping and the railways which depend on the mines also had little to do today. There is a general impression, however, that the strike will not last long, but that the men, after a short holiday, perhaps over the week-end, will reutrn to work.

The Welsh miners are in practical rebellion agains the British government.

All the responsible labor leaders of the country are opposed to the strike, and while while it is hard to see how the Government can enforce the penalties of the Munitions act, it is believed the men will be influenced by the fact that they are opposing an act which was passed for the safety of the country.

The strike has been forced by the men of the Aberdare Valley, who are strong syndicalists and have declared that the present was a good time to force the Government to take over the mines. This policy has been advocated by the Independent Labor party, which is more treme than the regular Labor ary, and one of the leaders of which is J. Kier Hardie, whose Parliamentary constituency included the Aberdare Valley.

In this situation the British Admiralty has taken over all the reserve supplies of coal and Walter Runciman, president of the Board of Trade, as a last concession, will meet the miners' leaders in London tomorrow afternoon and make a final effort to effect a settlement.

ANOTHER LUBIN "LIBERTY BELL" FEATURE

"The College Widow," from the famous play of the same name by George Ade, the second of the popular "Libery Bell" Features, will be shown at The Quirk today. It is in five reels. A Lubin "Libery Bell" Feature is a photoplay of at least five reels, with famous stars in the cast. The first "Liberty Bell" Feature was "The Eagle's Nest," featuring Edwin Arden and Romaine Fielding. "The College Widow" will feature fascinating little Ethel Clayton and George Soule Spencer. In preparation are "The Sporting Duchess," with Rose Coghlan in the title role, and the great political drama, "The District Attorney."

In "The College Widow" is a thrilling football game, a "snake dance" of 5000 students and the most spectacular fire scene ever shown in motion pictures.

"Such a Cook," a Keystone comedy, will complete a six-reel show.

Tomorrow Robert Warwick in the Paul Armstrong play, "Alias Jimmy Vanentine."

BOLDT CASTLE SOUGHT FOR PRESIDENT WILSON

Alexandria Bay, July 16.—Efforts are being made by a syndicate of prominent Washingon men to purchase the summer home of George C. Boldt, known as Boldt Castle, on Hart Island, near this place, for a summer home for the president. It is pointed out that the Thousand Islands would make an ideal place for the president to spend the summer, on account of the cooling breezes and the variety of entertainment afforded.

FLOYD T. HUNTINGTON

Floyd T. Huntington, a former resident ofthis city, died yesterday at his home in Los Angeles. He was 40 years old and had been ill but a short time.

Mr. Huntington was prominent in church and business circles while in this city. He was a member of the local Baptist church and of Hiram Lodge F. & A. M. In business he was a jeweler.

Surviving Mr. Huntington is the widow, Mrs. Lena Gardner Huntington, formerly of Fulton; a brother, Willis, of Syracuse, and the mother who resides at Palermo.

MORE PAPER MILL STRIKERS DISPOSSESSED

Watertown, July 16.—Further proceedings to dospossess strikers from their homes at Deferist owned by the St. Regis Paper Co., were instituted today by Purcell, Cullen & Purcell, the company's attorneys. Summary proceedings in eviction are being begun again 25 more strikers occupying company homes.

While orders in dispossession have been issued by County Judge George W. Reeves in over 30 cases, a considerable number of striking paper mill employes still occupy houses at Deferiet owned by the St. Regis Paper Co. While many of the men have already moved their families from the company houses, others remain in possession and show no disposition to get out.

BIG TIME PLANNED BY BROTHERHOOD

Plans are maturing for the first annual athletic meet between the brotherhoods of the First M. E. and State Street churches.

The committee in charge of affairs is composed of George Carner, A. Wise and Justin Morrill of the First M. E. church, and Fred Taylor, Chauncey Wilson and Charles Sage of the State Street church.

City Contractors Get Construction Work for the Newest Industry

People's Oil Co. Building to Be Built By Fulton Workmen and of Material Bought of Fulton's Dealers.

The Chamber of Commerce was in communication with the People's Oil & Fuel Co. of Oswego this morning by telephone, and learned that the contract for the building has been let to the local firm of Weiss & Laws. The order for the lumber has already been placed by the local men at Morin Bros.'s lumber yard. The order amounts to between 22,000 and 25,000 feet. The corrugated iron work will also be handled by Fulton men, but up to ten o'clock this morning the persons who will have this work had not been decided.

Messrs. Weiss & Laws were the lowest bidders according to R. L. Callison of the company and his agreement with them calls for the completion of the work by September 1st.

This is the first new plant secured by the Chamber of Commerce for the city, and it isd ue to the activity and co-operation of the Industries Division that the plant is to be built by Fulton contractors with Fulton labor and material furnished entirely by Fulton men.

It is not yet known how many men will be employed on the work, but it is the purpose of Messrs. Weiss & Laws to start as soon as possible in order that they may complete the building before the day specified.

The Industries Division has under consideration several manufacturing propositions, one or two of which look very promising. Representatives from a pneumatic cushion company for automobiles have been in the city within the last two weeks and have inspected several exisiting plants. There have also been representatives of a wagon works concern and promoters for several new mechanical devices. The Division of Industries hopes to secure one or more of these propositions for Fulton within the next few months and is working hard toward that end.

DECLARES THE COAST THE PLACE TO BUILD UP

Edwin O. Hart arrived in the city Thursday noon from the Pacific coast. He declares that he is enjoying the best of health and intimates that California is unexcelled as a spot on the earth for upbuilding a fellow "run down." Mr. Hart proposes to remain in Fulton. He is at present quite busy looking after the affairs of the Hart Coal Corporation while the company's head, his father, E. E. Hart, enjoys a respite from labor in Canada.

Mr. Edwin was formerly confidential secretary to Attorney F. G. Spencer and a great favorite in the social and business life of this community.

RIDE ALONG, HELP ALONG; JOIN THE PARADE

Monday evening at 8:30 after the Chautauqua parade a party will be held at the Chamber of Commerce rooms to which every one interested in the success of Chautauqua week is invited to attend. The refreshments will be in the nature of Spirits of Enthusiasm of which each one may dish out his own portion.

"Be on hand," says the committee. Hitch your buzz wagon to the Chautauqua star Monday eve. If you are fortunate enough to own one of these vehicles "ride along, sing along, help along" in the parade.

INDEPENDENTS PLAYING IN PULASKI TODAY

The Fulton Independents left this city at 12.30 o'clock today bound for Pulaski, where they will take on the Pulaski county seaters this afternoon. Painter will do the hurling for the local lads, and Fayette will work behind the plate. Twelve men made the trip.'

YOUNG PEOPLE'S UNION SERVICES

The young people of the city will meet in a union service at State St. church tomorrow at 6:30 p.m. All of the young people of the city are invited to attend.

Special music will be a feature of the program. Reports of the Y. P. B. convention will be given.

It will pay you to advertise in The Evening Times' Miscellaneous Want Column. See schedule of prices elsewhere. Phone [illegible].

GYPSY WOMEN WERE USHERED FROM CITY

Three gypsy women, attired in the usual polychromatic style paid Fulton a short visit this morning, remaining here for just one hour—from 9 to 10. The three women, Brazilians, alighted from a southbound Empire United Railways car and immediately began operations in the vicinity of the O. & W. station. Officer Alnutt corralled the three and took them before Chief Dyer. The next car Oswego-bound carried the officer and the women, the policeman alighting at Hannibal st. Inquiry among the business places visited by the gypsies revealed the following: At the first, a grocery store, green tea was desired; at the second, a real estate office, they asked the time of day; at the third, a laundry, would you like to have your fortune told. In the next place, a donation was asked for poor children.

Previous visits to Fulton of these people have resulted in much trouble for the people. Traveling in pairs as a rule, one engages the storekeeper's attention while her companion helps herself to whatever she can.

FORD CAR BUYERS HERE SHARE REBATE

With the announcement yesterday that the Ford Automobile Co. had sold since August 1, 1914, 300,00 machines, there came a feeling of joy to the hundreds of owners of Ford cars in this vicinity, as the company's statement means a sharing of profits here as well as all over the country.

The refund amounting to $15,000,000 to owners of Ford cars who purchased machines since August 1, 1914, means a pro rata distribution of $50.

On August 1, 1914, the company announced that if 300,000 machines were sold during the year, each purchaser would receive a refund of from $400 to 160. The 300.00 mark was reached this afternoon.

ELECTRIC CO. HAS TRUCK

The Fulton Light, Heat & Power Co. has purchased a new Ford truck which will be used in construction work. The truck has a capacity of one ton.

WEATHER FORECAST

Fair tonight and Sunday; cooler tonight, with moderate fresh to west winds.

FEARED TO ARGUE RIGHT OF WAY; WHEEL SKIDDED; OBJECTS OF REAL PITY

Synon Frawley and Frank Cox, two letter-carriers at the local post office, arose late this morning, and started for the office at a rapid gait, at least Cox did, while Frawley rode his wheel. Cox expected to meet the city trolley at the trolley station but the car happened to be at the northern terminus and Cox, anxious to report on time, asked Frawley to take him to the office on the handle bars of the bicycle. Frawley took his passenger aboard and started pedaling up First st. which was in its usual impassable condition. The gong of an approaching trolley warned Frawley to vacate the company's right of way, and as the trolley, in charge of Motorman Edward Ford and Conductor Lawrence Crandall, slowed down, Frawley, Cox, and the bicycle attempted to turn off the track. The wheel skidded on the slippery rail, catapulting the outfit into the muddy street. The heartless trolley-men and passengers enjoyed a long laugh at the expense of the unfortunate postal employes, who proceeded to work on foot.

Austria-Hungary, In Text, Protests American Shipments

Vienna, July 17.—Following is the full official text of the protest by the dual empire of Austria-Hungary to the United States Government against the continued shipment of American war munitions to the allies:

Special attention of the Austro-Hungarian Government has from the beginning been drawn to the marked consequences of the fact that for a considerable time in the past there has been, between the United States, England and her allies, a continued traffic in war material, carried on on a large scale, while both Austria-Hungary and Germany have been completely excluded from the American markets.

Although the Austro-Hungarian Government is perfectly convinced that the attitude observed by the American Government in this connection has been inspired solely by a desire to maintain the strictest neutrality and to keep within the regulations set forth by existing international treaties, the question whether the situation which has arisen out of the war, doubtless without any intention on the part of the American Government, is not of such a nature that the real intentions of the Washington Cabinet have been, as a matter of fact, frustrated and even reversed.

If this question is answered in the affirmative, and in the view of the Austro-Hungarian Government, it must undoubtedly so be answered—another question arises directly from it, viz., whethe it is not possible, and indeed necessary, that measures be taken to ensure that desire of the American Government to observe strict impartiality toward all beligerent parties shall be satisfied.

The Austro-Hungarian government, without hesitation and without reservation, answers this question also in the affirmative.

All authorities on the subject of international law maintain that a neutral government is not permitted to allow unhindered traffic in contraband of war, if such traffic is of such kind or reaches such proportions as to compromise the neutrality of the government in question.

On whatever basis of scientific criteria the supposed legitimacy of contraband traffic be founded, it must, nevertheless, be concluded that export of war material from the United States such as is taking place during the present war is not in conformity with the practice of strict neutrality.

It follows equally that there is no reason whatever why the right can be denied to the American Government to put an end to this flagrant and formidable export of war material by the prohibition of such exports, more particularly in view of the fact that it is well known that only one of the belligerent parties can take advantage of this export. The American Government can in no way be blamed if its exerts this admitted right and decides to pass a special act with a view of maintaining its position in conformity with the claims of international law.

As regards the possible objection that notwithstanding the willingness of American traders to furnish supplies to Austria-Hungary, as well as to England and her allies, the United States, owing to the conditions of war obtaining, are not able to carry on trade with Austria-Hungary and Germany, it may be pointed out that the Government of the United States is undoubtedly well able to deal with this objection.

It would, for instance, be quite sufficient for the purpose to notify the enemies of Austria-Hungary and Germany that the supply of food and raw materials will be stopped if legal traffic in those articles between American and the Central Powers of Europe is not permitted. The American Government, if disposed to act in this sens,e would not only by following the traditions of protection of the lawful trade by sea, which have always been respected in America, but would at the same time reap great moral reward by restraining the criminal efforts of the enemies of Austria-Hungary and Germany to utilize hunger as their ally.

Austria-Hungary, therefore, taking into consideration the excellent relations which have always existed between America and Austro-Hungary monarchy, makes this entirely friendly appeal to the Government of the United States asking the Government to reconsider, in the light of explanations set forth, the attitude it has hitherto observed in regard to this most important matter.

Police Department Arrests Woman Accused of Setting Fire to Barn

Accompanied by "Thomas Leslie" the Couple Told Captors They Were on Their Way to Give Themselves Up to Authorities.

A sensation developed over night as a result of the fire yesterday afternoon which destroyed a barn owned by Paul Clements, of West First st. As stated exclusively in last evening's Times, Chief Police Edward Dyer took Mrs. Augusta Clements, the wife of Paul Clements, and an unknown male companion, into custody at 2.30 yesterday afternoon, on suspicion. The couple were walking along Broadway near the N. Y. C. station when they were picked up.

Mrs. Clements is said to have remarked, when Chief Dyer told the pair that he wanted them to come down to the station, "That was just where we were going." The arrest of the couple was the result of a well founded rumor in the vicinity of the Clement's home to the effect that Mrs. Clements had something to do with the fire which destroyed the barn, and resulted in a loss of $3,000, only partly covered by insurance.

Chief Dyer left Mrs. Clements and her companion who afterward gave the name of Thomas Leslie, in his office and returned to the station about an hour later with Paul Clements, Lottie Evans, the present housekeeper at the Clements' home, and Mary Hawcks, a twelve-year-old girl who may figure prominently in the case later on. The Chief's first suspicions were grounded on a remark made to Paul Clements by his wife Wednesday night when she announced that she was "going to get even with him," and the little girl said Mrs. Clements told her yesterday afternoon, shortly before the fire, that she was "going to get out of town right away."

Meanwhile, Paul Clements had been in conference with his attorney James R. Somers, and a warrant charging Mrs. Clements and Leslie with a violation of a section of the Penal Code, was sworn out. In his information, Clements avers he talked with his wife Wednesday night, on her first visit to the city in some time. She was accompanied by Leslie, and told Clements he was her brother.

Mrs. Clements was arraigned before Judge Wilson at 7 o'clock and was highly indignant when a charge was read to her. She refused to plead or to say a word, and asked for an attorney. Then she poured out a torrent of invective on the Judge, and became so abusive that he orderd her taken to the city jail. She harangued the officer all the way to the cell, and when the door was opened, said, "This is just what I want—some place to lie down."

Leslie, was sitting in the Chief's office and did not say a word during the entire proceedings. Complying with the prisoners' request that counsel be furnished them, Judge Wilson communicated with Herbert J. Fanning, who appeared at 9 o'clock, the time set for the hearing last night. After a consultation with the prisoners Mr. Fanning announced that he did not care to represent them, giving no reasons in the court room, but afterwards stating they would not talk. Hubert L. Gilman then consented to appear for the couple, and, after a short conference with Mrs. Clements and Leslie, he announced that his clients would plead not guilty, and wished a trial by jury.

A jury panel of twelve men was immediately drawn and six of the number will act. The trial has been set for Tuesday morning at 9.30 o'clock. Mrs. Clements said she could furnish no bail and the prisoners were committed to the city jail.

Mrs. Clements, since her arrival in this city Moday last, has instituted a suit for divorce against her husband through her attorneys, Fanning and Fanning. In the suit, which has already been filed, she asks alimony and $200 counsel fees.

Court of Appeals Upholds Local Attorney's Decision

The court of Appeals this week handed down a decision in the Oswego Special Franchise Tax case, reversing the decision of the Appelate division and the Special Term of the Supreme Court, and confirming in all respects the report of the referee, Frederick G. Spencer, of this city. This case involves two years of taxes in the city of Oswego against the New York, Ontario & Western R. R. Co. The city sought to hold the company liable for taxes on a concrete subway near Fort Ontario and on some overhead bridges along the road leading out of the city, as well as other improvements along the line. Some special franchise taxes were also included in the city's demand.

The railroad brought certiorari proceedings to have the assessments set aside, and the result is a complete victory for the company in all its contentions.

"The question of developing more factories may mean the difference between disaster and safety to the country."—Lindley M. Garrison.

It is as gratifying as it is refreshing to find in the office of Secretary of War a man who unerringly thinks the right thing at the right time and possesses the ability to present it in a way that even he who would run away from the nation's great problem of preparedness cannot misunderstand.—N. Y. Herald.

Rreal Neutrality.

Though the differences between this country and Germany are very grave it should not be forgotten that we are at serious variance with England. American diplomacy will undoubtedly settle the Lusitania matter to the credit of this country. It should also give heed to England's interference with our commerce. Being neutral we must show neutrality. It is much easier to secure from England a reversal of its action in reference to our commerce than to induce Germany to substantially confess murder. Berlin has done all but that. London has not conceded one point of our just demands for freedom of the sea. To make even progress in these negotiations would emphasize our neutrality. There will be no precedent established by Germany in the Lusitania case. There should be no embargo on our commerce established as a precedent in wars we cannot foresee.—Watertown Standard.

PARCEL POST RECEIPTS

On and after September 1 it will be possible for senders to secure from the postal authorities a receipt showing the dispatch of any parcel post package. The receipt will have no money value, and will not replace insurance upon the shipment, but will show the good faith of the sender in mailing the parcel. Those desiring receipts should make out and present at the mailing window a receipt in the desired form, and upon affixing a one cent stamp to the receipt it will be signed by the authorized clerk, showing that the package has been mailed.

DISSATISFIED

By I. E. Hyde

Oh, Judge of Judge, today to thee I cry—
Will I answer to the populace or to Thee, by and by?
If I do half the world says I am not doing right.
Shall I leave opinions all behind, and do what I think right?
If con—I work, I win the praise of very few good men,
If better conscience I obey. Oh, Master, pray, what then?

At first I thought the world to please, I plunged into its game;
I wrestled with the good within, I thought to win mere fame.
I ran the race all men pursue, a golden cup to win—
I won the prize—not satisfied, still weighted down with sin.
My heart still hungry, on I plunge, there's something more I want.
I'll climb the ladder yet, my lads, where devils do not taunt.
I'll win the love of some pure girl, I'll drink the cup of bliss.
Ah! yet my hardened heart still craves, what is it that I miss?

Afar—I see a faint light shine. It radiates sweet peace.
I gaze with wonder on its glow. I'm praying for release.
And while I pray, a calm voice speaks — a voice calm, deep and low,
Dear brother man, the thing you crave, is — Godly light — and now."

STOCK VERSUS REAL ESTATE

There is a lesson in a story from one of our great cities that concerns values, then and now. The lesson throws light upon the mistaken ideas of men, and refutes many of our "I can'ts." Men will say to you, "Oh, I can't see why real estate should advance in this or that place." Those same words have been used right at home —within the observation of the reader, yet the world do move—not hundreds of miles away, but at home, right at the end of your nose. Confidence is the greater factor in achievement. If we have confidence in the future of our city, it is our duty to make an exhibition of it.

The case in point is this: Fifty years ago a man bought one hundred shares of railroad stock. He paid approximately $6,000 for it. If he had kept it until today he would have received about six per cent. on his money all that time, but his capital would now be only $5,600.

Had a man on the same day bought a piece of real estate for $6,000 in almost any thriving town, the increase in his capital now would be very great, in almost every case. Twenty-four years ago a man paid $30,000 for a piece of real estate in a big center of population, and he recently refused $460,000 for it. His capital multiplied by more than fifteen.

There is a general impression that those who own railroads have grown rich with wonderful rapidity, while the truth of the matter is that a dollar invested half a century ago in one of America's largest railroads where traffic is densest and where business has grown the fastest, is worth a little less than a dollar today.

NOT ACCIDENTS

Lieutenant Frederick Mears was born two years after Custer's disaster—born at Fort Omaha. His boyhood days were spent in the State of Washington.

Later, he educated himself as a civil engineer, and began as an axman, then rodman, then chainman, and finally became assistant engineer.

* * *

But the son of the barracks would war, and he enlisted. With wages thirteen dollars a month, he left for the Philippines, to fight the bolobraves.

Here he won his dream of life—a commission as Second Lieutenant of Cavalry. Then, as a cub engineer, he was taken to Panama, and there he re-located the Panama Railroad, and finally managed it.

* * *

During the past winter, Congress authorized the President to expend $35,000,000 in building a trunk line in Alaska.

Pessimists declare that any attempt to build a railroad in Alaska will fail. But the bronzed young engineer in charge seems confident.

* * *

Here is a story of success from the barracks—from $13 a month up. And still they say there is no opportunity in the army.

* * *

Dr. Charles P. Steinmetz, Consulting Engineer of the General Electric, landed in this country a poor immigrant boy. He took up his quarters with an American friend in a small room in Brooklyn. The two batched while they conducted electrical experiments. Dr. Steinmetz began with comparatively nothing, so far as money and material can be measured; but today he has more friends, material and money than any man in his profession.

* * *

Dr. Alexander Graham Bell declares that he knew nothing to speak of with reference to electricity, when he invented the telephone. He found the missing link idea of the telephone by accident, by inspiration. The angel of genius is always poised over the head of the man that works.—Silent Partner.

LECTURER WITH A PUNCH

J. S. Knox has the unique distinction of traveling over the same Chautauqua circuit two seasons in succession, and that because of the universal demand on the part of all classes of people for his return.

Mr. Knox is called "The Lecturer with the Punch," and "The Greatest Epigrammatic Orator in America." He is recognized by business men to be one of the best informed men in the country in regard to business and business needs. He is a deeply inspirational speaker in that he has a most business like way of relating business to the highest things. He is an earnest and forceful exponent of the positive in all things.

Mr. Knox is the President of the Knox School of Salesmanship and Business Efficiency. He is the author of several textbooks on Personality and Business Efficiency that have wide use in our commercial colleges. His own strong personality marks him as one well fitted to authoritatively handle such topics.

The subject of the lecture will be Community Building. Where Mr. Knox has already appeared a different phase of the subject will be treated. Every business man and every person interested in better business and a better community ought to hear this lecture.

OUR WASHINGTON CORRESPONDENCE

News Mostly of a Political Nature From the Nation's Seat of Government for Times' Readers.

Washington, July 16. (Special correspondence).—"I have the utmost confidence in the new tariff law. I am absolutely confident that this law will reduce the cost of living in the United States."

Standing at the elbow of President Wilson the evening of October 3, 1913, in company with other officers of the Army of Business Disorganization, Congressman (now Senator) Underwood, awaited the signature of the bill which blotted his scutcheon, and with the consummation of that act by President Wilson, Mr. Underwood delivered the above-quoted prophecy.

The recent report of the Department of Labor and the nation-wide comment of the press thereon have convinced everyone of the fallacy of Mr. Underwood's forecast, and it is proposed here to give a tabulation of the fifteen different food products considered by the Department of Labor in its report, showing the relative retail prices in 1912, when the Democrats were making their campaign on the assumption that the high cost of living was due to the protective tariff —a campaign which turned the country over to their administration, although the protectionist vote was against them, and the relative retail prices for July, 1914, with the Democratic law in full swing.

The Deparment of Labor fixes on 1913 as a base year, placing the index figure for that year at 100 per cent. To use the Department's explanation: "A relative price of any article is the per cent which the price of that article at any certain date is of the price of the same article at a date or period which has been selected as the base period. The prices for the base year or period are represented for the purpose of comparison as equal to 100."

* * *

"Purchases of Argentine corn at the seaboard exerted a deprerssing effect on the corn market here," says a press dispatch from Chicago. Let every corngrower in the United States who voted the free trade ticket in 1912 and 1914 paste that in his hat where he can see it every time he raises the lid to wipe the perspiration from his heated brow. The Argentine farmer should have it printed in large ltters of gold and hung on the wall of his dining room opposite the motto: "Eat, drink and be merry."

* * *

When the outbreak of the European war caused a flurry in American banking circles, the banks issued many millions of dollars' worth of emergency currency under the provisions of the Aldrich-Vreeland emergency currency act. The act which thus proved the wisdom of its authors, when put to the test of practice, was enacted by a Republican Congress and signed by a Republican president.

* * *

The State Department is making strenuous efforts to secure the release of $50,000,000 worth of goods ordered from Germany by American importers but held in that country because Great Britain will not allow its shipment. But what has become of the "Made in America" policy to which this administration was supposed to be committed?

* * *

As Mr. Bryan reads over the single-term plank of the Baltimore platform he doubtless takes pleasure in agreeing with President Wilson's statement that the platform was "not molasses to catch flies."

* * *

The American people are determined to support the President in his foreign policies, but they do get a little impatient over being compelled to change their minds so often regarding Mexico.

* * *

In 1896, when novel monetary schemes were proposed, William McKinley originated the slogan—let us open the mills instead of the mints." While the European war has opened a few mills and, doubtless, will open more, that is not the sort of factory business the American people desire. What they want is an economic policy that will keep mills open when there is no war.

SUNDAY SYLAN BEACH EXCURSION

Beginning Sunday, July 25th, and continuing each Sunday until August 22d, the O. & W. Sylvan Beach train will leave Oswego at 8:40 a.m., returning leaving Beach at 5:15 p.m.—advt.

Expert Advice for the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

In a gasoline engine, is any more power obtained from the explosion by having the spark plug directly in front of the piston rather than at one side in a boss or recess?

There are two theories relative to the location of the spark plug in a recess within the cylinder. One is that by having the spark plug in such a recess a spurt of flame enters the combustion space from the recess and as a result quickly ignites the charge. Another theory is that by having the spark plug directly in the center of the combustion, or, that is, so that the spark plug points project outward into the combustion space itself, the gas is quickly exploded because it gives the flame a chance to propagate itself in all directions. Practice favors a plug which merely has its points projecting into the combustion space.

Why do I have difficulty in starting on my magneto in damp weather?

The difficulty you have in starting in wet weather is probably due to moisture short circuiting some of the wires. Inspect the wires carefully for any points that might be affected by moisture and see that all the insulation is in good condition.

How will I burn the carbon out of the cylinders of my engine with oxygen-acetylene flames?

An oxygen-acetylene flame is never used for burning carbon out of cylinders. Acetylene is of no use for this purpose, but by employing oxygen alone a very satisfactory job can be done. The oxygen is used because it supports combustion five times as readily as air does, and therefore, once the carbon is ignited, it will burn rapidly, although it will not burn at all in air. In cleaning carbon from the cylinders in this manner the first thing to do is to remove the valve-caps; then the cylinder is filled with oxygen. A small piece of burning waste is then dropped into the cylinder, and combustion immediately begins in a very vigorous manner. In fact, sometimes the carbon is consumed so rapidly that sparks will fly out of the valve openings, and for this reason it may be advisable to cover the front part of the car with damp cloths to catch these sparks. From this it must not be thought that there is any danger of setting the car afire, because the continued use of oxygen has demonstrated that there is no possibility of this occurring. If damp cloths are not used the most that will happen is a slight marring of the varnish by the sparks. The oxygen is supplied from a tank in which it is stored under very high pressure, and, as the pressure at the delivery nozzle of the outfit must be small, a reducing valve must be used to bring the pressure down to a reasonable amount. Therefore between the tank and the tube that carries the gas to the cylinders there is a reducing valve that automatically lowers the pressure. A gauge is generally fitted to the tank to indicate how much gas there is in it, because as the quantity becomes smaller the pressure drops.

I have a leather faced cone clutch and wish to put on a new one. I want to know the best kind of leather I can get for the purpose; also how to put it on. Would asbestos be better than leather?

Either leather or an asbestos fabric may be used with satisfaction. If you use leather you should obtain friction leather, which is made for this purpose.

In ordering the facing, the diameters of the two edges of the cone and the width of the cone should be given. If an asbestos fabric is used, care should be taken to obtain a piece that is made for the size of cone you have. Unlike leather, strips of this material to fit cannot be cut from a large piece of fabric. The thickness of the facing is important because too thick a facing will prevent the cone from properly entering the flywheel. One-quarter inch is an average value.

If you desire to buy a piece of leather and cut your own facing you should remove the old clutch leather and use it for a pattern. Before applying the leather it is well to soak it in a neatsfoot oil to soften it. Care should be taken to cut the leather to the correct length. The best way is to first rivet one end and then wrap the leather around the cone in such a manner that it slips down over the smaller end of the cone. Then pull it tight and rivet the other end. Now push the leather up in place all around and it should be tight and unwrinkled.

The same advice applies to putting on an asbestos fabric, but there is less danger of the facing wrinkling.

Will you explain fully the method of fitting and lapping in new piston rings?

Place the cylinders on the bench and apply some ground glass and oil to the interior. The ground glass should be very fine. Then place the piston in the cylinder and work it in and out until the rings are well polished and fit tightly. Lapping is an operation which requires an experienced man. Furthermore, it is advisable to use an old cylinder wherever possible, as there is danger of wearing the new cylinder.

AUSTRIA GIVES ROUMANIA WEEK TO MEET DEMANDS

Rome, July 16.—Austria has threatened to close the Roumanian frontier unless the restrictions on Austro-German exports for Turkey are removed.

A satisfactory reply is demanded within a week.

Replying to Austria, Roumania has notified Austria that the restriction only applies to contraband, and that a closure of frontiers would only hasten to end the friendly relations of Austria and Roumania.

Daily conferences between the new Bulgarian Minister Stunicioff and the Roumanian Minister Chika at the Rumanian Legation in Rome have strengthened the report that Bulgaria, Rumania and Greece are preparing for joint action either by joining the allies or announcing their neutrality for the remainder of the war.

Advices from Athens reported that the meeting of the Greek Parliament on July 20, when the "war party" of ex-Premier Venizelos was to have come into power, will probably be postponed because of the continued illness of King Constantine.

A RUTHLESS CZAR

Peter the Great Was a Savage, but He Made His Country.

BIRTH OF MODERN RUSSIA.

It Began With a Beard Reform In Which the Monarch Himself Acted as Hair Cutter For His Nobles—Triumphs of the Giant Barbarian.

The chief nobles of Russia, summoned from all quarters of the empire on April 26, 1698, sat around a table in the czar's palace at Moscow. They were a rough looking lot with their shaggy beards and unkempt hair and with their dirt incrusted bodies swathed in gold embroidered oriental robes.

At the table's head stood a thick set young man whose ill fitting European robes sat oddly on his giant body. He was rugged of face and was the only beardless member of the conference. In one unwashed hand he wielded a pair of barber shears.

The man was Peter I., czar of all the Russias, father of modern Russia and known to time as Peter the Great. He had just returned from a tour of Europe, and the journey had taught him a lesson. It had taught him, he said to the nobles, that he ruled a barbaric and primitive realm that was about a thousand years behind the times; that Russia had slumbered while all the rest of the world had pressed forward.

He announced that he was going to open a new era for his country; to civilize and modernize it and make it as up to date as the nations which were laughing at it. He further informed the assemblage that the reform was going to begin then and there. Modern folk, he told them, did not wear enormous shaggy beards and long robes. European dress must henceforth be worn by the Russians, and beards must go.

To show he was in earnest Peter went slowly around the table and with his own hand cut off the beard of every man there. To a seventeenth century Russian the beard was as sacred as is a pigtail to a Chinaman, and nothing but Peter's iron authority, backed by his army's loyalty, prevented a wholesale revolution. Until Peter's time it had been the custom to wear the coatsleeves at least a foot longer than the arms. These sleeves he ordered cut off to conform with European fashions. As it was, the clothes and beard reform stirred up a dozen hot little rebellions.

And thus modern Russia was born. Nor did Peter rest until he had made his formerly despised country a world power. He was a strange man, this czar, who undertook to awaken a sleeping nation to life and activity. Voltaire paints perhaps the best picture of the czar's many sided character in the words:

"He gave a polish to his people and was himself a savage. He taught them the art of war, of which he himself was ignorant. From the sight of a small boat on the river Moskwa he erected a powerful fleet, made himself an expert and active shipwright, sailor, pilot and commander. He changed the manners, customs and laws of the Russians, and he lives in their memory as the father of his country."

One change followed another. Education, mechanics, the arts, were introduced into Russia, armies of practical teachers being imported. Then came wars which won some long needed seaports for the awakened land and new territory as well.

Peter decided that Moscow was wrongly built and in a bad location for his newborn country's capital. And against an avalanche of opposition he picked out a tract of ground in the midst of a swamp for a new capital. Here with his own hands he built a wooden hut and summoned every artisan he could get hold of to help him erect a monster city, to be known, in his honor, as St. Petersburg.

He superintended the work of dredging, digging and building, doing much of the labor in person, working side by side with his underpaid day laborers. In 1703 the city was begun. In 1711 Peter laid the foundation of his own brick palace there. (And 203 years later one of his successors renamed the capital Petrograd, to get rid of the Ger- [illegible]) In 1712 the seat of government was moved hither from Moscow.

Peter the Great died in 1725. Modern Russia is his true monument and epitaph. He found his country semisavage, and he, a savage at heart, left it civilized and progressive. He added six mighty provinces to the empire, and he made it a leading political, commercial and naval power, respected by the very nations that had so lately derided it, hated and feared by most of them.

All through the work of one giant barbarian who had begun his miraculous task twenty-seven years earlier by acting as barber for his own nobles.—Milwaukee Sentinel.

Mary's Revised Grammar.

"The sentence, 'My father had money,' is in the past tense," explained the teacher. "Now, Mary, what tense would you be speaking in if you said, 'My father has money?'"

"Oh, that would be pretense," replied Mary soberly.—Youth's Companion.

His Preference.

Farmer's Wife—Yes, I suppose I can let you have a cup of coffee. How do you take it? Frayed Philip—With breakfast, please.—Boston Transcript.

It becomes a wise man to try negotiations before arms.—Terence.

LIGHTNING RODS.

Why They End In a Sharp Point and Not In a Knob.

The reason a lightning rod has a sharp point is because a fine point offers no resistance to the discharge of electricity and in order that a cloud may be emptied of it noiselessly and harmlessly.

The degree of resistance is in proportion to the surface of the object. If the rod were surmounted by a knob, for instance, the discharge would be violent. But many a lightning rod has received an electrical discharge when the people in the building below were calmly unconscious of the fact. Noncorrosive metal is used for the point of the rod, as corrosion makes resistance.

The difference between a point and a ball is shown in discharging a battery. The full charge from a large battery would be received quietly on a metal point, while a moderate charge from a small one would explode violently on a ball.

It is said that a full charge may be passed harmlessly through a person's body if received on the point of a needle, whereas the same charge received on a discharger with a ball or knob on the end would mean instant death.—London Telegraph.

Mistakes In Use of Words.

If use can make authority in the employment of words it is high time that certain etymologically misused phrases of our English tongue should be adopted into the family of orthodoxy. The word "necessity" is habitually used as the equivalent of "necessary," instead of being its direct opposite. A man says: "I do not care for the luxuries of life if I have the necessities," when probably he has the "necessities" in clamorous abundance. Quite as common a blunder is the confusion between the words "expect" and "suspect." A man says: "There is a knock at the door. I 'expect' that is the tax collector." He should say, "I have been expecting the tax collector and suspect that is he."—Boston Transcript.

Indians of Ecuador.

Perhaps nowhere on the globe do human beings so much resemble passive beasts of burden as in Ecuador. In fact, the Indians used to be designated in documents as "smaller beasts of burden" to distinguish them from pack animals. Loaded, they clamber up the steep streets as stolid as little gray burros. One sees many an urchin of seven years bearing on his back a load of bricks as heavy as he is. One woman, bent under a burden, carries a child at her breast. Another laden woman plies distaff and spindle as she creeps along. Here is a file of barefoot women bent under loads of earth or bricks escorted by a man with a whip.—Professor Edward Alsworth Ross' "South of Panama."

Two Points of View.

To a woman in love little things seem big, and to a man in love big things seem little.

SPOTS ON THE SUN

The Way They Affect Our Source of Light and Heat.

POINT TO THE GRAND CLIMAX

When Darkness and Cold Shall Overtake Our Planet and Smother It In the Chill of Death—Their Effect Upon Climatic and Weather Conditions.

The return of sun spots is a phenomenon that astronomers always regard with great concern. They come flocking back once in about every eleven years. It takes on the average four and a half years for them to reach a maximum of numbers, when the sun is seen to be more or less speckled every day, and six and a half years to decline again to a minimum, when for months in succession the sun's face is as clean as a polished mirror. Upon the whole the heat on the earth, taking its entire surface into account and basing the observation on the temperature of the atmosphere, is about 1¼ degrees of the Fahrenheit scale lower at sun spot maximum than at sun spot minimum.

This cannot be wholly due to the darkening of the sun caused by the presence of the spots, since, as Mr. C. G. Abbott of the Smithsonian institution has shown, the amount by which the temperature is lowered is five times too great to be accounted for in that way.

But there are other ways in which an invasion of a horde of spots on the sun makes its effects felt upon our globe. The most conspicuous of these is in connection with the earth's magnetism.

The earth is a great magnet, and the sun appears to exercise a direct influence upon its magnetic state, that influence varying with the condition of the sun as to spottedness. When sun spots are at a maximum, magnetic storms of great violence occur, during which the electro magnetic excitement of the earth is vividly manifested—in the atmosphere by imposing displays of the aurora borealis, and in the earth itself by vagabond currents which interrupt telegraph and cable communication, and sometimes leap into visibility in the form of crackling sparks and electric flames playing about the instruments.

Occasionally it has been possible to trace phenomena of this kind to the influence of individual sun spots of unusual magnitude and activity. It is like the transmission of a shock from the sun to the earth, across a gap of 93,000,000 miles, supposed to be filled with nothing but the invisible and intangible ether.

Exactly how the forces that produce spots upon the sun affect the earth's weather is an unsettled question. There is a considerable amount of evidence for saying that such storms as our western tornadoes, the hurricanes of the West Indies and the typhoons of the China seas are far more numerous during sun spot maxima, and especially during the time that the spots are increasing in numbers. It has also been thought that wet and dry seasons are connected in some way with the sun spot cycle, but on this subject the evidence is contradictory. Some statistics show that dry seasons accompany sun spots and others that wet seasons accompany them.

But all of these things are really of little account in comparison with the great question of the effects produced upon the sun itself. The earth is a speck in the infinite vault of space, and we are animated atoms living for the fraction of a moment upon that insignificant speck. Of how great consequence in the vast scheme of the creation can the little questions that relate to our ephemeral comforts be! If a sun flame should lick us up our disappearance from the universe, physically considered, would be of less importance than that of the minutest drop of water from the ocean. But if the sun should disappear there would be a star gone from heaven. A part of the universe at least would notice its absence. Whatever threatens the existence of the sun, then, has an appreciable importance. The astronomer finds that the sun spots are symptomatic of progressive changes which will eventually bring the sun's career to an end, and so he studies them not for the sake of finding out merely how they may affect our petty affairs, but in order to trace for his intellectual satisfaction the grand phenomena of the life and death of a star. And in doing that he is pursuing the only course which can rescue man from oblivion, offsetting his material insignificance and nothingness with the relative greatness of his mind.—Garrett P. Serviss in Spokane Spokesman-Review.

The Blue Heron.

Notwithstanding the nature fakirs who write wonderfully unsound natural history, the heron does not spear prey with its bill (nor does the loon); it bites them, nips them between the long, sharp mandibles. We have had captive herons and have seen thousands of wild ones all over this continent, and they do not do the silly trash told of them by the nature fakirs.

Some of the nests are as big as a small haystack, built upon year after year until they reach enormous weights, very often up to 500 pounds.—Outing.

Good humor and generosity carry the day with the popular heart all the world over.—Alexander Smith.

HIS COURSE WAS CLEAR.

He Would Be Perfectly Willing to Help Her All He Could.

"William," said the good wife, looking up from her paper, "here I see an article that says a man is suing his wife for divorce, simply because she went through his pockets after he was asleep. Goodness knows, William, probably the poor woman never got a cent from the brute of a husband in any other way!"

"Uh-huh," replied William.

"William," came from his better half, "don't you dare sit there and 'uh-huh' me in such a manner! What would you do if you woke up and found me going through your pockets?"

"Who—me?" asked the sleepy husband, who had already turned over his pay envelope to the boss of the house. "Why, I'd get up and help you search, of course, my dear!"—Judge.

A Truthful Saw.

When church is out and Jack and Jill
In linked seclusion stray
It takes them two long, lonely hours
to pick their homeward way.
And as it's scarcely half a mile,
No reason can I find
Why it should take so very long
Except that "love is blind."
—Boston Journal.

The Changing Panorama of Life.

BEFORE MARRIAGE.

She—Jack, you are the sweetest man Oh, how I love you!

Jack (pinching her cheek) — How much?

AFTER MARRIAGE.

She — Jack, you are the sweetest thing. Oh, how I love you!

Jack (reaching toward his vest pocket)—How much?—Michigan Gargoyle.

Fashion Comment.

"What do you think of those new corkscrew gowns the women are importing from Paris?"

"Corking!"—New York World.

Those Were the Times.

"The first of our line, Sir Higgledy Piggledy, founded the family fortunes with a grist mill he ran."

"When did he run this grist mill?"

"Back in 1300 or thereabouts."

"Oh, yes. I've often heard that those were the times when knighthood was in flour."—Louisville Courier-Journal.

LIGHTS FOR BATTLEFIELDS.

Our Army Officials Are Making a Study of the Newest Devices.

The secretary of war has directed the engineer corps of the United States army to make an exhaustive study of searchlights, flares, star bombs, and such other lights as the Europeans are now using in war.

According to the Army and Navy Journal, searchlights are for obvious reasons kept dark until the field artillery has ceased firing and the enemy is charging. To illuminate a field over which the enemy is to advance, star bombs and flares are also used.

Flares, which are merely modified fireworks, are like the familiar red, white and blue lights used in Fourth of July celebrations to illuminate streets and parks. Sappers go out in front of the trenches with flares, which are then connected with the headquarters of the officers in command of the first line, who by setting them off at intervals throughout the night can keep the battle front continually lighted.

Star bombs are also adaptations of modern fireworks. They are shot from mortars into the sky, where for twenty minutes they will give off an intense light over a wide circle of the surrounding country. Before one bomb dies out another is shot into the air. A kind of star bomb, shot into the sky like an ordinary rocket, is used by both armies for signaling at night.

It is with such lights as these that our own engineer corps is now conducting experiments at the barracks in Washington.

Substitute For Icebox.

The housewife who does not have an icebox or ice in the summer will find the following a very good plan for keeping food fresh: Place vegetables, butter, opened cans of milk, etc., in a deep basin with about two inches of cold water in the bottom. Take a piece of old linen, soak it in water, wring out and spread it over all that is in the basin. Let the four corners dip into the water. This keeps the cloth moist. Then place the basin near a window where the air can blow over it. This method will keep the temperature under the linen 7 or 8 degrees lower than the temperature outside.—Delineator.

Odd Happenings In the Day's News

Kerosene oil sausages are a new invention of New York firebugs.

Chicago woman who sued a man for $25,000 for forcibly kissing her settled for $350 cash.

Resisting plea for increased alimony, New York man alleges that his wife put pins in his bed.

Georgia girl who married a man she had never seen said she fell in love with his penmanship.

Orange pastor advised mothers to wring their daughters' necks if necessary to stop them from modern dances.

Arizona man set a trap for rats. Dog was caught in trap and upset can of gasoline. Barking aroused man, who took lighted lamp into room and lost life in explosion.

St. Louis couple married twenty-five years have had 800 chicken or turkey dinners during that time. They saved all the wishbones, which were dipped in silver and strung on ribbons at their silver wedding celebration.

Alaska's Rivers and the Railroad.

The rivers of interior Alaska, of which the Yukon is the main artery, flow generally from east to west. The Yukon itself, from the point where it enters Alaska at Eagle to its outlet at the Bering sea, is more than 1,400 miles. It receives another 1,500 miles of navigable tributaries in the Tanana, the Chandlar, the Porcupine, the Koyukuk and the Innoko. The Kuskokwim, the second largest river in Alaska, has 600 miles of navigable water, with which the branch railroad through the Kuskokwim valley will connect at McGrath. In all, these rivers give 3,500 miles of navigable waterways in interior Alaska, besides water in Canada, ready made to serve as feeders for the government railroad the day it reaches Tanana, 412 miles from Seward, with the short branch to McGrath.

One of the Most Remarkable Pictures Ever Put on the Screen

COURT SAYS HE MUST VACATE

Paper Manufacturer Secures Order Compelling John Hunter to Leave Highland St. Premises in 30 Days.

The case of H. Lester Paddock, president of the Oswego Falls Pulp & Paper Co. against John Hunter, of the Hunter Arms Co., petitioning that Mr. Hunter be ordered to vacate the premises belonging to Mr. Paddock, namely, a house in Academy st., was decided in favor of the plaintiff late yesterday afternoon in the City Court, by Judge Herbert J. Wilson, after lengthy arguments by both sides. Mr. Hunter has been given thirty days in which to vacate the premises.

The action grew out of dispute that arose when Mr. Paddock asked Mr. Hunter to vacate the house, about two months ago. Mr. Paddock contends that Mr. Hunter's tenantcy ran only from month to month, whereas Mr. Hunter claims a verbal contract between Mr. Paddock and himself stipulated a tenantcy from year to year until such time as Mr. Paddock's daughter, Imogene, was to marry, at which time, Mr. Hunter's verbal lease was to expire, after due notice.

A. T. Jennings, counsel for Mr. Hunter, argued that Mr. Hunter was within his rights in refusing to vacate the premises until the expiration of his year, which would give him until April, 1916, to leave the house. Wishing to do all in his power to comply with Mr. Paddock's request, however, Mr. Hunter attempted to locate another house suitable but was unable to do son, and then dedcided to build. His new home will be ready September 1, and he is willing to move out at that time but does not care to move twice.

Claude E. Guile, for Mr. Paddock, argued that the monthly payment of rental was indicative of a month to month agreement. Mr. Paddock, Mrs. Paddock and Mr. Hunter testified.

ALL NOMINATIONS MUST BE BY PETITIONS

Getting their names upon the primary ballot in the fight for nomination next September will not be a difficult task for the majority of the candidates under any party emblem this summer. In the wards of Fulton those desiring a seat in the common council or with the board of supervisors will in many cases be required to secure not more than a half dozen signatures of voters in their respective party. In fact the head of the city ticket in the leading party calls for less than 100 petitioners.

Under the primary law it is necessary for three per cent. of the enrolled voters in the district represented by the office to be secured upon a petition to entitle the candidate to a place on the primary ticket.

Town officers will be nominated by caucus the same as in the good old days.

All petitions for a place on the primary ballot, containing the signatures of three per cent of the enrollment in the district represented, must be filed with the election board between Aug. 26 and Sept. 7. Primary day, when the candidate will be decided, falls on September 28.

SEE "LOLA" AT THE QUIRK MONDAY

"There is a Divinity that shapes our ends, rough hew them as we may." The truth of this saying is exemplified in the unfolding of the thrilling story of Lola." The story of "Lola" is one of the most remarkable that has ever been put on the screen and there is no doubt that on its release it will become a subject of widespread discussion and divergence of opinion. Was Lola really dead? Was her father justified in his scientific experiments? Was Lola to blame for the inexplicable change in her character or was she but the victim of some inscrutable fate? These are some of the questions that will be asked.

COUNTY JAIL PRISONER IS DECLARED INSANE

Frank J. Murphy, who was sent from this city to the county jail in April, charged with public intoxication, became insane Thursday and attacked two fellow prisoners. He had stolen a dull knife from the kitchen. This was found under his cell cot and it is assumed he planned suicide. A medical examination yesterday produced the opinion that Murphy had become insane.

Fresh Eggs, 21c per doz., at Keller & Wilson's. ad182

FEW CHANGES IN GAME LAWS

Fish and Game to Be Protected Much the Same As in 1914---A Summary Has Been Issued.

Careful comparison of the 1915 Fish and Game Laws of New York State with those of last season fails to reveal any important changes of interest to sportsmen of this section of the State. A summary of the laws, just issued by the State Conservation Commission, is a convenient document for reference.

One of the features of the pamphlet is the inclusion of four vivid red pages containing warnings against forest fires and admonishing hunters and others from starting camp fires, lighting matches or dropping cigarettes in inflammable undergrowth. The main facts of interest to this locality follow:

Wild deer having horns not less than three inches in length may be taken in wholly enclosed deer parks and in the Counties of Clinton, Essex, Franklin, Fulton, Hamilton, Herkimer, Jefferson, Lewis, Oneida, Oswego, Saratoga, St. Lawrence, Warren and Washington, except in that portion of Oneida, Lewis and Jefferson counties lying westerly of the Utica & Black River Railroad, from Utica to Ogdensburg, from October 1 to November 15, both inclusive.

Only two such deer can be legally taken by one person in an open season. Female deer and fawns must not be taken at any time. The use of dogs, artificial lights and salt licks in hunting deer is prohibited and a deer cannot be taken while in the water. Venison may be possessed from October 1 to November 20.

Ducks, geese and brant may be taken from September 16 to January 10; grouse or partridge from October 1, to November 30; woodcock from October 1 to November 15; shore birds, including snipe and plover, from September 16 to November 30; rails, American coots, mud hens and gallinules from September 16 to December 31; black, gray and fox squirrels from October 1 to November 15.

The trout season opens on the first Saturday in April and ends August 31; the bass season extends from June 16 to November 30; that for whitefish and lake trout from April 1 to September 30, and for muskalonge from June 16 to December 31.

MANY DELINQUENTS ON INCOME TAX LIST

While the internal revenue office in Syracuse does not mention names, the collector announces that there are 150 delinquent income taxpayers in this district. How many of these are located in Fulton the officials alone know, but those who are delinquent have no doubt by this time received notices to produce the tax within the next six or seven days.

In the event that they fail to comply with this notice, the department will commence at once to file liens against their property. The notices will also inform the delinquent enjoyers of taxable incomes as to the penalties which they will be compelled to pay for their procrastination.

The law subjects delinquents to penalties of interest and fines and makes it incumbent on the collector to file liens against property where the payments are not made. There is no dodging the income tax and those who have failed to liquidate will be compelled to pay by process of law if they otherwise fail.

TROLLEY TRACKS MOVED; TRAFFIC UNMOLESTED

The tracks of the Lakeshore and Northern R. R. Company were shifted last night from the old canal bridge at Oneida st. over the fill completed by the company on the canal bed south of the bridge. The change was completed in record time and traffic was uninterrupted. Work is progressing today on the removal of the canal bridge.

The great open space at the corner of Oneida and First sts. may be graced by an ornamental standard and fountain if plans under consideration by the Fulton Light, Heat & Power Co. and the railway company are carried out. It is said the lighting company is willing to divide the cost of the standard and fountain with the trolley company, and the pole will be used for the suspension of trolley wires and the electric light wires. The plans call for a flower bed at the base of the pole and the Chamber of Commerce may be asked to attend to that part of the improvement.

Chronicle of Events and a Forecast of What is Doing in Officialdom---Special Correspondence.

By Frederic T. Cardoze

Albany, July 17.—From all outward indications it would appear that the attempt to amend the Constitution of the State so as to provide for the incorporation of the New York Stock Exchange will end in failure.

During the session of the legislature of the present year and in previous years bills were introduced to bring about this result, but the measures were either defeated or died in committee. The best legal talent obtainable fought the contemplated change and many hearings and long debate attended their consideration.

It was during the administration of William Sulzer that the most ardent attempt was made to compel the New York Stock Exchange to take out articles of incorporation. Several measures were introduced at that time, one of which, though foreign to the subject itself yet related to financial matters, resulted to the trial and vindication of Senator Stephen J. Stillwell of the Bronx. Stillwell was subsequently given a court trial and found guilty.

Two proposed amendments to the Constitution having for their object stock market reform, were introduced by Delegate Israel T. Deyo, of Binghamton. One of the propositions provides that no contract respecting any securities or commodities where the parties thereto intend that such contract be closed upon the basis of thhe market quotations of prices for such securities or commodities, shall be authorized within the State.

The second proposition provides that no exchange, board of trade, or security market on which stocks, bonds or securities are bought or sold shall hereafter be permitted to do business in this State unless incorporated under its laws and the transactions and dealings of its members for themselves and others shall be subject to State regulation.

There does not appear to have been much of a hue and cry for the propositions as presented by Delegate Deyo. As in the case of the bill to abolish race track gambling, public sentiment, it would seem, is on the side of the operators of the market.

At the hearings upon the proposition it had its ardent advocates who raised the point that a man had a perfect right to invest his money in any manner he saw fit and that the Stock Exchange was a business organization where it was possible to make money and there was no law which required that a person must deal in stocks and bonds on a margin against his will.

As a prominent delegate to the Constitutional Convention points out, there are far more important subjects before the Convention that the question as to whether the Stock Exchange shall be incorporated. "If this Convention should go on favor of such a step," said he, "there is nothing to indicate that the people would ratify our action in that rerspect. There are too many of our citizens who are in market," he added dryly.

Viewing the situation as presented by the delegates at the present time, it looks as though radical reforms will not be advocated by them. This was apparent from the first and the conviction grows that nothing but vitally important amendments will be approved.

Samuel Untermeyer and John G. Milburn, two wiants of financial law, advocated and opposed the incorporation of the Stock Exhange at the Convention hearing, furnishing one of the most interesting debates of the session.

LAKE DISTRICT AUTO TOURS

New York State Motor Federation Issues List of Routes Accessible From Here.

Perhaps no geographical features of New York State are of greater interest to motor tourists especially those from distant parts of the country, than the several clear, sparkling bodies of water in the central-western sections widely known as the "Finger Lakes." While that term is ordinarily understood to mean principally Skaneateles, Owasco, Cayuga, Seneca and Canadaigua lakes, Itisco, Keuka, Honeoye, Candice, Hemlock Conesus and a number of smaller lakes belong to the same system, and are equally attractive, though smaller and less accessible from the main-traveled roads. All are located in the fine hill country extending from about Syracuse on the north and Binghamton on the south to the fine, long valley of the Genesee.

Either immediately above, or not far below them, passes and repasses someo f the heaviest road travel on the continent, between the Hudson river, Lake Erie and the central west. The great thoroughfare across the Empire State through Albany, Syracuse, Utica, Rochester and Buffalo touches or runs close by the northern edge of each. Skaneateles being the principal place through which Skaneateles Lake is reached from that direction, the chief approach to Owasco Lake being through Auburn, Cayuga Lake through Seneca Falls or Cayuga village, Seneca Lake through Geneva, and Canadaigua Lake thru Canadaigua. A short southward detour from the main line between Syracuse and Rochester at any of these places will soon bring the tourist alongside cool and usually heavily wooded lakes, which in midsummer are likely to be sprinkled with motor boats, sailboats and various smaller craft.

Road travel across the state along the "southern tier" will find the lake district almost equally accessible by excellent connecting highways up from Binghamton through Owego to either Ithaca on Cayuga Lake or Watkins Glen on Seneca Lake; also from Elmira through Horseheads and Montour Falls to both of these points. Keuka Lake, while a trifle off the main-traveled thoroughfares east and west, is easily reached by the route across from Watkins through Hammondsport to Bath or Hornell; or as round trip of medium length southwest from Geneva through Penn Yen. Honeoye, Candice, Hemlock and Conesus lakes are not quite as eccessible, being all but hidden in the deeper recesses of the semi-mountainous country farther west; but they can all be reached over mostly good roads, and their wilder beauty will appeal to leisurely motorists not averse to leaving the more beaten paths.

Tourists from Western New York, running to the central or eastern parts of the State, will often find it worth while to plan a short detour from the standard through routes in order to make a partial or even complete circuit of the "lake district." One of the most popular of these variations is to turn south from Penn Yan to Watkins, rounding the wonderfully picturesque southern edge of Seneca Lake and then crossing the hills to Ithaca, where the views of Cayuga Lake are fully equal to those at Watkins. From Ithaca there are excellent connecting routes northward into Syracuse and the Mohawk Valley, southward to Elmira, Owego and Binghamton, or nearly direct east to Cortland, Sherburne, Cooperstown and the Susquehanna Valley.

There is literally no end to the combination of fine trips that can be arranged in the "lake district" and the territory adjacent thereto; and with incidental exceptions good roads will be found throughout. The motorist who is also a fiesherman may safely anticipate many opportunities for his favorite sport in this region, especially among the several lakes that are farther from the larger places. All the main lines and principal connecting routes are given complete in Volume I, Automobile Blue Book, covering New York State and Canada; while assistance in laying out any trip to best advantage can be had from the headquarters of the New York State Motor Federation, Utica. N.Y. In addition to the scenic features of the route, there are numerous points of interest, among them the State Reservation at Watkins Glen, Cornell University at Ithaca and the Curtiss Aviation Grounds at Hammondsport.

BOY'S BODY NOT YET FOUND

Search Continues for Remains of Lad Whose Ignorance of Danger Cost Him His Life

Stanley Gbyswuki, aged nine years, son of Mr. and Mrs. Martin Gbyswuki, of West First street, fell into the Oswego river last night near the old coal dock on the west bank and was drowned. Stanley, with several companions, came to the river bank after supper to play, and seeing an old row boat tied to the bank near the coal dock, entered it and commenced jumping from seat to seat. He lost his balance and disappeared over the side. His companions were horror stricken and after watching him come up and sink again, ran to the Polish settlement and told some men standing there that Stanley was drowned.

A crowd collected instantly and several men dove repeatedly at the spot where the lad had gone down, in an attempt to recover the body. Two rowboats with drags assisted in the search and a crowd of 500 people watched from the river bank. No trace of the body was discovered last night, and search until noon today was fruitless. There is a strong current at that point upstream and men familiar with the river are now directing the search nearer the upper bridge.

HENRY JEWELL TO WED MRS. EMMA MILLS

Henry A. Jewell, a papermaker residing at 179 South First st. and Mrs. Emma Mills of the same address, took out a marriage license pesterday at the office of acting City Clerk George Washburn. This is the second matrimonial venture for both parties. Mrs. Mills was divorced in Laconia, N. H., in March, 1915, and Mr. Jewell's first wife obtained a decree of divorce from him in Plymouth, N. H., in 1906.

In the event of rain tomorrow afternoon at 5 o'clock, the regular union park services will be held indoors, in the Baptist church, where the sermon will be preached by the Rev. Mr. Olmstead.

Orwell Tuberculosis Hospital

All persons wishing to contribute toward the expense of equipment of a private room in the new pavilion of the Orwell Hospital, to be known as the Fulton Room, may give the same to any physician of Fulton or to H. Putnam Allen. A contribution to this fund no matter how small will help to relieve real suffering among most unfortunate people. adv179

STATE CENSUS SHOWS GAINS

More Than One and One-Quarter Million People Added, Says Secretary of State Hugo.

Albany, N. Y., July 17th.—A substantial increase in the population of New York State during the past five years will be shown by the preliminary tabulation of the census enumerators' reports, according to a statement issued today by Secretary of State, Francis M. Hugo. Mr. Hugo said that a conservative estimate places the advance in the vicinity of 1,135,000, or a total population of about 10,250,000 as compared with 9,113,614, when the Federal census was taken in 1910. This total may be considerably larger, but by no means will the 11,000,000 mark be reached. Final official figures cannot be expected, however, before September.

The present estimate is based in part on the increase shown by former census taking and by the personal count of the six thousand enumerators who completed their field work last month. These enumerators' reports are by no means final, for the slow process of verification is expected to result in numerous changes. Exceptional care is being taken in checking the work. It is expected, however, that the official figures will show that the increase from 1910 to 1915 has not been so marked as was the case from 1905 to 1910. One reason is the decrease in immigration; another, the industrial decline and general business depression during the last few years. The highest mark in immigration was reached in 1907, but since [illegible] been a considerable drop in population. The war resulted in a general reduction in immigration and this, of course, has had its effect onthe increase in population.

Returns will show nevertheless that there has been a good advance in the population in most of the cities, but whether these cities have grown to the detriment of the rural sections, or whether the population in the central and western part of the State has fallen, or numerous other interesting questions, will not be known for some time yet. Despite the fact that this census is one of the most difficult ever taken in New York State, there will be no delay in issuing the official publication which must be presented to the Legislature for its consideration when it convenes next January. As is generally known, the principal reason for taking the census is for the redistricting of the State.

JUDGE WILSON TO HAVE FUN ALL UNALLOYED

City Judge Herbert J. Wilson left this city at 5 o'clock this morning for Constable, Franklin county, his boyhood home. The Judge will return to thisc ity Monday night and the program for Saturday, Sunday and Monday is as follows: (according to the Judge) Fish, sleep, and fish. The Judge and his family will make the trip by automobile.

Children Cry FOR FLETCHER'S CASTORIA

IN MEMORY OF MRS. WARREN S. GARDNER

(Contributed)

At the Lee Memorial hospital in this city, on Monday, July 12, 1915, Velma Coles Gardner, wife of Warren S. Gardner, superintendent of schools for the Fifth Oswego county district, passed from her earthly life in the 37th year of her age.

On November 15th, 1878, Mrs. Gardner was born in the town of Granby, the daughter of Mr. and Mrs. George M. Coles, who survive her and now reside in Volney.

Of the sturdy American stock which appreciates the importance of education and secures it at any cost, Miss Coles sought the opportunities afforded by Fulton High school, from which she graduated with honor in the class of 1896; her popularity with her classmates being shown by the fact that she was chosen vice-president of her class.

Having taken the work of the teachers' training class and being as eager for service to others as she was ambitious to secure her education, she joined the devoted army of faithful women who year by year render noblest service for pitifully small financial reward, and for five years taught in the public schools of her native state, one of which was spent in Brewster, Putnam county. Faithful, painstaking and successful as a teacher as she had been diligent and industrious as a student, she was beloved of her pupils.

On June 1st, 1901, she was married to Warren S. Gardner, and spent fourteen happy years in the most exalted calling in which woman can serve, home-making, as a devoted and ideal wife and mother. Surviving her, besides her husband, father and mother are three sisters, Mrs. Alonzo Clark, of Fulton; Mrs. William Gilbert, of Volney; Mrs. Clarence E. Snyder, of Palermo; one brother, George J. Coles, of Volney and five children, Gladys E., Beatrice G., Stanley N., Elliott and Robert. To all these the sympathy of the community goes out in fullest manner.

Her funeral was held from her late home, 13 N. Seventh st., July 15th, burial being made in Mount Adnah.

Naturally of diffident and retiring disposition, but exceedingly sweet spirited, Mrs. Gardner promptly made friends of all who came to know her. About five years ince the family removed from Minetto to Fulton, in order that Mrs. Gardner might be near the home of her parents. Almost continually since, Mrs. Gardner has been a sufferer from her heart difficulty which resulted in her death.

The courage and fortitude with which she bore illness and suffering, realizing what must be its inevitable end, was the highest testimony to the nobility of her character and proof to all who knew her that in her experience as a Christian woman she found answer to the prayer:

"Tell me Thy secret; help me bear
The strain of toil, the fret of care."

ROMANCE OF A STREET CAR MISHAP

Careless Man Makes Amends For Thoughtlessness.

Miss Anderson was very romantic. She could make a love story out of any case where there was marriage or failure to marry. One day Mr. and Mrs. Buddington called, and as they passed out Miss Cartright came in.

"What a singular looking couple," remarked Miss Cartright.

"Do you think so? Poor things, they can't help it. That disfigurement is connected with their courtship. Sit down; I'll tell you about it."

Miss Cartright seated herself on a divan and Miss Anderson proceeded.

"Mrs. Buddington was not her husband's first love. That's where the romance comes in.

"But first I must tell you that Mr. Buddington was engaged to Miss Martin. It was one of those cases where a good, noble man, when he is too young to know his mind, falls in love with a pretty face and afterward meets one for whom he conceives a grand passion.

"Well, one day Mr. Buddington was in a trolley car. Mr. Buddington carried a silk umbrella. He didn't carry it as a lady would, by the handle, the point lowered, but just like a man, under his arm and at an angle. He was holding to a strap, with his back to the front of the car, when it came to a sudden stop. Mr. Buddington was thrown violently backward. There was a shriek directly behind him, and, turning, he saw a beautiful girl, with her nose bleeding profusely. His umbrella point had rammed it.

"Mr. Buddington apologized as best he could and, as the bleeding continued, suggested that the girl get out at a corner drug store. She consented, and at the next corner Mr. Buddington pulled the bell rope, the car stopped, and the two got out, attended by a sympathetic married lady."

"It wouldn't have been proper for them to go without a chaperon," put in Miss Cartright. "How nicely it all comes about!"

"Very. The drug clerk telephoned for a doctor, who came and bound up Miss Palmer's nose. That was her name. Then Mr. Buddington insisted on calling a carriage, and the three were driven to Miss Palmer's home.

"The next day Mr. Buddington called at Miss Palmer's house to ask how she was doing. Miss Palmer's mother came down into the drawing room and assured Mr. Buddington that her daughter was doing very well, but her nose was bandaged and a bag of ice tied to the end of it to prevent a recurrence of the bleeding. This of course prevented Miss Palmer from coming down."

"I wouldn't have gone down for a fortune," said Miss Cartright.

"Mr. Buddington called often, but Mrs. Palmer always came down in her stead, making excuses why Miss Palmer did not come down herself. Mr. Buddington could not surmise what it meant. He was dreadfully worried. Finally, at one of his visits, Miss Palmer came down to see him, and what do you suppose?"

"What?"

"Her nose had been broken."

"How awful!"

"Mr. Buddington felt that he was to blame for the broken nose and was so sweet about it that he quite captivated the poor girl. He called frequently, always asking her 'What I can do to repair the damage?' You see her beauty was spoiled, and unfortunately her face was her fortune. He couldn't do anything to repair the damage; only a doctor could do that, and there was some reason why they didn't want to perform an operation in her case. I don't know what, so there was nothing that Mr. Buddington could do in the matter except"—

"To marry her."

"How did you know it was coming out that way?"

"I'm very good at seeing through impenetrable plots."

"But Mr. Buddington was engaged to Miss Martin. He passed many a day and night's anguish, often lying awake for hours struggling with himself like the good, noble man he was, thinking himself bound in honor to both girls, though he now knew he loved"—

"The girl with the"—

"Miss Palmer."

"What did he do?"

"Why, at last he decided that Miss Martin, not being disfigured, did not need him, and he wrote her a good kind note, telling her that he thought honor required him to marry Miss Palmer."

"What a high minded way to put it!" suggested Miss Cartright. "And what was her reply? Did she generously release him?"

"Why, no; she showed his note to her brother, who went to Mr. Buddington's office, and before he knew what the fellow was going to do Martin struck him in the face and"—

"What?"

"Broke his nose."

"The brute!"

"Mr. Buddington felt released after this."

"I should think so."

"So he went to Miss Palmer and proposed to her. And here's where a new complication comes in. He found that Miss Palmer was engaged to a man she didn't love. But since Mr. Buddington's nose had been broken in her behalf she broke her engagement with the other man and married Mr. Buddington."

SIRES AND SONS.

Elias Greenbaum, Chicago, is active at ninety-three as a banker.

Professor A. G. Bell says he never has held more than one share of telephone stock.

Professor Jeremiah Smith of Boston is the son of a soldier of the American Revolution.

Senor Don Manuel Vicente Ballivian, commissioner general of Bolivia to the Panama-Pacific International exposition, one of the foremost citizens of his country, is regarded as an authority on all subjects relating to Bolivia, whether historical, political, commercial or social.

Sir Henry Bradwardine Jackson, England's first sea lord of the admiralty, has been chief of the British war staff since 1912 and has been in the navy since he was thirteen years old. He is now sixty. He is an expert on the construction and equipment of warships.

Hiram Dryer McCaskey, the newly appointed head of the federal division of mineral resources, brings to his new position experience not only as a geologist of the geological survey since 1907 and section chief since 1912, but also as a mining engineer in the Philippine mining bureau from 1900 to 1903 and as chief of that bureau from 1903 to 1906.

Pert Personals.

Major General Goethals has a right to retire, of course, but he's one of the kind that everybody hates to see do it.—Indianapolis News.

Now that George Bernard Shaw has begun to attack Lord Northcliffe, the latter is likely to regain his lost popularity with the British people.—Albany Knickerbocker Press.

If Bernhardt should fail to make a howling success on the stage with one wooden leg when she comes to the United States in September she might try two.—Pittsburgh Dispatch.

The joke seems to be on Mr. O'Shaughnessy, who, in order to be given a relief from the turmoil of the city of Mexico, was withdrawn by the government last spring and sent to Europe.—Kansas City Star.

The Writers.

Elizabeth Dejeans, the author, lives in an apartment overlooking Gramercy park, New York city, but is listed properly among California's authors.

It is said that the last name of Oliver Onions, the writer, should be pronounced Onyons, to rime with Lyons, and not like the name of the vegetable.

The dynamic energy of Baron von Wolzogen, the German novelist, is evidenced by his present service in the German army, though he is sixty years old.

Charles Dickens' writing was very minute, and his habit of writing with blue ink upon blue paper with frequent interlineations and cross lines made his copy a burden alike to compositor and proofreader.

Flippant Flings.

The Rockefellers are now producing prize roses. The by products of petroleum grow more and more marvelous. —New York Sun.

Americans may be short of materials for the dyers, but when it comes to the bleachers, there is where we are strong.—Chicago News.

Gentlemen in official life have to learn to be patient with a popular tendency to refer to any long trip for hard work in hot weather as a "junket."—Washington Star.

John Barrett advises girls to flirt. The next thing we hear the director-general of the Pan-American union will be advising birds to fly and fish to swim.—Norfolk Virginian-Pilot.

SHORT AND SHARP.

It doesn't pay to own things you owe for.

Peace also hath her bitter battles no less than war.

Wise men unravel tangles that unwise folk weave.

There are more true heroines in kitchens than in fiction.

Even the brightest people don't always set the world on fire.

What a man believes of others is an index to what he knows about himself.

Words resemble sunbeams—the more they are condensed the deeper they burn.

Any one who has a sense of humor can get along pretty well with a pessimist.

One drawback to the powers of psychology is that it explains everything after it happens.

The use of wooden sandals in Mexico is said to be growing. Wooden heads, more likely.

Elocution may be a good thing, but it doesn't go far enough. It merely teaches us how to speak, not when.

If the belligerents fight themselves to the point of exhaustion the folly of war will be effectively demonstrated.

Switzerland also protests against the war's being allowed to disturb business. It needs the money just as badly as we do, and maybe worse.

A Big Settlement

By EDITH V. ROSS

"You say, my boy, that this young lady to whom you have engaged yourself is a saint. Very well, you will know more about her saintly qualities in future. However, that is your affair, not mine. I desire to give you every opportunity in my power to avoid the calling forth of those traits which may lie dormant in your angel. For this purpose I will settle on you an amount equal to the young lady's property."

"Her aunt has told her that she will give her what I shall receive."

"I think it better that this aunt and I should confer on the matter. Give me her name and address, and I will call upon her."

The young man wrote a name and address on a card and handed it to his uncle. The name was a common one, and after glancing at it the older man put the card in his portemonnaie. His nephew hurried away to post his fiancee on what was about to happen.

"I fear," he said, "when my uncle meets your aunt they will get to quarreling and there will be no settlements. He is as fierce a woman hater as your aunt is a man hater."

"Aunt Helen is not a man hater. She considers herself to have been badly treated on one occasion by a man, but she does not condemn the whole sex."

"Well, let us hope for the best. Uncle will call upon her this evening. Do what you can to put her in a good humor, and warn her that she is to meet a man who needs skillful handling. A great deal for us depends upon the meeting."

At 8 o'clock the same evening Mr. Edward Cutler rang the bell at the residence of Miss Emily Brown and was admitted to a drawing room, where he amused himself looking at the pictures on the wall while he waited. A portrait of a girl of twenty caused him to start. At the same moment Miss Brown entered the room. The two stood looking at each other in astonishment.

"Edward Cutler!"

"Emily Brown!"

"Are you William Gifford's uncle?"

"Yes. Are you Ethel Wheeler's aunt?"

"I am."

There was an awkward pause which was broken by Mr. Cutler.

"We meet for a purpose of great importance to two young persons. It seems that they are about to make fools of themselves as we did eighteen years ago. Let us not stand in their way, but help them on. You and I found each other out before being tied up together. Perhaps they will not have such good luck."

"There was nothing in me for you to find out. I have never been any worse or better than I have appeared."

"Then why did you turn me down a week before we were to have been wedded, and that, too, without giving me a reason?"

"And why did you take your dismissal so coolly? It was plain to me that the story I heard about you and Winifred Baldwin was true. You seemed happy in your release."

"Winifred Baldwin was nothing to me and, as for being happy at my release, you wouldn't have had me whimper, would you?" His eyes turned from the lady to the portrait. "You are not so much changed as I would have expected," he added. "To look at that innocent young face one would not suppose its owner would have"— He checked himself.

"Recriminations after so many years will not mend matters. Let us proceed to business. I understand that you will settle on your nephew an amount equal to what I give my niece."

"I will."

"Very well; I have fixed upon $25,000. If you give the same they will have $50,000. This invested at 5 per cent interest will give them $2,500, which, with William's salary, will make $5,000 a year."

"Quite enough to keep the wolf from the door."

Meanwhile Mr. Gifford had come in, and he and his fiancee were listening at the door. When they heard these words they embraced and, taking no further interest in the interview, went to another room, where time flew so rapidly they did not realize that more than an hour had passed before the two elder persons, leaving the council chamber, entered the room where the young couple were. Instead of wearing the appearance of having quarreled they seemed to be radiantly happy. Mr. Cutler called upon Miss Brown to state to the young couple what had been agreed upon for their comfort, and Miss Brown signified that she would prefer Mr. Cutler should make the announcement. After an "Ahem!" the gentleman proceeded:

"The aggregate settlements will be $250,000. Miss Brown has consented to give $100,000, and I, preferring to lead in the matter, will give $150,000."

The young lovers looked at each other in amazement at this increase over what had been expected.

"There is another matter it becomes my pleasure to speak of. Miss Brown and I when we were about your respective ages became engaged. Through my fault"—

"I beg pardon," interrupted Miss Brown, "through my fault."

"Anyway, I made a fool of myself and threw away eighteen years of happiness. We have decided to make up for what we have lost and are to be married on the same day that you two are tied."

For the Children

Wild Lamb Which Looks Like Its Tame Relatives.

Nearly every child has seen at one time or another the gentle little lamb which frolics so gayly in the pasture with its mother. But here is a wild lamb that was captured in the mountains of Spain and which is said by scientists to be a member of the family from which our domestic sheep are descended. A beautiful and innocent little creature it is and differs slightly from the playful little fellows we all know so well. This lambkin is said to be of the Musmon family, which had its origin, so far as known, in southern Europe. Whether this is true or not, the fact remains that any person who had ever seen a lamb would at once pronounce this little animal to be a baby sheep. He doesn't look so very wild either. When wild animals are treated kindly they soon become tame and love those who are gentle with them.

Reconciliations.

You know there are many things always mentioned together, such as "Jack and Gill," "The Lion and the Lamb," "Stars and Stripes," and so on. A pleasant little game has been based on this and plays itself quite comfortably in a quarter of an hour. Assuming that twenty guests are expected to be present, the hostess prepares twenty sheets of paper, on which the first half of such couplings are written, the guests being required to complete them and so effect a reconciliation.

The following list of twenty will illustrate the game, the last part of each sentence appearing only on the key, which the hostess will keep until the competition is closed to correct papers. A prize may be given the one having the most correct sentences:

1. Early to bed and	early to rise.
2. Beauty and	the beast.
3. Man and	wife.
4. The lion and	the unicorn.
5. Oxford and	Cambridge.
6. Darby and	Joan.
7. Roast pork and	apple sauce.
8. Go farther and	fare worse.
9. Hook and	eye.
10. Jack and	the beanstalk.
11. Antony and	Cleopatra.
12. Bruce and	the spider.
13. David and	Jonathan.
14. The horse and	his rider.
15. Romeo and	Juliet.
16. Bat and	ball.
17. Hand and	glove.
18. Stars and	stripes.
19. Bread and	butter.
20. Pen and	ink.

Japanese Children.

Children have a good time in Japan. They are blessed by inheritance with a cheerful nature; they are dressed loosely, yet warmly; they are out of doors as much as possible, and inside their homes there is so little furniture they never stumble over it and are never warned against crawling up on the satin brocaded chairs or handling the bric-a-brac. The houses are always open to sun and air, even in cold weather. They are built dovetailed together, no nails being used, and are mounted on wooden pillars, so that when an earthquake occurs they will not tumble down, but merely shake and settle down again.

Hidden Trees.

One day we all started for the —. Bobby held the car fare in his —, and he looked so happy that we all thought that he and Mabel were a pretty —. Grandma shook like an —, but after the car started she did not care a —.

We sat under the old drooping —, and we had — pie for luncheon. I — for the sea, and the sight of the broad — brought the tears to my eyes.

Answers.—Beech, Palm, Pear, Aspen, Fig, Willow, Apple, Pine, Bay.

A Riddle.

The cause that first brought grief and death in the world,
And Adam and Eve from their paradise hurl'd,
Transposed will reveal you a dress of the fair
Which to hide while it heightens their beauty they wear.
Reverse it again, and you will soon find
A name known to us from time out of mind.

Answer.—Evil, veil, Levi.

Squeaky New Shoes.

No matter how I tippy toe,
No matter where I try to go,
My brand new shoes keep squeaking so—
You sneaky, squeaky, creaky shoe!
I really don't know what to do
With such a naughty thing as you!
You squeaky shoe!

You squeak like tiny little mice
Who've nibbled at the cheese and rice;
Now, tell me, shoes, is this thing nice?
You sneaky, squeaky, creaky shoe!
I really don't know what to do
With such a naughty thing as you!
You squeaky shoe!

You squeak like squirrels in a tree,
You squeak at mother, then at me;
Now what can all this trouble be?
You sneaky, squeaky, creaky shoe!
I really don't know what to do
With such a naughty thing as you!
You squeaky shoe!
—Cincinnati Commercial-Tribune.

COUNSEL AND CLIENT.

A Lawyer's Right to Defend a Prisoner He Knows to Be Guilty.

Ought an advocate to defend a prisoner whom he believes to be guilty? Mr. Justice Darling in a case in which a solicitor was the plaintiff made some observations on this familiar problem which ought not to go unrecorded. He protested, says the London Globe, against the notion that a lawyer, whether barrister or solicitor, was under an obligation to cease to conduct a case which he realizes to be bad.

"If an advocate in the course of a trial for murder comes to recognize that his client is guilty is he," asked the learned judge, "to say to the court, 'Hang my client?'" Judges have seldom asked about the ethics of advocacy in open court. It was, however, in a considered judgment in the court of exchequer that Baron Bramwell made his famous contribution to the discussion.

"A man's rights," said the baron, "are to be determined by the court, not by his advocate or counsel. It is for want of remembering this that foolish people object to lawyers that they will advocate a case against their own opinions. A client is entitled to say to his counsel: 'I want your advocacy, not your judgment. I prefer that of the court.'" Mr. Justice Darling, in the jargon of the courts, concurs.

Laymen have usually been readier than lawyers to discuss the ethics of advocacy. "What do you think of supporting a cause you know to be bad?" Everybody knows Dr. Johnson's reply when Boswell asked him this question. "Sir, you do not know it to be good or bad till the judge determines it."

Less generally known is Sydney Smith's contribution to the discussion. "Justice is found experimentally to be most effectually promoted by the opposite efforts of practiced and ingenious men presenting to the selection of an impartial judge the best arguments for the establishment or explanation of truth. It becomes, then, under such an arrangement the decided duty of an advocate to use all the arguments in his power to defend the cause he has adopted and to leave the effects of those arguments to the judgment of others." This was said in an assize sermon the famous wit preached at York in 1824.

DARING BELLE BOYD.

Brilliant and Romantic Career of the Famous War Spy.

Stonewall Jackson's valley campaign was one of the great deeds of history. Not since Napoleon's time have men been so dazzled as they were by that great exploit of his. Yet Stonewall might have gone down the valley in defeat had it not been for a little college girl named Belle Boyd.

The Union general, Shields, was quartered at Miss Boyd's house. He held a council of war there. Miss Boyd bored a hole in the floor of her chamber, which was over Shields' room, and lay there with her ear to it throughout the night. The next morning Stonewall Jackson was in full possession of the plans for a great battle and was able to defeat the Union army.

She kept up her valiant work for the Confederates until the Union officers began to suspect her, and Jackson ordered her to move from her Shenandoah home to Winchester. She had been arrested by the federals and had flirted her way to liberty, for she was a pretty girl despite the libelous photographs of her. In Winchester Jackson conferred upon her a commission as captain in the Confederate army. By this time the whole north had become aware of the services she was rendering the Confederacy, and every officer and private was on the alert to get her. Yet she escaped until 1864, when she was caught on a blockade runner. Her captor lost his heart to her, deserted the navy and married her, and the Prince of Wales, afterward Edward VII., attended the wedding.—New York Times.

Encouragement.

He was very bashful, but she liked him and was willing to encourage him, and she saw her opportunity when he said:

"That's a beautiful dog you have there, Miss Ethel. Is he affectionate?"

"Is he?" she answered archly. "Here, Bruno! Here, good dog! Come and show Charlie Smith how to kiss me."—Exchange.

Not as She Thought.

Fond Mother—Our Johnny is a great favorite with his teacher. Sympathetic Friend—Is that so? Fond Mother—Yes, indeed. Why, only the other day she told Johnny if there were another boy like him in the class she would feel entitled to demand an increase in salary.—Richmond Times-Dispatch.

Explained.

"This isn't my suit," said Hawkins to the pawnbroker. "This is a half dozen sizes smaller than mine."

"You are mistaken," replied the pawnbroker. "This is your suit, but it has been in soak so long that it has shrunk."

A Dark Hour Friend.

Jimson—Oh, yes; I knew old Simson. He was a good sort. He did a very kind action once for me when the clouds were dark and threatening and the world looked so black. Pimson—What did he do? Jimson—He lent me an umbrella.—Boston Globe.

Safety First at Sea.

In nautical parlance the phrase "The three L's" means "lead, latitude and lookout," these being the chief three things to be considered in keeping a ship from running aground.

LIVING ROOM OF MUCH BEAUTY.

Design 1060, by Glenn L. Saxton, Architect, Minneapolis, Minn.

PERSPECTIVE VIEW—FROM A PHOTOGRAPH.

INTERIOR VIEW—LIVING ROOM.

Note in this design the artistic living room, extending across the entire front of the house, with abundance of wall space left for the piano and other large furniture. Special attention is called to the beamed ceiling, only cross beams being used. There is a splendid large fireplace at the end of the room, with built in bookcases at each side and art windows above, affording light and giving a general decorative effect. A large window on the long side furnishes all necessary additional light. This beautiful room corresponds with the artistic exterior of this fine home, which is 26 feet by 28 feet deep over the main part. Cost to build, exclusive of heating and plumbing, $3,200.

Upon receipt of $1 the publisher of this paper will furnish a copy of Saxton's book of plans, "American Dwellings." It contains 310 designs costing from $1,000 to $6,000; also book of interiors, $1 per copy.

REDINGOTE COAT.

The Garment of Louis Philippe's Reign Is Again Revived.

ADVANCED AUTUMN MODEL.

Coat of covert in redingote fashion, with deep plaits to give additional fullness. These plaits are not stitched, but held in place at the waist line by a snugly fitting belt of the material. The deep cuffs are trimmed with a row of tan bone buttons and over the flaring collar is worn a separate collar of white linen.

TIN NOVELTIES.

Articles Which Contribute a Gay Note in Outdoor Life.

Among the decided tin novelties which some ingenious brain has evolved is the door knocker into which the guest's name or card may be slipped and save confusion in a house of many visitors. And now that the door-stop [illegible] are being decorated in gay flowers for the purpose of holding back doors when strong breezes blow.

A charming idea is that of the painted tin cluster of flowers forming the old time curtain knob or rosette, as it was called. These are only effective on a plain curtain and not on flowered drapery.

Sure to be popular is a practical ornamental painted tin pail in which ice can be packed about any bottled drinks and be carried out to the tennis courts or for a garden tea. Popular, too, are the long tin horns which are meant to summon guests at the tea hour for the meals. The convenient tin newspaper rack will no doubt figure conspicuously on the up to date veranda.

The bird houses of the painted tin, if they are put up in a more or less sheltered place, promise to be a decorative note of color on the lawn. Painted tin has also been introduced into garden novelties. Watering pots of different sizes for my lady who does the sprinkling of her choice blossoms cannot but appeal to the fair gardener. The garden sticks come both in the painted tin and wood, as do the weather vanes.

The Ethics of Borrowing.

Some time since a little girl who lived in a rural community appeared at the back door of a neighbor's house with a small basket in her hand. "Mrs. Smith," said she, as the neighbor answered her timid knock, "mother wants to know if you won't please lend her a dozen eggs. She wants to put them under a hen."

"Put them under a hen?" was the wondering rejoinder of the neighbor. "I didn't know that you had a hen!"

"We haven't," was the frank rejoinder of the little girl. "We are going to borrow the hen from Mrs. Brown."—Christian Endeavor World.

To Clean Bronze.

Dip the bronze object into boiling water and rub with a flannel cloth dipped in soapsuds made from yellow soap. Dry with a soft cloth and then polish off with a chamois.

Washington's Last Illness.

George Washington probably died of diphtheria instead of acute laryngitis, as is commonly believed, according to an article by Dr. H. B. Hemenway in the Evanston Medical News. Dr. Hemenway outlined briefly the means used to cure ills in Washington's time.

"It is probable that Washington's life was cut short more by excess of treatment than by disease," the article reads. "It is sometimes said that he died of acute laryngitis, but we believe that it is now generally agreed his disease was diphtheria."

BEDOUIN WOMEN.

They Know Little or Nothing of the World Beyond Arabia.

Time seemed to turn back twenty centuries when I stepped off the Tigris river steamer at Bagdad. Old Testament men in turbans, sandals and quaint flowing robes ("abbas") crowded about, calling each other "Yusif" and "Musa"—Joseph and Moses. From the river's edge veiled women walked away, gracefully upright, carrying on their shoulders tall jars of water—the same style of jars no doubt that held the water when it turned to wine. Sheep are slain to seal a vow, and the blood covenant is common.

With their own shapely hands Arab women still wash the feet of honored guests; upon their own heads they heap handfuls of dust when they mourn for their dead children, and should a Bedouin woman sin her brother may cut her throat, and the tribe will applaud his awful act of righteous wrath.

Arab women live, love, slave and die knowing little of their Christian sisters in the western world.

Few Arab women I met had ever even heard of America. One or two, whose husbands sold wool and dates to Bagdad traders, knew there was such a place as "Amerique," but they believed it merely a part of that far away land called London, whence came their bright calico and the cheap guns used by the sheiks in tribal wars. Even the men can tell the women little of the world beyond the desert's rim.

For all the average Arab woman knows of America, she might as well live on Mars. My serving maid, Nejibah (the star), asked me if I came to Bagdad from Amerique by railway train. Once on this ancient plain, however, lived wise women—the consorts of kings—whose names and fame come down to us through the centuries.—National Geographic Magazine.

CALL OF THE SEA.

Land Is Existence, but the Oceans Are Life and Civilization.

From the dawn of time, humanity has dreamed of the sea. Land is existence, but water is life. The open sea is the open mind. The oceans are civilization.

Watch the movements of the progressive races. It is from land to water, from water to wider water. First there are the rivers, like the Euphrates and the Nile, and the civilizations upon their banks are vastly superior to the civilizations of the interiors. But once the seas are discovered and mastered the civilizations of the rivers sink into second place, and nations like Greece and Rome wake into life. Then the oceans. And once the oceans are conquered, you have France and Germany and England.

Suppose back there in the long ago a naked sword had been laid across the mouths of the Euphrates and the Nile. And suppose humanity, having discovered an overland route to the southern peninsulas of Europe, had found barring their further march another sword across the strait of Gibraltar. And suppose that thereafter all overland routes to the ocean had been blocked, say, with long lines of cannon. If the democracy of Greece never arose on the Euphrates and the strong type of the independent Roman never developed on the Nile, or if, in the second case, that sane, stable constitutional government that is the pride of England never bloomed in Greece and the splendid educational system that is the pride of Germany never flourished in Rome, upon which lands would the blame lie—upon those on the inside or upon those on the outside, upon those that found the sword across their path or upon those that laid it there?—From "The World Storm—and Beyond," by Edwin Davies Schoonmaker.

Her Thoughtfulness.

"George, dear," said Mrs. Dovekins, who had come downstairs in time to pour the coffee. "I'm going to walk to the car with you this morning. Aren't you glad?"

"Very glad, indeed, lovey. It's so nice of you to think of me and get up early for the purpose of making it unnecessary to walk those dismal three blocks alone. How much do you want?"—Exchange.

Dr. Johnson's Homeliness.

Samuel Johnson was himself—and this is a quality rarely found in "plain" men—under no illusion as to his personal appearance. Dr. Burney tells us that on one occasion while Miss Burney was examining his portrait he peeped over her shoulder and, with a ludicrous half laugh, exclaimed: "Ah, ha, Sam Johnson! I see thee—and an ugly dog thou art!"—London Times.

Mechanical Riddles.

Engineers say that among the things that will never be settled are the following: Whether a long screwdriver is better than a short one of the same family; whether water wheels run faster at night than they do in the daytime; the best way to harden steel; which side of the belt should run next the pulley, and the right way to lace belts.—London Express.

Mistake Somewhere.

Servant (answering bell)—My master isn't in, sir. You may leave the bill if you wish. Caller (in surprise)—Bill? I have no bill. I wish to— Servant (in surprise also)—No bill? Then you must have called at the wrong house.—Pittsburgh Press.

All For Him.

Mudge—Your wife certainly has a will of her own. Mosh—Yes, and I am the sole beneficiary.—Boston Transcript.

Care of the Baby In Summer

(Prepared by the children's bureau, United States department of labor.)

Food For the "Runabout" Baby.

For the first nine months or more of a baby's life, when he is growing at a very rapid rate, nature has provided a perfect food in mother's milk. With such babies a healthy development usually goes steadily forward with little trouble. But after being weaned all too many babies seem to suffer from a setback, while accommodating themselves to digest a new food.

A list of the foods suitable to this period of the baby's life is given in greater detail in a bulletin called "Infant Care," published by the children's bureau of the department of labor, Washington. This publication is sent free to all who care to ask for it, sending their name and address to the bureau.

The average healthy baby of one year of age should be taking five meals a day at four hour intervals. At this period he should have about one quart of milk daily. In addition, he may have well cooked cereal twice a day, squeezed beef juice or broth once a day, some fruit juice once or twice a day, unless the bowels are loose, and dry bread or toast to chew.

As the baby grows and thrives various things may be added to his diet. The following are sample meals for a day for a healthy child from eighteen months to two years old (an ounce is two tablespoonfuls):

7 a. m.—Milk, 8 to 10 ounces, piece of zwieback, toast or dried bread.

9 a. m.—Orange juice, 2 ounces.

10 a. m.—Cereal, 2 tablespoonfuls; cupful of milk, toast or dry bread.

2 p. m.—Broth, 6 ounces; meat, 1 tablespoonful; vegetable (spinach), 1 tablespoonful; stale bread, 1 piece; baked apple, 1 tablespoonful.

6 p. m.—Cereal, 1½ tablespoonfuls; milk, 6 to 8 ounces; toast or bread.

10 p. m.—Milk, 8 ounces in cup. (May be omitted).

The following rules for cooking and preparing certain of these articles may be helpful to mothers:

Toast.—Bread one day old, cut in very thin slices; slices placed on edge in a toast rack in an oven to dry. Leave oven door partly open.

Broth.—Of round steak, one pound; of water, one pint. Put the meat on in cold water and allow it to come to a boil; then lower the flame so that it barely simmers for three or four hours. Remove the meat and add enough water to make up the original amount of liquid; strain through a wire sieve and set aside to cool. When cold the fat is removed in a solid piece, leaving a clear liquid or jelly. Heat a small portion when it is time to feed the baby. Keep the jelly covered and on ice.

Meat. — One tablespoonful. Take meat, round or sirloin steak, scraped with a silver spoon. When you have the desired amount shape into a pat and broil on a hot, dry spider. When done add a little salt. Or a piece of rare round or sirloin steak, the outer part having been cut away, is scraped or shredded with a knife.

Spinach.—Cook spinach in salted water until tender. Pour cold water over it and drain. Then rub through a fine sieve.

Baked Apple. — Apple baked three-quarters of an hour; skin and core removed; two tablespoonfuls of pulp strained through a fine sieve.

Cereal (flour preparations). — Cereal preparation three-quarters of a cupful cooked with one quart of water for three-quarters of an hour in a double boiler. Add enough water to keep moist.

Oatmeal.—Have a pint of water boiling in the top of the double boiler; add one-half teaspoonful of salt and drop in gradually one-half cupful of oatmeal flakes, stirring all the while. Cook for three hours and strain through a wire sieve. Pour on it one or two ounces of milk.

The following are some of the things a baby should not have: Candy, cakes, doughnuts, pastry, fresh bread, griddle cakes, sirup or molasses, pork or tough meat of any kind, bananas, overripe fruits, pickles, tea, coffee, soda water or beer nor tastes of foods from the family table.

CHILDREN'S TEETH.

Take Them to a Dentist Regularly and Insist Upon Use of Toothbrush.

It is most important to get young children into the habit of regularly cleaning their teeth. This should be done after every meal, but sometimes that is not possible. At least the children should scrub the teeth as a matter of routine after breakfast and the last thing at night.

Dentists are advising that the gums as well as the teeth should be scrubbed carefully. First, because it is just at the place where the gum and teeth meet that decay begins and, second, because friction of the gum brings a good supply of the blood to the part, and that, of course, nourishes the teeth and preserves them. Any simple tooth powder can be used, and after scrubbing the children should rinse the mouth out with clean cold water.

The mother should remember how important it is to preserve the first teeth. Any spot of decay should be stopped immediately. The wise mother takes her children regularly to the dentist, perhaps once in six months, to have the teeth inspected. This is a real economy in the end.

Remington Arms Men in Bridgeport Factories Decide to Strike Now

With reports still insistent that German propagandists are secretly bringing about the agitation for the purpose of preventing the manufacture of ammunition for the Allies, a strike of practically all the operatives of the Remington arms and cartridge factories was decided on last night.

Unless the Remington officials grant the demands of the machinists' union within two or three days, the machinists, tool workers, and die sinkers—all indispensable in the manufacture of guns, bayonet,s cartridge and shells—will walk out. Such a move, it is asserted, means practically a complete tie-up of the big factories and serious interference with contracts for millions of dollarrs' worth of war materials, not alone for European Powers, but for the United States as well.

There is just a possibility that the final step will be averted. The labor leaders say rather grudingly that if the company makes part of the concessions asked and reinstates the millwrights, who, only one hundred in number, are the nominal cause of the entire trouble, there will be no walkout. But from the tone and temper of the meeting of the machinists and metal workers tonight it appeared that the labor men are determined to "go to the mat" on their alleged grievances and force the Union Metallic Cartridge Company and the Remington concern to recognize the unions and make other concessions which, at the present moment at least, the manufacturers have no intention of making.

The machinists and their allied trades will ask:—That the unions be recognized as unions; that there will be an assurance of no discrimination against union men; that the men have an eight hour day a nda guarantee that that arrangement will continue for a specified time, and that there be a minimum wage which will not be lower than the rate paid at the present time. here are to be other demands, but those mentioned are the principal ones.

Scene from "Alias Jimmy Valentine" at The Quirk today.

RETURN FROM TRIP THROUGH NEW ENGLAND

Dr. H. M. Doane and Miss Marion Dickerman have returned from an extended motor trip which took them through the beauty spots of the New England states.

The trip which was of 20 days duration, led out through the Adirondacks, over Vermont and New Hampshire, through the picturesque Berkshires, then into the heart of Maine where a couple of days were spent. The return was made along the coast, across Massachusetts and back into New York.

While in the Berkshires Dr. Doane and Miss Diukerman were guests of Miss Nancy Cook, who is with a colony of artists at Monterey.

The trip covered 1500 miles.

Fulton Keynotes

Miss Hazel Bidwell of Emery st., has gone to Geneva, where she will be the guest of her sister, Mrs. B. C. Higgins, for a month.

* * *

Rev. Charles Olmstead will speak at the union services in the park tomorrow afternoon. The topic of his talk will be "Distinguishing Marks of Christian People."

* * *

"Lola" will be seen at The Quirk next Monday.

* * *

Mr. and Mrs. E. A. Putnam are enjoying their comfortable cottage at Fair Haven.

* * *

Ex-Sheriff and Mrs. Myron A. Stranahan have been entertaining at their South 3d st. home, Miss Marcia Town of Baldwinsville.

* * *

Officer Fox began his ten days' vacation yesterday.

* * *

Miss Laura Shufelt of Oswego has returned home after spending a few days with relative and friends in this city.

WIFE STOLE HIS EGGS TO HELP HATED RIVAL

Topeka, Kan., July 17.—Henry Cauder is suing for a divorce after six months of married life. He says that the meanness of his wife is something scandalous.

In his petition Cauder allges that he has been a farmer, and "requested the defendant to make garden and raise chickens, or to assist him in the matter, but she refused and went to the neighbor's, Bert Rice's, and there made garden for the said Bert Rice and set his hens and stole the eggs from under the plaintiff's hens and removed them to the said Bert Rice's hens for the use and benefit of the said Rice."

HONDURAS CATTLE AT $6.80

East St. Louis, July 17.—The first consignment of cattle received here from Honduras was sold to local packers today. The lot of 700 head sold at $6.80 a hundred. This was the first part of a consignment of 6,000 head bought by a local concern in Honduras.

THE QUIRK TODAY

O. Henry had the instinct of the dramatist, as well as the short story writer, and this instinct is shown in the neatness of construction of the film-play, in which Robert Warwick plays the reformed convict, or the convict who wishes to reform, contrary to the desires of the detectives. Some of the detectives who were after Jimmy Valentine in his honest endeavors to go straight were cold-blooded hirelings who were out after "acses"; one, in the last resort, when Jimmy's fortunes hung on a thread, "had a heart" and refused to arrest him, although he was sure of his guilt as a bank safe looter.

O. Henry seldom diverged fatally from the probable; there was always a substratum of the matter-of-fact in what he wrote. "Alias Jimmy Valentine" is a very matter-of-fact play, conceding for convenience sake the wonderful power which the safe-opener possessed in his digits. Everything else might have happened in real life.

In this fine screen play, that talks to us more eloquently than words, Robert Warwick plays Jimmy Valentine—a very fine part. He went to Sing Sing and played convict for three days in order to obtain local color.

Tomorrow, "Mrs. Wiggs of the Cabbage Patch," in five parts adapted from the novel by the author with an exceptionally strong cast; Charlie Chaplin, in "Caught in the Rain," and others to make up a long bill.

OVER-CONTINENT CYCLE RACE STARTS MONDAY

Motorcyclists throughout the country are interested in the Dispatch Relay," which starts Monday from Washington. One hundred and seventeen nervy, speedy, enthusiastic motorcycle riders are going to attempt a trip from New York to San Francisco that will beat the train time between those cities. They will go in relays three men riding together, so that if anything happens to the dispatch rider, the others can carry it on. President Wilson will give the first rider the message in front of the capitol at Washington. It will be addressed to the major-general at the Presidio in San Francisco. The message will be rushed to the military station at Governor's Island, New York, where the real start will be made. The boys will ride night and day, and are due in New York Monday afternoon at 4:20 o'clock.

SOUTH AMERICANS BUYING U. S. PIANOS

New York.—For the first time since war began South American music dealers are showing an inclination to buy pianos and pianolas in appreciable quantities.

The foreign department of the Aeolian Company has recently received orders from Argentina, Chile, Brazil and Peru. The purchases were lines of the less expensive instruments. These orders are considered indicative of better business and financial conditions generally in South America.

Last year business placed with the South American merchants by dealers from the United States has been disappointingly small.

Present orders for pianos indicate that at least stocks are being exhausted.

REMINGTON PLANT TO WORK 8 HOURS DAILY

Ilion, July 16.—It was with a great deal of pleasure that the many employes of the Remington Arms and Ammunition Company in this village have received the word that beginning on the first day of August that the working day in that plan will be changed from 10 hour to an 8 hour day with the same pay. A notice signed by the president of the company to that effect was posted in the shop, so this statement is more than a rumor.

TO WED AT 51

Charles Morrell, a carpenter, of 412 Erie st., 51 years old, and Miss Rachel Turner, of 261 South 4th st., who admitted 51 summers to acting City Clerk George Washburn, took out a marriage license at the City Hall yesterday.

W. C. T. U.

[Compiled by Fulton Union]

"If ever you had a fight before you in Pennsylvania in all your lives, you will have one from now on," were the warning words of James Mulvihill, a leader in Pennsylvania liquor circles at a dinner of liquor dealers recently. The prediction was received in silence by the diners. It should be enlightening to men who patronize the wares of the liquor dealers to know that on this occasion, as on many similar ones, the dealers themselves drank not liquors, although they were on the menu, but water, the drink of the temperance advocates the world over.

* * *

The head of one of the big brewery concerns of Cleveland, O., claims that 75 per cent, of the saloons in the city at the present time are not paying propositions. This admission was made in the effort to prevent the raising of the liquor license tax which has been considered by the city government owing to a need of more funds for the running expenses of the municipality.

* * *

Eighty-three of the eighty-five prisoners of the Salem (Mass.) workhouse favor nation-wide prohibition according to a vote taken on a recent occasion. The chaplain of the institution says that more than 95 per cent of all prisoners are intemperate, and that 67 per cent of all imprisonments are for drunkenness.

* * *

Cato Sells, Commissioner of Indian Affairs, has recently awarded prizes to 729 successful contestants among pupils in the Indian schools of the United States, the contest being for the first, second and third best essays written by the Indian pupils on the effect of alcoholism on men, women and children. This contest was participated in by several thousand Indian children and it is believed will have a large influence in impressing upon the students, their parents and other Indians the evil effects resulting from the use of liquor

* * *

Prohibition causes an increase in consumption of alcoholic liquors the dealers in drink tell us. Yet, according to the latest figures of the Internal Revenue department, in the period between November 12, 1914, and May 1, 1915 there has been a decrease of $15,000,000 in revenue due to the falling off in consumption of alcoholic beverages. Which statement will you believe?

WHEN HER BACK ACHES

A Woman Finds All Health and Ambition Slipping Away

Fulton women know how the aches and pains that often come when the kidneys fail make life a burden. Backache, hip pains, headaches, dizzy spells, distressing urinary troubles, are frequent indications of weak kidneys and should be checked in time. Doan's Kidney Pills are for the kidneys only. They attack kidney diseases by striking at the cause. Here's proof of their merit in a Fulton woman's words:

Mrs. Leland Sherman, 267 S. 7th st., Fulton, says: "I feel justified in recommending Doan's Kidney Pills, for I know from personal experience that they are an excellent kidney and backache medicine. I used them for pains in my back and loins and other kidney annoyances, and they gave me relief."

Price 50c, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mrs. Sherman had. Foster-Milburn Co., Props., Buffalo, N.Y.

CAPTAIN NORTON'S MEN SCOOPED THE CARDS, CHIPS, CASH

Incidentally the Three Officers Took With Them the Participants in an Early Sunday Morning Game of "Jack-pot;" Players Were Noisy.

A friendly game of "jack-pot" progressing nicely in the building formerly occupied by Lebnany, the tailor, above No. 29 South Second st., was interrupted at 1 a. m. Sunday morning by the arrival of Captain Norton and two officers who corraled seven players and a quantity of chips, cash and cards. The players had been whiling away the long summer evening for some two hours without interference, but finally shouts of "Ante up!" "Come up on the grass!" "Somebody's shy." and "I'll raise you two bits." filtered through the open windows and attracted the attention of the patrolman on the beat, who informed headquarters. Captain Norton laid his plans well and swooped down on the sextette just as one player was scooping in a large pot that had been "sweetened" to such an extent that he could barely pull it across the table.

When lined up at headquarters the men gave their names, but in deference to the expressed desire of the Police Department they are withheld until after tomorrow's hearing. The men were released on their promise to appear before Judge Wilson in City Court tomorrow morning at 9 o'clock.

CHARLEY'S "HE DAWG" COLLAR AND LICENSE GONE

Charles Witowski, aged 12, of 156 West First st. south, appeared at the Police Headquarters this morning and informed Chief Dyer that "some guy had stolen" his dog license, for which Charlie had given a perfectly good dollar only last week. Not only did the depraved specimen of the genus homo take the license but he added insult to injury by taking the collar, and now Charlie is afraid the city dog catcher will corral his pet. Charlie readily consented to give a description of his pet to the newspapers, and when asked what kind of a dog he owned, answered "A he dog." Much questioning finally elicited the information that his dog is a cross between a bulldog and a hound, and carried a license number 130. Charlie paid a quarter more for another license plate, but says he is "gonna watch out for the guy that stole his collar."

WEST SIDE PLAYGROUND SOON TO BE A REALITY

Work on the play ground to be donated to the West Side by John W. Stevenson started this morning. The contractor in charge of the work had three teams at work grading a plot of ground on the west bank of the river, opposite the library. While Mr. Stevenson has not yet made public his plans, it is said he contemplates improvements on the river bank at that point, in connection with the establishment of the playground.

CITY GOVERNMENT DIVISION MEETS AT 8:30 TONIGHT

A meeting of the City Government Division of the Chamber of Commerce will be held at the office of the vice-chairman, F. G. Spencer, tonight at 8:30 o'clock. A full attendance of members of the division is requested as some important announcements in connection with the campaign for commission government will be made.

Weather Forecast

Moderate northwest winds; partly cloudy; fair tonight and Tuesday. Somewhat lower temperature.

CYCLIST THROWN; COLLIDED WITH JUST PLAIN DOG

Leon VanSlyke, of South 3d st., while riding a motorcycle along West 1st st. near Worth st. yesterday afternoon, ran into a dog and was thrown from the machine, landing heavily on his arms and knees on the brick pavement and sustaining many bruises. VanSlyke's motor was damaged to the extent of a broken light, but he was able to mount his machine and proceed to his home.

M. J. McDONALD HERE

M. J. McDonald, proprietor of the New York Shop, spent yesterday in this city, the guest of Manager John Perchway of the local store. Mr. McDonald has just returned from an extensive buying tour in New York and the New England states, and covered more than 3000 miles in his car en-route.

Y. P. B. SOCIAL

A big crowd is expected to attend the Y. P. B. social, to be held on the F. E. Godjon lawn, in Buffalo st., Wednesday evening. There are causes behind the anticipation, first of which is the location; secondly, the quality of the ice cream to be served, and third, an orchestra will be on hand to help make merry the afternoon and evening.

ATTORNEY GILMAN MAY NOT ACT FOR CLEMENTS WOMAN AND PARTNER

Mrs. Paul Clements and Thomas Leslie, arrested Friday afternoon on a warrant sworn out by Paul Clements, charging the couple with a violation of a section of the criminal code, will be tried tomorrow morning before Judge Wilson, in City Court, if the Judge returns from his vacation today.

Mrs. Clements' arrest followed a fire which destroyed a barn owned by her husband Friday afternoon. Arrested first on suspicion only, because of several actions which led the police to surmise that she was connected with the fire, she was charged Friday evening with a violation of the criminal code, the information alleging that the offense was committed in the Fulton House last Wednesday evening. Mrs. Clements and her companion have maintained a stolid silence since their arrest, with the exception of a violent outburst on the part of Mrs. Clements in the court room Friday night when she was arraigned before Judge Wilson. At that time she became so abusive that the judge committed her to jail. At the preliminary hearing later in the evening, the couple were represnted by Hubert L. Gilman and remanded to jail in default of bail. It was learned yesterday that Mr. Gilman may decline to represent them tomorrow, but he has not made his reasons public.

Mrs. Clements has already filed suit against her husband for divorce through Fanning and Fanning, her attorneys. While she has refused thus far to make any statement, she intimated to the police under examination Friday that she would make counter charges against her husband. She has not resided with Clements for several months.

FRUIT SHOW IN FAIR WEEK

Oswego County Farm Bureau Decided Saturday to Hold Exhibit Here in August.

The executive commitee of the County Farm Bureau was held Saturday in Oswego and it was decided to hold an Oswego county exhibit of fruit at the State Fair as usual.

Concerning the meeting the Oswego Times says:

"Beside preparing an exhibition for the State Fair it was decided to make exhibits at both the Fulton and the Sandy Creek County Fairs in order to show those who do not attend the State Fair what Oswego County is class fruit. It is believed that the exhibitions at the county fair schould stimulate interest among all of the farmers in all parts of the county and aid in the work of co-operation among al lthe farmers which is so earnestly sought by the Farm Bureau. To reach full efficiency and effectiveness the farm bureau not only needs but must have the support of every tiller of the soil. whether he has ten acres under cultivation, or a thousand. No man has too small a farm to profit by the work of the Bureau in solving tough problems, and no man has too large a farm to benefit by the tests and the advic of the experts in the agricultural world as classiled and adapted for use in the various parts of Oswego County by the Farm Bureau."

"It is the intention of the Farm Bureau to make this a county wide exhibit and get every farmer in the county thoroughly interested so that the exhibit will really represent the entire county. There is a vast amount of detail work to be done in connection with an exhibition of this kind and usually the burden has fallen on a few men both to produce and prepare the fruit used in the exhibition. This year it is hoped that the interest will be general and not confined to a few fruit growers.

MACHINISTS' UNION DELAYS STRIKE ORDER A DAY

New York, July 19.—Postponement of the machinist strike at Bridgeport for a day at least is announced by J. A. Johnston, vice-president of the International Association of Machinists Great mystery surrounds this latest move of the union labor leaders. The annoqncement was made after a secret meeting in the Atlantic Hotel It is asserted on high authority, however, that this latest development will not interfere with the plans for labor agitation throughout New England.

"I hope the affair here will be settled amicably," said Mr. Johnston. "While in New York today I received a telephone call from a representative of large manufacturing interests, who stated that if we could delay the strike he would bring his influence to bear toward arbitration. If we settle it will be for all of our demands."

LEO FRANK IMPROVES; BELIEVED HE WILL LIVE

Milledgeville, Ga., July 19.—The condition of Leo M. Frank, whose throat was cut almost half way round last night, continually grows more favorable. He is getting well, and shows every indication that he will recover.

Dr. Giley Compton, the prison surgeon, says there is danger from possible infection from the weapon of the would-be assassin, a knife used in cutting salt pork. There may also be a rupture of vessels from blood pressure or coughing spells.

In fighting off his assailant Frank received gashes in both of his hands from the knife. The wounds are not bad, however.

BECKER GETS HIS STORE SHOES; RESIGNED

Charles Becker says he is ready to die. To one of his visitors in the death house last week hes aid he didn't know what his lawyers were doing to save him and wasn't very much interested. But he is prepared to die like a man.

A week ago he complained to Warden Osborne that the makeshift slippers, with which the condemned men are shod, hurt his feet. He wanted a pair of regular shoes such as he used to wear when he was Czar of the Tenderloin. Mr. Osborne told him the prison authorities were not in favor of giving prisoners regular store shoes because in the arches of such shoes were bits of iron which might be used for suicidal purposes.

Becker flouted the idea. He told the Warden he wouldn't attempt to commit suicide. He said there were numerous opportunities for a man to kill himself-even in the death house. He pointed to the blanket on his cot and declared he could hang himself thereby without the guards seeing him. Becker got the store shoes.

BAD LANDS TABOO, SAY AUTO CLUB'S HEAD OFFICERS

East First Street Section to Be Avoided by Touring Autoists: Detour Will Relieve Congestion of Traffic and Over-Crowded Stores.

The Fulton Auto club has acted on the suggestion made in the columns of The Evening Times last week and signs advising automobilists to detour in view of the condition of South First st. and the operations at Oneida st. will be placed at the corner of Broadway and First st. and at the corner of Hannibal st. and West First st. tomorrow. The east river road between this city and Oswego was closed to traffic this morning because of the removal of the bridge at Black Creek, and although local traffic between this city and the bridge will not be interrupted, vehicles will not be able to proceed through to Oswego or Minetto on the east side of the river for some time, as there is no bridge between this city and Minetto, all tourists must take the west river road.

The loss of the patronage of the tourist traffic sustained by business houses on the east side of the river will be negligible, but the detour of many vehicles may promote some action on the part of merchants to hasten the improvement of South First st., and this was one of the indirect benefits to be derived mentioned when the detour suggestion was made. Officer Smith, on duty at the Oneida st. bridge yesterday, said the congestion at that point was a source of much annoyance to car owners, when it is estimated that more than 2000 cars passed through the city.

The detour suggestion has also met with approval of Secretary Heydecker of the Chamber of Commerce, and Chief Dyer, who sees in the plan the removal of much unnecessary congestion along First st.

West First st. is an ideal automobile road and tourists are bound to get a good impression of the city, quite different from the sentiments expressed yesterday by several motorists who drove through the "Bad Lands" section between Rochester st. and Broadway.

AUTOS, FLAG-BEDECKED, PARADE THIS EVENING

The Chautuaqua parade of automobile will rendezous at the Chamber of Commerce headquarters at 7:30 o'clock to-night where each car will be decorated with a Chautauqua flag, after which the parade will start. The last night automobile parade held by the Fulton Auto club, was well patronized and the committee in charge of tonight's affair hope to see a large representation of cars in line. The route of the parade has not yet been decided.

After the parade a meeting, open to all those interested in the Chautuaqua, will be held in the Chamber headquarters.

CLAIM AGENT ADMITS COMPANY'S RESPONSIBILITY

Fred Eames, the young motorist who narrowly escaped death lastweek when his machine collided with a New York Central passenger train at the corner of Cayuga and Second sts., signed a claim release tendered him by the railroad company's agent on Friday and received $51. The railroad agent admitted that the company was at fault, according to Eames in not having the crossing protected, but as he had sustained no injuries other than bruises, the company was only willing to pay for the damage to the machine.

POLISH BOY'S BODY REMAINS IN THE RIVER

Several men dragged the river between the bridges all day yesterday in an attempt to recover the body of the little Polish boy who was drowned Friday afternoon last. Dynamite was used Saturday in an attempt to bring the body to the surface but as yet no trace of the lad has been found. Many people are of the opinion that the body will be found near the head gates at the lower falls.

BIG TIME AT PICNIC PLANNED

The Brotherhood Classes of the First and State St. churhes will picnic Wednesday beginning at 10 o'clock at the Fair grounds. The committee in charge comprises Amos Wolever, George Carner and W. B. Joice, and they are making a concerted effort to have the event this year the most successful and enjoyable of any held by the church. An open invitation is extended to every man, women and child in the city to attend the picnic, and a program of entertainment has been aranged which will keep things moving from start to finish.

45—PHONE NEWS ITEMS—45

It is to be hoped that the reports which have been circulated about the unprotected condition of the Panama canal had no basis in fact. However, statements of serious import have been traced to the authorities who are in position to know and to give judgment. Any general unpreparedness for war is excusable in view of the national reluctance in time of peace to assume an attitude before the world of having possible enemies or that we nurse ambitions likely to arouse enmity. But the Panama canal is an institution by itself. It has an international mission, and the United States is the guarantor of ability, come what may, to fulfill its mission for all the world. The nation felt relieved when provision was made to place the canal terminals in a state of defense, and the disappointment would be great if a test would be put upon the defenses and they were found wanting. We shall not lose the canal permanently, but it would be a calamity to have the defense of it prove tedious and costly if assailed. Our control seems to carry with it the obligation to make that control secure against every emergency.

It is now forty-eight years since the purchase of Alaska, but the people of the United States are only just beginning to get an inkling of its interior industrial possibilities. From this time forward it is safe to predict a swifter development. The opening of the Panama canal puts Alaska within easier reach from our populous Atlantic front.

There are stores of coal and copper in the great stretches of warkable mining land between the Alaska mountains and the sea. New railroad facilities will give still greater push to industrial expansion. Alaskan coal is even a more important asset than Alaskan gold. The more we know of Alaska the more we have reason to congratulate ourselves on the farsighted wisdom that induced its purchase nearly half a century ago. It was a great bargain at $7,200,000.

A little more than three-fifths of the farms in the United States are operated by their owners and a little less than two-fifths by tenants. As to farms operated by tenants, the census makes no attempt to learn whether or not they are mortgaged, but as to farms operated by owners it reports one-third mortgaged and two-thirds free from incumbrance. Probably among farms operated by tenants the ratio of those free to those mortgaged is not widely different. The average value of the mortgaged farm is, in round numbers, $6,300; the mortgage is $1,700; the owner's equity, $4,600. Probably exactness is not to be claimed for these census figures, but it is a fair assumption that they show approximately the situation.

Personal liberty is a much abused asset all along the line. It should mean individual initiative and freedom of action, but not much more. It is a grant by other interested parties who, in turn, do not want their own liberty interfered with. Communities and nations, too, sometimes run away with the notion that personal liberty insures the right to be selfish. It simply insures the right to live one's own life without impingement upon the interests of others engaged in the very same course. The etiquette of personal liberty needs revision once in awhile, and new rules have to be enforced with drastic methods.

Italy's king says it was with great sorrow that he entered the war. If rulers would be sorry first and then not enter their nations would be better off.

If the weather bureau would see to it that rains arrive when they are due and due when they arrive the system would be more popular.

Vainly humanitarians cry "Peace! Peace!" when almost every moving picture film in the land declares there is no peace.

Peace is spoken of in terms of high appreciation until it interferes with having one's own way.

Walking is popular with most people excepting when a street car strike leaves no alternative.

A GENTLEMAN'S ADMONITION

A gentleman, a native of this city, has expressed himself thus: "What's the matter with Fulton?" Replying to his own query the gentleman laid particular emphasis upon the system of government under which we are working. He believes in Commission Form of Government, with a manager at the head of the commissioners. He wants to see Fulton realize its full measure of possibilities, believing that unless better municipal conditions prevail we shall not come into the blessings in store for us. But the same gentleman declares his belief in the successful outcome of the coming campaign for the Commission-Manager Form of Government. He is fearful lest too many people think the movement is fostered by the "silk stocking crowd of the Chamber of Commerce," a claim that is too absurd to command more than passing notice. It may be that there is a "silk stocking crowd" in the Chamber of Commerce, but as yet its members have not come under the observation of The Evening Times' periscope.

The Chamber of Commerce is the product of the people—common people, it might be added, if workers are considered to comprise the common people. The Chamber of Commerce represents the will of the workers of Fulton—the workers who are engaged in the mercantile and manufacturing interests of the city, and who would have the city come really and truly into its own as a place to live, think and work. The Chamber of Commerce directors were created by the will of the people who voted for them as officers because they merited their confidence. In the main, these are the men who have found that there is something wrong with Fulton, and they are the men who have launched the boom for a government that should rally to its aid each and every worker of the street, the shop, the factory, the mill, the office and the home. Why? Because Commission Manager Government is administered in the interest of every worker, every taxpayer and renter, and not in the interest of men with no other regard for the people's rights than the satisfaction to be obtained by holding office at the public's expense and the power their offices may give them.

Another point is referred to the gentleman who fears the encroachments of the "silk stocking crowd." Inefficiency is the cry all over the land; the cry is directed at the methods of misgoverning cities and towns. This being true, with the subsequent and consequent evil results, how can any city expect to realize an extended circle of the "silk stocking crowd," provided the people's money is squandered by men, who through lack of training are inefficient and incompetent to handle the business of a municipality. It is the object of every city to boast of the wealth of its people—to advertise that no abject poverty exists in its homes; that the people get the best to be had for the money expended; but where in all America is there to be found a city conducted on old line plans that does not enter the complaint, Here we get practically nothing for our high tax rate.

Commission Manager Government is not a silk stocking government, but it is a government which by its simplicity of operation and enforcement gives the greatest good to the greatest number of people. It has ceased to be an experiment—it is a reality in nearly thirty progressive American cities and in no instance have the people of those cities recalled their expressed desire to secure efficiency.

Opinions

Oswego Pleased

Oswego was pleased to hear of the good fortune which Fulton realized in getting the large contract by the Hunter Arms Company. — Oswego Times.

The Newspaper's Free Service

If a Board of Trade is organized to boom a town, it finds that it is expensive work. Secretaries must be hired, office rent paid, supplies must be settled or in cash. People usually make no discount because the work is for a public cause.

Meanwhile the newspaper is booming the home town all the time, and for the most of the services it renders it asks no pay. If its motives are not wholly unselfish, at least it is far-sighted enough to expect its compensation in the added prosperity that comes to all enterprises when a town grows.

In view of all this unpaid service, it is fair to ask a reciprocal spirit on the part of its home community.

The Times is not complaining of its support, which has been generous and friendly. It merely reminds it readers that when they pay down their money for a subscription they not merely get their money's worth in the form of news, but they are helping to support an agency that gives unpaid service all the time for the development of the community. —Oswego Times.

Two Types

Out in Montgomery county, Kansas, there lives a man whose home is on a stretch of bad cross road, who is said to have made this year about $200 pulling tourists' motor cars out of the mud in the road past his farm. He says it has become a paying labor for him. His attitude is like that of the old duke of Brittany, who held that the unlighted rock on his coast that wrecked the vessels he salvaged was the richest stone in his diadem.

In contrast to this man who made $200, is his next door neighbor, who has put a sign on the fence telling

hitched nearby without charge when their cars become stuck in the mud. He feels it is the more human way, and besides, hem akes money enough off his corn and hogs without taking advantage of the misfortunes of others. He declares that he has found that it pays to give travelers a lift without charging them anything, and he says that so many have been helped by his team that they are creating a sentiment of kindness toward him in his isolation on this road, which will result ultimately in the improvement of the highway by the state. Of course his neighbor of the more mercenary type, will profit, but he says that is the way of the world.

Here is the contrast of human nature, the man who profits by the misfortunes of others, and the man who helps the unfortunate and refuses profit. We all know which farmer we like better, and we all know which of the two will spend the happier old age. We also recognize things which of the two will have better looking hogs and more profitable corn fields. After all, it must be admitted that prosperity and contentment usually follow the man with the kind and generous heart.—Water town Times.

BUSINESS IN REVIEW SHOWS IMPROVEMENT

Dun's Review for week ending Saturday, says:

"Constructive factors accumulate and the international uncertainties, while making for caution, fail to check the growth of confidence in the future. With the basic influences still gaining in strength, the outlook steadily becomes brighter, although apart from industrial lines, progress is not rapid in any direction. It is mainly in sentiment that the general form and substantial betterment, but in actual commercial transactions there is also concrete evidence of improvement. One instance of this is found in the record of bank clearings, which more frequently show increases in comparison with earlier periods and—for the current week are 5.4 per cent. larger than in 1914. To some extent this is due to the expansion in speculative operations at New York, yet the gains in the totals at outside cities indicate a broadening volume of business in legitimate trade channels. Other statistics are likewise more favorable and the considerable reduction in the number of idle cars last month testifies to more active movements of freight. Returns of railroad earnings are now less disappointing than in the past and expectations of further improvement in this respect are encouraged by the official promise of big yields of grain. The latter also means much to the country at large; yet, on the other hand, the South is confronted with the problem of finding a market for its present and prospective supplies of cotton, owing to the export restrictions imposed by the war. During June, however, domestic consumption rose to a new high record for the period, although the bullish influence of this was offset by the very heavy stocks held by manufacturers and in independent warehouses throughout the South. Progress in strictly mercantile lines would be more rapid were it not for the recent vagaries of the weather, which tended to retard distributive trade in many sections. More seasonable conditions now prevail and the lost ground is being regained, while there is manifest a disposition to provide more freely for future requirements. Except for labor disturbances of some importance, notably in the local clothing trades, the industrial outlook is increasing bright.

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

What increase in power can I expect by using ether in gasoline and in what proportion is it used to gain the best of results?

The use of ether in fuel will give a slight increase in power, due to the more rapid propagation of the flame. One-half pint of ether for each ten gallons of gasoline is used for this purpose, but it is not recommended, as it is not economical. For getting easier starting a mixture of one-half commercial ether and one-half gasoline is carried in an oil can. This can be squirted into each priming cup for the initial explosions. The can must have a cover on the spout.

How will incorrect wiring affect my motor?

The effect of incorrect wiring on the motor depends on how the wires are misplaced. For instance, if the high tension cables were changed around so that no one of them went to the right plug it would be impossible to run the motor, although an occasional explosion might be obtained. If two or three of the high tension wires were interchanged, but one or more were left on the correct plugs, then the motor would run on the cylinders in which the latter were. Where a dual system is employed the wires of the battery system may sometimes be misplaced without interfering with the operation of the magneto and vice versa. As a rule, however, the changing of the wires will result in the whole ignition system becoming inoperative.

Has a long stroke motor any advantages over a short stroke motor?

Yes. The gas after ignition has greater chance to give up its energy to the piston. A greater volume of gas may be gotten into the cylinder without increasing the bore. This means more power for the same piston speed.

How can I take up the end play in a crank shaft without putting in new bearings?

It is best to replace the bearings when end play develops, but if this is not desirable the play can be removed by moving the thrust bearing to one side enough to compensate for the wear. The thrust is taken by the center main bearing, which is easily distinguished by having large flanges on each side. Remove the bolts holding the bearing to the crank case and file out the bolt holes enough to permit the bearing to be shifted. Then replace the bearing and tighten the bolts carefully.

How will running with retarded spark make the water boil in the radiator?

Operating a motor with retarded spark will cause overheating by retarding and prolonging the combustion of the charge throughout the power of expansion stroke. Thus the cylinder walls are exposed to the action of the burning gases during the whole of the stroke instead of only during the time the piston is in the region of upper dead center, as is the case when the spark is properly set. If the spark is advanced to the point of most efficient operation the spark will occur some time before dead center and maximum pressure will be reached and the combustion nearly completed just after dead center has been passed. During this time, since the piston is near the top of the stroke, the amount of surface exposed to the exhaust gases is a minimum, and, furthermore, at this point in the stroke the compression is at its height, and combustion takes place with greatest rapidity. Contrast these conditions with what happens when the spark is greatly retarded. Let us assume that ignition occurs when the piston has half completed its stroke. At this point the compression is lower, and combustion is therefore slower and will probably not be completed until after the exhaust valve opens. The hot gases are in contact with nearly the whole of the cylinder wall surface for practically one-half revolution.

But this is not all. When the spark is retarded, as in the instance just mentioned, the motor does not develop full power, therefore for a given load on the motor the throttle must be opened wider and more gasoline and air must be supplied. The extra heat generated by the combustion of the increased amount of fuel thus adds its share to the already overheated motor.

My car is equipped with electric lights and would like to know if dry batteries would work the head and tail lights. If so, how many and about how many hours would they last?

Dry batteries are not suited for lighting the head and tail lights. This method would be entirely too expensive, as the number of batteries you would require would be great and their life short. Take your storage battery to a battery repair man that you are certain is an expert—if possible take it to a service station maintained by the maker of your battery—and have it examined. It may be that all it needs is an overhauling to make it as good as new. But even if you must buy a new battery it is better to do this than try to use dry cells.

Reliable merchants advertise in The Evening Times—the paper is their asset and the people's newspaper.

UNDERSTANDING CITY DEVISING

Expert Talks to National City Planning Conference.

FOR BEAUTY AND UTILITY.

The Only Difference Between Architecture and Civic Design Is One of Degree and Application—In Both the Eye Is Satisfied by Good Taste.

Addressing the seventh national city planning conference held recently at Detroit, George B. Ford, consultant to the committee on city planning of the board of estimate, said:

"Citizens are now waking up to the fact that, once a plan is satisfactory from the standpoint of business efficiency and social welfare, it need cost little if any more to make it pleasing to the eye as well. Many are feeling that oftentimes it is worth while to sacrifice a little of the other elements in order to gain in beauty. The pendulum is swinging back to the normal. Comprehensive, all around city planning is arriving.

"Architecture, or, better, civic design, as it is often called when speaking of civic architecture, is generally considered a rather mysterious subject, to be left for its creation to the initiated few. The sooner that illusion can be cleared away and the principles underlying good civic designs are generally understood the more insistent and general and therefore the more effective will become a popular demand for

WELL PLANNED CITY SQUARE IN KOENIGSBERG, GERMANY.

seemliness in our cities. From the first we find that the only difference between architecture and civic design is one of degree and application. In both cases the eye is satisfied by the use of good taste in mass, proportion, placing of ornament, scale, appropriateness and the handling of color and materials.

"The appropriateness of the design of structure to its function is a matter on which every one has his own views. Many question whether the heavy, classic architectural treatment of the Pennsylvania station in New York is peculiarly suited to the needs of a great modern terminal. There is a distinct demand for a monumental treatment in order to make it a worthy entrance to a great city, but it is a debatable point whether a more open treatment would not have given a greater sense of the movement of a city's crowds.

"Attention to the possibilities of texture of surface and of materials is something that we have not carried as far in America as they have in Europe. We have become used to the red pressed brick facade, with its rock faced granite trimmings and its painted iron cornice. Yet what a far cry from that to the beautiful texture and use of material in the Morgan library in New York, in the Wisconsin state capitol or in some of the recent suburban stations about New York, as in Yonkers, White Plains and along the Westchester and Boston road. For the same cost, good taste in the use of material and in the texture of surfaces can make a great difference in the appearance of a structure.

"The recent use of color in architecture in our expositions, particularly in the wonderful color effects which are now to be seen in San Francisco, has opened our eyes to new possibilities in this field. We are afraid of color, especially in our civic architecture. We excuse ourselves by saying that it is 'undignified.' The real reason is that we do not trust ourselves to use it. But in view of the present ease and cheapness with which colored terra cotta and colored cement can be made I believe that our cities are not bound to remain much longer somber, drab and monotonous. The possibilities of the use of color are limitless, and I prophesy an early demand to have cities brightened up."

PEOPLE OF HOLLAND FEEL PINCH OF HUNGER.

With Prices of Staples Doubled, War Bread Cards Are Issued.

"Government bread" and "bread cards" on June 1 became an institution in Holland for the period of the war, from which the people of the Netherlands suffer much while only looking on. The Dutch, however, are not compelled to eat government bread nor to take bread cards nor restrain their appetites by order. The system is based on the philanthropic principle, and its introduction does not imply any fear of a shortage of flour or bread.

The idea of issuing bread cards arose owing to the ever increasing number of people in Holland whose resources have been reduced since war broke out in Europe. The drafting into the army of thousands of the breadwinners in preparation to defend Holland against any attack on her neutrality and the decreased opportunities for those who remained at home of finding employment as a sequel to the lack of raw materials in various trades have rendered the poor as a rule poorer, while those persons possessed of means have become wealthier, since they have been able to take advantage of opportunities of making profit by laying out their cash.

In order to allay some of the discontent of the poor brought about by the increased cost of their prime necessary, the government recently requested the municipalities all over the country to ask the bakers in their various districts to indicate whether they were willing to make and sell whole wheat bread at approximately 2½ American cents a pound instead of nearly 6 cents, the usual store price for this moment.

Large numbers of bakers agreed to do so under the impulse of a proposal by the government to supply them with whole uncrushed wheat through the municipalities at a price averaging 9 florins (3.60) per kilogram, or about 2.20 American pounds.

The bread is sold at the low price of 2½ American cents a pound to families which apply to the local authorities for bread cards. No restrictions are placed on the amount of money earned by a family, which desires a bread card, but only one pound of bread is furnished daily for each person over two years old, belonging to the family.

The extent of the poverty in the towns may be judged from the fact that many thousands of families have applied for bread cards. In Amsterdam, for example, nearly 50,000 family bread cards have been issued; in Rotterdam, 30,000; in The Hague, 20,000, and in Leyden, 15,000.

SECOND CLEANUP CONTEST IN UTAH

Remarkable Results Achieved In Initial Campaign.

REVIEW OF WORK DONE.

Dr. T. M. Beatty, Secretary of the State Board of Health, Has Reported That the First Campaign Reduced the Death Rate Throughout Utah.

The second cleanup contest in the state of Utah is now on. The first one was inaugurated early in 1914 by the secretary of the Utah Development league. He worked through the commercial clubs of the state, the governor and the state board of health. As a result Utah in 1914 conducted the first cleanup town contest ever held in this country under the auspices of a state bureau.

So remarkable were the results last year, says the Survey, that the contest is being repeated this year by the state board of health, the Utah Development league co-operating. The manner of conducting the contest and the mode of scoring will be essentially the same this year as last, so a brief review of last year's event will show the general value of the movement.

The contest started about the middle of March. Each town organized a committee of citizens who outlined and directed its campaign. Provo, a town of 10,000 population, selected a committee of fifty. A captain for each of the 250 city blocks was also appointed. By a centrally chosen street the town was divided into two competing sections.

WHAT A CLEANUP GATHERS.

From the citizens of each section a doctor and layman were chosen, constituting a committee of four judges.

When a resident finished cleaning up he notified the judges that his premises were ready for inspection. The judges scored his premises on a possible basis of 90 points. If he scored 75 points he was given a red or blue button according to whether he belonged to the red or blue army. The army receiving the greater number of buttons prevailed. In Lehi a prize of $25 was given the winning side.

The same system of scoring as was used locally was employed by the state wide judges in scoring the towns in the final contest, excepting that five points were reserved for sanitation of schoolhouses and other public buildings and five points for vacant lots, making the highest possible score for a town as a whole 100 points.

The state judges began scoring the towns on Aug. 15, before which date all preparations for the contest ceased. The three judges, one of whom was J. H. Wallis, former state food and dairy commissioner of Idaho, were paid for their services out of the funds of the state health department. The judges were busy scoring from Aug. 15 until the first week in November.

Of the possible 100 points 15 were devoted to sewage, 15 to stables and corrals, 10 to garbage disposal, 10 to water supply, 5 to public buildings, 5 to the marketing of food, 5 to the presence of flies (or, better, the absence of them), 5 to house sanitation. To the aesthetic, as distinguished from the sanitary aspect of the scoring, the remaining points were devoted—namely, to the condition of streets, parks and alleys, towns and flower gardens, vacant lots and fences.

The towns fell in six classes, from A to F inclusive, depending on the population. Salt Lake and Ogden alone constituted class A. Manti, a town of between 1,500 and 2,500 population (Class D) received the highest score, although there was a prize for the leading town in each class.

T. B. Beatty, M. D., secretary of the state board of health, states that the campaign reduced the death rate throughout the state.

Federation of Civic Clubs.

At a recent meeting of the Federation of Commercial Clubs of Minnesota the federation voted to merge with the recently organized Minnesota Commercial and Civic federation. The meeting was attended by delegates from clubs at Duluth, St. Peter, Brainerd, Austin, Stillwater, Osakis, St. Paul and Minneapolis.

CHOOSING MUTTON.

Rules to Guide Those Who Want to Be Careful Buyers.

Mutton is generally considered the most healthful meat and is eaten by many to the exclusion of any variety, consequently great care should be exercised in the selection, and a little time should be given to the study of quality.

In buying mutton or lamb care should be taken to see that the fat is clear, hard and white, as mutton with soft or yellow fat indicates too long a stay in cold storage. It might appear that a great quantity of fat on mutton signifies waste, but the lean part is much juicier and more tender when this is the case, so the wise housewife makes purchases with this in view.

The leg has the least fat in proportion to weight. Next comes the shoulder. The color of lean mutton is a deep red.

Lamb is good to eat when a year old and is much more digestible than other immature meat, such as veal or young pork. The wise housewife knows the value of nutrition, so she will hesitate about buying lamb merely because it is in the market, as it is generally expensive.

The meat of spring lamb should be a clear pink, with plenty of pure white fat.—New York Sun.

FIRST ARMY MEDAL.

It Was Issued After Cromwell Defeated the Scots In 1650.

The first medal issued as a reward for military service was struck by order of parliament to celebrate a victory of English troops over the Scotch.

When the news reached London that Cromwell had defeated the Scots at Dunbar on Sept. 3, 1650, the house of commons instructed Thomas Simon, chief engraver to the mint, to proceed to Edinburgh and design a medal in honor of the event, of which a leading feature should be a portrait of the victorious general.

The result was a lifelike portrait of Cromwell in profile, and over his head is engraved the battle cry of his Ironsides, "The lord of hosts." On the reverse there is a wonderful representation in miniature of the house of commons in session. This medal was given to all officers and privates alike who fought in Scotland, but this democratic practice was discontinued till revived in 1815 at the suggestion of the Duke of Wellington for the troops under his command at Waterloo.—London Telegraph.

Knew Him.

"Well, how about that little bill?"

"But I told you to call at 4 o'clock, and it is only 3 now."

"I know it; I wanted to catch you in."—Houston Post.

Hopeless Case.

"Pessimistic, is he?"

"To the ultimate limit. He couldn't even imagine a castle in the air without a mortgage on it."—Judge.

IMPROVEMENT SCHEDULE.

Kalamazoo (Mich.) Chamber of Commerce Maps Out Civic Reform Work.

That the recent reorganization of the Kalamazoo Commercial club, whose name in the process was changed to Chamber of Commerce, resulted in an awakened civic consciousness upon the part of the membership is indicated by the program of work for this year which has recently been decided upon. A few of the items in the program are quoted below:

Promote a higher sense of citizenship by holding before the people of Kalamazoo as an ideal the best accomplishment of the most advanced cities.

Study the manager form of city government and promulgate information concerning the results of this study.

Assist in co-ordinating the various charitable and relief agencies of the city and county with a view to increasing efficiency and preventing duplication.

Help to devise ways and means for providing a home for the Y. W. C. A. that will enable it properly to care for the young women transients and employees of the city.

Promote the cultivation of vacant lots and waste places to increase self help among the needy.

Co-operate with the authorities to increase efficiency in public administration.

Urge the repair of dirt streets.

Assist in securing full registration and vote in municipal and school elections.

Secure public comfort stations.

Cleaner streets and sidewalks.

Extension of ornamental light system.

City water service extension.

Improvement in fire protection.

Improve and beautify the river front and plan for its permanent utilization for park purposes.

Establish and improve parks and playgrounds.

Conserve our trees.

Prepare data on the establishment of a public market, farmers' headquarters and women's rest room.

Prepare and submit data on a modern system of garbage collection and disposal.

Make a study and analysis, for general information, of property assessment and public taxation, scope and proper expenditure of public funds.

Fire Protection In Hotels.

The guests of Raleigh (N. C.) hotels are given exceptional protection against fire hazard by the arrangement which the Raleigh chamber of commerce has made with the city commissioners for one of the city's paid firemen to inspect the hotels of the city hourly between 10 p. m. and 7 a. m. This protection is in addition to that provided by the hotels themselves.

PROTECTION.

The chamber of commerce of Raleigh has arranged with the city commissioners of Raleigh for one of the city's paid firemen to inspect this hotel hourly from 10 o'clock p. m. to 7 o'clock a. m.

This fireman carries a watch clock, and the watch clock stations are located at the end of each corridor on each floor, including basement, dining room and kitchen. The watch clock records are filed with the secretary of the chamber of commerce and are open to inspection.

This protection is arranged by the chamber of commerce in addition to that provided by this hotel that the guests may feel amply protected against hazard of fire.

The card here reprinted is tacked up in every room in the different hotels, thus informing all guests that the hotel is being afforded fire protection in the manner described and incidentally affording desirable publicity to the chamber of commerce.

Protecting Shade Trees.

Governor Walsh of Massachusetts has recently signed an act defining the powers and duties of tree wardens and their deputies and providing for the better protection of public shade trees. It includes a jail sentence for not more than six months or a fine of not more than $50 for any one who willfully, maliciously or wantonly injures a tree, shrub or growth which does not belong to him and which serves a useful purpose. The same penalty applies to cutting down a tree or shrub within the limits of a state highway without authority. Another section carries a $50 fine for attaching advertisements upon or painting or marking any tree located in a public place or highway except for the purpose of protecting it or the public.

"Leggo My Leg!"

LEGIONS BLIND IN WAR.

European Countries Need Special Provision After Peace Is Declared.

Injuries of the brain and of the eyes are more frequent and cause more deaths in the present war in Europe than was ever the case in any other war, according to Dr. Lloyd Mills of Los Angeles, who related his experiences in Austria at a meeting of the American Medical association.

These injuries are more serious owing to the short range at which most of the fighting has been carried on and to the rotary motion of the bullet fired from the German rifle, which revolves about thirty-two times a second. Infections are common, especially following shrapnel wounds.

Of those recovering, the number of totally blind, according to Dr. Mills, is appallingly large, and will need special provision on the part of European countries after the war is over.

A PHILOSOPHIC PRISONER.

Burgomaster Max of Brussels Adapting Himself to Conditions.

Burgomaster Max of Brussels, interned in the German fortress at Glatz, is resigned to his fate, according to a letter written by him to the Havre correspondent of the Paris Matin, in which he says:

"I take no merit for supporting my fate stoically. Besides, I see in my patience only an application of the physical law that every being adapts himself to the conditions of life imposed upon him by circumstances. I have been shut up now 240 days and captivity has become a normal state for me. The sufferings I experienced during the first weeks following my arrest are lessening more and more."

BE NEIGHBORLY.

"Get acquainted with your neighbor—you might like him." This, from the letterhead of a western village improvement association, is excellent advice. What fine things a large personal acquaintance can do for us, provided we are worthy of it! Let us put aside any petty dislike, engendered perhaps by fancied faults in other people, and go out and shake hands with neighbors whom we probably have never really known. Let us talk over our common problems with them; discuss the welfare of our community, the state, the nation, so that we may all have a better understanding of our common hopes and aims. All this pays. Its returns come not alone in the help we can be, one to the other, but in the greater discernment with which our personal business can be conducted and in the better feeling and progress that follow in a town or city where all are working for the common good.—Countryside Magazine.

ALBANY GOSSIP DAY BY DAY

Chronicle of Events and a Forecast of What is Doing in Officialdom—Special Correspondance.

By Frederic T. Cardóze

Albany, July 19.—There looms up on the horizon of the Constitutional Convention the promise of a lively fight over the question as to whether the delegates shall favorably dispose of the proposed amendment to abolish capital punishment.

The proposition which lay dormant in the committee on Bill of Rights, of which Hon. Louis Marshall is chairman, was finally voted down by that committee by practically a unanimous vote and therefore was not allowed to get out upon the floor of the Convention for a vote of the entire delegate body.

When Delegate Charles H. Betts of Lyons, who introduced a proposed amendment upon the subject, learned of the suppression of the subject in committee he decided to make a stand to have the committee discharged from further consideration of the proposition and may make his motion any day.

In order to win to his standard delegates who had not carefully followed the arguments raised against capital punishment, Delegate Betts offered a rresolution asking that five hundred copies of the remarks made in favor of the death penalty as madé before the committee on Bill of Rights at a public hearing, be printed. His resolution was referred to the committee on Contingent Expenses which may or may not favorably report it.

"Capital punishment is a relic of barbarity. It has been bequeathed to us by all the brutal instincs of a savage past. Intelligent thinking humane citizens want capital punishment abolished. The people of the State are looking to this Convention to prohibit the taking of life of those who have committed a capital crime."

At the hearing before the committee on Bill of Rights, Delegate Betts went fully and deeply into the subject of capital punishment and its resudts. He submitted figures showing that the crime of murder had fallen off in States where the death penalty had been abolished. Following the partial publication of his remarks he received and is still receiving many requests to make addresses upon the subject in many localities.

Since there are a number of former district attorneys and judges among the Constitutional delegates, it is being forecasted that the task of Delegate Betts will be a hard one. While here and there there may be a former prosecutor who favors the abolition of capital punishment, the majority of them have expressed the opinion that it is absolutely necessary to safeguard the public from a large degree of crime which under the laws of New York State is punishable by death.

Since the Bill of Rights Committee took its action upon the capital punishment abolition proposition, its members have come to the conclusion that perhaps it would beb est to favorably report the proposed amendment and let the Committee of the Whole deal with it. Some of the members of the Bills of Rights committee took exception to this and there may be another contest within a contest to get it upon the floor of the Convention. Delegate Betts says that he will keep right on fighting for the amendment and feels confident that if he can get it out on the uoor that it will eventually be approved and submitted to the people for their action.

ALBION MAN BELIEVES WEALTH LIES UNDER FARM

Pulaski, July 19.—Frank S. Mowers, who owns a farm of 300 acres near this village, believes that by drilling on his land crude petrolinm and natural gas will be found in paying quantities. He has found oil floating on the surface of the water in a small stream, and further, he says that much of the sandy soil on the farm is dark in color indicating that the oil impregrates the sand. At times he has placed the dark colored sand in his kitchen stove and good heating qualties resulted. Mowers further corroborates his claim by saying that an experienced oil prospector from Oklahoma after an inspection declares that many conditions on his farm resemble the oil fields in other states.

MAN, 30 YEARS OLD ROCKED BOAT; DROWNED

Pulaski, July 19. — Three Albion men embarked in a boat near Port Ontario yesterday to fish. One of them, Roy Towsley, rocked the boat which capsized and he was drowned. With Towsley were Lyman Hooper and Prosser Whaley. The latter claims that the drowned man was an expert swimmer. The body was not recovered yesterday and the search continues today.

H. L. CRANDALL LOST HOUSE BY FIRE

The new home of Herbert L. Crandall near the Peat Bed Road in Granby was destroyed by fire Saturday night.

The house was on what is known as the Allen farm, and Mr. Allen was vacating the buildings when the fire took place. No one was in the house at the time the fire gained headway. Mr. Allen was in the barn and did not make the discovery until too late

The house was partly covered by insurance.

LOLA AT THE QUIRK TONIGHT

"Lola" aparently died. Her father experimented with his wonderful electric apparatus and to all appearances she comes back to life. But there is a change in character, a difference in every action of the woman.

What caused the change? Was Lola really brought back to life? Was her father justified in his scientific experiments?

See Lola at the Quirk tonight.

Borrowed Time Club Met

The Borrowed Time Club met this afternoon in the parlors of the Presbyterian church, and listened to an informal talk by the Rev. J. W. Barrett, pastor of the First M. E. church. The subject chosen by the speaker was, "The Riches of Riper Years."

GERMANY BEGINS HER SUPREME EFFORT, SAYS BRITISH EDITOR

J. L. Garvin, editor of the Pall Mall Gazette, comes forward with the statement that Germany at last is opening her grand attempt not merely to sweep across the whole of Eastern Europe, but to envelop and destroy the main part of the Czar's armies so as to open the path to Turkey and Asia.

The next few months, even the next few weeks, may be rememberеd as the most important phase of this Armageddon.

The measure of the allies' success at the end and, above all, of the subsequent position which this empire is to hold in the world, will be determined absolutely by the measure of Britain's organizing exertions, both with regard to material and men, between now and the end of the Fall.

We have a second chance, and a good one; we will never have a third. That is now gravely understood by every minister in the Cabinet, whose members will put away squabbling, hesitation and red tape to get forward unmistakably with the job whereon depends our all.

Germany is now opening her supreme effort. We have long said that Germany's suprem e effort when it came would stagger the imagination.

Russia's task is one of gigantic difficulty, and we shall see how the Grand Duke, his masterly lieutenants and the aroused Russian nation are likely to cope with it. They know that if they get through the next month in fair safety they will be afterward invulnerable.

It is certain the Grand Duke has long since penetrated the mind of his antagonists, and is not to be taken by surprise. The result of the crowning fight for the Polish salient must be awaited during the next two months with absorbing excitement.

If the Grand Duke's central armies could be enveloped and destroyed all the rest of the much easier effort would undoubtedly be made to sweep to Kiev and the Black Sea, break through the Balkans and join hands with the Turk, now in dire need.

The Russians could retreat for months steadily, strengthening instead of weakening as they went backward, until they could turn with crushing strength, when the German's were furtherest from their bases.

If the Germans fail in their supreme effort during the next few months or weeks, they must fail altogether, both by land and sea.

Ammunition of Turks to Last Only Fortnight

Athens, July 18.—Reports received here from Constantinople state that conditions there are becoming critical. Ammunition is running low, the supply of shells being insufficient to last a fortnight. The price of commodities has become prohibitive, and riots have occurred which were quelled only after bloodshed.

There are almost 50,000 wounded in Constantinople besides those in Adrianople, Smyrna, Dardanelles and Sea of Armora ports. The proportion of killed among the Turks is high.

On the other hand, sanitary conditions among the troops are good, although cases of tetanus are not infrequent among the wounded. The heavy casualty lists appear to be the only cause of apxiety at the orte. To fill the gaps in the Gallipoli army nearly all of the Constantinople police and gendarmerie have been sent to the front.

Owing to the ubiquity of spies severe treatment such as flogging and torture, has been meted out to all suspects in order to maintain public peace, and untnil some great military disaster overtakes them the position of the committee leaders is considered to be secure.

The oung Turks have lost the support and sympathy of the population, it is declared, and are trying to regain it by the announcement of wonderful victories over the Allies.

PULASKI TEAM SHOWED RESPECT

Secured Available Timber to Bolster Up a Weak Outfit; Were Snowed Under.

The Independents were obliged to take the short end of an 8-3 tally at Pulaski Saturday afternoon, but the humiliation of defeat is tempered somewhat by the consolation that the winning team resorted to the antique practice of playing "ringers" against a bona-fide amateur aggregation. The Pulaski players evidently held the locals in great respect, for they engaged a Syracuse pitcher and catcher and several other out of town players in an effort to make the victory more certain. The pitcher was supposed to have been a big league star at some time or other in his career, but he displayed nothing Saturday which would lead anyone to believe he ever had been any nearer the big leagues than the bleachers. The locals hit him frequently but he was accorded good support, and the stick work of the Pulaski team helped him to ag reat extent.

The locals made the trip by automobile, and played with a crippled line-up, McCullum being absent, and two other regulars missing connections.

EASY TARGETS MADE OF SYRACUSE ALL-STARS

The Fulton Red Men handed an awful beating to the Syracuse All-Stars at the Fair ground park yesterday afternoon, the final score standing 14-0 in favor of the local Indians. Jackson, the pitcher for the stellar aggregation, had nothing but his glove and his nerves, and the locals bumped him for some seventeen hits. In addition too, or rather subtraction from, his lack of curves and stuff, Jackson also showed a painful absence of head work, and pulled some raw boneheaded plays.

Painter, who twirled for the locals had a good day in spite of the fact that he had pitched Saturday. He fanned thirteen of the visitors, and had the game well in hand at all times, allowing only four hits. He was supported in good style, the work of Tad Gaughn, behind the bat, being one of the features of the performance.

It will pay you to advertise in The Evening Times' Miscellaneous Want Column. See schedule of prices elsewhere. Phone 45.

NO DELEGATES FROM FULTON

Local Automobile Club Not Sending Deligates to Niagara Falls Convention; Opens Today.

The terrible waste of money in building roads caused by the constant changes in the Highway Department will be the subject of the discussions at the State Convention of the Automobile Association held at Niagara Falls beginning today. No delegates are being sent by the Automobile Club of this city, says F. H. Morin, the secretary.

This subject has been the topic of discussion for many of the local organizations, so that now the one big convention will thrash the matter out and undoubtedly come to some conclusion which will create a differene spirit for the Highway Department. The gathering will attempt to curb the immense waste of money, demanding a hundred cents' worth of road for every dollar expended by the motorists of the Empire State.

In addition to this, further plans will be advanced for a campaign prior to the opening of the constitutional convention to awaken the public to the realization of the enormous waste in the highway construction. In order to create activity among the delegates, speakers of national and world-wide importance will be heard and will make their appeal so clear that the delegates will attempt to do some hustling on their own account when they return from the convention.

Aside from the business part of the convention, the entertainment provided by the Niagara Falls Association will be of some importance. A sight-seeing trip will be taken of the various scenes around the Falls; both on the American and Canadian sides, and a grand ball and supper will end the day's festivities.

SHIPPING PEAS TO MARKET IN BULK

The shipment of peas to New York in refrigerator cars will be tried by pea growers in the vicinity of Hamilton and Earlville, and possibly other places along the Ontario & Western Railroad. This action is along the line suggested by Prof. Frank Rexford of Brooklyn.

The great advantage of shipping in this manner is that the peas reach New York in a fresh condition, the solid container and the iced car preventing the usual sweating and spoiling when shipped in bags by express car. If the market is over supplied the peas may be held in the car as long as necessary without danger of spoiling. Several thousand baskets have been purchased by growers here and at Hamilton and Randallsville, and cars will begin moving this week or the first of next.

Black Baking Co.'s wagons serve your grocer every afternoon with fresh rolls, etc. adv

500 ATTEND UNION SERVICES

Clear Skies and Comfortable Weather Conditions Made the Afternoon a Record-Breaker in Attendence.

The attendance at the 5 o'clock union services in East Park, yesterday, nearly doubled that of the first and preceding Sunday. Clear blue skies and the absence of humidity in the atmosphere were no doubt responsible for the large attendance, which taxed the seating capacity of the open-air auditorium, and many persons were compelled to stand, but this feature did not interfere with the enthusiasm and fervor of the worshipers.

The Rev. Mr. Olmstead, pastor of the Congregational church, preached a sermon, choosing for his subject, "Some Distinctive Marks of Christion People. The text was found in Psalms 92-12. The speaker used the symbol of the palm tree and the cedar tree to express how the "righteous shall prosper as the palm tree."

In the absence of instrumental music the larger congregation made the park ring with vocal music which echoed and re-echoed through the tall trees and into the homes of people for many blocks surrounding the park.

Next Sunday's union services will be held on the lawn of the Congregational church, West Side, at 5 o'clock, when the Rev. Mr. Buck of the Baptist church will preach; or, in the event of his absence from the city, his supply will preach.

CONGREGATIONAL SUNDAY SCHOOL PICNIC WEDNESDAY

A fine program of sports and games has been arranged for the Sunday school picnic of the Congregational church which will be held on the Fair Grounds Wednesday, all day. To complete the pleasure of those who will attend the membership of the Sunday school is taxing the commissary department of each home, therefore the eats should not fall short of the demands.

ENDEAVORS TO PICNIC

The Christian Endeavor Union of the different churches of the city will hold the annual picnic at Oswego Beach tomorrow.

JAMES W. ADAMS

James W. Adams, 77, died at his home in Bundy's Crossing yesterday afternoon after a long illness.

Mr. Adams was a farmer and had lived all his life in that section where he was born.

Surviving is his widow, two sons, Normon of Syracuse and Orlie of Flint, Mich.; one brother Orlie Adams of Denver, Cal., and several grandchildren.

The funeral will be held from the house Wednesday afternoon at 1:30 o'clock. Rev. Mr. Crawford of Bundys Crossing will officiate with services at the church. Burial will be made at Fairview Cemetery.

FRANK WHITTLE

Frank Whittle, a former resident of this city died at his home in Lowell, Mass., after a short illness. Mr. Whittle was formerly engaged in the Foster knife works.

The body will be brought here tomorrow night and will be taken to the home of William H. Keeley, 510 Waldradt street from which place the funeral will be held Tuesday afternoon at 3 o'clock. The services will be in charge of Hiram lodge, No. 144, F. and A. M. Rev. J. W. Barrett will officiate.

Burial will be made at Mt. Adnah.

JAMES H. COY

James H. Coy of Almond died yesterday morning ath is home in that place. Mr. and Mrs. Coy recently removed to Almond where they expected to make their home.

The body will be brought here on Wednesday and taken to the home of Mrs. J. B. Birdsall, 208 Hannibal street, where the funeral will be held Thursday afternoon at 3:30 o'clock. Burial will be made at Mt. Adnah.

JOHN JOHNSTON

John Johnston, 55, died at his home 712 Freemont Ave., Saturday afternoon. He had been a resident of this city for 18 years.

Surviving is the widow; three sons, William, Melvin and Jerry; one daughter, Mrs. Ida Mansfield of Rochester; three stepsons, Joseph Hall, Avory Hall and Hubert Hall.

The funeral will be held from the home in Freemont Ave., tomorrow afternoon at 2:30 o'clock. Rev. Charles Olmstead will officiate. Burial will be made at Mt. Adnah.

GETTING THEM SOFT.

It was their first breakfast in their little flat after they had returned from the honeymoon trip. Lovey had asked Dovey to fix him a couple of soft boiled eggs. When the eggs were served Lovey opened one of them and found it to be as hard as a rock.

"These eggs are very hard," exclaimed Lovey. "I wanted them boiled soft."

"Well, dear, they ought to be soft," replied Dovey. "I just boiled them and boiled them and boiled them until I felt sure that they must be soft. But I only boiled them for twenty minutes. Perhaps I should have let them boil for half an hour."—Cincinnati Enquirer.

MUNITIONS ON MINNEHAHA.

Vessel on Which Bomb Exploded Carried Much Valuable War Material.

Whether or not it is ever proved that Erich Muenter, alias Frank Holt, placed the explosive on the Minnehaha which caused her to return to port, there is no proof necessary that it was a vessel literally filled with war munitions. Here are some of the things she carried:

2,300 cases loaded shrapnel shells.
1,732 cases loaded cartridges.
1,000 cases cordite.
1,400 cases trinitrotoluol. (This is a chemical of great force, which goes into high explosives.)
54 cases rifles.
325 cases empty projectiles.
4 cases firearms.
2,001 plates spelter.
955 cases and bundles brass rods and sheets.
492 motortrucks.
1 motor ambulance.
200 horses.
18 cases auto parts.
100 cases magnetos.
6 cases fuses.
82 bundles copper wire.
34 plates zinc.
10 crates air guns.

ITALIAN KING COUNTS SHELLS

Victor Emmanuel Unawed as Sixteen Twelve-inch Shells Burst Near Him.

A soldier in a letter to his parents in Rome relates this incident of the Italian king's coolness under fire. Along with the general staff, the king had visited an outpost to see how operations were progressing. The news of his presence was communicated to the Austrians by a spy. They immediately fired sixteen twelve-inch shells at the spot, some exploding within 120 yards of the king and his officers.

His majesty counted the projectiles as they fell, and then sat down on the grass and penciled out an account "to show how much it had cost the Austrians to try to take the life of one man."

What Caused His Death?

An Arizona man set a trap for rats. A dog was caught in the trap and upset a can of gasoline. The dog's barking aroused a man, who took a lighted lamp into the room and lost his life in the explosion.

Cool Presence of Mind.

Debtor (to shopgirl)—It's an outrage for your employer to have you present this bill here at the railroad station in the presence of all these people. Tell him I'll attend to the matter as soon as I get home. And now give me a kiss, so the people will think that you are a relative and have come to bid me goodby!—Fliegende Blatter.

Community Notes

Mr. and Mrs. B. H. Sharp and Mr. and Mrs. Allie Rogers spent Sunday in Skaneateles.

* * *

Mrs. Sarah H. Dow and twin daughters, Helen and Hattis, of Cambridge, Mass., are this week's guests of the Rev. and Mrs. Charles Olmstead, at the Congregational church manse. At the conclusion of their visit here Mrs. Dow and daughters will go to Niagara Falls and Montreal before returning to Cambridge.

* * *

Circle No. 9 of the Congregational church met with Mrs. Wallace Butts, in West 1st st., Saturday afternoon.

* * *

Miss Lottie Bennett spent Saturday in Syracuse.

* * *

Mr. and Mrs. Charles Murrell, accompanied by Mr. and Mrs. Ellsworth Rude, motored yesterday to Sylvan Beach. On the return trip they enjoyed a dinner at Cicero, arriving home at 8 o'clock last night.

* * *

Mr. and Mrs. John Foley, and Mr. and Mrs. Howard Post spent Sunday afternoon and evening in Syracuse.

* * *

Mr. and Mrs. "Dad" Mead have a treat in store for the members of Nehasane Lodge, Order of Rebekahs, tomorrow afternoon and evening. Their lawn in the Whitaker road will be thrown open to the Rebekahs and a picnic supper will be served at 6 o'clock.

* * *

Mrs. William Castler of Amsterdam returned home Friday after spending a few daysw ith her sister, Mrs. Michael Byrne.

* * *

Bernard Jones of Syracuse spent the week-end with his parents, Mr. and Mrs. J. L. Jones of Rochester st.

* * *

Jay Hollingsworth and wife arrived here last week from Buffalo where they will make their future home.

* * *

Mr. and Mrs. C. C. Benedict of Albany are spending their vacation with Mr. and Mrs. A. W. Wiltsie at 4th and Broadway.

* * *

Mrs. Ellen Smith of Phillips st. is improving after her recent illness.

* * *

Miss Nellie Irwin of Phoenix has been spending a few days with friends in this city.

* * *

Six members of the west side younger set spent yesterday at Ontario Beach, near Rochester. The Misses Elizabeth McNally, Katherine Walsh and Marguerite McGovern and Edward Walsh of this city, Edward Burns and John Burke of Oswego comprised the party. The Fultonians report the Beach booming, and spent an enjoyable day returning to this city last night.

* * *

Mrs. Bridget Kent of West Broadway is seriously ill.

* * *

Mr. and Mrs. Fred Mentro of Oswego were the guests over Sunday of Mr. and Mrs. Adelbert Ferguson. Mrs. Elvira Imgard of New York, who is returning from the Panama-Pacific exposition, is also a guest of Mr. and Mrs. Ferguson.

* * *

Miss Clarice Bache of West 1st st. spent the week-end in Syracuse.

* * *

E. H. Taft and Jardine Hill caught nine large black bass and a fine pickerel in the Oswego river yesterday off the library, and claim the honor of the best catch of the season in the river.

* * *

John Nutt, a west side Polack, was arrested on West Broadway yesterday afternoon about 3:30 by Patrolmen Brown and Lewis, charged with carrying a billy. He will be arraigned tomorrow morning.

* * *

Patrolman Fox of the local police force is enjoying a ten days furlough. Patrolman Lewis is substituting for Patrolman Fox.

* * *

Mrs. Bessie Seeley of Syracuse was a guest yesterday of Mr. and Mrs. Harry Allen, Oneida street.

* * *

The Misses Elizabeth and Rosanna McNally, of Jordan, who have been visiting Mr. and Mrs. John Walsh of West 4th st. for the past two weeks, will return home tomorrow. The Misses Rose and Katherine Walsh will accompany them for a short stay in Jordan.

"Herald of Progress"

Mr. Bowser Laughs

And So Do Mrs. Bowser and the Cat.

By M. QUAD.

Copyright, 1915, by the McClure Newspaper Syndicate.

The other night as Mr. Bowser settled down to his newspaper and cigar the cat leaped up on his lap, and Mrs. Bowser noticed that he didn't knock her head off at once. He is not exactly down on cats, and the Bowser cat had been an inmate of the family for many years. But Mr. Bowser is rather erratic. Sometimes he seems to love cats, and again his glare of malevolence sends them hustling for life.

Mrs. Bowser sat reading a book, and all was quiet and content within the house. Even the cook had broken her last dish in doing up the dinner dishes. The cricket on the hearth was getting ready to chirp when there came a sound like a human chuckle.

Which was it and who was it?

The sounds were repeated, and Mrs. Bowser looked up. Mr. Bowser was the guilty party. He chuckled again as he finally stroked the cat. Indeed, his chuckle became a cackle, and the cackle finally reached the ha! ha! stage.

"What on earth is the matter with you?" exclaimed Mrs. Bowser in tones of astonishment.

"N-othing—nothing 'tall."

"But there must be. You are looking red in the face and trying your hardest to laugh."

"I was thinking of—of the cat—ha!"

"What about the cat? She seems to be all right."

"Yes, she seems to be a-l-right—ha! ha!"

Mrs. Bowser stood up in her astonishment and looked at him. Mr. Bowser returned her look and continued to stroke the cat. After half a minute he asked:

"KITTIE, KITTIE! COME HERE, OLD CAT!"

"You seem to think it funny that I love our cat. Haven't you always noticed that I just doted on her?"

"Not by a jugful, Mr. Bowser. You have almost kept her in terror of her life ever since she came to us."

"She knows better than that, doesn't she?" said Bowser as he lifted the cat up against his cheek. "I have always thought her the best cat in the world and sometimes I have hurried home to dinner more on her account than on any other. Nice cat. Good old cat. I wouldn't have anything happen to this cat for a hundred dollar bill—ha, ha, ha!"

Mrs. Bowser moved toward the telephone with the object of communicating with the family doctor about Mr. Bowser's mental condition, but he stopped her with the question:

"Mrs. Bowser, how old do you call our blessed old cat?"

"Why—why—I was thinking about it a day or two ago and I made out that she was about twelve years old," she replied.

"That old? How good and kind of her to live that long. I hope she will live another twelve years to comfort this home. She will always find in me a friend and protector. Mrs. Bowser, should I ever learn that during my absence at the office you had perpetrated an act of cruelty toward this dear old cat I should certainly make you answer for it—ha, ha, ha!"

At this point the cat leaped to the floor and took up her quarters under the lounge. If the cricket on the hearth intended to chirp he gave it up, and only the voice of a street peddler came faintly to break the silence. Mrs. Bowser was more than astonished, but there was something more to come. All of a sudden Mr. Bowser half shrieked out with laughter and bent double in his chair and pounded his leg with his fist as he uttered his ha, ha, ha's!

"Excuse me, dear," he replied as he straightened up and wiped the tears from his eyes. "Of course it was foolish of me, but I got to thinking. Once in awhile one does think, you know."

"Even about cats," she sneered.

"Yes, about cats. I think I will take a little walk and drop in and see the druggist for a bit of a chat."

As Mrs. Bowser sat alone for the next half hour she wondered and wondered if anything serious was to follow Mr. Bowser's strange exhibition, but finally gave it up as one of those weak spots which now and again appear in men's characters.

Mr. Bowser returned with a faint smile around his mouth and a twinkle in his eyes, but he was subdued, and the rest of the evening passed off without alarm.

Next day Mrs. Bowser had shopping to do in the afternoon, but before starting out she said to the cook:

"Maggie, I want you to keep your eye on the cat while I am gone."

"Is she going to run away, mum?"

"I don't think so, but she may be carried away."

"By the cat and dog wagon, mum?"

"I can't say, but somehow I feel that something will happen to her unless she is watched. If Mr. Bowser comes home unexpectedly make an excuse to keep your eye on him."

"Why, mum, Mr. Bowser wouldn't take the cat away, would he?"

"Well, he was most too affectionate to her last evening. At any rate, keep your eye on the cat and Mr. Bowser."

At 3 o'clock that afternoon two or three things happened at the Bowser mansion. The cook had kitchen utensils to scour and found that she was out of sand soap and obliged to go to the grocery for a supply. The Bowser cat awoke from a nap on the sitting room rug and passed out into the back yard and the sunshine to try a little promenade on the fence to get the kinks out of her legs.

The cook was at the grocery and inquiring for her soap and accepting the clerk's invitation to attend a picnic with him at the same time when Mr. Bowser drove up to the deserted house with a farmer in his wagon. It took him but a minute to rush through the house and find Mrs. Bowser and the cook absent. From a rear window he saw the "dear old cat" on the alley fence, and hustling back to the wagon he had the horses gallop around to the alley gate.

With an empty potato sack on his arm and a smile of hypocrisy on his lips he approached the innocent victim of his wiles with:

"Kitty, Kitty. Come here, old cat. I am going to give you a little vacation. That's right. Show your trust and confidence in one who has never betrayed you!"

With that he dropped the feline into the sack and made for the wagon, and two minutes later Mr. Bowser, the Bowser cat and the farmer and his wagon were out of the neighborhood.

The cook had intended to make a two minute job of buying the soap, but, of course, it was twenty minutes before she got back to the house. Her mind being on that picnic, it was half an hour more before she looked around for the cat. Grimalkin was gone. Nor could an hour's hunt reveal hide nor head of her.

When Mrs. Bowser reached home no scouring had been done. No preparations for dinner, but nothing but tears and sighs and reproaches had taken place.

"The cat—the cat is gone, mum!" was the doleful news communicated.

"But I told you to keep your eye on her."

"I had to go to the grocery for soap."

"Are you sure Mr. Bowser didn't come home?" asked Mrs. Bowser.

"He might have come while I was at the store, mum."

Mrs. Bowser looked for the cat for the next half hour, and not finding or hearing of her she gave it up. Her mind was made up as to the fate of the cat, however, and the policy that she was to pursue was adopted.

Mr. Bowser came home at the usual hour, and he found Mrs. Bowser's attitude the same as usual. No excitement, no perturbation. He looked at her closely and made up his mind that she had not yet discovered his heinous offense.

Dinner passed off as usual. If there was suspicion abroad he did not feel that it rested on him. Once or twice during the meal he started to give a chuckle or a cackle, but at once suppressed it. It was only when he was seated again with a newspaper and cigar that he said in a careless way:

"It seems kinder lonesome without the cat around. I wonder where she is?"

"Oh, I guess she is around somewhere," replied Mrs. Bowser in equally careless tones.

"I should hate to have her lost at her age after having lived with us so long as she has."

"I am not worrying any."

Five minutes passed, and Bowser chuckled. Five more, and he laughed. Two or three more, and he said:

"Somehow I am afraid that we shall never see our dear old cat again."

"I think we shall," said Mrs. Bowser as she rose up and called to the cook through the tube:

"Maggie, is the cat down there?"

"Yes, mum."

"Then bring her up. Mr. Bowser wants to see her."

And in another minute the cook came up lugging that "dear old cat," looking a little weary, but not much worse for wear. As she dropped the feline to the floor there was a purr of "home again," and Mr. Bowser raised his hands and exclaimed:

"It can't be! It can't be!"

"But it is," laughed Mrs. Bowser. "She returned while we were eating dinner. It is a cat habit, you know."

Mr. Bowser looked from the cat to Mrs. Bowser and then back.

Mrs. Bowser looked from Mr. Bowser to the cat.

Then they both chuckled and smiled and grinned and burst out laughing, which was continued for five long minutes. Mr. Bowser put his arm around her and asked to be forgiven.

And the cat chuckled and smiled and laughed with them. It was the first time in years that Bowser had not threatened divorce, but he was seeing the funny side of things.

Concealing a Gem

By DONALD CHAMBERLIN

When I was a youngster casting about for something to do for a living I spent a good deal of time groping in the dark. I was of an adventurous disposition and longed for new fields. Finally I settled on a career.

I went out to India to seek my fortune and found—well, for three years I found poverty, then I found something better. Walking on a street in Calcutta, I saw at my feet a brilliant spot emitting the colors of the spectrum. I stooped and picked up, to my surprise, a diamond. It was not one of enormous proportions, nor yet was it small. It was worth not less than $10,000 nor more than $20,000, but as I was no judge of diamonds, I did not know. It was surely of sufficient value to take me home to America and give me a new start.

Nevertheless, I was sufficiently honest to look in such mediums as would serve to advertise its loss. I did not advertise it myself because there is so much rascality in that benighted country that had I done so I would have been beset by persons whose object would have been to get possession of it surreptitiously. I did not see any advertisement of a lost diamond, so I considered myself its owner. My theory of its loss was this: There had been a gathering of Indian potentates in Calcutta, and some one of them had dropped it. These fellows have so many jewels that the loser may not have missed it, or perhaps if he did miss it he may have considered it beneath his dignity to issue any public notice of the fact.

One incident in its finding troubled me. Upon picking it up, while I was examining it I looked up suddenly to learn if any one saw me and encountered the gaze of an Indian. There was a diabolical expression on his face that told me if he had a chance he would murder me to relieve me of my find. I put the gem in my vest pocket and walked away, not looking at the man to see what became of him.

I had a room in a low grade hostelry —I could afford nothing better—and that night in order to make sure of my gem I tied it to the palm of my hand and slept with it in my grip. During the night I heard some one rummaging in my room. I lay perfectly still, and by and by whoever was there went out. I had not told any one of my find and could not understand who could have had a motive for robbing one whose very appearance indicated poverty.

I had a friend in Calcutta who was in good circumstances. I went to him, told him of my find and that I wished to go home. He loaned me the money to pay my fare, and I sailed for San Francisco. I had not been out twelve hours before I recognized in one of the passengers the man who had seen me pick up the diamond.

It is a very uncomfortable feeling to know that you are cooped up with one who is determined to relieve you of a valuable article. It seemed to me that, whatever I did to conceal my diamond, this Indian would get it from me. I was sure that he had come on board for it, and the natives of India are so stealthy, have so many insidious ways of securing their ends, that I considered my property as good as lost.

On the forward lower deck was a coop containing chickens. They were of a rare variety and were going to some American chicken fancier. One morning, standing before the coop, a singular plan of concealing my diamond occurred to me. It was to let one of the chickens swallow it. He would hold it in his crop, and I could shadow him as the Indian was shadowing me and in time get it away from him. From my next meal I took away with me some crusts of bread and, going to the chicken coop as soon as I was sure I was unobserved, began feeding a stately rooster. He took down one piece of crust after another, and among them I fed him my diamond. It was rather large for him, but he got it down, and I congratulated myself that if it was lost to me that rascally Indian would not get it.

I visited the bird, that was now worth a small fortune, the same evening and went again to the coop the next morning. He was there in the evening, but at my morning visit I was horrified to see that he was missing from the coop. I knew that the Indian had got him, but did not trouble myself to discover how. Not a word did I say to any one on the subject. I met the Indian later walking the deck and fancied that there was a look of triumph in his eye. As for me, I endeavored to conceal any evidence of knowing that he had secured possession of my property. If he was obliged to kill the rooster for the diamond I was resolved to kill him before I would permit him to leave the ship with my property.

Where did he keep the bird? I was not long in finding out. My stateroom was in the stern of the ship directly over the steerage. In the middle of the night I heard a crow. Jumping from my berth, I threw on some clothes, ran below and hunted for the crower. I found him in possession of the Indian. I drew a long knife, with which I made a pass at the man, seized the rooster and ran with him to my room and locked the door.

I never left the room, nor did the bird till after reaching port. I killed him in my stateroom and was delighted to find the diamond in his crop. I got it safely ashore and sold it to a jeweler for $18,000.

Hints For Housewives

Look For Dishonest Measures.

The north plaza of the city hall, New York, which was stacked high with all kinds of weights, must surely have caved in were it not for one thing. The weights were false. They were not as heavy as they looked. They were not honest weights.

That is the reason they were there, for it was weights and measures week, and Commissioner Joseph Hartigan of the mayor's bureau of weights and measures had placed all the dishonest baskets and pails and scoops and balances and other weighing paraphernalia which his inspectors had confiscated in public view that passersby might see and become wise.

One of the prize fakes was a five gallon oil can, so constructed that it contained but one quart of oil. It was said that the engineer who designed this can did not mean to be dishonest. He had a grudge against John D. Rockefeller and figured that he would not let any one use his oil, like the Irishman who bought a ticket and then walked, to get square with the railroad.

Another infernal machine was a large ice scale which gave only thirty-five pounds when it registered 100. When the iceman was arrested he said the ice had melted on the way up the dumbwaiter.

On one side of the exhibit was a pile of baskets, such as are used to mismeasure fruit and vegetables, while on the other a large stack of short weight paper containers gave mute evidence of the fortunes to be made in the ice cream business. A prominent confectioner accused of possessing these containers asserted that he only used them when selling ice cream and water ices to young ladies, as he could not bear to see them injure their complexions.

An interesting balance was one with a wire attached, connected through a hole in the counter with two weights weighing eighteen ounces below. By this device an ostensible five pounds of coffee became in reality only three pounds fourteen ounces.

While this exhibition was exposed to the elements, safely housed on the third floor of the Municipal building, in Commissioner Hartigan's office, was a display of correct and proper scales and measures of all sorts. At this office the commissioner is busy organizing what is known as the Consumers' league. Already 61,000 women have joined this organization, and by the end of three months the bureau expects the enrollment will be more than 200,000. This league, composed of housewives, will spread the propaganda of honest weights and measures by insisting on them when making their purchases.

When Ice Cream Sticks.

Ice cream is sometimes frozen so hard that it does not come out of the mold easily. When this happens let the cold water run over the outside of the can. The water is so much warmer than the ice cream that it melts it sufficiently to start it out and does not melt it enough to spoil the shape of the mold.

How to Clean Matting.

When matting is soiled rub it with a soft flannel cloth dipped in lukewarm salt water. Rub the spots with moistened cornmeal; then go over the whole surface again with salt water, this time cold. Wipe with a dry cloth. This method of cleaning does not turn the matting yellow, as water usually does.

If You Need More Fat.

If your physician advises you to eat more fat see that your diet includes plenty of cream, butter, olive oil, bacon, walnuts, pecan nuts, egg yolks, suet, salt pork, salmon and beef and mutton fat. All these foods contain a very large percentage of fat.

Cleaning Mackintoshes at Home.

Spread the mackintoch out flat on the table and scrub with warm water and yellow soap, in which a little carbonate of ammonia has been dissolved. Rinse in cold water and hang in the air to dry. On no account put it near the fire.

This Drives Mosquitoes Away.

Wind a piece of paper around a pencil and fill the tube so formed with Persian powder. Stand it in a dish of sand and burn it an hour before bedtime. This drives the mosquitoes away and so insures an untroubled night's sleep.

Bran For White Paint.

A plain cloth dipped in hot water and then in a saucer of bran will clean white paint and not injure it. The bran acts like a soap on the paint.

Brightening Rugs.

Throw coarse salt over rugs and carpets before sweeping them to prevent the dust from rising. This will brighten the color also.

To Sharpen a Knife Quickly.

A strip of emory cloth tacked to a small square board will be found useful for quickly sharpening the carving knife.

Ironing a Bias.

Be sure to iron garments with the straight of the goods and thus prevent stretching of the bias seams.

Uncle Sam's Formidable Naval Base In the Pacific Ocean.

When it was seen that Manila was useless as a defense for this country and would be a handicap instead of a help in war Pearl harbor, on one of the Hawaiian islands, nine miles from Honolulu, was selected, and $13,000,000 was appropriated by congress for its fortification. It has a better harbor than either Gibraltar or Helgoland. A concave sweep of land makes the harbor, which is crowned by a long ridge of gigantic trees and rugged and tumbled rock that terminates in an extinct volcano, known as Diamond Head. A frowning mountain side hides a beautiful lake that is reached from the sea by an inlet like the neck of a bottle. It covers eleven square miles, with a depth of about sixty feet over nearly all of it. The neck that leads to the sea is three miles long and hardly wider than necessary for vessels to pass. Parallel with the coast is a coral reef a mile wide. Through this a channel a thousand feet wide has been cut.

It has been equipped with one of the most complete naval stations in the world, a mile square in extent. It has a drydock, which is the largest in the world, a $400,000 ammunition plant and oil tanks for vessels. The fortifications, extending for fifteen miles to Honolulu, consist of powerful batteries, with cement emplacements below the ground level. The ends are guarded by two forts, neither of which can be seen from the ocean. On the land the guns are defended by a series of earthworks that form a crescent from the harbor to Honolulu. In the extinct volcano is a mortar battery. The four mortars of this battery have an extreme coast range of nine miles, throwing twelve inch shells weighing 700 pounds. The seacoast defenses have fourteen inch guns, and the forts are supplemented with submarine mines, controlled by electricity.

Pearl harbor is about 2,000 miles from Unalaska and from Samoa at opposite ends and a little less from San Francisco. So with this impregnable base a fleet can guard the whole range of the Pacific for this distance and have this safe retreat for refitting and fresh supplies.—Technical World Magazine.

THE MAN OF FORTY.

As a Rule, He Still Thinks He Can Put Off Doing Things.

At the age of forty a man has reached a time of life when it is hardly one thing or the other. The past years have not been so many as to permit one to lay down his arms and retreat in quiet to the shade. It is still not too late to strive and perhaps to achieve. On the other hand, so much dusty road has been traveled that if one finds it has not led him far on the way he meant to go he can hardly delude himself with the fancy that he can yet go back and begin the journey anew. The pleasant sense of superfluous time is gone; one must hurry, and perhaps it is too late.

Then comes the grief of perceiving the waste, the loss, the utter futility of postponements. The world is full of good and wonderful things. What a wealth of potential experience and emotions, and time and opportunity for so little! And yet year after year one goes on blindly and blandly putting off to some more convenient or appropriate time, to that impossible period when all will be exactly right, things he wants to do and can do—a kind action, making a new friend, or altering a whole career!

Once acquired, the habit of postponing persists. Hope springs eternal, and a man of forty finds himself counting complacently on some day taking up hunting or entering politics or circling the globe.—Robert L. Raymond, in the Atlantic.

Pipes Frozen by Warm Spells.

It is a curious fact that water pipes under ground will often freeze during the warm spell that follows a cold snap. The explanation made for this interesting phenomenon is that after a cold wave a large quantity of heat is taken from the ground in the work of changing the frozen moisture into water, and thus, on the principle of the ice cream freezer, the pipe is chilled, enough heat being taken from it to freeze it.

Inseparables.

"Sweet and low; heart and soul; tooth and nail; hammer and tongs."

"Rain or shine; fair and warmer; odd or even; put up or shut up."

"Thick or thin; ham and eggs."

"Tall and stately; black and blue."

"Hue and cry; gay and festive; meek and lowly; safe and sane; pro and con; touching on and appertaining to."

"So and so; fine and dandy; down and out."—New York Mail.

A Record of Profits.

He (puzzling over wife's checkbook)—Why, my dear, I can't make head or tail out of these stubs. They foot up more than you ever had in bank. She—Oh, that's all right, dear. I just used the stubs to keep tab on what the things were before they were marked down, so as to show how much I made; don't you see?—Pittsburgh Press.

Forlorn Hope.

Bride (half crying)—Oh, dear, something terrible has happened! My whole Sunday's roast has burnt and it cost me 8 marks! (Suddenly illuminated by a brilliant idea). But, say, my dear, we have a fire insurance, haven't we?—Lustige Blaetter.

Closer Than a Brother.

"That French count sticks very tight to your skirts, Mae."

"Yes. I fancy he must be the original plaster of Paris."—Judge.

Simple Tailored Suit

Designed by Hickson & Co., New York.

THIS style developed in lightweight serge is appropriate for beach or promenade, but it is also an advanced style which will be much favored for practical fall wear made of heavy diagonal ribbed serge. For summer wear it is particularly effective in fine white serge because of its simple tailored lines, as an all white suit is always deprived of half its charm when made elaborately. The coat has a moderately high waist line, and both the front and back of the long peplum fall in one wide box plait. It is finished at the waist line with a crossed belt of the same material and buttons plainly up the front, ending in a high stand up collar. The skirt is made without plaits, and the whole model is exceptionally smart. ANNA MAY.

HELPFUL HINTS FOR HOUSEWIVES

Egg Beater That Is Operated by a Vertical Lever.

Nearly all egg beaters are designed upon the crank and wheel principle, but in a new one recently patented the rotary motion is supplied by the vertical movement of a lever which is said to be much more satisfactory for many reasons, the main one of which is that a greater speed may be secured by less exertion. While it is designed particularly for egg beating, a great number of similar operations may be performed with it, such as making mayonnaise and mixing cake batter. The apparatus is secured to a table, and the eggs or other material to be treated are placed in a deep glass receptacle into which the beaters descend. A slight movement of the lever is sufficient to violently agitate the shaft on which the beaters are mounted, and the aeration of the eggs is quickly accomplished.

Scotch Cabbage Soup.

Required: One firm, white cabbage, two ounces of butter, two heaped tablespoonfuls of medium oatmeal, one small onion, one pint of milk, one and a half pints of water, salt and pepper. Well wash and carefully examine the cabbage, then cut it into thin shreds. Throw it into a pan of fast boiling water and boil it for five minutes, then drain off this water and throw it away. Melt the butter in a saucepan, add the chopped onion and the cabbage and let them cook gently for five minutes; then add a pint and a half of water, and when it reboils sprinkle in the oatmeal. Add a little salt and let the soup boil gently until the cabbage is quite tender. Stir it now and then or it will stick and burn. Lastly, add the milk, and if the soup seems thin do not use all. Season carefully and serve it in a hot tureen, with toast or fried bread cut in neat dice.

Cleaning Frying Pans.

All frying pans and omelet pans should be cleaned in the following way: Directly they are done with pour off all the fat and then wipe them thoroughly with fresh pieces of paper till these come off quite clean, and when the pan is rubbed over with a clean cloth there should be no stain on it. If by any chance one of these pans has got burned at any time dip a cloth in salt and rub this well on the pan till the burned part is removed. Or crushed eggshells can be used in the same way. If any tin pots and pans be used remember that after cleaning they must be kept in a warm place and, of course, thoroughly dried, for otherwise they are apt to rust at the seams.

Stuffed Potatoes.

Required: Large, even sized potatoes, for each potato a tablespoonful of grated cheese, one tablespoonful of chopped cooked meat, one teaspoonful of chopped onion, parsley and dripping. Scrub the potatoes, bake them until they are soft inside. Cut one end off each and carefully scoop out with a small spoon. Mash them smoothly and mix it with the cheese, meat, parsley, onion, warmed dripping and seasoning. Refill the skins with this. Reheat until very hot all through and serve at once.

Mutton Bone Broth.

When buying mutton or lamb for a roast bring home also the bones which the butcher removes and make a nutritious broth for lunch. Put the bones into the soup kettle, cover with three pints of cold water, add four tablespoonfuls of pearl barley and allow to heat slowly. When boiling skim carefully and set the kettle back that the broth may simmer for two hours. Season well with salt and serve very hot in bouillon cups.

Lingerie Ribbons.

Colored ribbons which are used in embroidery or lace and which must be removed before laundering can be easily replaced by this method: Tie a white wrapping twine to one end of the ribbon, draw the ribbon out and the string in and untie. After washing reverse, drawing the ribbon back into place.

Fruit Punch.

Squeeze the juice of four lemons and two oranges into a glass bowl or pitcher. Add a small can of shredded pineapple and put in any berries that you wish. Add a generous quantity of cracked ice and sugar to taste. Add a quart of carbonated water and garnish with a generous bunch of mint.

Rust.

Rust is a compound of oxygen and iron that only forms in the presence of water.

A Native View of the Oriental Brand of Politeness.

A Chinese, unlike an American, who would oppose other men's viewpoint till it ends in an altercation, is always courteous and answers a question with "Yes, yes, yes, yes." In case he disagrees with his opponent he will say: "Your honor will take more time to reach a better conclusion. Your honor is quite right, but perhaps you may have a wiser opinion later on. I, worthless little brother, think somewhat differently from you. However, my ignorant conclusion may be wrong and yours right. I beg your excellency to think over the matter."

But oriental politeness has its bad aspect. It takes too much time. If a guest is leaving his host's door he has to turn his head and ask a dozen times that the host should not accompany him any farther. The same is true of tea drinking, and there is a great deal of ceremony between host and guest. So it is with dinners and every social gathering. Even in fighting a duel one person—provided both are gentlemen—will say to the other, "Pray hit me first." The other refuses and says, "Oh, no; please you hit me first."

Politeness is especially manifested in the form of an invitation. Few Chinese go to an invited dinner on time; instead they delay for an hour or so. Polite in the extreme, although consenting to accept the invitation, they would not go to dinner until pulled and dragged in a gently rough manner by their host. Knowing the habit of his guests, the host always turns out all the members of his family to drag one after another of his invited friends to the dinner. A youngster is often sent out by his mother to hunt their guests like a hound, and, finding them, drag them like mules to his mother's house. Observing such customs, foreigners usually laugh, but they laugh mistakenly.—H. K. Tong in New York Independent.

KINGSLEY STAMMERED.

And George Eliot Was a Bore, According to Mrs. Walford.

Mrs. Walford, the novelist, published some years ago a novel of memories of Victorian London, in which allusion is made to many persons in the world of letters. One of Mrs. Walford's acquaintances in the faroff days was Charles Kingsley:

"One day Charles Kingsley came in, and we had an opportunity of seeing if he were like his photograph which had been sent to Mary or not. To own the truth it flattered him, as he is so very red in the face, perhaps from leading an out of door life in all weathers. * * * In ordinary conversation Mr. Kingsley stammers a good deal; but, being conscious of it, he has taken pains to overcome the defect by speaking very slowly—almost too slowly, for when we heard him make a speech on one occasion we felt inclined to goad him on it became so tiresome."

"Tom Brown Hughes" Mrs. Walford described as "a man neither tall nor short, neither stout nor thin, with fair hair and blue eyes and a round, pleasant face."

In 1876 Mrs. Walford first met George Eliot at the house of John Blackwood in Edinburgh, and concerning that occasion she says:

"Much did I look forward to that evening, but—shall I confess it?—it ended in disappointment. * * * George Eliot, with her large head and rather horselike face and portentous manner, was not to me an attractive personage. * * * I had been set down beside the guest of the evening at her request * * * and she had meant to be civil and kind. But how heavily drave the wheels of her chariot! How interminably dragged that interview!"

Some may wonder, says the Westminster Gazette, what George Eliot thought of Mrs. Walford.

Our Medal of Honor.

The medal of honor, which congress awards for unusual bravery, is a five pointed star that bears a medallion of Minerva, the inscription, "United States of America," and a laurel wreath surmounted by the single word, "Valor." The order dates from the time of the war between the states. It is given sparingly and is one of the most highly prized of military decorations.—Youth's Companion.

A Dose of Iron.

Anxious Mother—It was after nine o'clock when Clara came down to breakfast this morning, and the poor girl didn't look well at all. Her system needs toning up. What do you think of iron? Father—Good idea. Anxious Mother—What kind of iron had she better take? Father—She had better take a flatiron.—New York Sun.

The Ruling Passion.

"Pa, with all his money, will never let us take our rightful place in society." "Why, he's most indulgent. He has just bought the family a magnificent automobile." "Yes, but unless we watch him all the time he can't resist the temptation to take on a few paying passengers as he rides around."—Louisville Courier-Journal.

Thoughts.

Thoughts are much greater than things. They are vital forces and have endless effects. What you think today determines what you will be in years to come.

Would Qualify.

Possible Employer—Hm! So you want a job, eh? Do you ever tell lies?

Applicant—No, sir, but I kin learn.—New York Times.

Guard against making a liar of the friend who praises you.

Care of the Baby In Summer

Weaning and Supplementary Feeding.

[Prepared by the children's bureau, United States department of labor.]

Many a mother looks forward with dread to the weaning period as one fraught with trouble to herself and more or less disturbance for the baby, but this need not be so.

One of the difficulties of weaning is the baby's objection to the rubber nipple, but if he has been given his drinking water by means of a nursing bottle throughout his life, he will already have learned how to use it.

Another and the principal trouble with weaning is to find food that suits the baby, and on which he thrives, which may safely be offered to him in the place of breast milk. Much of this trouble may be avoided if the weaning is done so gradually that the baby learns to take cows' milk while he is still getting breast milk to keep his digestive processes in good order.

Some of the rules for successful weaning are these: First, never wean a young baby until every means for keeping up the breast milk has been tried; second, do not wean the baby in the heat of summer, and, third, do not wean the baby because you think your milk disagrees with him. The trouble is almost certainly not with the quality of your milk, but because you do not have enough of it.

The way to wean the baby comfortably is to begin at the eighth or ninth month to give him one bottle feeding a day in place of one breast feeding. A little later another bottle is added, and so on until at the end of the year the breast is taken away altogether. These bottle feedings should consist of clean fresh cows' milk, diluted and sweetened. It is necessary, however, to remember that a baby who has been breast fed all his life cannot immediately digest cows' milk, as a bottle fed infant has learned to do. Accordingly a very weak mixture should be used to begin with. For example, for a baby of nine months of age the milk should be that intended for a bottle fed baby of four or five months. The strength of the food should be gradually increased, if the baby shows no signs of disturbance, until the full strength feeding is reached.

When a baby is weaned at the end of the first year he may be taught to drink directly from a cup and to be fed with a spoon.

It sometimes happens that the mother thinks her milk does not agree with the baby because he cries a good deal or is not gaining in weight. Under such circumstances, often with the advice and encouragement of her neighbors, the young mother weans her baby, even though he may be only a few weeks old. This is almost always a mistake. The trouble is not that the mother's milk is poor in quality, but because there is not enough of it. Instead of weaning the baby the mother should do all in her power to save it and to increase it for the baby's sake by eating more nourishing foods, such as eggs, meat, milk, fresh vegetables and good bread and butter, by taking plenty of fluid, water or milk, and by taking more rest and plenty of out of door exercise. Above all, she should stop worrying. Nothing more seriously interferes with successful nursing than worry and anxiety on the mother's part, and as far as possible a nursing mother should be relieved of the causes of mental disturbance, not only for herself, but even more for the sake of the baby.

At the same time, the baby will require some additional food. He should be given one or two prepared feedings in a nursing bottle each day until the mother's milk has increased sufficiently for his needs. The same rules govern "supplementary" feeding, as it is called, as those which apply to artificial feeding, except that a much weaker milk mixture must be used for a baby who has had nothing but breast milk from birth than for a bottle fed baby of the same age.

The mother should nurse the baby at least four times a day in order to keep the breast in good order and to induce a greater milk supply.

If the mother can have the help and advice of a good doctor at this time she should seek it, or take her baby to an infant welfare station. The country mother who cannot readily go to a doctor should have some good book to help her. The children's bureau of the United States department of labor, Washington, will send a pamphlet called "Infant Care," containing simple directions for the care of the baby, to any one who asks for it. This publication also contains many references to standard books on the subject.

Odds and Ends.

A lightweight moire with irregular and only vague water design is used for silk coat and frock costumes, but not extensively, and much more often in combination with other materials than alone.

As for taffeta, it seems to have reached the top note in favor, but instead of being made up in semitailored styles is seen more often in quaint models reminiscent of 1830 and in many cases with much fussiness of trimming detail.

Viewing the fashion field casually and impartially, one is impressed with the fact that an exaggerated fussiness threatens to characterize the season's modes. The clever dressmaker and the clever woman will avoid these styles.

SAY SUBMARINES ARE COMING HERE

New German Undersea Boats Can Cross the Atlantic.

WARNING IS GIVEN SHIPPERS

Von Tirpitz Is Said to Be Ready to Sink Some of the Ammunition Boats Now Plying Between American Ports and British Isles—Talk of Secret Base on Coast.

A German submarine is expected to appear off New York harbor any day. The British admiralty in anticipation of such warfare has made extensive preparations to counteract it, but keeps secretly guarded the steps taken.

All along the Canadian Atlantic coast, from New Brunswick to Labrador, public warning has been given to merchant ships and fishermen to be on the lookout for signs of a German attack.

As a result the British naval authorities in Halifax and in the United States are receiving daily reports of suspicious craft along the northeastern coast, which indicate the alertness of fishermen. None of these reports has proved well grounded.

New U Boats Can Cross Atlantic.

There have been reports for six months that the Germans would attempt to establish a secret supply base for their submarines on some almost deserted island off Newfoundland or Nova Scotia. The new U boats can cross the Atlantic and would need only oil fuel and provisions to enable them to raid southward along the coast, destroying British ships from New York or out of the St. Lawrence.

The British naval authorities assert there is no possibility of any supply station being established. The whole northern coast is on guard. Every island is being searched.

The real German plan, so the naval sharps predict, is for one or more of the submarines to steam northward along the coast of Norway to meet with a supply ship and then proceed across the Atlantic, north of the regular track of ships, and when near the coast of America turn southward.

Then the mother ship will load the submarines to capacity with fuel and provisions and cast them off to do as much damage as possible off the American coast to British ships.

It is said they will approach New York and try to catch some of the guarding British warships and the big merchant craft steaming with foodstuffs and munitions of war for England.

When out of fuel the submarines will run into some United States port and there intern, the report says.

HAS THE LONGEST NAME.

In Fact, It Is So Long There Is Not Room For It In a Headline.

Demetrios Pappatheothorokoummountorgeotopoulos of Moline, Ill., has been declared the winner of the long name contest conducted by clerks of the postoffice at Duquoin, Ill. Demetrios walked under the wire, all other contestants getting the distance flag.

Several weeks ago newspapers contained an account of the marriage of Frank Matus and Miss Anna Stainqenskaitiskitage, which took place at Weaver, Ill. Among the letters of congratulation on her change of name were two from Miss Mae Makoupakomalouskis of New Bedford, Mass., and William J. Pappademanakakoopoulos of Kirksville, Mo.

When the letters passed through the Duquoin postoffice the clerks, after struggling with the pronunciation, inaugurated a contest, open to any one in the United States. It was declared closed on receipt of the entry of Mr. Papatheothorokoummountorgeotopoulos.

FORECASTS A RECORD CROP.

2,814,000,000 Bushels of Corn Are Promised by Government Report.

A corn crop of 2,814,000,000 bushels, exceeding expectations by more than 60,000,000 bushels, is estimated in the last government crop report. This is the first report of the year on the size of the corn crop. The crop condition is 81.2 per cent, as compared with 85.8 last year at this time.

The record corn crop was 3,124,746,000 bushels in 1912. Last year the promise at this time was for a crop of 2,968,000,000 bushels, but the crop actually harvested was 2,672,804,000 bushels.

The area planted this year is a record, 109,273,000 acres. The acreage in 1912 was 107,083,000. Last year's acreage was 103,435,000. The increase in acreage this year, it is thought, points to crop diversification in the south, corn in part supplanting cotton.

War Makes London Smokier.

One of the curious effects of the war is that London is smokier than ever. War has filled the factories with unskilled stokers, who do not know how to feed the furnaces so as to produce the best combustive results. All London is now complaining of the smoke nuisance.

Judge a Janitor Too.

Because he swept out his own office while probate judge in Texas county, Mr. T. J. Hale has been awarded $234 for janitor's services by the supreme

BOULEVARDS IMPORTANT.

Of the different factors entering into an intelligent city plan one of the most important is the laying out of boulevards providing direct routes to the different portions of the city through attractive territory. The greatly increased use of automobiles as a means of transportation necessitates direct thoroughfares between the important points of the city, and the fact that these thoroughfares are so extensively used, not only by the local population, but by those living within a large surrounding area, makes it desirable for a city to provide both direct and attractive routes between its main centers.—W. H. Connell, Chief of Philadelphia Bureau of Highways.

FOLLOWING THE CLEANUP.

New Orleans Sends Printed Reminders to Its Citizens.

Keeping the city in order from day to day, after the annual cleanup, is a problem which requires some ingenuity. To ward off a relapse into carelessness on the part of its spring cleaned citizens the department of public property of New Orleans has recently issued a set of small folders called the "City Beautiful Series," which it is expected will be effective in producing results. These are printed in a style to make them attractive and interesting and are unique as to contents. In each case, as a practical part of the argument, it is stated that the department is determined to put an end to the throwing of papers and rubbish upon the streets and that stringent measures will be adopted to punish all violators of the city ordinances upon this subject.

These warnings are distributed by the citizens' committee, which consists of representatives of the board of trade, New Orleans Association of Commerce and other commercial organizations. Each ward in the city also has a representative on the committee, and the Women's club has rendered valuable assistance in circulating the folders. It is interesting to note that each of the seventeen wards of New Orleans has a club devoted to the beautifying of its surroundings and that a representative from each precinct reports progress at the ward meetings.

To Protect City Trees.

Small boys who tear "switches" from trees planted along the parkways of streets and delivery wagon drivers who allow their horses to make a meal of the long hanging leaves of those same trees are henceforth to be the object of vigilance of the streets and tree planting committee of the Municipal Art league of Chicago.

Mrs. H. S. Newton, chairman of the committee, spent a day inspecting the newly planted Carolina poplars which have recently been placed by the league along Warren avenue.

"We want the streets of our city to look like some of those beautiful avenues in large cities of Europe, where the trees have become famous," she said. "This we can accomplish if the trees are not molested. The greatest menace to the life of the trees is the mischievous boy and the driver of the nibbling horse. When we secure the co-operation of these two classes of individuals our object is assured."

To plant trees along the structure of the Metropolitan elevated railroad is the plan of the committee.

"One of the hideous things of the city, the great iron structure, will then become an asset," said Mrs. Newton.

About 300 trees have been planted thus far by the committee in the vicinity of Warren avenue and West Monroe and West Congress streets.

Fighting the Billboard Nuisance.

In a decision delivered not long ago the supreme court of Illinois upholds the principle underlying Chicago's present billboard ordinance. Not only is the measure declared valid, but the reasoning of the court indicates that even a stronger ordinance dealing with the billboard would be sustained.

As the contest over this nuisance is going to the supreme court of the United States, where the frontage consent feature of the existing ordinance may be the special object of attack, opponents of billboards are seeking to improve the measure. Instead of providing, as does the ordinance as it stands, that billboards may be permitted in certain conditions only with the approval of the majority of the property holders in the neighborhood, the city council is now asked to prohibit absolutely billboards within 250 feet of any hospital, church or school, in blocks in which one-half or more of the buildings are used exclusively for residence purposes and in vacant blocks adjoining residence blocks.

Prize Plan For Street Intersection.

John Floyd Yewell of Peekskill, N. Y., won out over 200 competitors and was awarded first prize by the jury of awards of the Municipal Art society of New York city in its competition for the best architectural solution of the intersection of an avenue and a street. His plan provided for a tower in the center of the intersection, with the angles of the buildings on the four corners cut off so as to allow rotary circulation. The car tracks on the cross streets were depressed so as to pass under the avenue, and vehicular traffic, leaving the street at another point, also passed under the avenue on the lower level. This plan involved a very slight amount of condemnation of property.

THE CITY BEAUTIFUL

CHILDREN'S GARDENS IN A NEW YORK COUNTY.

Government Specialist Gives Some Interesting Results of His Observations.

Dr. C. D. Jarvis, the government specialist in children's quarters, recently made a tour of inspection in Westchester county, N. Y., under direction of the federal bureau of education in co-operation with the International Child Welfare league.

"Although some of the towns have not yet been heard from," said Dr. Jarvis in commenting on his work, "the present reports show that 3,671 school children of the county have home gardens and 1,001 other children have plots either at school or on near by vacant land.

"We now find that the boys and girls are able to carry on much larger garden projects than we formerly believed.

CHILDREN'S GARDEN IN A BACK YARD.

We find also that by giving the boy a man's job and by putting the work on a business basis there is no trouble in maintaining interest. In many cases the children have utilized every available foot of land in their back yards, but too often they have spaded up only enough ground to plant the few seeds that have been given to them or that have been purchased.

"In some cases the size of the garden enterprise is limited because of a mistaken idea of the teacher or parent regarding the child's ability, but more often the number of available pennies with which to buy seeds is the determining factor.

"The distribution of seeds gratuitously among children is not recommended, except where no other provision has been made for them to obtain seeds in sufficient quantity to plant all their available ground. Where children are required to buy their supplies they are taught the value of money and are given a wider business experience. One of the chief objects of the work is to cultivate in children the quality of self reliance, and this must come from independent effort."

One of the interesting features of the work as brought out by Dr. Jarvis was that most of the children, even the girls, preferred raising of vegetables. Some of them, however, have made attractive flower beds, and others have planted fruit trees, vines and bushes.

VACANT LOT IMPROVEMENT.

West Philadelphians Made Playground of Neglected Space.

How an unsightly vacant lot, strewn with tin cans and all manner of refuse and containing stagnant pools to breed mosquitoes, quickly can be changed into a playground to develop healthy children and provide outdoor amusement for elders has been demonstrated by residents of West Philadelphia.

The residents got together; they formed the West Walnut Street Outdoor association; they elected officers; then committees were named, and one of these visited the owners of the vacant lot. Of course the owners didn't like the vacant ground to be an eyesore. Would they permit the people to turn it into a playground? Certainly!

Other committees solicited members and funds and bought equipment. Now there is a board fence around the lot, the tin cans are gone, and so are the disease breeding pools. In their places are to be seen tennis, croquet and quoits courts, 220 yard running track, swings, seesaws and other amusement equipment. Sixty men of the neighborhood are subscribers to the upkeep, and 150 children are enrolled.

The members of the West Walnut Street Outdoor association say they haven't done anything wonderful. They simply state that they cleaned up a neighborhood disgrace and that people in other sections can do the same if they will only start in hustling. The members wish it known that Director of Public Health Ziegler and Chief Connell helped them a lot in their cleanup work.

COMMUNITY CENTER USE IN WISCONSIN.

Great Increase During Past Year In Use of Schoolhouses.

Five hundred and nine schoolhouses in Wisconsin were used as community centers in 1914-15 as against eighty-six so used in 1910-11, according to a report compiled by Edward J. Ward of the social center bureau, University of Wisconsin extension division. Twelve hundred and sixty-five community meetings were reported in the former period, 9,031 in the latter.

Five years ago only one principal had undertaken the duties of the community secretaryship; last year 152 performed such services. In 1910 a dozen schoolhouses were used as polling places; in 1914-15 over 100 school buildings were so used. Not until 1913-14 is any school principal reported as serving in the capacity of voting clerk; last year seventeen school principals did this work.

Not a schoolhouse in the state reported gymnasium equipment in 1910-11; 130 are now thus equipped. Fifty-five public school libraries were in use in their respective communities in 1910; now 479 such libraries are in use. Two dozen young people's organizations were reported in the public schools in 1910; over 200 such organizations are now in existence.

No community secretaries were regularly employed five years ago; last year seven communities employed such officers.

These figures are taken from responses received in answer to a questionnaire sent out to 900 school principals throughout the state.

ORNAMENTAL WINDOW BOXES

Often Can Be Made to Atone For Architectural Incongruity.

A properly designed window box, suitably planted with trailing vines and a harmonious selection of colors, can often be made to atone for a vast amount of architectural incongruity in the house itself. Even in the most skillfully designed work the need for some softening effects about the windows can be felt. Aside from the charming exterior effect of such an arrangement, the bright colors and the scent of the flowers add greatly to the interior atmosphere of the house, while the view from a window is greatly enhanced by being framed in by the foliage of growing plants. Great care should be taken to secure the boxes from falling on passersby.

The window box may be made of white pine, painted to withstand the weather, or oak or chestnut stained, strongly put together and braced, and should be lined with copper or zinc with suitable apertures for drainage. The soil is put directly into the metal lined box so formed.

Of the planting it is enough to say that there should be a vine of some sort to hang over the edge, thus softening the rigid lines of the box, and that the flowers selected should be such as harmonize in color. Plants which form constant masses of bloom are best. It is well to provide several flowers which blossom in rotation, thus insuring a continuous effect. Pansies, heliotrope, giant mignonette, myrtle and similar plants are suitable for small boxes, while foxglove, salvia and digitalis may be grown in the larger ones. Geraniums are hardy and because of their bright coloring and fragrance make an excellent combination for the smaller window gardens.

Rubbish In City Parks.

A vigorous campaign has been instituted in New York city against the throwing of rubbish in city parks. Mayor Mitchel, Police Commissioner Woods and the park commissioners instituted the crusade, and the city magistrates have co-operated, with good results. Numbers of malefactors in this respect have been admonished, while others have been arrested and fined. A great improvement has resulted, and the arrests now are few and far between.

Dr. William T. Hornaday, director of Bronx Zoological park, gives the following testimony:

"For fifteen years we have been trying to educate the persons who come to the zoological park on Sundays into the knowledge that the park was not built for a big rubbish can. Now on Monday the park employees can put all the peanut shells into a silk hat and the waste paper into a receptacle just as small. The result is very satisfactory."

THE GROWING CITY.

Everywhere the growing city has to meet the problem of readjustment. The boy putting on long trousers takes thought as to his future and is better for doing so. It is equally well and normal for the city to do these things, and all kinds of cities all over the world are doing it.

So it has come about that what is called city planning has developed into one of those rare and epoch marking world movements that are the great milestones of history and that influence civilization.—Charles Mulford Robinson.

BRIGHT BRIEFS.

The majority of men are like clocks—either too fast or too slow.

Hope may bud when it is cloudy, but it blooms only in sunshine.

A short sighted man always expects his neighbors to look through his glasses.

The more we need advice the less likely we are to appreciate the kind we get.

There is always something coming to us that we should like to see sidetracked.

If you are looking for trouble you don't need to spend any money on a periscope.

If you are skilled you have self confidence; if you have self confidence press on to success.

Lots of men never get anywhere because they spend all their lives trying to trade places.

Life could be made a great deal happier if memory could be put under perfect control.

Alternate labor and rest, judiciously used, enable the wise worker to endure much and go far.

Never tell a man you have a cold. It only gives him an opportunity to offer a cure. Safety first.

When a man misses the road to success he usually insists that some one changed the guideposts.

Mexico has about everything that could serve to complicate its affairs except an energetic peace movement.

Current Comment.

What's become of the swat the fly campaign?—Detroit Free Press.

Flour prices continue to rise and fall, but they rise considerably farther than they fall.—Chicago News.

BOMBS FOUND ON FOUR FREIGHTERS

None Exploded, However, on Ships From New York.

THEIR ORIGIN A MYSTERY.

Agent Returning From Havre Reports the Finding of Chemicals In Cargoes of Vessels Bearing Munitions For the Allies—Vain Hunt For Clews on Both Sides of Atlantic.

Attempts made to blow up four freight steamships sailing from New York for Havre in April and May by concealing bombs in the holds became known through the arrival of H. C. Hill, a passenger on the French liner Espagne, who was in Havre when two of the explosives were discovered. The vessels were all English freighters that had been chartered by the French line to carry auto trucks, tractors and munitions of war to Havre for the French government.

The first steamship was the Devon City, sailing on April 27, followed by the Lord Erne and the Cressington Court on April 29 and the Bankdale on May 8. These ships were loaded at the piers in South Brooklyn. In each case two bombs were placed on board in different parts of the ship amid the cargo, so that if one explosive missed fire the other might burst.

Mr. Hill, who handled one of the bombs found in an autotruck case at Havre on May 28, said it consisted of two metal cylinders covered with wax. One cylinder was filled with sulphuric acid and the other with some high chemical explosive, the idea being that the acid would eat through the metal and set the explosive off when the ship was in midocean. The second bomb on the Bankdale was found at Havre on May 30, hidden in a sack of wheat, where it would have been smothered even if it had exploded, Mr. Hill said.

Clews Sought In Vain.

French detectives at Havre searched the cargoes of all ships coming from United States ports because similar bombs had been found on the Cressington Court and the Lord Erne, which arrived there on May 17 and 18, respectively, but no clew could be found among the crews as to the manner in which the explosives had been placed.

Captain Proctor of the Devon City found two bombs wrapped up in paper on top of the cargo down No. 2 hold four days after leaving New York on April 27. He threw one of them overboard and kept the other as a souvenir after carefully removing the contents to avoid any mistakes later, he explained. Whoever had taken the bombs on board the Devon City did not have time to secrete them in the autotruck cases or wheat sacks.

The finding of these explosives on the four British freighters was reported to Washington from Havre, and the piers in South Brooklyn were visited by secret service agents to get some clew, but without success.

It was after the receipt of this message from Havre that stringent instructions were issued to the employees at the French line piers not to allow any strangers on board the liners on sailing day. This order referred also to the officers and crews of other vessels of the company that might be in port at the time, even though the men were in uniform. The agents of the Holland-American line issued similar instructions, and all the steamship companies prohibited any package being taken on board their ships without its first being opened on the pier for examination.

Washington Officials Silent.

The authorities in Washington requested that the finding of the bombs should not be made public, as it might serve to defeat the ends of justice in warning guilty persons.

Sir Courtenay Bennett, British consul general in New York, admitted that he had received a report of the bombs being secreted on the four steamships, but did not know if any clew had been discovered in Washington or Havre regarding the identity of the offenders.

Mr. Hill said that he was the European representative of an automobile company of Springfield, Mass., and had been in France for the last eight months with the allies.

"The finding of these bombs in the cargoes of the British steamships arriving from New York did not create so much excitement at Havre as it would have under normal conditions," he continued. "The war was brought very near to the French seaport by such incidents as two steamships being torpedoed and sunk within ten miles of the city, where the wrecks lie now, and the continuous arrival of the trains filled with the wounded from the front."

ARMOR LIKE THAT OF CAESAR

Austrians Have Both Back and Breast Plates, Just Like Old Romans.

Reviving the methods of the Roman legions under Julius Caesar, the Austrians are adopting back shields and breastplates. On the Alpine front some of their infantry use a portable steel screen, rectangular in shape, for protection against shrapnel shot and grenade splinters.

A quantity of these have been picked up in front of intrenchments north

Commissioner Gage Says It's Absurd to Widen Street

Claims Right to Participate With Board of Works In All Deliberations That Relate to Particular Question at Issue. Board Meets Tonight.

The Board of Public Works will hold its first meeting since June at the City Hall tonight. Although President Stevenson of the Board announced the meeting this morning, he did not say whether or not the Board would meet as a Paving Board, with Commissioners Mason and Gage present, or in its official capacity as Board of Public Works with only three commissioners. He has said, however, that the question of the paving of South First st. between Rochester st. and Broadway would be taken up at this meeting but offered no suggestion as to the probable action of the Board.

The Board of Public Works, at its last meeting in June, rescinded a resolution made some time previous, to add four feet to the width of First st. when it is paved, but this is no indication that Commissioners Stevenson and Garrett have changed their views on the question, and tonight's meeting, according to those in close touch with the situation, some unexpected action will be taken. In a conversation with a repoter Saturday, Commissioner Stevenson said he was still opposed to paving the street without making it wider, and said he had been urged by many local merchants and business men to stand pat on the question, and that he would so act.

Commissioner Fred Gage of the Paving Board, in a conversation this morning, outlined the objections of himself and his fellow-[illegible] by Messrs. Stevenson and Garrett. Mr. Gage reiterated that the street was wide enough as it now stands and will remain adequate for all traffic for some years to come. He argued that the cost of adding two feet to the street is not justified, and in speaking of the plan to lay sidewalks to the curb on the west side of the street, called the idea absurd, unless the same plan was to be carried out on the east side of the street.

"The Board of Public Works has obtained the consent of the property owneers to pave that street 34 feet wide, and if they wish to pave it 38 feet wide they must obtain the consent of the property owners once more," said Mr. Gage. "I have the opinion of one of the best corporation lawyers in Oswego county on the question of our status on the Board of Public Works, as commissioners for paving, and he contends that Mr. Mason and myself have a voice in all proceedings which have to do with this paving work, and that a majority of votes, in other words, three votes, is necessary to pass any resolution. The Board of Public Works can take no action if we haven't been notified of the meeting."

FRANK JEWEL RAYMOND COMES TO SPEAK BEFORE RETAIL TRADE DIVISION

The Retail Trade Division of the Chamber of Commerce announced this morning that Frank Jewel Raymond, Manager Industrial Department of the National Retail Dry Goods Association, would speak Wednesday evening, August 11th, at the City Hall. Mr. Raymond comes to this city with an unbroken record of successful engagement with the largest retail establishments in the Unitede Staees. He has also spoken before the Trenton Chamber of Commerce, Utica Chamber of Commerce and the Boston Chamber of Commerce and many other llarge commercial organizations. Mr. Raymond's talk, "Making Good in Business," contains much pracaical material for merchants and their employees.

A sub-committee of the Division of Retail Trade consisting of W. H. Patterson, Leland Dann and Irving Galusha was appointed last Friday to secure the co-operation and attendance of the business men of Fulton on August 11th. The retail trade division is offering to its members of the Chamber and the business men of Fulton an unusual opportunity and it is hoped to be that many of them will make use of it.

CHAUTAUQUA WEEK

TODAY'S PROGRAM

Morning—Lecture, "Old Foes Under New Faces," Dr. Keenan.
Admission 25 cents, children 15 cents.

Afternoon—Musical prelude with ginger in it, by Christine Giles-Bingham Concert Company.
Address, "A Vision of a Larger Life," by J. S. Knox.
Admission 35 cents, children 15 cents.

Evening—Devoted to a very high grade of fun, by Christine Giles-Bingham Concert Company.
Admission 35 cents, children 15 cents.
Entertainment, by Ralph Bingham of Philadelphia, one of the greatest humorists, a joy night festival.
Admission 50 cents, children 25 cents.

GIRL, CRAZED BY FEAR, TRIED TO HURL HERSELF OVER BRIDGE RAILING

Crazed because she thought her little cousin, Lester Closs, aged 7, had been drowned, Edith Perrigo, 14 years old, daughter of Mr. and Mrs. William Perrigo, of 723 Erie st., attempted to commit suicide late yesterday afternoon, by jumping from the lower bridge into the Oswego river. The water in the stream was very low, and the fall would have considerably injured if it did not kill the girl, who was prevented from taking the leap by William Crahan and Henry Carlin, two passers-by, who noticed her wild glances and divined her intentions just as she mounted the railing of the bridge.

When they reached her, Edith became hysterical and fought her rescuers madly in an attempt to escape. Patrolman Smith was called and the combined efforts of the three meen were required to hold the girl, who struggled so fiercely that almost all of her clothing was torn to shreds. She was placed in an automobile and taken to the city jail, where she was detained until the arrival of Dr. Terpening and Dr. Joy, after which she was removed to her home. The heat and the unsanitary condition of the cell had the effect of increasing thegirl's terror and she was delirious and, at times, unconscious, before the doctors arrived.

Lester Closs, her little cousin, was playing along the bank of the barge canal earlier in the afternoon, when he fell from a barge into thirty feet of water. His outcries attracted the attention of some men in the vicinity who pulled him out and took him home. Edith was under the ipression that he had been drowned and that his body had not been recovered and when Carlin and Crahan grabbed her she begged them to let her leap into the stream to get the boy's body, although the lad fell into the stearm several yards below the bridge. The little boy was soon revived and is none the worse for his experience this morning, while Edith is also reported as improving.

Sideswiped Car; Racer Kept On Going; Third Accident

For the third time in two weeks the west river road north of the city was the scene of an automobile accident Saturday night, when a racing roadster headed towards this city side-swiped a car said to be owned by an Oswego man and tore the spokes out of the left wheel of the Oswego car as well as smashing a fender and causing other damage.

The accident occurred near the home of Frank Cusack, and the crash came about 12 o'clock. Both cars were maintaining a high rate of speed, and the driver of the north bound car claimed the lights on the other machine blinded him. He did not turn out far enough and the south bound machine hit his left front wheel. The occupants of both cars wereb adly shaken up but no one was seriously injureda.

"Jedge" Lindsey Says Boys Are Not Really Bad; Need Teaching

Tonight's Chautauqua Program Should Eclipse Saturday's Offerings Which Included the Speaker Who Never Countenanced "Snitching" on the Other Fellows.

Judge Lindsey, who lectured at the Chataqua tent on Saturday, Miss Ridgeway, who gave readings to the evening gathering, and the union services on Sunday morning increased Fulton's appetite for more Chautauqua—a Chautauqua for next yeear. The question of a 1916 Chautauqua in Fulton has evidently been settled, and has become a certainty, as the number of persons necessary to complete the Chautauqua Association are enrolled, and the good work will go on.

Judge Lindsey was heard with appreciation as any one with the least interest in human life could not have heard him without interest. He told many of his experiences as "Judge" in which mirth and pathos were mixed. The "kids jedge," says boys are not really bad; they just don't understand. The law of the gang is as real and and sacred and binding to them as our national law. The law that prevents one kid "snitching" on another of his pals is sacred from his point of view. To help the kids to understand by getting at the cause instead of doctoring the effect is the theory of the Judge. He is a strong advocate of giving kids a "square deal" in their pleasures. He is not at all in sympathy with a city which spends thousands yearly in splashing fountains beneath which nude little iron kiddies stand and then arrest flesh and blood boys for bathing in the nude in a pond of water, forbidden territory, by the side of the railroad. Yet this is what Denver did and the Judge woke up the city, shocked it so to speak, by inviting a horde of little street gamins to a public bath beneath the fountains in the city's court yard one afternoon. The people were shocked, according to the Judge's statements, but it is evident that as true western people are they "got a hunch" as to what was wrong and the lesson did not have to be repeated. The city today has a number of public bathing spots and properly supervised at that.

"Society creates through its ignorance the evils in society and then tries to wipe them out by building jails and prisons," said Judge Lindsey.

"Some day as a nation we shall wake up and there will be schools for spiritual development," he continued, "and then the day when

(Continued on Page Four)

WILLING HANDS SIGNED PETITION FOR HOLDING A SPECIAL ELECTION

The petition asking the Common Council to call a special meeting on the question of commission form of government was filed with the City Clerk last Saturday. It bore the signatures of 470 voters, or more than 20 per cent of the votes cast for Governor in 1914. When the Common Council meets tomorrow night the petition will be presented to them and they will beasked to comply with the provisions of the optional city government law and set a day in September for the holding of the special election. The law provides that this day shall not be less than one month, nor more than two months after the filing of the petition.

Although the law requires the petition to bear only ten per cent of the number of votes cast at the general election preceding the presentation of the petition. More than 20 per cent of the number were actually secured with very little effort. There were 2269 votes cast in 1914. A petition of 227 signatures woulld have been sufficient, instead of that petition bears 470 signatures and there are outstanding on petitions which were reeeived too late for filing between fifteen and fifty per cent.

Opinions

Keeps the Oath.

The proposal was made in the constitutional convention by an Oswego delegate to eliminate from the oath prescribed for public officials the statement that in seeking election they had not resorted to bribery. The Oswego man argued that the oath offended the dignity of the officer, and did not prevent any one from bribing, and made liars of those who did.

The delegate must have seen some highly sensitive office holders, if they were sensitive about taking this oath. Moreover, it would be very difficult to prove that the oath is useless. It is a solemn oath which may have caused many a man to be more careful about conforming with the law. The convention did well in retaining the oath.—Utica Observer.

Room for Young Men.

Theodore N. Vail, who at the age of 70 years is yet hale and hearty, and attends to his duties as president of the American Telegraph and Telephone company, is an ardent believer in young men who make their way to the front in the large matters of the world, on the strength of their own merit and efficiency.

It is the belief of Mr. Vail that the opportunities for young men were never so large as now. Obviously, he considers that a man of his own age should not relinquish work, as he himself still "stays in the game." But he is a sticker forg enuine worth in young men, and this is the way he puts it:

"The young man who is willing to work and has ability and a good education is the one who is going ahead. There was a time when, because a person was the son of an old friend or had influence, he would be given a good position and boosted along. That day is past. Too much is involved in big business to have its affairs retarded because of a friendship. It has been discovered that one cannot run a business under the present high pressure by favoritism or nepotism. I don't mean that young men with friends are not given chances, but I say they have to make good or get out."

This is a tactful way of saying that, while influence may be useful in giving a young man a footing and an opportunity to demonstrate his ability, dependence for advancement and success must be upon thoroughness and intrinsic merit if the greater heights are to be attained, concludes the Democrat and Chronicle. But young men, because of their youth, are no longer barred from the race.—Lyons Republican.

A LOT OF BLUSTER

There are always a few people in every community who need to know more about the conduct of their municipal government, but how many of them ever take the trouble to look into things they see going on before their noses. It is true that if they see something they do not like, or think they see something, which amounts to about the same thing, they proceed to become like the fellow who changes his mind about the tarriff question: They usually convince themselves that everybody should know all about their change of mind and they accordingly make enough noise to be heard in the township. But why soft pedal?

It is the same with the fellow whose shoe begins to pinch—the fellow who has to face the fact that the people are arming themselves for protection; that they are at last aroused to the necessity of injecting into their government a little of the real democracy by making the control of public officers and public offices within their own power.

In this connection a pamphlet issued by the National Short Ballot organization says:

"The first-thought objection to the commission-manager plan is that it is undemocratic in making its most important single official appointive instead of 'directly responsible to the people by election.' Democracy, however, consists in controlling public officers—not necessarily in electing them—and the most effective way for the people to get a firm grip on the neck of the city manager is by sending a group of citizens down to city hall to see what the manager is doing, with power to fire him and get another any day of the week if he is unsatisfactory or insubordinate."

The above in a nutshell is what the Fulton Chamber of Commerce wants to do for the people of this city, at least for those who evince enough interest in public affairs as to make them noisy when something displeases them.

The Commission-Manager form of government is sweeping the country. Its devotees are the "common people," if you please, and not the silk stocking variety of aristocracy. It is not the product of a class of men who want to retain their power so that they may profit in one way or another—if not exactly financially, then by their political prestige.

Commission-Manager form of government is designed to give the people a business-like way of conducting a big business—a city government! it is designed to eliminate waste and inefficiency by electing and appointing to office men who are trained for the purpose of giving true value, or who by experience in private business are equipped to serve the taxpayers' interests.

The situation in Fulton is just this: When the Chamber of Commerce was organized a series of questions were asked, and a majority of the replies indicated a desire to have the present form of government changed to the Commission-Manager form, which is American in its true sense, because its plan embodies all that is recognized in Big Business as the proper way to conduct any enterprise. Big Business is American because it is with us and will stay with us. The people of Fulton have made the noise; they have indicated their preference, and any opposition that may develop to their will comes from a source that sees in real democracy in Commission-Manager government an attempt to abridge their rights.

If the people of Fulton need a plainer object lesson of the power of a handful of men over a majority let them observe the condition of First st. between Rochester st. and Broadway. Surely the condition of that city street is not the result of a Chamber of Commerce plan, but it is tshe outcome of unsalaried individuals who are termed the representatives of the people, by whose "sacred right to vote" they were elected to do the people's bidding.

What are children? * * * Flowers! They are the flowers of the invisible world; indestructible, self-perpetuating flowers, each with a multitude of angels and evil spirits underneath its leaves, toiling and wrestling for dominion over it.

Blossoms! They are the blossoms of another world, whose fruitage is angels and archangels. Or dewdrops! They are dewdrops that have their source, not in the chambers of the earth, nor among the vapors of the sky, which the next breath of wind or the next flash of sunshine may dry up forever, but among the everlasting fountains and inexhaustible reservoirs of mercy and love.—Youngstown Vindicator.

A QUESTION ANSWERED

As a listener to Mrs. Bjorkman's speech at the bank corner Saturday evning, I heard the question asked by a man, "Does equal suffrage mean that my wife must rub elbows with bad women?" which immediately brought forth the question by a lady at my elbow, "How about the bad men?" which, coupled with Mrs. Bjorkman's remarks, aptly answers the same.

But, me thinks, the gentleman should study his Bible and especially the following chapters: John 8; chapters 1 to 11; verses; Matt. 13, 29 to 30, Matt. 5th, 43 to 47; Matt. 23rd, 23 to 28, inclusive, and he will find the answer direct from the fountain of all truth, and me thinks, he may after reading the above mentioned chapters be able to see there is none without sin, and if such a condition should exist in any man or woman, they should be translated like Elijah of old.

A LISTENER.

Is It Worth While?

Is it worth while that we jostle a brother
Bearing his load on the rough road of life?
Is it worth while that we jest at each other
In blackness of heart—that we war to the knife?
God pity us in our pitiful strife.

God pity us all as we jostle each other;
God pardon us all for the triumphs we feel
When a fellow goes down; poor heart-broken brother,
Pierced to the heart; words are keener than steel,
And mightier far for woe or for weal.

Were it not well in this brief little journey,
On over the isthmus, down into the tide,
That we give him a fish instead of a serpent
Ere folding the hands to be and abide
For ever and aye in dust at his side.

Look at the roses saluting each other;
Look at the herds all at peace on the plain,
Man, and man only, makes war on his brother,
And dotes in his heart on his peril and pain—
Shamed by the brutes that go down on the plain.

—Joaquin Miller.

"COFFIN NAILS" ORDERED FOR ARMIES OF THE ALLIES.

400,000,000 Cigarettes Must Be Delivered by Sept. 1.

The allies have signed a contract with a large American manufacturing firm for 400,000,000 "coffin nails." They are not metal nails to tack up coffins with, however, but are the good old "coffin nails" of the text books on physiology, the same old "coffin nails" dear Aunt Maria warns small Billy about.

The 400,000,000 cigarettes are to be delivered to the allies on or before Sept. 1. The order will keep the factory handling it busy night and day, it is stated. In order to get the "smokes" completed on time the factory will have to turn out cigarettes at the rate of 10,000,000 a day, or about 7,000 for every minute of the day, which is "goin' some," every man who "rolls his own" will admit.

If the allies smoke the cigarettes at the rate of manufacture, a cloud of smoke forty feet high should engulf the German empire, statisticians figure out.

Four hundred million cigarettes would form a tobacco bridge covering the Bug river from bank to bank from source to mouth. The "papers" used would carpet Europe as with a white pall. If laid end to end those 400,000,000 cigarettes would stretch from Paris to Berlin and from Berlin to Paris nineteen times.

TO END COUNTERFEITING.

Prisoner Offers to Make Money Safe In Return For Liberty.

If the claims of Peter Feldkamp, now a prisoner in the Wayne county (Mich.) jail under a seventeen year sentence to Fort Leavenworth for counterfeiting, are correct, he may be the means of revolutionizing the entire issue of United States paper money.

Feldkamp wrote to Secretary of the Treasury McAdoo offering in exchange for his liberty and a job with the treasury department a chemical secret he had discovered which, according to him, will make counterfeiting impossible.

Feldkamp is a photographer and an amateur chemist of no slight attainments. While experimenting in raising one dollar bills to ten dollar ones he stumbled on his process, which since his arrest, he asserts, he has perfected.

Feldkamp's process so colors the bill that it cannot be bleached and thus halts evildoers from making even the paper. Even with the paper they would still be up against a stone wall, unable to duplicate his tint.

That the Washington authorities are taking Feldkamp's assertions seriously is shown by the fact that James Sloan, head of the treasury department at Detroit, has been instructed to interview Feldkamp.

Percentage of Boats Sunk.

Out of almost 20,000 vessels which had entered or left the port of Liverpool since the German submarine blockade began only twenty-nine were sunk by German submarines. These figures were given in a speech at Liverpool by Sir A. Norman Hill, secretary of the Liverpool Steamship Owners' association.

$10,000,000 A MONTH IS SENT TO BELGIUM.

Whereas Edward J. Williams, the treasurer who disbursed the funds to meet the cost of the construction of the Panama canal, paid out $2,000,000 per month on the average during the years 1905-13, he, as assistant treasurer of the commission for relief in Belgium, has been distributing $10,000,000 per month since the German occupation became effective, says the Chicago Christian Advocate. The economy with which this fund has been administered by the commission and its splendid system of distributing food, regularly, promptly and economically, suggests to William B. Parker, the official historian of the commission, that we have here a practical illustration of how successful collective marketing for an entire nation may be.

Expert Advice for the Automobile Owner

Queries and Replies Covering Matters of Importance to the Man Who Runs a Car

Where would you consider the proper place for a gasoline tank?

This depends on conditions. There are advantages in every location. If placed under the cowl the gasoline can flow by gravity to the carburetor, yet the carburetor does not need to be placed as low as when the tank is under the seat. By locating the carburetor higher, it is more accessible and the intake pipe is shortened, giving better carburetion. The gasoline is warmed by the heat of the motor so that in cold weather, at least, carburetion is facilitated.

The under seat location of the tank also allows fuel feed by the simple gravity method, but there is danger of the flow stopping when climbing a steep hill. When the tank is being filled the passengers in the front must be disturbed.

Putting the tank at the rear utilises otherwise waste space and allows the space under the front seat and under the cowl to be used for other purposes. There is a slight objection to this location, however, because the gasoline must be fed to the carburetor either by pressure or the vacuum system. This means a slight amount of complication, but it is not serious, as is indicated by the fact that the majority of cars now in use one or the other of these systems.

A very large percentage of the cars put on the market in the past year or two use the vacuum system of fuel feed in which the main gasoline tank is located at the rear of the car, while a small auxiliary tank is placed on the dash, usually inside the hood, to give gravity feed to the carburetor.

On a level road or slight ascent my car runs well, but on steeper grades it misses, chokes and back fires. I had new rings put in and the compression seems good. What is the cause?

From the information given it would appear that the gasoline line between the carburetor and the tank is slightly clogged. The gasoline flows through rapidly enough to feed the car under conditions obtained on the level road or on a slight ascent, but on steeper grades the feed is not fast enough to do the work. If you remove the pipe connecting the tank and carburetor and clean thoroughly it will probably end the trouble.

My car will not hold compression very well. I put in two new rings, and I think they do not fit well enough as yet, as the car has only been run about thirty miles since. The compression was fairly good with the old rings, but I thought I could improve it with new ones. Is there any way to make them fit more tightly by using grinding compound?

In order to get the new rings to fit well at once they should be lapped in by means of a grinding compound. The cylinder is put on a bench and the piston worked out and in with a sort of irregular turning movement similar to that given in grinding a valve. This work can be done by an amateur, but should not be attempted without first having observed carefully how it is done, because it is easy to spoil the piston and cylinder by unequal abrasion. The probabilities are that the new ring will wear in and the compression will be tighter after you have run another two or three hundred miles, and altogether it would probably be better for you to wait and see that this does not happen unless you can get the services of an expert in lapping in the ring.

When the spark on my car is retarded it misses considerably. Is this a sign that the magneto is weak?

No. Retard and advance simply refer to time of spark occurrence. The spark is just as strong on retard as it is on advance. When the spark is retarded it means that it occurs when the piston is going downward, and when it is advanced it occurs when the piston has not yet reached dead center.

Should the valve spring be a stiff one under small compression or a nimble spring under heavy compression to give best results?

The stiffness of the spring will be found only by experiment. As the piston descends it creates a vacuum in the cylinder, thus allowing the pressure of the atmosphere to open the valve. If the piston suction is poor, then the difference in pressure between the bottom and the top of the valve will not be so great, and hence the valve will have a tendency to remain shut. However, if a piston has good suction the valve will open without difficulty. You will have to try your particular motor and valves in order to get the best results.

Please explain the proper way of overhauling a car.

In good repair shops and service stations the entire car is disassembled, the parts inspected, worn ones replaced and the car then reassembled. However, it is often found that certain parts do not require attention. For example, the repair man may find that the differential and gearset are in good shape and will not go to the trouble of taking them apart.

Zinc and Platinum.

Zinc expands most of any metal under the influence of heat and platinum least.

Another Chance

A Monstrous Tide.

The bay of Fundy forms a cul-de-sac at which the Atlantic ocean seems to have taken a special spite and at regular intervals pours into it an enormous amount of water. Take the harbor of St. John as an illustration of what this mighty tide must be. In most parts of the world a tide of ten feet is considered something abnormal, but at St. John it rises twenty to twenty-four feet in good weather. In stormy weather the monotony is varied by the high water mark being pushed up even ten or fifteen feet higher.

GOSSIP

"MISS BROWN," says Miss Dizzle to Miss Mary Jones, "is naught but a package of loose fitting bones." "Miss Jones," says Miss Dizzle, "is terribly fat; she's naught but a gossiping, silly old cat." They gossip (Miss Dizzle, Miss Jones and Miss Brown) and choice information goes floating 'round town. They analyze people and, first thing you know, the embers of jealousy kindle and grow. Some soul starts a rumor and in a short time it spreads like a tumor and eateth like lime. Miss Jones keeps on talking and then wonders why the people all give her the icicle eye. Miss Brown goes out calling on Thursday each week and then comes home bawling 'cause neighbors won't speak. Miss Dizzle's offended 'cause some one has said, "There's nothing but troublesome thoughts in her head." Talk swells like a bubble and flows like a stream; it causes the trouble of pickles and cream. The talkative neighbor is sure a disgrace, as much out of place as a fly on your face. They won't let off talking, yet can't understand why people don't give them the fellowship hand. If people would stifle their wigwagging talk the neighborly spirit would win in a walk. If people would keep all they knew to themselves these choice bits of gossip would die on the shelves. But gossip's a habit that just sticks around; it flies like a rabbit escaping a hound. It's just like an endless and double linked chain—it travels the route and it comes back again. If scandalous gossip comes floating to you forget all about it and hide it from view.

Capital of an automobile factory jumped from $2,000,000 to $100,000,000. The auto plays a great part in peace and in war, too, nowadays.

Her Safety Not His Business.

"This safety movement is a great thing, but what good does it do to try to be a missionary to some of these women?" commented a citizen on a High street car. His pessimistic view was the result of a rebuff he had just received from an elderly woman, who, alighting from the car in the usual feminine way, with her face to the rear of the car, was informed by the "missionary" that she should have faced the other way in order to avoid an accident.

"I'm attending to my business. You attend to your own," retorted the woman. "Thanks for 'safety first,'" said the man sadly.—Columbus Dispatch.

His Trouble.

"How are you getting on with your golf?"

"Not very well."

"What's the trouble?"

"I'm not able to get off often enough to get on."—Detroit Free Press.

Rainbow Trout.

The rainbow trout is bluish above, silvery or golden below, more or less spotted with black on the body and fins and with an orange or red lateral band. It is doubtless for this varicoloring that it receives its name. It is more hardy than the English trout and accommodates itself to almost stagnant waters and has thus proved a success in many ponds which were regarded as fit for coarse fish only. In many places, however, it has caused disappointment by going down to the sea and never returning.—Philadelphia Press.

Meaning of Cemetery.

It is not correct to say that "cemetery" means the "city of the dead." The word is from the Greek "koimeterion," meaning sleeping place, not the place of the dead. There is nothing in the etymology of the word to warrant us in thinking that it was originally intended to convey the idea that the departed were really dead any more than there is in the old Hebrew term for cemetery, "bethaim," the house of the living.—Exchange.

War is upsetting the dictionary, and one new definition of defeat is "retirement for strategic reasons."

DRAMATISTS FIND FIELD FOR TALENTS

FAMOUS AUTHORS NOW WRITE DRAMAS FOR FILM COMPANIES.

W. H. OSBORNE THE LATEST.

Scion of Prominent Family and Noted Author Writes Great Serial for Pathe.

William Hamilton Osborne, author of the new serial "Neal of the Navy", is the latest of the modern popular authors to enlist in the moving picture line. He has already written five hundred short stories in the past thirteen years, and is also the author of several best selling novels, "The Red Mouse", "The Catspaw", "The Blue Buckle" and "The Running Fight." He never really attempted to write moving pictures straight

William Hamilton Osborne.

off—or on—the reel, until he tackled "Neal of the Navy," for Pathe. Mr. Osborne was attracted to the Navy as a fine background for a story of adventure, and for a year past he has been delving not only into the characteristics of the navy itself as an institution, but also into the records of the Secret Service, so far as the same were obtainable. He has coupled this authentic knowledge to his own imagination and is turning out a series, which, while it pictures the United States Navy from all its advantageous standpoints, also involves an exciting novel story of adventure in the toils of which the hero is constantly finding himself baffled. The heroine is a modern young girl whose ancestry is shrouded in mystery, but whose fortunes are bound up with an unusual trio of adventurers who are constantly under the surveillance of the government. Lillian Lorraine is featured as the heroine and Wm. Courtleigh, Jr., as the hero. The series is being produced by Balboa for Pathe, and will begin to appear on the screens in September. Permits for the taking of the naval pictures have already been obtained from the authorities at Washington.

Navy in His Family.

Both Navy and Army figure largely in the family of Mr. Osborne. The late Secretary of the Navy, George M. Robeson, now deceased, was one of his ancestors, and an uncle of Osborne's has, until his recent retirement, been an official in the Navy for many years. His great grandfather was quartermaster-general of the State of New Jersey. Another uncle was the youngest commissioned officer in the Federal army in the Civil War, Capt. Ellis Hamilton, killed at Bull Run, at the age of 18.

William Hamilton Osborne comes of an illustrious ancestry—his great grandfather and granduncle — two William Penningtons, were both Governors of the State of New Jersey and one of them at one time Speaker of the House of Representatives at Washington. Another ancestor was Chancellor Halstead of New Jersey.

His grandfather was a well known editor, and his father an old time lawyer of New York and New Jersey. He was born in Newark, N. J. and has always lived there. Mrs. William Hamilton Osborne is a well known clubwoman of Newark, being corresponding secretary of the Contemporary of N. J., the largest woman's club in the world.

FILM VERSIONS OF NOVELS.

It is probable that within the near future one will be able to see his favorite novel, whatever it is, in pictures. It has been well known for some time that Pathe has been in the market buying right and left the picture rights of famous novels and plays that seem to be best adapted for motion pictures. Among them are numbered: "The Beloved Vagabond" and "Simon, the Jester," by William J. Locke; "The Galloper," by Richard Harding Davis; "Via Wireless," by Paul Armstrong and Winchell Smith; "Comrade John," by Henry Kitchell Webster and Samuel Merwin; "The Closing Net," by H. C. Rowland; "Nedra," by George Barr McCutcheon; "The New Adventures of Wallingford," by George Randolph Chester; "The Weavers," by Gilbert Parker; "Mary's Lamb," by Richard Carle.

PITH AND POINT.

European nations are finding war is easier to start than to stop.

The first thing a young man learns at college is how little his parents know.

Many a girl, when she marries, loses a good friend and gets a boarder—who grumbles.

An ounce of prevention is worth a pound of cure, and then it costs so much less.

Europe's great war in some of its aspects strangely resembles an American political deadlock.

By the time Europe gets through the manufacturers of antiques will find their occupation gone.

The trouble seems to be that lots of times when a man makes up his mind he doesn't use good material.

The dove of peace and the olive branch have been replaced by the airship and the long range gun.

The small boy who sits on the bank after his first summer swim learns too late the disadvantages of a place in the sun.

If San Marino and Monaco should ever lock horns a half dozen portholes would give them an ample supply of trenches.

The country has been warned of the approach of the seventeen year locusts. Fortunately it doesn't take them that long to transact business.

The American Bible society has issued 6,370,405 copies of the Bible during the last year, but then Europe's been too busy of late to read them.

Drawing the Line.

Mrs. de Fashion—My dear, I have picked out a husband for you. Miss de Fashion—Very well, but I want to say right now, mother, that when it comes to buying the wedding dress I am going to select the materials myself, so there!—New York Weekly.

There Are Lots of Them.

Hokus—Old Gotrox is devoted to music. There is a clause in his will leaving $25,000 to establish a home for poor singers. Pokus — How inadequate! Twenty-five millions wouldn't begin to house all the poor singers.—Life.

Good Reason.

"So you have written a book on cemented basements. But why did you choose such a subject?"

"Because I wanted it to be among the best cellars."—Baltimore American.

Knowledge is power, but it won't take the place of gasoline.—Kansas City Journal.

STAGE STARS FALL FOR CAMERA'S LURE

CHANGE FROM "MOVIE" TO "PHOTODRAMA" BRINGS MANY INTO NEW FIELD.

THE SCREEN'S WIDE SCOPE

Plays Presented in Photo Form Overcome Limitations of Spoken Drama —Pathe Announces Conversions.

It was only a short time ago as time is reckoned, since the stars of the stage spurned the advances of the motion picture manufacturers. Considering the "movies," as they contemptuously termed the film drama, as a cheap and entirely ephemeral form of amusement they considered acting in them as beneath their dignity and preferred thirty week contracts at $200, to fifty-two weeks playing in pictures at larger figures. Today what a difference. One by one, at first apologetically, but now boldly to the sound of figurative trumpets, the great names of the stage have gone over to the "silent drama."

Bruce McRae.

Here is a list of popular stage favorites recently secured by Pathe, which illustrates the trend:

Rhys Alexander, Edwin Arden, Richard Carle, William Courtleigh, Jr., Clifton Crawford, Arnold Daly, Lionel Barrymore, Frederic de Belleville, Katherine Brown-Decker, William Elliott, Max Figman, Wm. Riley Hatch, Gail Kane, Sheldon Lewis, Lillian Lorraine, Fania Marinoff, Bruce McRae, Bliss Milford, Lolita Robertson, Jessie Ralph, and Melville Stewart.

Just one of those famous names attached to a photoplay two years ago would have made a sensation and yet the house of Pathe calmly announces now that other big stars will be signed in the near future!

SIRES AND SONS.

Mayor William H. Thompson of Chicago is a total abstainer.

W. H. Winans fills four public offices in Cleveland. He is twenty-six.

C. C. Herron of Philadelphia has completed twenty-five years in rescue mission work.

W. M. Smith has spent thirty-five years as a typesetter for the St. Louis Post-Dispatch.

The Hon. Austen Chamberlain, the new British secretary for India, is no tyro in public business and is regarded as a fine administrator. In 1902 he was postmaster general and afterward became chancellor of the exchequer.

Colonel Rogers Birnie, who recently retired as senior colonel of the ordnance department of the army, having reached the age limit, is one of the foremost ordnance experts in this country. He is a native of Maryland and entered the army in 1872.

General Carlo Caneva, commander in chief of the Italian forces in the field, is a man tried in battle in the war with Turkey. His is the highest rank in the Italian army. He is seventy years of age and was on the retired list until the war threat loomed on the horizon.

The Jitney Bus.

At least the bus of that name has lived long enough to make the jitney famous.—Chicago News.

So far as is known, with all her troubles, Europe doesn't have to grapple with a jitney bus problem. — Detroit Journal.

One thing the jitney certainly has done—it has enabled the street car motormen to see a prospective passenger sooner than formerly.—Dallas News.

With the coining of the word "jitneur" to denominate the driver of the jitney bus there should no longer be any curbing the demand that this vehicle must go.—New York Post.

Current Comment.

America is now the richest of nations. Can we keep our peace and our ducats?—Louisville Courier-Journal.

A rise in the price of beef used to be accompanied by an interesting explanation. Now it simply takes place. —Washington Star.

Almost any man with personal magnetism, some guns and a few boxes of soda crackers can get up a revolution in Mexico.—Los Angeles Express.

The crank is capable of much worse mischief than the criminal, and the pity of it is that he should be so much harder to detect.—Philadelphia Ledger.

Mirrors to Protect Vault.

In constructing a vault in the basement of one of the Los Angeles banks a plan was followed which makes the six sides of the chamber visible to a watchman and eliminates all chances of its being entered by tunneling beneath it. It is set on concrete columns in the middle of a white tiled pit which is brightly illuminated. To make it possible to command a view of the space beneath the vault from the level above mirrors have been arranged on the floor at such an angle that every part of the space is reflected in them. Light is reflected by the white walls so that the top of the vault is illuminated and easily inspected.—Popular Mechanics.

SYRACUSE MOOSE EFFORTS FAIL

The local Red Men swamped the Moose of Syracuse under an avalanche of base hits at the Fair grounds yesterday afternoon and the final tally stood 13-7 in favor of the Fulton team. One of the largest crowds of the season attended the game, and a fair sprinkling of the fans came down from Syracuse with the Moose players, who made the trip by automobile.

Painter and Gaughn formed the battery for the locals, and the local twirler had the opposing hitsmiths well under control at all times. He allowed eleven safe bingles, but kept them scattered, whereas Fulton's ten hits came in bunches, especially in the eighth inning when Marquard, the Moose star twirler, was driven to the dug-out. Kiest took up the burden at that point and fared better. Burkhardt and Brady did the receiving, and Brady was the star for the Syracuse nine.

F. Brown, the local third sacker, and Bill Ingamells shared the fielding honors for Fulton. Ingamells pulled several spectacular catches in left field, and Brown knocked down everything that came down the third base line. Dingle and Cook umpired.

"JEDGE" LINDSEY SAYS BOYS ARE NOT REALLY BAD

(Continued from Page One)

boys will no longer run away from school, but if he be found playing "hookey" is will be to get away from home and get to school."

Judge Lindsey's lecture was as much the eye opener in its way as was the lecture on Mormonism by ex Senator Cannon.

Katharine Ridgeway, who was heard Saturday evening, is indeed a master in her work. Not alone were the readings given in a master's own way but the thought itself in the selections chosen left new and stirring thought on war, and peace, and bird conservation, nationalism and various other lines along which a thinking progressive people are working today.

Dr. Keenan was heard Sunday morning, at the union services, and in addition to capable expression on the broader viewpoint in religious life today, it was another splendid demonstration of the community spirit, the get-together-ness, as from the big tent the mingled voices of hundreds rang out in "Faith of our Fathers," and "Onward Christian Soldiers."

John Knox, Business efficiency man, spoke this afternoon and his talk will be reported in tomorrow's issue of this newspaper.

Sideswiped Car; Racer Kept On Going; Third Accident

(Continued from Page One)

Just one week ago Saturday night, a Ford car with six passengers, crashed into a wagon occupied by Tuson Minett and Charles Robellard of the river road. Both men were seriously injured and are still confined to their homes. The car made good its escape before the injured men could get the license number.

The next evening, Charles Bothwell, of Oswego, ran down a man named Wilbur, causing injuries which resulted in Wilbur's death a few hours later. All three accidents occurred within one mile of each other.

TWO REGIMENTS TO HOLD REUNIONS ON SAME DAY

The 110th Regiment, N. Y. V., will hold its annual reunion in Washington Hall, Mexico, Wednesday, Aug. 25th. George H. Lester, of this city, is President of the organization and Henry B. Whitney, of Pulaski, Secretary.

On the same day the veterans of the 147th Regiment, N. Y. V., will hold their annual gathering there and the two organizations will unite to enjoy a dinner to be served by the Woman's Relief Corps. Many old soldiers will no doubt attend, and after business sessions the time will be given up to reminiscences of army life and sociability.

ROXFORD CARVEY ELIGIBLE FOR GAME PROTECTOR

Among the names of men who are protector of Oswego county appears that of Roxford Carvey of 218 North 6th st., this city. The position pays an annual salary of $900.

The Albany announcement gives the candidates' names and percentages won in the civil service examination in the following order:

James H. Dickinson, Constantia, 95.60 per cent.; oJhn F. Hahman, Utica, 90.38 per cent.; Roxford Carvey, 218 North Sixth st., Fulton, 88.23 per cent.

"The best seller," is the expression of merchants handling Black Baking Co.'s products. adv.

BULL MOOSE LEADER WANTS PARTY CONTINUED

The Oswego Times quotes B. Coe Turner as not being in sympathy with the plan of leading Bull Moosers to give up the ghost and go back into the fold. In a statement Saturday Mr. Turner declares his independence and says he will continue to vote for Progressive candidates just as long as they are on the list and stand for party principles. There are about 600 Progressive in Oswego county, according to Mr. Turner's estimate.

In speaking of the withdrawal of several local Progressives from the party, Mr. Turner says it is his belief that their registering under other parties is with the belief that they will be more than ordinary party men and will be booked upon as one carrying a banner. "Only a handful have left the party," Mr. Turner says, and they will not be missed. He expects the Progressives to have a ticket in the field this fall for mayor and in some of the wards will run aldermanic candidates.

"Black's white bread" and Black's cookies have won a place here. They suit the taste. adv

LOCAL FIRM BIDS HIGH ON MINETTO BRIDGE

Bids were opened Saturday at County Superintendent Howard's office in Oswego. Only three tenders were made, as follows:

Larkin & Sangster, Seneca Falls, N. Y., $65,000.

Woolsey Construction Co., Davenport, N. Y., $78,000.

William Mueser of the Concrete Steel Engineering Company of New York, designers and supervisor of construction of the bridge, assisted Superintendent Howard in tabulating the bids.

The bids occasioned much surprise, owing to the variety of the figures.

The Concrete Engineering Company in submitting plans and specifications gave as tentative figures the sum of $69,000, and a later estimate, figuring quantities, was $63,000.

Larkin & Sangster, the lowest bidder, is a well-known firm and has had large barge canalcontracts at Seneca Falls and elsewhere.

Before closing the afternoon's proceedings it was decided to take no further action until Wednesday afternoon, August 4.

OPENING GUN LOADED WITH BLANK CARTRIDGES

Secretary Heydecker, of the Chamber of Commerce, in speaking of the political campaign for commission government, which bids fair to be one of the most interesting and warmly contested in some years, vetured the opinion that the "Opening Gun" announcements written by the anti-commission government element thus far have been loaded with blank cartridges. Mr. Heydecker said he could discern no real argument or ground for one in any of the statements made by the opposition.

RAILWAY OFFICIALS HERE TO STOP TRACK WALKING

In line with efforts being made in other places to stop track walking, the New York Central may send to this city its special officer who will endeavor to abolish the dangerous practice at this point. Hundreds of persons trespass on railroad property each day here and when the officer comes arrests may be made.

It is a misdemeanor to trespass on the tracks of a railroad, as provided for in chapter 481, section 83, of the consolidated laws of 1910.

Community Notes

PICNIC EXCELLED ALL OTHERS IN THE PAST

At both masses yesterday, Father John Lindsman of the Church of the Immaculate Conception thanked the parishioners for their support and presence at the annualp icnic of the church Saturday, which was the most successful in the annals of the affair. Nearly one thousand people were on the grounds Saturday afternoon when the program of athletic sports was run off, and some twoh undred people enjoyed a bountiful dinner served by the ladies of the church. All the booths did a thriving business and the committee expects to realize a neat sum when all the reports have been handed in.

REBEKAHS TO PICNIC AT SOUTH GRANBY

Mrs. Ralph Brown extends to the members of Nehasane Lodge, Order of Rebekah, and the friends of members, a most cordial invitation to call at her home in South Granby tomorrow. The occasion is a picnic and a consequent good time is assured. Those who propose to take the trip should leave the D. & L. station on the 10:30 a. m. train.

BYRON D. READ.

Byron D. Read, 83, died today at his home, No. 1019 Emery street. He was born in Adams Center but had lived in this section for thirty-four years as a retired farmer.

Mr. Read is survived by three sons, Delevan J., and Delatus B., both of this city, and Delton C., of Seattle. Thef uneral arrangements have not been made, but they will be in charge of the Masonic lodge of which Mr. Read was an old member.

MRS. BUET PETLINE.

Mrs. Buet Petline, 26, died this morning at her home, No. 215 Vorhees st., after a short illness. Besides her husband, she is survived by one child. Thef uneral will be held Tuesday morning at 9:30 o'clock at the Church of the Immaculate Conception. Burial will be made at St. Mary's cemetery.

Black Baking Company time in Fulton is at all times. Your grocer sells the goods. adv

NICHOLAS BROWER.

Nicholas Brower, one of the oldest lawyers in northern New York, died Saturday at his daughter's home in Pulaski. He was in his ninety-third year and has been enjoying comparatively good health.

Mr. Brower was born in New York city, February 1, 1823, and settled in Hannibal in 1859. He was educated in the schools of New York, studied law with Weston Brothers of that city, and was admitted to the bar in 1847. Mr. Brower went to Forestville, N. Y., in 1856, forming a partnership with E. S. Spencer. In 1859 Mr. Brower went to Hannibal, this county, and remained there in the practice of his profession, until about twenty years ago, when he retired and has since made his home with Mrs. Hinman in Hannibal and Pulaski.

Decedent's great-grandfather was Adolphus Brewer, who resided at Hackensack, N. J. His grandfather was a captain in the Revolutionary army and lived at Fishkill, N. Y., where Nicholas' father was born. Mr. Brower married Miss Ledursky Jenks, daughter of Colonel Perry A. Jenks, of Erie county. Two children, Clarence B. Brower, editor of the Hannibal News, and Mrs. B. N. Minman of Pulaski, survive, together with six grandchildren and four great-grandchildren.

Mr. Brower was a charter member of the Masonic lodge at Hannibal.

WILLIAM MOSIER

William Mosier, 72, one of Hannibal-town's oldest residents, died Friday evening. Surviving are his wife and one brother, Samuel Mosier, of Kansas City, Mo. Funeral services will be tomorrow. There will be a prayer at the house at 1:30 o'clock. Service at the M. E. church at 2:30 o'clock, Rev. F. W. Dunning officiating. There will be a ritual service at the grave by the Hannibal Center Grange, of which the decedent was a member. The grange will assemble at the hall at 2 o'clock.

To Rent—Rooms in Waldhorn block. Offices and living rooms. tf

ALBANY GOSSIP DAY BY DAY

Chronicle of Events and a Forecast of What is Doing in Officialdom—Special Correspondence.

By Frederic T. Cardoze

ALBANY, August 2.—That a general idea of the work of the Constitutional Convention may be known and that the impression that the delegates have done little than to gather at the Capitol each day there is a session to remain an hour or two and then adjourn, may be corrected, a brief digest of what has been accomplished to date is of interest. It is true that the committees have thus far performed theg reater part of the work of the Convention. The length and intensity of committee meetings have in some instances been a severe strain upon th members and more than one heated argument has arisen which has all but caused animosity.

There have been, 689 proposed amendments to the Constitution introduced by delegates, the majority of which has never progressed beyond the committee rooms, although practically all of them have been considered according to their importance. Standing committees of the Convention have presented 18 additional propositions, while 40 proposed amendments have been favorably reported by standing committees. Two proposals have been in some instances been a sevre strain defeated and not a single proposition has been passed by the committee of the whole, which action means that the subject so dealt with will be submitted to the people this fall, or possibly later in the event that the work of the delegates is not concluded their deliberations on time for when once this composite committee has passed a proposition it goes to third reading or the order of final passage and almost invariably is approved.

It has been because the standing committees have been patiently active that the work of the Convention proper has been held up. There has been no waste of time, in that there have been no propositions before the delegates of late on the order of final passage. Amendments have been frequent after a proposed amendment has been favorably reported from a committee and this procedure naturally results in a temporary setback for the proposition.

On practically every night of the week there have been committee hearings of late. Some of these meetings havel asted into the early morning. This illustrates that there has been no play and that the delegates are quite sensible of their duty.

For a fortnight various committees have been favorably reporting proposed amendments to the Constitution which are of the utmost importance. The conservation situation has been threshed out in committee, but only after a bitter fight resulting in three minority reports. The amendment desired by Delegate-at-Large Charles H. Young of Westchester county, to the effect that after a certain period ending in 1918, those who cannot read or write shall be restricted from voting, is now on the general orders calendar as is the proposition advocated by the committee on Education that every city shall have a board of education, which board shall determine the amount and direct expenditure of all funds used for public education within its jurisdiction.

Other important proposed amendments which are waiting the action of the Convention proper are:

That the education of children shall be a statef unction and that no powers in derogation thereof shall be conferred upon local authorities; increasing the terms of governor to four years and making the executive ineligible to succeed himself and increasing his salary to $10,000; making the public service commissioners Constitutional bodies.

Unsettled weather tonight and Tuesday and cooler; probably rain.

EVERETT BISHOP'S CAR IN ACCIDENT YESTERDAY

It was reported this morning that a car owned and driven by Everett Bishop, who conducts a blacksmith shop on West First st., met with an accident near Auburn yesterday afternoon and turned turtle, throwing out Mr. Bishop, Fred Howell of Hannibal st. and other passengers, whose names were not learned.

Attempts to get Mr. Bishop to verify the report this morning were unavailable, although the party who answered the telephone at the Howell home, admitted that Mr. Howell had been hurt. The car is said to have been badly damaged.

N. Y. C. APPLE PACKING TRAIN CHANGE OF TIME

The New York Central announces a change in time of the departure from this point of the apple packing train to be operated in co-operation with the State Department of Agriculture. The train is due in this city on August 5th.

At ther equest of a large number of fruit growers in the vicinity of Oswego a special stop will be made at that place, the meeting to be held from 2:00 to 4:30 in the afternoon. The meeting schedule for Fulton at this time will be held in the morning from 8:30 to 11:00, instead of from 1:30 to 4:00 as originally scheduled.

Fulton Keynotes

The Ladies' Aid society of the Zion Episcopal church will hold a silver tea and business meeting tomorrow afternoon at the home of Mrs. H. Huggins, 219 Erie st.

* * *

Mr. and Mrs. E. A. Raymond and daughter, Eva, and Miss Eva Palmer will camp for the month of August along the Oswego river at Hinmanville. The party will occupy the Dun bar cottage, and Mr. Raymond will commute to business in this city.

* * *

Mrs. Thomas Newton and children are visiting relatives in Parish and Mexico.

* * *

Miss Winifred Bogue of First st. is visiting Miss Minnie Day, of Oneida for a few days.

* * *

Donald O'Brien has returned from a sojourn at Old Forge, and reports the resort booming.

* * *

Mr. and Mrs. Will O'Hare and daughter, Frances, are spending a few days at the summer home of Mr. and Mrs. J. C. O'Brien at Old Forge.

* * *

Mr. and Mrs. Charlees Milvo of Park st. left yesterday for Rome, where they will make their home. Mr. Milvo, who was formerly the manager of the Onyx, will succeed to his father's business in Rome.

* * *

K. Richard Harrison, confidential secretary for F. G. Spencer, will leave this week for his home in New York city, where he will resume his former position with H. W. Johns-Manville company.

* * *

Mrs. Harley Simons of the Chase road, is ill. She is more than 70 years old and grave fears are entertained for her recovery. Her daughters, Mrs. Palmer Hubbard and Mrs. James White are in constant attendance upon the mother.

CLAIMS MUST BE FILED SOON

Attorney General Gives Until May, 1916 for Those Whose Lands Have Been Appropriated for Canal Purposes.

ALBANY, August 2.—Land owners, whose claims against the state for the appropriation of their properties for barge caal purposes were outlawed by the expiration of the two-year period in which claimants are required to present their demands, are given another year in which to file such claims, under an enactment of the recent Legislature. This law extends to May 14, 1916, the time in which outlawed claims may be filed with the Court of Claims. Failure to take advantage of its provisions will mean absolute loss to such claimants.

Anson Getman, deputy in charge of the title bureau of the Attorney-General's office, on behalf of Attorney-General Egburt E. Woodbury, announced today that such claimants will thus have their day in court. His department is now engaged in determining the titles in claims cases aggregating over $50,000,000.

The lands which have been appropriated by the state and to which the titles are being examined are located principally in these counties:

Albany, Bronx, Cayuga, Clinton, Erie, Herkimer, Kings, Monroe, Montgomery, New York, Niagara, Oneida, Onondaga, Ontario, Orleans, Oswego, Queens, Rensselaer, Saratoga, Schenectady, Schuyler, Seneca, Tompkins, Warren, Washington and Wayne.

Attorney-General Woodbury purposes to expedite the trial and settlement of the $50,000,000 of claims against the state, to hasten the approval of the titles to the properties involved and to aid the property owners whose land has been taken over by the state in obtaining the reimbursement to which they are entitled at the earliest possible time. To quicken the work of approving the titles in these cases, Deputy Attorney-General Getman ha reconstructed the title bureau and proposes to detail to the counties where there is an accumulation of title work, examiners who will devote their entire time to the task, and to otherwise clear up the objections in connection with titles already examined and which await final approval. At the present time there are approximately 1,200 titles ready for examination and nearly 1,000 titles examined but not approved because defective.

In keeping with this plan to expedite the settlement of claims against the state, Attorney-General Woodbury has placed Deputy Attorney-General Carery D. Davie in charge of the trial work before the Court of Claims. Co-operating with the title department and the court, the claims bureau over which Judge Davie exercises supervision is speeding up the work of disposing of claims.

An embarrassing situation confronted the new administration on January 1 in connection with the payment of state claims, due to the fact that thef unds provided for the barge canal project were so nearly exhausted as to be insufficient to pay these claims and carry on the construction work then under way or under contract.

As a result Chapter 269 of the laws of this year was enacted to meet the contingency. This law provides for the assignments against the state and contracts entered into between land owners and the state to savings banks. These banks were authorized to invest the funds in the judgments and contracts in question. The assignment of funds in the judgments and contracts is now being handled by the title bureau and by this means various claimants are being reimbursed for the properties taken over by the state. The savings banks will hold these judgments until such time as the state is in a position to pay them off.

POWER BOATS CRUISED TO THREE RIVER POINT

The power boats Iona, Captain W. B. Painter, and Romono, Captain G. Fred Gillard, cruised to Three River Point yesterday with several guests. Those present were Cort Duttin, Tom Hopkins, John Frawley, E. Rugg, James Gordon, James Mehegan and William Smith. The party enjoyed dinner at Three River and returned to this city late last night. Captains Painter and Gillard have planned a cruise to Thousand Islands late this month.

ON YOUR MILEAGE

According to the new ruling made by the New York Central mileage exchange tickets are no longer issued. Previously a person owning a mileage book could get a ticket and have mileage equivalent to it torn from the book. Thus husband and wife, for instance, might travel in opposite directions upon the same mileage book. The advantage of this, in this section, of the state off the main line, was that a mileage exchange ticket might be secured at the rate of two cents a mile, which meant a considerable saving to one traveling a long distance.

Despite the prediction made some time ago, the road has no immediate intention of selling the 500-mile mileage books again. It is admitted that not nearly as mony books have been sold since the ruling was made that only 1,000 mile books would henceforth be sold, but nevertheless the short books will not be reinstated. Especially at the locall station has there been a great falling off in the sale of milegae books. It is stated that there are even many traveling men who are using tickets now.

DOCTORS HERE NOT CHARGED WITH NEGLIGENCE

In many cities and towns of northern and central New York the several District Attorneys are investigating charges made that physicians violate the laws, by failure to register birth certificates. Laxity of physicians in this respect has been called to the attention of the officials higher up. The failure of doctors to place on record all births is a criminal offense.

Inquiry has developed the information that doctors in this vicinity are faithfully complying with the law which says that they must file within five days the certificate of birth; it has been in force since 1914 and is being rigidly enforced everywhere. The leter received by Mr. Clark came from the director of the Division of Vital Statistics, State Department of Health. The doctors whose names Mrr. Clark has been given will be warrned that a penalty will be imposed in case of their failure to live up to the law.

HOBOES GIVEN TEN DAYS IN JAIL BY JUDGE WILSON

Five cases of intoxication were on the Police Court calendar this morning. All of the arrests were made Saturday night, and Judge Wilson will dispose of them today.

In court Saturday, Frank Ingersoll, who was arrested Friday by Motor-Policeman Brown, was fined $10. Ingersoll was driving his car down So. First st. at a 35 mile clip, when he was arrested and before Judge Wilson he entered a plea of guilty. He was charged with reckless driving.

Four hoboes, who were arrested Thursday night as they were rding in an Ontario and Western freight car, were given ten days in the Oswego jail Saturday. F. W. Richardson, of the company, appeared against the men, and at first, it was believed they were implicated in the robbing of a freight car at Norwich.

CHAUFFEURS' EXAMINATIONS TO BE HELD THURSDAY

Fultonians who have no licenses to drive automobiles are advised to go to Oswego Thursday and take the drivers' examination which will be given under the supervision of a State Inspector at the County Court House.

ATTORNEY JENNINGS GETS HIS DISCHARGE

An order was filed Saturday in the office of the County Clerk discharging A. T. Jennings of this city as a member of a commission to handle the affairs of Archibald Davy, mentally deficient.

THE QUIRK.

The offering today is another of those fine Mutual Masterpictures, "The Outlaw's Revenge." In the Dawn of a New Republic, in four complete parts. Two other reels of interest and excellent quality are also being shown. Tomorrow another of this splendid grade entitled, "Ghosts," in five parts, from the pen of Henrik Ibsen, featuring Henry Walthall and Thomas Jefferson. Paramount travel series No. 11 and others. Don't miss these Mutual Masterpictures. There is none better.

An Easy, Pleasant Laxative

One or two Dr. King's New Life Pills with a tumbler of water at night. No bad, nauseating taste; no belching gas. Go right to bed. Wake up in the morning, enjoy a free, easy bowel movement, and feel fine all day. Dr. King's New Life Pills are sold by all Druggists, 36 in an original package, for 25c. Get a bottle today—enjoy this easy, pleasant laxative.

COFFIN PLATE WAS REMOVED

Inspector Went to Becker Home and Removes Offending Inscription—Mrs. Becker Protests

NEW YORK, Aug. 2.—Astounded that Mrs. Charles Becker would have an inscription put upon her husband's coffin accusing Governor Whitman of "murder," Francis Martin, District Attorney of the Bronx, yesterday took summary action and caused the silver plate to be removed. Inspector Joseph A. Faurot, head of the Detective Bureau at Police Headquarters, and Acting Captain Andrew E. Wines, of the Fifth district in the Bronx, went to the Beeckere home late in the afternoon and after slight demurrer from Mrs. Becker, Inspector Faurot himself removed the plate.

The accusing silver scroll now lies in a vault in Police Headquarters, and it is believed that the incident is closed, although District Attorney Martin said that if Governor Whitman were so disposed he might make endless trouble for Mrs. Becker and every one who had a hand in the making of the silver plate, the engraver, the man who placed it on the coffin, and Mrs. Becker primarily. It was said, however, that it was hardly likely the Governor would consider the matter further, but would be generous enough to waive it accepting it as the result of the overwrought condition of Mrs. Becker's mind after her long and persistent fight to save her husband.

District Attorney Martin explained his attitude in the matter by saying that while he had full sympathy for Mrs. Becker, he could not permit the Governor of the state to be criminally libelled in such a manner.

Te removal of the startling plate came as the result of presure upon the Becker family, not only from the public prosecutor and the police, but from the clergy of the Church of St. Nicholas of Tolentine. As soon as the priests learned yesterday that the accusing plate was upon the coffin, they went to the Becker family and said firmly but considerately that the coffin would not be permitted to come into the church with such an inscription upon it.

It was announced, moreover, that in such circumstances a solemn requiem mass could not be sung and that the executed policeman would be accorded only a low mass, which could be said just as easily, if the body were taken direct to the cemetery and not brought to the church.

EVENING TIMES FEATURES

We will begin shortly the daily publication of

Easy and Practical Home Dressmaking Lessons

Prepared Especially for Readers of

The Evening Times

by

The Pictorial Review Company

of New York City

And in addition, each issue will contain

Beautiful Half Tone Illustrations of the Latest Ideas in the Art of Correct Dressing for All Occasions

These two features are designed to please and benefit the women readers of this Newspaper and are EXCLUSIVE.

The advertising value of the features is that Fulton Merchants will benefit, as the Patterns are sold in the leading stores of the city.

The Prosperity Dawning Upon Fulton is Reflected in the Amount of Increased Advertising Space Used by Merchants in

THE EVENING TIMES

The why and the wherefore of this lies in the recognition of a fact—that Success comes in "cans" and not in "can'ts," and our advertisers know that The Evening Times has in stock a big supply of "cans."

CRITICS OF NAVY CALLED UNFAIR

Expert Points to Advance Made in Recent Years.

PRAISES SECRETARY DANIELS

Five First Class Battleships, Each Costing About $14,000,000, Authorized in Last Three Years—Other Units Increased in Proportion—Enlistment Up to Limit.

By E. K. RODEN, Director of the Navy League.

So much unfair criticism of the navy department in general, and of the secretary of the navy in particular, has appeared in the press lately as to almost prejudice public opinion in regard to the efficiency and homogeneity of our naval defense. One writer and public speaker after the other is taking their turn in assailing Secretary Daniels and his administration of the navy. If these attacks were made in good faith they would be pardonable, but as a matter of fact the attacks are for political effect rather than from any real understanding of naval conditions.

Representative Gardner of Massachusetts, who seems to have assumed the leading role in the attacks made on what is termed "naval inefficiency," is about as capable a judge of naval affairs as is the man in the street. Yet, if statements made by Mr. Gardner concerning the navy were true, the million dollars of the taxpayers' money spent during the last fifteen years on the upbuilding and maintenance of our navy would be so much money thrown to the winds.

Fortunately such is not the case. Any person of ordinary intelligence who will take the trouble in looking over the statistics of the navy will find that the expenditures made on our naval defense have been money wisely spent indeed. From a small beginning with the white squadron upon lines similar with other maritime nations, the United States has advanced so rapidly in naval construction as to have overtaken and passed all but the two leading naval powers of the world, and today our navy, which for many years was considered by European and even by South American nations as altogether unworthy of consideration, is recognized as a factor of tremendous significance in the international affairs of the world.

It is only fair that credit be given where credit is due. The navy should not be made the object of partisan jugglery at any time and least of all at the present time.

Five First Class Battleships.

Perhaps the most noteworthy accomplishment of recent years is the authorized construction of five first class battleships, to cost about $14,000,000 each. The addition of other units to the navy has been in the same proportion. At the present time there are under construction twenty-three destroyers, thirty-eight submarines, three gunboats and seven auxiliaries. The production of supplies of munitions for the increased size of the navy has kept pace with requirements. Thus the increase in number of mines on hand and in process of manufacture is 244 per cent and in torpedoes 90 per cent. The powder factory at Indian Head has been enlarged, so that when the extension now under way is completed its capacity will be nearly doubled.

The critics of the navy lament the utter unpreparedness of our fighting units and its lack of battle efficiency, due, they claim, to lack of practice. But they do not know that during the last fifteen months more battleships and destroyers have participated in tactical maneuvers for a longer period of time than ever before in the history of the service. The critics may not be aware of the fact that under the direction of Admiral Fletcher, upon plans evolved at the naval war college and approved by the department, the fleet has been busied in tactics to try out its efficiency and readiness. All reports tell of the enthusiasm of officers and men in this practice and the splendid record made by the ships.

Enlistment Up to Limit.

Again, so far as the enlisted personnel of the navy is concerned, for the first time in years is the enlistment up to the limit prescribed by law, and this has been accomplished, not by lowering the standard of admission to the service, but by making the service more attractive to the young men of the country.

It will not be amiss to state that to Secretary Daniels belongs the credit and honor of having carried into effect evolutions that have placed the naval service upon a footing it never had before. I refer to the new system of promotion, by which capable enlisted men are given chances to advance in the service. This system, notwithstanding the opposition it has met with in some quarters, is bound to work about a transformation in the personnel of the navy. It will substitute for the careless, rollicking seaman of former days an entirely new type of man-of-warsman—active, alert, intelligent and educated, respecting himself and respected by his officers, well paid, well fed and well clothed, surrounded by comforts of which the seafaring man of a score or more years ago knew nothing, with the certainty of rapid advancement in rate and pay if he is faithful and industrious and with a possibility of promotion to the rank of commissioned officer.
